Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape (arrived in meeting at 4:39 p.m.) Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilman Brownie W. Newman

CONTINUATION OF A PUBLIC HEARING TO CONSIDER ADOPTION OF THE MASTER PLAN AND REZONING FOR THE PROJECT IDENTIFIED AS HORIZONS, LOCATED AT 136, 176 AND 180 MERRIMON AVENUE AND 17 AND 23 ELOISE STREET FROM HIGHWAY BUSINESS DISTRICT, COMMUNITY BUSINESS I DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO URBAN VILLAGE DISTRICT

Mayor Bellamy explained that this public hearing (which was originally scheduled on January 15, 2008) was continued to this date. The following letter dated July 3, 2008, was received from Mr. Marty Kocot, PE, from Land Design: "The ownership group (Foster Shriner, Chris Peterson, and Cam Pace) representing the proposed "Horizons" Urban Village project on Merrimon Avenue have asked me to formally make request for a three month extension on the Urban Village rezoning currently in progress. This request has become necessary due to the recent economic conditions. The ownership group is currently exhausting opportunities to secure financing and/or additional partners to help with the project economics."

When Mayor Bellamy asked for public comments, no one spoke.

Councilwoman Jones moved to continue the public hearing to October 28, 2008, to consider adoption of the Master Plan and rezoning for the project identified as Horizons, located at 136, 176 and 180 Merrimon Avenue and 17 and 23 Eloise Street from Highway Business District, Community Business I District and RS-8 Residential Single-Family High Density District to Urban Village District for a mixed use development. This motion was seconded by Vice-Mayor Davis and carried unanimously.

WORKSESSION MEETING TIME

Mayor Bellamy initiated discussion regarding the change of the worksession time from 5:00 p.m. to 3:00 p.m. She said we have been starting worksessions for the last few months at 3:00 p.m. and was following up to see if that time was satisfactory to Council members.

Councilwoman Jones felt this item should be revised when all of Council is present.

Upon inquiry of Councilman Mumpower, City Manager Jackson said that worksessions in general are helpful and productive for staff. He said that staff at worksessions largely consist of executive staff that are on salary. In general, the 3:00 p.m. worksession time is convenient for staff, but they would be happy to adjust their schedules per Council's direction.

Mayor Bellamy asked that this time be calendared for discussion in 60-90 days and until such time as a change is made, the worksessions will remain at 3:00 p.m.

PACK SQUARE CONSERVANCY UPDATE

Ms. Carol King, Chair of the Pack Square Conservancy, updated Council on the cost estimates for Pack Square Park from 2004-2008. In 2004, based on the final design, the

Conservancy's new project managers from Hanscomb, Faithful & Gould carry out a detailed cost estimate for the park and determine that it will cost approximately $10.5 Million to build. Early in 2005, lead landscape architect Fred Bonci presents the 100% design development drawings to the Conservancy's Board of Trustees. The plans are approved. Based on the final design development drawings, and material cost increases over the preceding year, project managers from Hanscomb, Faithful & Gould boost the construction estimates to $12.5 Million. Material costs continue to escalate over the course of 2005 and in November, the project managers raise the construction estimate to $15.1 Million. The Conservancy makes several modifications in the park to control costs. The water feature in mid-park is simplified and made much smaller, the planned pavers for Spruce Street are eliminated, and plans are developed for the street to be paved with concrete. In 2006, the costs for construction materials continue to escalate. Two primary causes are hurricane relief on the Gulf Coast and massive construction projects abroad, particularly in China. In 2007, the Conservancy becomes increasingly concerned about cost estimates for the park and decides to hire an independent professional estimator to determine what costs will be base don new material prices. After a month-long study, the estimator sets the cost estimate for the park improvements phase at $8.1 Million, including factors for inflation and cost escalation. The Board approves a new project construction budget of $20,002,864. In September of 2007, the Conservancy puts the all-encompassing park improvements contract out to bid. The winning bid, from Valley Crest Landscape Development, is $7,254,700, which is slightly under the 2007 estimate for that phase of construction. Material costs continue to rise, with the added burden of skyrocketing gasoline prices. The Conservancy revisits the plan for the park pavilion and makes several material modifications to reduce the cost of the building. The Board of Trustees approves a pavilion budget of not more than $2.4 Million. In July, the Conservancy begins construction on the Pack Square Park with assurance that its 2007 cost estimates, including contingencies, will cover construction of the park improvements. She then highlighted the Pack Square Park timelines from 1999 to present.

Ms. King showed and explained pictures of (1) the Roger McGuire Green with water feature, performance stage and entry court; (2) the Reuter Terrace with pavilion and observation point; and (3) a viewscape of the named features in Pack Square Park.

Mr. Charles Russell, CPA, reviewed the Conservancy's accountant's review report and financial statements for the year ended December 31, 2007; budget vs. actual figures at December 31, 2007; Conservancy's balance sheet as of March 31, 2008; budget vs. actual figures as of March 31, 2008; and profit and loss from January – March, 2008.

Ms. King then reviewed the Conservancy's fundraising effort. She said the Conservancy needs to raise close to $5 Million to complete construction of the Pack Square Park and another $1.5 Million to complete initial funding for the endowment. Ms. Cary Owen and Mr. Larry McDevitt are working to obtain a number of lead and major gifts by the end of 2008 and in 2009 the Conservancy will carry out a public phase of the campaign. She noted that two important naming opportunities remain in the park for gifts of at least $500,000. She reviewed a chart showing 6% ($300,000) of gifts in kind; 10% ($500,000) for the public phase; 24% ($1.2 Million) for the major gift phase; and 60% ($3 Million) of the lead gift phase, for a total of $5 Million. Ms. King then briefly reviewed the fundraising report as of July 7, 2008.

Ms. King then reviewed the timeline for the Park. She said that completion of the park is scheduled for September 2009. Construction in Pack Square is part of the park improvements phase and is expected to begin by August 18 and should be completed by the end of March 2009, weather permitting. Once it is complete and the work approved, Pack Square will be turned over to the City. The pavilion will be built under a separate contract. The contractor, Beverly-Grant Inc., has requested a building permit and construction should begin in late summer or early fall of 2008. The pavilion is expected to take 10 months to build and completion is expected in June or July of 2009. She then reviewed some specifics on the pavilion.

Ms. King then reviewed various communications including City Council representation and City staff participation.

Mr. Kelly Miller, member of the Pack Square Conservancy, outlined the ongoing communication efforts and the importance of City participation at all levels.

Ms. King and Mr. Miller responded to various questions/comments from Councilman Davis, some being, but are not limited to: how large is the endowment and is it largely for capital improvements; will there be an advisory committee with major stakeholders to answer questions, such as long-term maintenance, operations, programming, security, etc.; how will the programming of the Park take place; and is there an opportunity for Buncombe County to contribute to programming for the Park.

Mayor Bellamy duly noted Councilman Mumpower's personal request that when packets of information are provided to Council, that they be delivered to Council through the normal courier fashion, even if the information is provided on-line.

Upon inquiry of Councilman Mumpower regarding delays, Ms. King said some of the biggest hurdles were (1) the Conservancy developing alternative designs if a private developer were to build on a piece of land in the center of the Park for a mixed-use building; (2) the N.C. Dept. of Transportation contract; and (3) fundraising was inhibited by the controversy related by the Parkside Condominiums.

When Councilman Mumpower asked what Council and the citizens can do to help the Conservancy's efforts, Ms. King replied (1) emotional support; (2) a financial contribution; and (3) for Council to do the best they can with the Parkside Condominium project.

Councilwoman Jones noted that, as seen by this presentation, the Conservancy has a clean bill of financial health.

Mayor Bellamy thanked the Conservancy for agreeing to send their minutes (and quarterly financial reports) to the City Clerk for distribution to the City Council. She was also pleased that Ms. King and City Manager Jackson have worked out a management agreement about how the construction will move forward.

On behalf of Council, Mayor Bellamy thanked the Conservancy for their hard work on this big project, especially since change in Asheville is never easy. She feels the public, in general, is satisfied with the direction of the Park. She did note that it would be difficult this year for any financial support. She was pleased with the increased communication between the City and the Conservancy and also noted the Conservancy's willingness to work with the Parade Committee.

CITIZENS POLICE OVERSIGHT COMMITTEE

Vice-Mayor Davis said that this item was reviewed by Council on January 15, 2008, and briefly reiterated the highlights from the report on the current process for Internal Affairs and other avenues that are in place to ensure the accountability of the Asheville Police Department employees. He said the request arose from citizens in the community who wanted a Police Oversight Committee. The Public Safety Committee met with the existing Citizens-Police Advisory Committee to see how they could offer a better conduit for communication and strengthening in the complaint process. Since the existing members' terms were to expire soon, the outgoing members presented Council with the following insights for Council's consideration before empanelling a new Citizens-Police Advisory Committee. As defined in the resolution establishing said Committee (Resolution No. 94-186), they feel the "Committee (1) has outlived its original purpose; (2) is constrained by a large, unwieldy committee structure resulting in sporadic attendance by a majority of committee members; (3) has become redundant in light of other active and competing committees; and (4) needs a clearly defined purpose if it is to function

into the future." They believe that Asheville needs a citizens-police panel and are hopeful that the facilitated planning process under consideration by the Police Department to address community-police relationships will lead to a clearly defined role for a new Citizens-Police Advisory Committee. They wanted to affirm that, if asked, they would be willing to participate in the planning process and to serve the City of Asheville and its Police Department in any other capacity. "Our respect continues to grow for Chief Hogan, his officers and staff, and we will continue to support them. We are proud of our Police Department and applaud their extraordinary efforts and accomplishments." This letter was signed by Tim Flora, Davidson Jones, Ed Taylor and Mary Ann LaMantia. He said that the newly established Committee will strengthen those communications, as we continue on our way to being one of the safest cities.

Police Chief Hogan assured Council that the Asheville Police Department has made great strides in improving the complaint process. He said that complaints are taken very seriously, investigations are thorough and corrective disciplinary action is taken, if necessary. He said that there are multiple avenues for people to go if they so choose in terms of a complaint against the Police Department.

Police Chief Hogan responded to various questions/comments from Council, some being, but are not limited to: is downtown a high crime area due to the concentration of population in the daytime and nighttime; and how has the citizen complaint procedure been revamped to make it more user friendly.

In response to Councilman Mumpower, Vice-Mayor Davis said that the Public Safety Committee will schedule on their agenda again (with adequate notice) a meeting with advocates of a Police Oversight Committee.

Mayor Bellamy felt the Police Department has been transparent on the procedures for anyone who interacts with police officers. She reiterated the following information from the January 15, 2008, report regarding internal investigations: "It is the APD's policy to investigate all reports of employee misconduct, including anonymous complaints. The Office of Professional Standards is responsible for coordinating such investigations. Complaints can be made to the on-duty supervisor 24 hours a day to the Office of Professional Standards during weekday business hours, or via the City's website, where a complaint form is downloadable." Regarding claims of violations of Constitutional Rights, "When a private citizen believes his or her constitutional rights have been violated by a police officer, the citizen has the following resources:

Municipal

1. File a complaint with the APD's Professional Standards Division (Internal Affairs).
2. File a civil claim for money damages with the City's Risk Management Division.

State

1. File complaint with the N.C. Attorney General.
2. Contact a civil attorney and file a lawsuit in state court.

Federal

1. File a complaint with the federal government (http://www.usccr.gov/filing/flndx.htm) U.S. Department of Justice or the local office of the Federal Bureau of Investigation (FBI)
2. Contact a civil attorney and file a 42 U.S. 1983 lawsuit in federal court."

Councilman Russell commended the Police Chief on (1) their beat patrol; (2) the downward trend of violent crime in the downtown area; and (3) their efforts in educating people to secure their belongings in the trunk of their cars, especially when parking in public places.

Mayor Bellamy clarified that City Council cannot handle any personnel matters in open session that pertain to employees, except for the City Manager, City Attorney and City Clerk. If anyone has personnel issues with any other staff members, they must contact the City Manager.

The public can contact Council; however, they will only direct you in the right direction. If there is a complaint with the City Manager, City Attorney or City Clerk, she requested the public set up a meeting with Council so that the matter can be addressed.

SECTION 287 (G) OF THE IMMIGRATION & NATIONALITY ACT PROGRAM

Police Chief William Hogan said that this is in response to a request for the Asheville Police Department (APD) becoming involved in the Immigration & Nationality Act (ICE) 287-G program.

At City Council request, contact was made with Paige Edenfield, Assistant Field Office Director of ICE / Detention and Removal Office. Ms Edenfield is responsible for implementation and management of 287-G programs and ICE Detention and Removal efforts within North Carolina. Ms. Edenfield was asked about the feasibility of APD entering into a 287-G agreement with ICE and if so, would ICE have to maintain direct supervision over APD Officers. Ms. Edenfield responded that even if APD was interested in entering into a 287-G agreement, that ICE would not authorize it. ICE has learned that the jail module of 287-G is the most efficient way to implement 287-G and that field investigations conducted by municipal law enforcement are not nearly as effective. It is mandatory that an ICE Agent maintain direct supervision over trained 287-G Officers and ICE does not currently have the staff to increase the 287-G program.

Ms. Edenfield continued that Henderson County is now the operational hub in Western North Carolina for ICE Detention and Removal. Nine Henderson County Detention Deputies have been trained by ICE to screen individuals entering the Henderson County Detention Center on criminal charges and determine their immigration status. Those that have active deportation orders or other ICE warrants are held and transported to Atlanta for deportation hearings. Ms. Edenfield said that Buncombe County had applied for and been considered for the 287-G Jail Module program, but that Buncombe County did not have the available jail space to qualify for the program. ICE also did not have the available staff to directly supervise a Buncombe County program. Buncombe County will participate in a pilot program that will allow Detention Center staff to access the ICE database and check for ICE deportation orders or criminal warrants on individuals brought to the detention center on other criminal charges. APD has worked recently with the Buncombe County Sheriffs Department and City-County Identification Bureau to implement a program where all individuals entering the Buncombe County Detention Center on criminal charges are fingerprinted and photographed. This was done to eliminate the increasing number of individuals using false names to evade criminal prosecution and to quickly identify fugitives and other wanted persons.

APD continues to participate with ICE in human trafficking cases where individuals are trafficked throughout our region as part of prostitution enterprises or enslaved for other work. APD has received training and has initiated three cases where young women were rescued from prostitution houses and where enslaved workers were rescued from Mexican "coyotes" who were transporting the workers through Asheville. In all these cases, the criminally responsible parties were prosecuted in federal court and imprisoned and / or deported. There have also been cases where APD Interstate Criminal Enforcement Officers have stopped suspected human traffickers and ICE assistance was requested, but unavailable. In these cases, APD Officers document the involved parties, photograph the individuals and vehicles, and send that documentation to ICE for intelligence purposes.

APD also cooperates with ICE in drug trafficking cases through the DEA Task Force. Individuals who are charged and prosecuted as part of federal drug trafficking investigations are imprisoned and then deported for their felony crimes.

In cooperation with the District Attorney's Office, APD has been assisting on Obstruction of Justice and Identity Theft cases where individuals who are in the United States illegally, use false names to evade criminal prosecution. The District Attorney's Office has used a full-time

intern to assist in identifying people who continually come through the court system using a number of false names. After resolving the name issue and determining the correct name, an APD Detective then charges the person with Identity Theft, if the name or names used were that of a real person or Obstruction of Justice if the name or names used were not of a real person and used to evade criminal prosecution. Both charges are felonies and result in the person serving time in prison and subsequently being deported. This program has been very effective in reducing the number of Latino individuals using false names to escape criminal prosecution.

APD works cooperatively with ICE on issues of criminal activity, identity theft, and endangerment. At this point in time, ICE is unable to expand its involvement with municipal law enforcement into field investigations due to limited ICE staffing and the emphasis on the successful 287-G Jail Module. With Henderson County being the approved and active 287-G site, APD would not be considered as a 287-G program.

Vice-Mayor Davis said that the Public Safety Committee had some representation from the Latino community. He said there are numerous good legal immigrants in this area and there were people at that meeting advocating that group as well.

Police Chief Hogan responded to various questions/comments from Councilman Mumpower, some being, but are not limited to: what kind of direct supervision is Henderson County receiving; how many primary drug distributors that are illegal aliens has the Police Department connected to the ICE program; if we catch three illegal aliens in drug trafficking, does ICE become involved; what instances does ICE become involved; and does the Police Chief have plans to work more closely with Henderson County with the ICE 287 (g) program.

There was discussion regarding the City's efforts on E-Verify system. Vice-Mayor Davis said that a congressional representative met with Chamber of Commerce members so they could learn more about the E-Verify system. He suspected there will be other opportunities to do educational outreaches and would be open to hear comments on whether this should be done on a municipal government level. Councilman Mumpower felt that since the City has E-Verify information on its website, that that it be made more accessible for the public to access.

There was considerable discussion, initiated by Councilman Mumpower, about what type of verification do we use for our own employees, contractors and subcontractors. He felt we should not use taxpayer dollars to subsidize illegal immigrants in that statistically in North Carolina estimates vary from 40-70% of the people who do not speak English are illegal immigrants. He felt the City should be a model on this issue of immigration.

Mayor Bellamy said that the City should see how we can partner with Congressman Shuler's effort regarding the E-Verify system on the federal level.

City Manager Jackson said that we do require employees to verify their citizenship. If the question is whether or not we should require contractors and subcontractors to provide us with a list of employees and we manually go through and verify each and every employee, that would probably need more discussion. What we are doing now, with the guidance of the City Attorney's Office, is that every contractor is required to meet all state and federal laws regarding purchasing, sexual harassment, Americans with Disabilities Act, etc. We would investigate any unusual circumstances brought to our attention, but we do not have the administration in place to go in and audit each and every contract or subcontract and itemize compliance with each and every law of state and federal government. To do that would be a discussion with the Chief Financial Officer regarding the cost of the resources associated with that.

At this time (4:39 p.m.), Councilwoman Cape arrived at the meeting.

At the request of Councilman Mumpower, City Manager Jackson said that he would provide Council with a memorandum in 1-2 weeks on what we currently do to verify conformance

7

with the state and federal laws, how we verify our employment, and how participating in the E-Verify system would impact the City.

Councilman Mumpower asked that this discussion be followed up in another worksession if new information is brought forward from the City Manager's memorandum. In response to Councilwoman Jones, Mayor Bellamy said that if a Council member requests an item be on the agenda, it is placed on an agenda. At Mayor Bellamy's request, City Attorney Oast said that there is a provision in the Council's rules whereby reconsideration of an item can be prevented for up to six months. He read, from Council's rules, "The motion is in order immediately following the defeat of a substantive motion and at no other time. The motion requires, for adoption, a vote equal to two-thirds of the actual membership of the council, excluding the mayor, unless he or she may vote in all cases, and vacant seats." Mayor Bellamy said that unless there is a motion to not place this item back on the agenda for six months, she will honor the request by Councilman Mumpower.

Regarding Councilman Mumpower's request to send a resolution to our state and federal representatives requesting that they begin enforcing existing laws and grant local authorities greater enforcement support and flexibility, Mayor Bellamy said that this was done on the federal level. Councilman Mumpower said that he will bring this back up again when discussion occurs on the state legislative program.

Regarding Councilman Mumpower's request that the City Attorney monitor federal and state legislation affecting local government's ability to respond to illegal immigration concerns and make ongoing recommendations on potential initiatives, City Attorney Oast said that he has provided Council with a partial list of legislative actions he is monitoring.

Regarding Councilman Mumpower's request to explore city regulation of day labor agencies by requiring confirmation of citizenship for temporary employment, City Attorney Oast said that our ability to enforce immigration and naturalization laws without enabling authority from the state and federal government are extremely limited.

VETERANS MEMORIAL AT MEMORIAL STADIUM UPDATE

Parks & Recreation Director Roderick Simmons said that upon request of the City Council, staff is providing an update on the development of the Veterans Memorial at Memorial Stadium.

Due to a lack of funding for the entire Memorial Stadium renovation project in the fall of 2007, the City Council agreed with and directed staff to proceed with constructing the Veteran's Memorial component of the project which is funded via a Housing and Urban Development grant of $247,000. The Veteran's Memorial is being designed and implemented within the grant's sum. Any additional elements that enhance this design beyond this basic project are to be designed, funded and implemented through other private fundraising efforts.

The cost of the previous Veteran's Memorial design (as designed within the entire Memorial Stadium project) was in excess of the federal grant funds so the design of the project is being revisited. Site Works Studios designed the original memorial and has been hired to redesign the memorial with Parks, Recreation & Cultural Arts Department staff.

Staff and the consultant have initiated new design work of the Veterans Memorial and preliminary designs are currently being explored as well as associated costs. The alternative design will be brought before the Memorial Stadium Committee that is being newly reformed.

Pending the planning and design process, the project will be constructed by the spring of 2009. He reviewed with Council the design and construction timetable, along with the Veteran's Memorial funding.

8

City staff is providing an update pertaining to the development of the Veterans Memorial at Memorial Stadium and is not making a recommendation for City Council action.

Mr. Simmons responded to Councilwoman Jones when she hoped that we are not spending more money than we've raised in order to incorporate the new design features.

There was discussion, initiated by Councilman Mumpower, about reconstituting the Memorial Stadium Committee soon. He felt that we need a group in place to raise money in that there is a lot more work that needs to be done. When he was chair of the Committee, they made a commitment not to take City dollars but to raise funds by private donations.

Councilwoman Jones wanted to make sure this was in order with all the other projects that we have. She would love the people who care about this issue to become involved, but doesn't want to send a mixed message that this will trump the master planning process but that it will all be looked at as one.

It was the majority consensus of Council that Councilman Mumpower be Chair of the Memorial Stadium Committee and that he provide the Boards/Commissions Committee a list of potential members. They also asked that he update Council as they move forward.

City Manager Jackson said that he will set up a meeting with Councilman Mumpower and appropriate staff in the Parks & Recreation Department to come up with a plan.

REVIEW AND DISCUSSION OF CITY & COUNTY PROPOSALS FOR DEVELOPMENT ON THE SOUTH SIDE OF CITY-COUNTY PLAZA

Mr. Stewart Coleman, representing S.B. Coleman Construction Co., LLC, requested the City grant a temporary construction easement for the construction and/or continuation of Court Plaza – a new street in front of Parkside Condominiums. He showed Council a basic footprint of their plan. He showed the property lines for the property and the new building footprint. He said that Marjorie Street is 14-feet wide. The new Court Plaza would allow the street to continue through in front of the City Hall and preferably exit out onto South Spruce Street. The sidewalks along South Spruce Street and Marjorie Street will be widened. He said the drawing he provided to Council was the drawing from the design architects for the Park. He received it from Buncombe County Manager Greene and Buncombe County Attorney Frue. He said that he attempted to find the drawing in the City's archives but was unable to find it. He was told by Mr. Frue that this was the only drawing that the City Council and County Commissioners ever reviewed, and it was provided to Council by the Pack Square Conservancy. He said it was presented to the Council members on March 23, 2004, and in this original drawing it clearly shows a street. The design architects for the Park recommended the street be implemented even though they did recognize that they did not own the property that the street crossed. When they started designing their building, they took this drawing and implemented their design features into their architectural design to design the building that they are trying to place on this piece of real estate. If they are allowed to use this particular street, it will allow a clear view corridor of the City Hall Building from the Vance Monument (stepping their building back from the north property line of the Park 25-29 feet). The Downtown Commission requested that this street be put in place when they, at one time, reviewed the project and requested retail on the first floor of the building. They agreed it would be very difficult to have retail on the first floor that did not front on a street. The City's Traffic Engineer recommended that the street be one-way traveling west only. He also recommended a loading area so as not to block the street during early morning deliveries. The Fire Department recommended the street for a fire apparatus staging platform in accordance with Appendix D of the Asheville Fire Code. He quoted a statement from the Fire Marshal in the Technical Review Committee's Staff Report as follows: "This required fire lane can be provided on other building sides so its location is up to the designer." He said they have only one option if the street is not approved and that option is to use Marjorie Street as the fire apparatus staging

9

platform and in order to make Marjorie Street qualify, they will be forced to move their building 15 feet north, on their property. That has a tremendous affect on the view corridor in doing so. He said the new street would service the building, the Courthouse, the City Hall and relive the bottleneck presently in existence with the cul-de-sac. They would ultimately give the new street back to the City for their maintenance. The Park has streets surrounding the entire Park and they feel that a review of this nature should be considered.

Mayor Bellamy said that at the last time they had a formal meeting, Council voted to have the City Manager speak with Mr. Coleman to talk about some options for consideration by City Council. Mr. Coleman then requested to speak to Council regarding the options. Since we have heard those options, City Attorney Oast has suggested Council go into closed session before Council asks questions or have a discussion about what was presented.

At 5:16 p.m., Councilwoman Jones moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville; State of North Carolina; Buncombe County; Louise Pack Metcalf; Barbara Pack Holcombe; Michael Lawrence; and Black Dog Realty, LLC. The statutory authorization is contained in N.C.G.S. 143-311(a)(3); and (2) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of contracts for the acquisition of real property by purchase, option, exchange or lease. The location of the property is on Eagle Street. The statutory authorization is contained in G.S. 143-318.11(a)(5). This motion was seconded by Councilman Mumpower and carried unanimously.

At 6:07 p.m., Councilwoman Jones moved to come out of closed session. This motion was seconded by Councilman Russell and carried unanimously.

Mayor Bellamy said that at Council's last formal meeting City Council adopted a resolution asking the City Manager speak with Mr. Coleman about this issue. Mr. Coleman asked that he or his representative have an opportunity to come before Council. Tonight we allowed that to happen and she thanked Mr. Coleman for presenting the alternatives he is seeking as a resolution. She said that this is a worksession where Council gathers information and hears from the staff on issues. City Council would like to reaffirm the resolution previously adopted as City Council strongly believes that Buncombe County should reacquire the public property that they chose to sell. It is the City Council's position that Buncombe County do that. We stand beside our resolution. She did offer as the next step that if there are other alternatives, that include a land swap that we can get behind, we would like that to be a public process – not a long drawn out public process. We want to be open to that, but we do feel like Buncombe County should be the significant driver in this seat and we want to be supportive of Buncombe County re-acquiring the property.

BOARDS & COMMISSIONS

It was the consensus of Council to instruct the City Clerk to prepare the proper paperwork to reappoint Dr. Dean Kahl to the WNC Regional Air Quality Agency. In addition, it was the consensus of Council to explore the possibility of shortening the existing 6-year terms, which would require legislative action.

It was the consensus of Council to (1) readvertise the east vacancy on the Citizens-Police Advisory Committee; (2) appoint Charlie Hume (south); (3) appoint Bob Smith (Central); and (4) interview Ada Volkmer and Angelica Reza Wind for the north vacancy.

There was a brief discussion regarding the next steps regarding the vacancy on the Civil Service Board. It was implied that there would be no appointment made to the vacant seat at this time. Councilman Mumpower said it was anticipated that the litigation would have been resolved

in a timelier manner; however, he felt Council should honor their commitment for Council to meet with staff, the Civil Service Board and representatives from both sides of the equation to have further discussion. City Attorney Oast noted that the reason the litigation is moving slowly is due to the judicial terms and the motion could be heard within the next 10 days. He would notify Council with a hearing date tomorrow. It was the consensus of the majority of Council to postpone any meetings regarding this issue until they get a report from City Attorney Oast.

It was the consensus of Council to ask the Film Commission staff liaison make a recommendation to the Boards & Commissions Committee regarding the future of the Commission and that no interviews or appointments take place until such time as the report is given consideration.

It was the consensus of Council to (1) readvertise vacancies on the Recreation Board; (2) reappoint Scott Barnwell and Geoffrey Ferland; (3) appoint Lonnie Gilliam; (4) interview Wanda Hawthorne; and (5) proceed with the interviews of Betty Young and Davidson Jones.

It was the consensus of Council to instruct the City Clerk to prepare the proper paperwork to reappoint Cindy Weeks, Darryl Hart and Jerome Jones to the Planning & Zoning Commission.

It was the consensus of Council to interview Gregory Sills and Terry Meek for the vacancy on the River District Design Review Committee.

OTHER ITEMS

There was a brief discussion of Councilman Mumpower's request that the City Manager provide him information on how much money the City has spent in Fiscal Year 2007-08 on planning, studies and consulting costs. City Manager Jackson explained that he would be happy to provide that information to Councilman Mumpower; however, he requested Council's consent due to the amount of staff resources it will take to make sure the report is accurate. Mayor Bellamy felt that this request has come about because of a report (which was misquoted by the reporter) which ran recently in the newspaper about the City prioritizing its streets. She emphasized that the Council has been investing in basic City services. When Councilman Mumpower questioned what recourse he had to obtain this information if the majority of Council does not support his request, City Attorney Oast said that anyone can review the Council minutes. City Manager Jackson also noted that he could make a request for available documents and the City would honor that request; however, the document he is requesting does not exist. Councilwoman Cape clarified that when people make a document request, it is not a document request that staff has to fabricate – it's a request for existing documents. Mayor Bellamy also suggested a review of the Minority Business Report which covers all contracts. Councilman Russell supported Councilman Mumpower's request regarding consulting costs.

RESOLUTION NO. 08-154 – RESOLUTION OPPOSING THE PROPOSED STATE OF NORTH CAROLINA HOUSE BILL 2499, DROUGHT/WATER MANAGEMENT RECOMMENDATIONS

City Attorney Oast said that there has been some legislation proposed (House Bill 2499) that essentially would allow the State, in some emergency situations or low water situations to assume some regulatory authority over our own management of the water system. Our Director of Water Resources Director has recommended Council oppose the bill as drafted.

Mayor Bellamy said that this item was scheduled for Council consideration on July 22, 2008, formal meeting but is before Council today because a vote on this is imminent.

Water Resources Director David Hanks reviewed the staff report he had prepared to report to Council on July 22 as follows: "This bill as proposed is a wide ranging bill that would take away local control of our most valuable natural resource – water. Lawmakers have

proposed the following: (1) Water systems in exceptional drought to reduce water use by 20% and those in extreme drought by 10%; (2) Give the governor emergency powers to force systems with extra water to share it; (3) Provide powers for cities and counties to limit the use of wells for watering lawns and plants, as long as they have the same rules for residents on public water; and (4) State shall develop guidelines for water rate structures, including rates that support water conservation.

"Asheville has two pristine lakes that contain over 6.5 billion gallons of water that is surrounded by a 22,000 acre protected watershed as well as a state-of-the-art ozone water treatment plant that can draw water from both the Mills River and the French Broad River.

"The City of Asheville has taken many positive steps to ensure that water is available to residents in the City of Asheville, and in Buncombe and Henderson Counties. Below is a list of some of the progressive steps that have been taken:

- Spent approximately $1 million on creating a Drought Model and updating our Emergency Action (Flood) Plan. The Drought Plan uses historic data, the forecast of rainfall for the next 10 weeks, and the level of our lakes to determine when conservation measures should take place. During last year's drought, we found that the information the drought model provided us was very accurate.
- The Asheville City Council approved $40 million of revenue bond projects which is being used to upgrade some old problematic water lines, provide back-up generator power when power is lost, and other water capital investments include upgrades to North Fork and Bee Tree Water Treatment Plants.
- Implemented an Asset Management Program which provides us with a computerized replacement and refurbishment model to identify funding needs of the water system, life cycle cost and business case evaluations for new projects.
- The City of Asheville Water Resources Department became the first certified water utility in the State of North Carolina and the first in the entire nation to be totally (all divisions of department) certified and registered under ISO 14001. This is an Environmental Management System that helps us systematically manage and improve every aspect of our environmental performance.
- The City of Asheville is a regional team player in the water arena. We are the sole source water provider for Biltmore Forest, and provide water to Black Mountain, Woodfin, and Hendersonville. We also have connection to the Town of Weaverville and have emergency help agreements with area water utilities. When requested, Asheville has never refused to provide water or repair assistance to our neighbors.

"The City Council Strategic Operating Plan and Water Master Plan actions are not applicable.

Pro:

- Comprehensive and regional water planning is desired for the entire State and Western North Carolina region.

Cons:

- This bill if adopted will take away the ability of local policy makers and utilities to make decisions concerning their communities, including various drought stages and water rates.
- The bill refers to various actions that will require additional staffing to implement and ensure compliance, especially during designated drought events.

"There is no immediate fiscal impact but future impacts could be tremendous if water rates, including drought surcharges are set by another policy board and not at the local level.

"Staff recommends that the City of Asheville oppose any legislation that would take away the local authority to manage local water conditions by approving the attached resolution. Asheville has done a superior job managing its water resources. We know what is occurring within our system, and our governing board and professional staff should be the ones making decisions and being held accountable for this most important natural resource."

He said that this version of the bill did take out some of the concerns or moved items to a "study" status. The two areas that may come back on the municipalities are (1) gives the governor emergency powers to force systems with extra water to share it; and (2) State shall develop guidelines for water rate structures, including rates that support water conservation. The main area of contention was the private well monitoring and that was one of the items that was moved to a study status.

Mayor Bellamy highlighted that Asheville has spent money on drought management and flood management for our water system to ensure that we are doing the best practices possible for our water system; and to have the state supersede us is disappointing by them using an across the board measure that might not be the best for our community for drought management.

Councilman Mumpower moved to waive the rules and take formal action on this item at this meeting. This motion was seconded by Councilwoman Cape and carried unanimously.

Councilwoman Jones felt it was too bad that our legislative delegation did not put in some kind of exemption in the bill that really recognizes the best practices that some communities are doing and the systems that have been proactive. If the bill does not pass, maybe this is something that can be explored. City Attorney Oast felt that idea is certain worth conversation, if possible.

When Mayor Bellamy asked for public comment, no one spoke.

After Mayor Bellamy read the resolution, Councilman Mumpower moved for the adoption of Resolution No. 08-145. This motion was seconded by Vice-Mayor Davis.

Councilwoman Cape asked for a friendly amendment to the third paragraph in the resolution to read as follows: "City staff has recommended the City of Asheville oppose this bill and encourage local and State legislators to allow local policy makers to make decisions that affect their local communities concerning drought conditions and water rate guidelines <u>with those communities who have exhibited best practice management with their systems</u> (underlining to denote change)." Councilman Mumpower and Vice-Mayor Davis did not accept the amendment in that the State does not pay for the water, they don't pay for the system, they don't have any responsibility for the system but they just want some control over our system.

The motion made by Councilman Mumpower and seconded by Vice-Mayor Davis carried on a 5-1 vote, with Councilwoman Jones voting "no."

In that Councilwoman Jones wishes the vote to be unanimous, she asked her vote be changed to support the resolution.

Therefore, the motion made by Councilman Mumpower and seconded by Vice-Mayor Davis carried unanimously.

SENIOR OPPORTUNITY CENTER, REID CENTER AND MUNICIPAL GOLF COURSE

Mayor Bellamy stated that the City of Asheville is not closing the Senior Opportunity Center on Grove Street; is not closing the Reid Center; and is not selling the Municipal Golf Course.

ADJOURNMENT

Mayor Bellamy adjourned the meeting at 7:09 p.m.

Magdalen Burleson
CITY CLERK

Jerry M Bellamy
MAYOR

Tuesday – July 22, 2008 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Ms. Rikki Walker, recipient of the Make A Wish Foundation, led City Council in the Pledge of Allegiance and briefly explained her experience in the program. Ms. Caroline Harrison, representing the Make A Wish Foundation, thanked Mayor Bellamy for proclaiming Friday, July 18, 2008, as "Make A Wish Day."

INVOCATION

Councilman Russell gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

At the request of Councilman Mumpower Consent Agenda Items "K", "P" and "Q" were removed from the Consent Agenda for discussion and/or individual votes.

At the request of Mayor Bellamy, Consent Agenda Item "L" was removed from the Consent Agenda for discussion and/or an individual vote.

A. APPROVAL OF THE MINUTES OF THE FORMAL MEETING HELD ON JUNE 24, 2008, AND THE WORKSESSION HELD ON JULY 15, 2008

B. RESOLUTION NO. 08-146 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH R & W INCORPORATED TO SUPPLY AND CONSTRUCT A NEW HVAC SYSTEM FOR THE BURTON STREET RECREATION CENTER

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with R & W Incorporated to supply and construct a new HVAC System for the Burton Street Recreation Center for an amount not to exceed $111,655.00.

The Parks, Recreation and Cultural Arts Department obtained approval for the creation of a budget amendment in the amount of $215,000 in October of 2007. This budget amendment consisted of a $60,000 appropriation from the Fiscal Year 2007-2008 general capital improvement budget and an additional $155,000 from a Community Development Block Grant (CDGB).

These funds were needed to renovate the Burton Street Recreation Center. Renovations included new energy efficient doors and windows, a new handicap access ramp, new flooring, new kitchen and bathroom fixtures and a new HVAC System for this community recreation facility.

This action complies with the City Council Strategic Operating Plan in that it supports and enhances basic city services. It is part of the park development program to make facility improvements. It is also a Green focus area by making an energy efficient capital improvement decision and supporting energy efficient funding for facilities and operations.

Pros:

- Provide funds to supply and construct a new HVAC System at the Burton Street Recreation Center.
- Fulfill commitment to the Burton Street neighborhood to make improvements to the facility.
- Reduce energy consumption.

Con:

- An additional HVAC System to maintain.

Funding provided by budget amendment of $215,000 in October of 2007.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with R & W Incorporated to supply and construct a new HVAC System for the Burton Street Recreation Center for an amount not to exceed $111,655.00.

RESOLUTION BOOK NO. 31 – PAGE 244

C. RESOLUTION NO. 08-147 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A 5-YEAR SERVICE AGREEMENT WITH MCQUAY FACTORY SERVICE FOR MAINTENANCE AND REPAIR OF THE CIVIC CENTER CHILLER

Summary: The consideration of a resolution authorizing the City Manager to enter into a 5 year service agreement, in the amount of $100,000, with McQuay Factory Service for maintenance and repair of the Civic Center chiller.

The Civic Center Chiller has been under a lease and maintenance agreement for the past ten years with ePlus. The agreement expires at the end of July. After financial analysis, it was determined by staff to purchase the chiller and enter into an agreement directly with McQuay Factory Service. This company has maintained the chiller during the past ten years as a subcontractor.

The Civic Center Commission unanimously passed a resolution supporting staff's recommendation to purchase the chiller and contract directly for the Chiller's maintenance.

Pros:

- Purchase of chiller and direct maintenance agreement saves $15,000 over 5 years
- Experts that have maintained chiller for 10 years will continue in that capacity

Con:

- None identified

The fiscal impact would be $15,000 saving over 5 year period

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a 5 year service agreement, in the amount of $100,000, with McQuay Factory Service for maintenance and repair of the Civic Center chiller.

RESOLUTION BOOK NO. 31 – PAGE 245

D. RESOLUTION NO. 08-148 – RESOLUTION AUTHORIZING THE MAYOR TO EXCHANGE REAL PROPERTY LOCATED ON HUNT HILL PLACE FOR PROPERTY LOCATED ON ARDMION PARK ROAD PLUS ADDITIONAL MONETARY CONSIDERATION

Summary: The consideration of a resolution authorizing the exchange of real property located on Hunt Hill Place for property located on Ardmion Park Road plus additional monetary consideration.

The City of Asheville and Satchel's Development, Inc. have negotiated an exchange of real property at Hunt Hill Place for property on Ardmion Park Road along with additional monetary consideration. Pursuant to N. C. G. S. 160A-271 a notice was duly published in the Asheville Citizen-Times on June 27, 2008, describing the exchange of properties on the following terms:

"The City-owned property on Hunt Hill Place is 1.0592 acres +/- in size and is a portion of tax PINs 9648.07-57-5714 and 9648.11.57-5224. The area is zoned Institutional and is mostly vacant land. This area is a portion of the larger Mountainside Park. The appraised value, as appraised by Underdown Ball & Associates, LLC, equals $130,300.

The property to be exchanged on Ardmion Park Road is an 0.854 +/- acre parcel zoned RM 8 and is a portion of tax PIN 9648.07-57-9853. This property is mostly wooded with steep to rolling grades and has road frontage on Ardmion Park Road. The appraised value as appraised by Underdown Ball & Associates, LLC, equals $120, 900. To provide that the exchange is full and fair, monetary compensation will be provided along with the exchange in the amount of $9,400 in cash; paid by the property owner, Satchel's Development, Inc."

Approval of the resolution will authorize the exchange of the properties as provided in N. C. G. S. 160A-271.

This action complies with the Strategic Operating Plan in that it promotes sound land management per the Parks and Recreation Master Plan.

Pros:

- The exchange will be a fair exchange of property for property plus consideration.
- Additional pedestrian access to the Mountainside Park will be gained from Ardmion Park Road.

Con:

- There is no negative impact.

The proceeds from the sale of this parcel will benefit the General Fund via the Parks, Recreation and Cultural Arts Department.

City staff recommends City Council adopt a resolution authorizing the exchange of real property located on Hunt Hill Place for property located on Ardmion Park Road and additional consideration.

Mayor Bellamy said that she did not support this item originally due to the number of affordable units planned even with a density bonus and a land exchange. However, the developer has increased the number of affordable units dramatically and she would therefore support this action.

E. RESOLUTION NO. 08-149 - RESOLUTION GRANTING AN EXTENSION FOR A TERM ON THE ALCOHOLIC BEVERAGE CONTROL BOARD

Summary: The term of Barbara Field, as a member of the Asheville Alcoholic Beverage Control Board, expired on November 13, 2007.

As the Board moves forward with the development of architectural plans for new stores on Tunnel Road, Leicester Highway and US 74A in the Reynolds area and as they continue their program of remodeling existing locations, Ms. Field's training as an architect will continue to prove useful.

Ms. Barbara Field, 33 Haywood Street, Asheville, N.C., be and she is hereby granted an extension of her term until April 1, 2009, or until her successor has been appointed.

RESOLUTION BOOK NO. 31 – PAGE 247

F. RESOLUTION NO. 08-150 - RESOLUTION AUTHORIZING THE MAYOR TO SIGN A SISTER CITY AGREEMENT WITH OSOGOBO, NIGERIA

Summary: The Asheville City Council supports the Asheville Sister Cities Program, administered by Asheville Sister Cities International, which encourages cultural exchanges, strengthens friendships and goodwill between nations, and increases the collaboration for the mutual benefit of both cities. The addition of Osogbo, Osun, Nigeria as a new Sister City will expand the opportunities available to the people of City of Asheville to experience Nigerian culture, and offer the people of Osogbo the opportunity to exchange with citizens in Asheville, creating benefits for both communities. Asheville Sister Cities representatives will travel to Osogbo, Osun, Nigeria in August 2008 to meet with head governmental officials to sign official documentation designating Osogbo, Osun, Nigeria and Asheville, North Carolina as Sister Cities under the auspices of Sister Cities International. The Asheville City Council supports the recognition of Osogbo, Osun, Nigeria, as an official Sister City of the City of Asheville, North Carolina in order to promote and encourage cross-cultural exchange through the goodwill practices of Asheville Sister Cities International. The Asheville City Council officially recognizes Osogbo, Osun, Nigeria as a Sister City of the City of Asheville and hereby authorizes the Mayor to enter into the Sister City Agreement with Osogbo, Osun, Nigeria.

RESOLUTION BOOK NO. 31 – PAGE 248

G. RESOLUTION NO. 08-151 - RESOLUTION OF INTENT TO CLOSE AN UNOPENED PORTION OF PEACE STREET AND SETTING A PUBLIC HEARING ON AUGUST 26, 2008

Summary: The consideration of a resolution of intent to close an unopened portion of Peace Street and request a public hearing for August 26, 2008, regarding this issue.

N. C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, the adjoining property owners have requested the City of Asheville permanently close an unopened portion of Peace Street.

This closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property

- The closure would allow for more efficient use of the adjacent residential properties for residential development

Con:

- The Greenway Commission at their meeting of June 10, 2008, recommended the unopened portion of Peace Street be retained as future opportunities for greenways, or other bike, pedestrian or vehicular connections.

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt a resolution setting a public hearing for August 26, 2008, to close an unopened portion of Peace Street.

RESOLUTION BOOK NO. 31 – PAGE 249

H. RESOLUTION NO. 08-152 - RESOLUTION APPOINTING MEMBERS TO THE RECREATION BOARD

Summary: The terms of Scott Barnwell, Geoffrey Ferland and Jim Drummond, as members on the Recreation Board, expired on June 30, 2008.

On July 15, 2008, it was the consensus of Council to reappoint Mr. Scott Barnwell, Mr. Geoffrey Ferland and appoint Mr. Lonnie Burton to each serve a three-year term respectively, terms to expire June 30, 2011, or until their successors have been appointed.

RESOLUTION BOOK NO. 31 – PAGE 250

I. RESOLUTION NO. 08-153 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A CONTRACT WITH DIXON HUGHES, PLLC, FOR AUDITING SERVICES FOR FISCAL YEAR 2007-08

Summary: The consideration of a resolution authorizing the Mayor to execute a contract with Dixon Hughes PLLC, Certified Public Accountants and Advisors, for auditing services for Fiscal Year 2007-2008.

NC General Statute sec. 159-34 requires that local governments of North Carolina have their accounts audited each fiscal year and submit a copy of the audit to the Local Government Commission.

Based on our review of a proposal submitted by Dixon Hughes, staff recommends retaining their services for Fiscal Year 2007-2008. We have previously worked with Dixon Hughes and they have consistently provided a thorough and high quality audit for the City.

Pro:

- Allows us to meet NC General Statute sec. 159-34.

Con:

- None noted.

The base fee has been proposed at $98,900.00 and is appropriated in the budget of the Accounting Division of the Finance Department.

City staff recommends adoption of the resolution authorizing the Mayor to execute a contract with Dixon Hughes PLLC, Certified Public Accountants and Advisors, for auditing services for Fiscal Year 2007-2008.

RESOLUTION BOOK NO. 31 – PAGE 251

J. RESOLUTION NO. 08-154 - RESOLUTION ACCEPTING HUNTINGTON CHASE DRIVE AS A CITY-MAINTAINED STREET

Summary: The consideration of a resolution to accept Huntington Chase Drive as a city-maintained street as outlined in the 2002 Annexation Services Plan for the Huntington Chase Area.

Section 7-15-1 (e) (4) (a) of the Code of Ordinances requires that streets dedicated for public uses be accepted by resolution of the City Council.

Huntington Chase Drive is a developer-constructed street that has an average width of 20 feet and a length of 0.37 mile.

Transportation and Engineering Department staff and Public Works Department staff have inspected this street and recommend its change of ownership from a privately-maintained street to a city-maintained street.

Huntington Chase Drive is a street listed in the 2002 Annexation Services Plan that the City would take over for maintenance.

Following City Council's approval of this resolution, Huntington Chase Drive will be added to the official City Maintained Street Inventory (Powell Bill List).

Pros:

- The City of Asheville will receive Powell Bill Funds from the North Carolina Department of Transportation (NCDOT) to help fund the maintenance of the street.
- Homes constructed along the subject street increase the tax base for the City.

Con:

- Powell Bill Funds will not cover 100% of the total cost to maintain the streets.

There should be no initial financial impact to the City, although the responsibility of maintenance will belong to the Public Works Department. The City will receive Powell Bill Funds in the future to help maintain the street. Currently, the Powell Bill Funds equate to $1,886 per mile compared to the City's maintenance cost of $8,200 per mile.

Staff recommends that City Council adopt the resolution to accept Huntington Chase Drive as a city-maintained street with an effective date of July 31, 2008.

K. BUDGET AMENDMENT TO APPROPRIATE DEPT. OF JUSTICE BULLETPROOF VEST REIMBURSEMENT FUNDS FOR THE PURCHASE OF POLICE PATROL SAFETY EQUIPMENT

This item was removed from the Consent Agenda for discussion and/or an individual vote.

L. RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ROCKIN THE RIVER RAFT RACE ON AUGUST 2, 2008

This item was removed from the Consent Agenda for discussion and/or an individual vote.

M. RESOLUTION NO. 08-156 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN ENTERPRISE LICENSE AGREEMENT WITH ESRI INC. FOR GEOGRAPHIC INFORMATION SYSTEMS SOFTWARE LICENSING

Summary: The consideration of a resolution authorizing the City Manager to sign a Enterprise License Agreement with ESRI, Inc. in the amount of $150,000 over 3 years payable in $50,000.00 yearly installments for Geographic Information Systems (GIS) software.

The City of Asheville has used ESRI GIS software for 10+ years as a keystone software information system. Many internal processes including asset management, code enforcement, public safety dispatch, stormwater utility billing, infrastructure maintenance, sanitation service, etc., rely on GIS expertise and software. Citizens also rely on GIS for Internet information portals such as the mapAsheville applications (Development Mapper, Crime Mapper, and Priority Places). City Council also relies on the City's GIS via planning and development decision visualizations.

Annual maintenance payments are required in order to keep software in a reliable and supported state. From Fiscal Year 2002 to Fiscal Year 2008, this critical maintenance increased by 282%. To reduce the risk of further significant increases, staff has negotiated with ESRI the ability to lock in a set maintenance payment for a three year period (renewed yearly). A contracted agreement also means that the City may provide unlimited staff installations of this software.

Specific City Council Strategic Operating Plan priority areas with goals that are supported by GIS technology include Community Building, Critical Services & Infrastructure, Natural & Built Environment, Economic Development, and Growth, Development & Land Use

Pros:

- Increased support of departmental business requirements via greater options for GIS software licensing.
- Ability to install additional software without additional purchases.
- Hold the line on increasing software maintenance costs.

Con:

- If continued funding for future years is not appropriated, some staff will lose ability to utilize some GIS software.

Based on trend analysis, this agreement represents a 3 year savings of $21,600.

City staff recommends City Council adopt a resolution authorizing the City Manager to sign an Enterprise License Agreement with ESRI, Inc.

RESOLUTION BOOK NO. 31 – PAGE 256

N. RESOLUTION NO. 08-157 - RESOLUTION APPOINTING A MEMBER TO THE WNC REGIONAL AIR QUALITY AGENCY

Summary: The term of Dean Kahl, as a member on the WNC Regional Air Quality Agency Board, expired on July 1, 2008.

On July 15, 2008, it was the consensus of Council to reappoint Dr. Kahl to serve a six-year term, term to expire July 1, 2014, or until his successor has been appointed.

RESOLUTION BOOK NO. 31 – PAGE 257

O. RESOLUTION NO. 08-158 - RESOLUTION APPOINTING MEMBERS FO THE PLANNING & ZONING COMMISSION

Summary: The terms of Cindy Weeks, C. Jerome Jones and Darryl Hart, as members on the Planning & Zoning Commission, expire on August 14, 2008.

On July 15, 2008, it was the consensus of Council to reappoint Ms. Weeks, Mr. Jones and Mr. Hart to each serve an additional three-year term respectively, terms to expire August 14, 2011, or until their successors have been appointed.

RESOLUTION BOOK NO. 31 – PAGE 258

P. ORDINANCE AUTHORIZING THE ASHEVILLE POLICE DEPARTMENT TO ACCESS THE STATE BUREAU OF INVESTIGATION'S DIVISION OF CRIMINAL INFORMATION NETWORK DATABASE FOR CRIMINAL HISTORY CHECKS FOR PERSONS APPLYING FOR EMPLOYMENT WITH THE CITY OF ASHEVILLE

ORDINANCE AUTHORIZING THE ASHEVILLE POLICE DEPARTMENT TO ACCESS THE STATE BUREAU OF INVESTIGATION'S DIVISION OF CRIMINAL INFORMATION NETWORK DATABASE FOR CRIMINAL HISTORY CHECKS FOR USE IN DETERMINING THE SUITABILITY OF AN APPLICANT FOR AN ADULT BUSINESS OR ADULT ENTERTAINER LICENSE

ORDINANCE AUTHORIZING THE ASHEVILLE POLICE DEPARTMENT TO ACCESS THE STATE BUREAU OF INVESTIGATION'S DIVISION OF CRIMINAL INFORMATION NETWORK DATABASE FOR CRIMINAL HISTORY CHECKS FOR USE IN MAKING RECOMMENDATIONS ON THE SUITABILITY OF A PERSON OR OF A LOCATION FOR AN ABC PERMIT

These items were removed from the Consent Agenda for discussion and/or an individual votes.

Q. UPSET BID RECOMMENDATION FOR THE HOLIDAY INN AT THE AIRPORT PROPERTY

This item was removed from the Consent Agenda for discussion and/or an individual vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Davis moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Cape and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

K. ORDINANCE NO. 3637 - BUDGET AMENDMENT TO APPROPRIATE DEPT. OF JUSTICE BULLETPROOF VEST REIMBURSEMENT FUNDS FOR THE PURCHASE OF POLICE PATROL SAFETY EQUIPMENT

Summary: The consideration of a budget amendment, in the amount of $23, 018, to appropriate Department of Justice Bulletproof Vest reimbursement funds for the purchase of police patrol safety equipment.

The Asheville Police Department currently participates in the Department of Justice Bulletproof Vest Reimbursement Program. This program is designed to off-set the tremendous cost involved in purchasing bulletproof vests for police officers. During the current fiscal year, the City of Asheville has collected $23,018 from the Department of Justice Bulletproof Vest Reimbursement Program. Adding these funds into the Police Patrol Division safety equipment budget line would assist in the purchase of additional vests for Asheville police officers.

This action complies with the City Council Strategic Operating Plan in that it supports efforts to hold the line on taxes and find areas for tax and fee relief.

Pro:

- Reimbursement revenue to cover the rising cost of bulletproof vests for Asheville police officers.

Con:

- None

City staff recommends City Council adopt the budget amendment, in the amount of $23,018, to appropriate Department of Justice Bulletproof Vest reimbursement funds for the purchase of police patrol safety equipment.

Councilman Mumpower felt that the City should pay for their own vests and not accept the money from the federal government, which has a trillion dollar national debt.

Mayor Bellamy noted that the City did purchase the bulletproof vests, but there was an opportunity for reimbursement of their primary purchase.

Councilwoman Jones moved for the adoption of Ordinance No. 3637. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 1

L. RESOLUTION NO. 08-155 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ROCKIN THE RIVER RAFT RACE ON AUGUST 2, 2008

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Rockin the River Raft Race on August 2, 2008.

Riverlink, Inc. has requested, through the City of Asheville Parks, Recreation & Cultural Arts Department, that City Council permit them to serve beer and/or unfortified wine at the Rockin the River Raft Race and allow for consumption at this event.

The Rockin the River Raft Race will be held on Saturday, August 2, 2008, from 9:00 a.m. – 6:00 p.m. within the boundaries of French Broad River Park, as per the event area limits referenced on the accompanying site map.

This action does not tie-in with the Strategic Operating Plan, nor does this action does not comply with any of the adopted City plans.

Pro:

- Allows fundraising opportunities for charity

Con:

- Potential for public safety issues

The fiscal impact would be for overtime pay for Ashville Police Department officers.

City staff recommends City Council adopt a resolution authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Rockin the River Raft Race.

Councilman Russell moved for the adoption of Resolution No. 08-155. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Mayor Bellamy voting "no."

Councilman Mumpower suggested hearing Mayor Bellamy's thoughts on voting against these alcohol at event resolutions at another time.

RESOLUTION BOOK NO. 31 – PAGE 253

P. ORDINANCE NO. 3638 - ORDINANCE AUTHORIZING THE ASHEVILLE POLICE DEPARTMENT TO ACCESS THE STATE BUREAU OF INVESTIGATION'S DIVISION OF CRIMINAL INFORMATION NETWORK DATABASE FOR CRIMINAL HISTORY CHECKS FOR PERSONS APPLYING FOR EMPLOYMENT WITH THE CITY OF ASHEVILLE

ORDINANCE NO. 3639 - ORDINANCE AUTHORIZING THE ASHEVILLE POLICE DEPARTMENT TO ACCESS THE STATE BUREAU OF INVESTIGATION'S DIVISION OF CRIMINAL INFORMATION NETWORK DATABASE FOR CRIMINAL HISTORY CHECKS FOR USE IN DETERMINING THE SUITABILITY OF AN APPLICANT FOR AN ADULT BUSINESS OR ADULT ENTERTAINER LICENSE

ORDINANCE NO. 3640 - ORDINANCE AUTHORIZING THE ASHEVILLE POLICE DEPARTMENT TO ACCESS THE STATE BUREAU OF INVESTIGATION'S DIVISION OF CRIMINAL INFORMATION NETWORK DATABASE FOR CRIMINAL HISTORY CHECKS FOR USE IN MAKING RECOMMENDATIONS ON THE SUITABILITY OF A PERSON OR OF A LOCATION FOR AN ABC PERMIT

Summary: This is the consideration of adoption of ordinances authorizing Asheville Police Department to access the State Bureau of Investigation's Division of Criminal Information Network (DCI) database for criminal history checks involving applicants for employment, persons applying for adult business and adult entertainer licenses, and persons applying for alcohol permits with the City.

Pursuant to City Code Sec. 2-187, the City shall conduct a criminal background check for all final candidates for City employment. Pursuant to City Code Chapter 9, Article IV, the City of Asheville through the Asheville Police Department is required to conduct a criminal background investigation for any person wishing to obtain an adult business license or an adult entertainer license. Pursuant to N.C.G.S. § 18B-904(f), the Chief of Police on behalf of the City is required to report to the ABC Commission whether an applicant and/or location is suitable for possessing an Alcohol Permit. Currently, the City is doing limited criminal history checks through City/County Bureau of Investigation. However, the City/County database only deals with crimes adjudicated by the State of North Carolina.

The Asheville Police Department has access to the State Bureau of Investigation's DCI database which contains criminal background information for the entire country. The State of North Carolina has strict requirements for using this criminal database for non-criminal employment and licensing. In order to access the state database, City Council must pass an

ordinance requiring the criminal history checks and the consequences for failing the criminal background check. City staff has presented the proposed ordinances to the SBI and the SBI has approved said ordinances.

Pros:

- The City will be able to access the DCI network to conduct criminal history checks on applicants for non-sworn employment with the City, adult business licenses, adult entertainer licenses, and alcohol permits.

Cons:

- None

City staff recommends City Council adopt the ordinances authorizing the APD to conduct criminal history checks for employment with the City, adult business and entertainment licenses and alcohol permits.

Police Chief Bill Hogan responded to various questions from Councilman Mumpower regarding the City's ability to use this resource in their efforts to address illegal immigration.

Councilman Mumpower moved for the adoption of Ordinance No. 3638, requesting feedback on how quickly the Police Chief, Sheriff and Judicial System are able to get an consistent pattern of checking the fingerprints of the parade of people who don't have identification but are brought into our jail for DUI's or other misbehaviors. This motion was seconded by Councilman Newman and carried unanimously.

ORDINANCE NO. 3638 - ORDINANCE BOOK NO. 25 – PAGE 3

Councilman Mumpower moved for the adoption of Ordinance No. 3639, requesting feedback on how quickly the Police Chief, Sheriff and Judicial System are able to get an consistent pattern of checking the fingerprints of the parade of people who don't have identification but are brought into our jail for DUI's or other misbehaviors. This motion was seconded by Councilman Newman and carried unanimously.

ORDINANCE NO. 3639 - ORDINANCE BOOK NO. 25 – PAGE 5

Councilman Mumpower moved for the adoption of Ordinance No. 3640, requesting feedback on how quickly the Police Chief, Sheriff and Judicial System are able to get an consistent pattern of checking the fingerprints of the parade of people who don't have identification but are brought into our jail for DUI's or other misbehaviors. This motion was seconded by Councilman Newman and carried unanimously.

ORDINANCE NO. 3640 - ORDINANCE BOOK NO. 25 – PAGE 7

Q. UPSET BID RECOMMENDATION FOR THE HOLIDAY INN AT THE AIRPORT PROPERTY

Economic Development Director Sam Powers said that this is the consideration of an offer by W&K Hotels, LLC to purchase the 10.37 acres of land owned by the City of Asheville located at 550 Airport Road.

The City owns approximately 10.37 acres of land at the intersection of Airport Road and Interstate 26. In the 1980's the City entered into a 60 year ground lease and a hotel, currently operating as a Holiday Inn (HI), was constructed on the site. The ground lease has approximately 36 years remaining. The City currently receives an annual revenue stream from the lessee of approximately $130,000, and the lease has gradual revenue escalation clauses. The current owner of the HI has made an offer to purchase the land for $2,450,000. A letter was

received from David E. Matney, III, attorney for W&K Hotels, LLC, on June 11, 2008. The hotel owner has indicated he has interest in developing the site to a higher intensity to include a possible upscale hotel addition and conference center, retail and office space, and structured parking. The hotel owner has indicated that in order for him to invest in his new facilities, his ownership interest in the property must change. In addition to an offer to purchase, the hotel owner has also indicated that he is willing to modify the terms of the lease to a new period of 99 years. A team of city staff, including the Chief Financial Officer, City Attorney, Real Estate Manager, and Economic Development Director have been assessing the prospect of disposition of the property. City staff had an appraisal done on the site in 2006. The owners of the HI had an appraisal done in 2007. There are major differences in the value conclusions of the two appraisals. The City's CFO has provided a memo to Council explaining the City's analysis of the value of the property.

Airport Road has seen tremendous growth as a retail and hospitality corridor in the last two years. Staff has reviewed the land appraisals on which the $2,450,000 offer is based, and staff has concluded that the offer does not reflect the value of the land to the City or to the Lessee. The offer tendered is based upon a sale in the open market. The value of the property to the open market includes the existing lease which survives a transaction of the property. It should be noted that the value to the open market is not considered as the City has not initiated plans to sell the land on the open market; instead the hotel owners approached the City with an offer.

It should also be noted that the hotel owner's proposed concepts would have a positive economic effect should the development occur, and selling the property would result in increased property taxes to the City. However, previous discussions have centered around a real estate transaction, and the owner has not indicated a desire to execute a development agreement that would govern the terms and conditions of the development of the site and set conditions for build out prior to closing on the real estate.

Based upon staff analysis of the property, growth potential for the Airport Road corridor, terms of the existing ground lease, the desire to provide effective asset management, and the interest in promoting economic development and smart growth in the area, staff believes it is in the best interest of the City to offer the property at the Fair Market Value established by the City staff of $5,932,500 ($5.65 MM escalated to 2008 dollars). If Council desired other alternatives, Council could authorize the City Clerk to advertise for upset bids based on the current offer of $2,450,000 with the understanding that City Council has the right and authority to reject any and all bids received if the price is not in the City's best interest. City Council could also offer the property for sale at a beginning price of $5,932,500.

The sale of city owned property is consistent with Council strategic goals and is contemplated in the adopted 2008-09 budget as a method to provide funding for anticipated capital projects.

Pros:

- City would receive a lump sum payment from sale of the property which could be utilized for capital projects.
- Sale of the property would allow the hotel owner to redevelop the property to a higher level of density, thus creating more property tax revenue, sales tax revenue, hotel occupancy tax revenue, and payroll.

Cons:

- City currently has a consistent revenue stream from the lease of the property which would be extinguished at closing.
- The existing ground lease encumbers the property and would survive transfer of ownership thus limiting the interest in the open market for the property to niche purchasers.

The fiscal impact would be the estimated proceeds from the sale, plus any additional tax revenues, less the current annual lease payments.

City staff recommends that City Council rejects the offer of $2,450,000 by W&K Hotels LLC to purchase the property at 550 Airport Road; and further recommends offering the property for sale in an upset bid process. The suggested offering price is $5,932,500.

Mr. David Holcombe, representing W&K Hotels, said that he is authorized by Mr. Dennis Hulsing to obtain this site, either by lease or purchase. He showed Council a conceptual plan for everything around the existing hotel. Mr. Hulsing is known for purchasing and then immediately improving, with his own staff, his properties to two and three times their value. He would like the City to look at the original offer made on June 11, 2008, which said either purchase or lease and they would recommend that this go to a long-term lease, which would benefit both parties.

Chief Financial Officer Ben Durant said that staff recommends the City get market value for the property and that we advertise it publicly and see what the market is willing to pay. Short of that, if Council directs us, we can go back and negotiate further and see if there is some type arrangement that can be worked out that would be in the best interests of both parties.

City Attorney Oast said if Council decides to dispose of this property, whether by sale or long-term lease, it will have to go through some sort of competitive process, e.g., an upset bid process, sealed bid process, etc.

Mr. Jesse Junior felt that the conceptual plan presented was vague and Council should ask for something definite in terms of plans for the property.

Throughout discussion, Mr. Powers, Mr. Holcombe and City Attorney Oast responded to various questions/comments from Council, some being, but are not limited to: does staff believe it's realistic that someone would pay approximately $6 Million on the open market for this property; what is the property currently zoned; is the lease for the entire 10.37 acres; is the Lessee free to do what they want (in normal development parameters) on the property in the remaining 36 years of the lease; what is the life of a hotel; is it possible to consider the lease and sale at the same time; how long does an upset bid process take; and when an existing business has an existing 36 year lease, under those circumstances how common is it to receive an upset bid.

In response to Councilman Newman, Mr. Powers said there are four kinds of transactions available (1) asset management and an income stream; or (2) a real estate transaction; or (3) an economic development deal; or (4) some combination thereof. Up to this point, the owners have not indicated an interest in an economic development deal. If we did a development agreement and there was due diligence and certain milestones in terms of design and construction that were accomplished before the City closed on the land that we knew would ultimately result in a much higher tax base, as was outlined by Mr. Holcombe, then that would affect the value. However, in absence of that, he believed we are looking at the real estate transaction. For the real estate transaction, we have (1) a value to the City; (2) a value to the Lessee; and (3) a value to the open market. The value to the open market is the least favorable for us.

In response to Councilman Russell, Real Estate Manager Nikki Gunter said that the appraisal done for the City by Richard Jacobs in 2006 was $2.92 Million and the appraisal performed by BB&T for W&K Hotels LLC was $2.05 Million, but that was for the lease fee interest only – not the fee simple value.

When Councilman Russell asked if the City has clear title, City Attorney Oast said that the property was acquired as part of the initial Airport purchase and when I-26 was built, this remnant remained. Back in the early 1980's we obtained a release of that property from the

Federal Aviation Administration (FAA) restrictions on our ability to apply the income to non-aeronautical projects. He felt we can get verification from the FAA that the City does have clear title to the property. He said that would be verified before we sold the property.

In response to Councilman Russell, Mr. Powers said the proposal we have now basically indicates a new lease pretty much at the existing terms of $130,000 a year. However, staff is not in favor of that, and there are many provisions in the lease that City staff would want to renegotiate.

Because there was an offer made to either purchase the property at $2.4 Million or extend the lease, Mr. Holcombe said it appears we will not come to an agreeable price at $5.9 Million. He said Mr. Hulsing is agreeable to a 99 year lease at a fixed rent rate of $130,000, noting that this year with the slumping economy and reduced travel, Mr. Hulsing estimates the rent will likely be closer to $115,000. Mr. Hulsing would then do a Consumer Price Index (CPI) increase of 2%-5%, with perhaps a cap which will be up for negotiations. He felt that the fixed rent of $130,000 a year with the CPI increase and Mr. Hulsing improves the site for an upscale convention hotel, he felt the City would double their money because the taxes on the property is about $130,000. If the City does not accept this offer, the rent will probably go down and Mr. Hulsing will not make any improvements on the property.

In response to Councilman Newman, Mr. Holcombe felt that Mr. Hulsing would not be willing to pay an outside consultant to take six months for a detailed plan. However, if Council wanted Mr. Hulsing to refine the conceptual plan given in detail, he would be willing to do that.

Mayor Bellamy said that in the absence of a motion, Council will send the matter back to City staff to talk with the existing Lessee.

City Manager Jackson asked if the motion is to send it back to City staff for the development agreement option if the Lessee is interested in that, that is new information and would be worth pursuing. If the Council is talking about putting the property on the market in an upset bid process for the $2.4 or $5.9 Million, or putting it on the market place for a 99-year lease, we still need an upset bid process to go in that direction. The options before Council, short of a development agreement, are (1) to merely set an offering price and begin a public process for placing it on the market; or (2) whether it's a lease or sale, but it if's a sale, at what offering price. The Council is not bound by the offering price.

Councilwoman Cape said if we have a $130,000 ground lease for 36 years, that's $4.7 Million. It's not as if we're not getting income on this property. As we go out and evaluate this project, she asked staff to give Council an assessment of the difference between City-owned property, taxes, rent incomes, how the rent would be negotiated, etc. She felt that would give Council information to make a good decision. Getting all the money at once may have some value, but we're getting $4.7 Million over 36 years with a lease we can negotiate. It's not as if the property is just sitting there. She asked for more information from City staff.

In response to City Manager Jackson, Mr. Holcombe said that said he can provide City staff with a detailed pro forma that shows what the site will allow - a certain amount of square footage which was done by an architect in detail. City Manager Jackson said that having that information available to staff (confidentially) would help expedite their process of analysis.

It was the consensus of the majority of Council to ask staff to work with Mr. Holcombe in an expeditious manner on the options available, and to provide Council with an e-mail update prior to placing it on the agenda in August.

III. PRESENTATIONS & REPORTS:

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO AN APPROVED CONDITIONAL USE PERMIT TO INCLUDE THE PROJECT IDENTIFIED AS LANDMARK AVIATION – FIXED BASE OPERATION AND AIRPORT HANGAR, LOCATED AT 275 WRIGHT BROTHERS WAY, FOR A 23,100 SQUARE FEET AIRCRAFT STORAGE HANGAR AND 5,500 SQUARE FEET OF OFFICE SPACE

ORDINANCE NO. 3641 - ORDINANCE AMENDING AN APPROVED CONDITIONAL USE PERMIT TO INCLUDE THE PROJECT IDENTIFIED AS LANDMARK AVIATION – FIXED BASE OPERATION AND AIRPORT HANGAR, LOCATED AT 275 WRIGHT BROTHERS WAY, FOR A 23,100 SQUARE FEET AIRCRAFT STORAGE HANGAR AND 5,500 SQUARE FEET OF OFFICE SPACE

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 6:00 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing. Councilman Newman specifically pointed out that he currently serves on the Airport Authority and they have discussed general development plans but would base his decision solely on what is before Council at this hearing.

City Attorney Oast said that the Authorized Practice Committee of the North Carolina State Bar has issued an advisory opinion that appearing in a representative capacity for a party before a local governmental body in a quasi-judicial proceeding is the practice of law, especially with respect to such aspects of the hearing as examining or cross-examining witnesses, or advocating for legal conclusions or results. This does not prevent persons, including land use professionals, from presenting information or expressing opinions within their knowledge or area of expertise.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Jessica Bernstein submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Bernstein said that this is the consideration of an amendment to an approved conditional use permit to include the project identified as Landmark Aviation – Fixed Base Operation Office and Airport Hangar, located at 275 Wright Brothers Way, for a 23,100 square feet aircraft storage hangar and 5,500 square fee of office space.

The applicant is requesting review of site plans for a new airplane storage hangar and fixed base operation office at the Asheville Airport (Attachments to City Exhibit 3 – Site Plan, Aerial Map and Aerial Map with Amendment). This project is being considered as an amendment

to the previous Conditional Use Permit (#08-1395) which was considered as a Level III review pursuant to Section 7-5-9(a)(1)b. of the Unified Development Ordinance (UDO), which states "properties located within 1,500' of each other, under the same ownership and/or developed by the same developer over a period of 3 years or less shall be considered to be one development and reviewed as such."

The project site is a leased portion of a 535 acre parcel (according to submitted site plans) containing the Asheville Regional Airport. The site is located at the northwest corner of Wright Brothers Way and Lindbergh Lane, north of the Asheville Regional Airport passenger terminal and the previous hangar project. The site and surrounding properties are zoned Industrial. The applicant is proposing to construct a 23,100 square foot aircraft storage hangar with a 5,500 square foot office space. The structure will be 38 feet in height (Attachment to City Exhibit 3 – Conceptual Site Layout).

Landscaping on the site includes a street buffer, street trees along Wright Brothers Way, vehicular use and building impact landscaping. A small parking lot is included and plans as proposed include 44 spaces, which exceeds the maximum parking range by 14 spaces, however staff is supportive of this excess as the lot will accommodate not only the new structure but also supports other buildings in the vicinity.

Ordinarily this project would be considered as a Level 1 on its own, however due to Section 7-5-9(a)(1)b. listed above and the projects approved in the past three years (Level 1 - May 2007; Level 2 - August 2005; Level 2 – March 2005; CUP – May 2008), this proposal is being considered as an amendment to the previous CUP.

City Council must take formal action as set forth in Section 7-5-5(e)(3) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case pursuant to Section 7-16-2(c). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. That the proposed use or development of the land will not materially endanger the public health or safety.
   The project will meet State building code requirements and will be reviewed in detail by the Technical Review Committee to ensure compliance with safety requirements.

2. That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.
   All land in the immediate vicinity of the site is also operated by the Asheville Regional Airport and supports private and public aviation. The proposed airplane storage hangar and FBO will support and complement adjacent uses. There are no significant or topographic features on the site that raise any conflict other than the need to plant some of the required landscaping offsite, due to the nature of the bulk of the parcel as paved apron area for flight craft.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.
   Abutting property is also owned by the Asheville Regional Airport. The proposed airplane storage hangar and FBO supports and complements the existing uses, especially due to existing storage hangars being currently filled to capacity. It should not injure the value of abutting or adjoining property.

4. That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.

The proposed airplane storage hangar and FBO is similar to other storage hangars in the immediate vicinity and is compatible with the adjacent public airport. This proposal is in harmony with the scale, bulk, coverage, density and character of the other uses in the area.

5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.
The 2025 Plan identifies that the airport is a "major economic generator for the community, with an estimated $199.8 million in annual direct, indirect and multiplier benefits, creating an estimated 2,956 jobs." Improvements to the airport, such as this one, assist in maximizing the efficiency and success of this regional transportation hub. General aviation additions are specifically stated as a needed long-term improvement of the Plan (pg. 146). Improvements to the Asheville Regional Airport indirectly support the City's goals relating to Economic Development and Sustainability, as maximizing the efficiency of the airport will make it easier for visitors (and residents) to travel to and from the area.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.
The proposed hangar and FBO is located just off I-26 at the Airport Road exit within the Asheville Regional Airport, which places the project in an easily accessible and appropriate location. The project has been reviewed by the Technical Review Committee and has been found to have adequate access to infrastructure.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.
Based on the proposed use of the subject project, it is reasonable to conclude that it would probably generate very little new traffic. The project will provide basic office use and covered storage for airplanes and it will more than likely serve the airplanes that already exist. Therefore, the overall traffic impact in the immediate area of the subject project should be minimal.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

As an amendment to a Conditional Use Permit, this project was not required to be reviewed by the Planning & Zoning Commission. It was approved with conditions by the Technical Review Committee on June 16, 2008.

Pros:
- Proposal contributes to the efficiency of operations at the Asheville Regional Airport.
- Parking lot will serve the needs of other existing storage hangars on the site and assist in complying with federal regulations.

Con:
- None identified

Staff recommends approval of the airplane storage hangar and fixed base operation subject to the standard conditions.

Mr. Alan Ditmore spoke against the amendment to the conditional use permit in that aviation is doomed as it wastes tremendous amounts of oil.

Mayor Bellamy closed the public hearing at 6:07 p.m.

After finding that the request is reasonable based on information provided in the staff report and stated in the staff recommendation, Councilman Newman moved to adopt Ordinance No. 3641 to approve the amendment to the Conditional Use Permit adopting the proposed master plan for the Landmark Aviation FBO & Aircraft Hangar, subject to the following standard conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (5) This project will undergo final review by the TRC prior to issuance of any required permits. This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 9

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE FOR THE PURPOSES OF FILLING IN MISSING INFORMATION, CORRECTING MISTAKES, RESOLVING DISCREPANCIES AND CLARIFYING THE ORDINANCE AS IT RELATES TO SIGN REGULATIONS

ORDINANCE NO. 3642 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE FOR THE PURPOSES OF FILLING IN MISSING INFORMATION, CORRECTING MISTAKES, RESOLVING DISCREPANCIES AND CLARIFYING THE ORDINANCE AS IT RELATES TO SIGN REGULATIONS

Mayor Bellamy opened the public hearing at 6:08 p.m.

Urban Planner Julia Cogburn said that this is the consideration of many amendments to the Unified Development Ordinance (UDO) for the purposes of filling in missing information, correcting mistakes, resolving discrepancies, and clarifying the ordinance as it relates to sign regulations. This public hearing was advertised on July 11 and 18, 2008

Working with the UDO on a daily basis, the Planning and Development staff has noted a number of instances where the ordinance contains discrepancies, is incomplete, or needs clarification. Staff compiles these issues as they are noted and regularly proposes amendments to correct these situations and to make the UDO a clearer document for staff and public use. She reviewed the various set of amendments which deal with sign regulations.

Regarding the Strategic Operating Plan, this ordinance supports the Council goal of completing UDO amendments to improve clarity and address community goals.

Pros:

- Codifies past staff interpretations on issues concerning sign standards.
- Adds language to address sign regulations on which the code is now silent.
- Adds language to aid in clearer enforcement actions.
- Changes standards to make consistent with other City regulations.

Con:

- None Noted.

The Planning and Zoning Commission of the City of Asheville, at a meeting on July 2, 2008, unanimously (6-0) recommended that City Council adopt the ordinance amending Chapter 7 of the Code of Ordinances of the City of Asheville with one minor clarification. No one spoke on the proposed amendment.

City staff recommends City Council adopt the amendments to the UDO for the purposes of filling in missing information, correcting mistakes, resolving discrepancies, and clarifying the ordinance as it relates to sign regulations.

Mayor Bellamy closed the public hearing at 6:15 p.m.

Throughout discussion regarding the various amendments, the following two amendments were agreed upon by the majority of Council: (1) In Section 7-13-02 (d) (1), Signs Exempt from Permit Requirements, Real Estate Signs be amended by adding the following sentence at the end of (1): "A minimum setback of five (5) feet is required."; and (2) Section 7-13-3 (3), Signs Prohibited in All Zoning Districts, Signs on Vehicles, be amended by deleting the last sentence ("Such vehicles must also be used periodically during the normal course of business") and replacing it with the following: "Such vehicles must also be used weekly during the normal course of business." (underlining denotes changes)

Councilman Newman moved for the adoption of Ordinance No. 3642, with the two amendments noted above. This motion was seconded by Councilwoman Jones and carried on a 4-3 vote, with Mayor Bellamy, Councilman Mumpower and Councilman Russell voting "no."

City Attorney Oast noted that because of the vote, this ordinance would need to come back to Council at their next formal meeting for a second and final reading.

ORDINANCE BOOK NO. 25 – PAGE 14

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO CREATE NEW ALLOWANCES FOR THE EXPANSION OF EXISTING OR PLANNED GATED COMMUNITIES

ORDINANCE NO. 3643 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO CREATE NEW ALLOWANCES FOR THE EXPANSION OF EXISTING OR PLANNED GATED COMMUNITIES

Mayor Bellamy opened the public hearing at 6:31 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of many amendments to the Unified Development Ordinance (UDO) to create new allowances for the expansion of existing or planned gated communities. This public hearing was advertised on July 11 and 18, 2008

Ms. Tuch said that this amendment is brought forward for your consideration at the request of Biltmore Farms. In 2007, City Council reviewed and approved a prohibition on gated communities in Asheville's jurisdiction. Once made effective, this prohibition applied to all properties not already developed as gated communities or otherwise approved and permitted as a gated community; the prohibition did not contemplate property that was in possession, marketed, or otherwise encumbered for the purpose of developing or expanding a gated community. This amendment seeks to offer relief for those rare instances. Staff is only aware of two situations where this amendment would be exercised and they are both Biltmore Farms developments.

The amendment would add the following explicatory sentence to the following prohibited use: "Gated Communities. This shall not include those gated communities lawfully established

prior to June 12, 2007, or extend to those properties acquired as part of such communities prior to June 12, 2007, provided it can be demonstrated that these properties were included in a documented community master plan."

Regarding the Strategic Operating Plan, this report's recommendation most appropriately addresses the goal of *sustainability* by supporting a variety of housing choices.

Pros:

- Accommodates a legitimate economic interest and expectation
- Supports another form of housing and community choice for residents

Cons:

- Somewhat contrary to the prohibition – allows for the expansion of gated communities that are not approved or otherwise permitted
- Documenting ownership of property and record of master plan can prove challenging and may be subject to appeal

The Planning & Zoning Commission reviewed this amendment at their July 2, 2008, meeting where it was approved unanimously by a 6-0 vote, with one member absent.

Supporting this amendment will have a positive fiscal impact through higher valuations of new properties that are supported minimally by City services.

City staff recommends City Council adopt the amendment to the UDO to create new allowances for the expansion of existing or planned gated communities.

Mr. Alan Ditmore felt there are only two groups that have the need for gated communities for heightened security, those being abortionists and gays.

Mr. Chad Lloyd, representing Biltmore Farms, spoke in support of this proposed amendment and explained how this amendment is necessary to prevent an unfair and injurious application of the existing ordinance to neighborhoods, homeowners and developers who have a legitimate economic, personal, health and welfare interest in preserving their gated communities as they were when they were proposed, developed (and continue to be developed), sold (and continue to be sold) and occupied.

Mr. Jesse Junior was concerned about what a gated community says about Asheville.

Mayor Bellamy closed the public hearing at 6:40 p.m.

Councilman Newman moved for the adoption of Ordinance No. 3643. This motion was seconded by Vice-Mayor Davis and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 17

V. UNFINISHED BUSINESS:

A. MOTION TO ACCEPT THE WATER LINE EXTENSION INCENTIVES PARTICIPATION AND EVALUATION FORM FOR AFFORDABLE HOUSING AND INFILL DEVELOPMENT

Water Resources Director David Hanks said that on November 27, 2007, City Council approved participation in funding water line upgrades and/or extensions for promoting affordable housing and infill development in areas where the current water lines or no water lines exist to support new development. At that time, Council directed the Sustainability Advisory Committee

on Energy and the Environment (SACEE) to review the form and add energy and environmental elements to the proposed form.

After a sub-committee of SACEE drafted changes to the original form (with informal approval), on February 29 2008 Water and Public Works staff met with representatives from Mountain Housing Opportunities, Habitat for Humanity and Pisgah Legal Services to review the SACEE's draft form and scoring criteria. Based on these stakeholder's input, staff made further revisions to the form to include scoring 'weights' which provide a flexible means to attain necessary points. Subsequent follow up dialogue never resulted in unanimous consensus by the stakeholders.

On June 13th staff presented the revised form to the full SACEE for review and disposition. They added areas for smart growth, affordability, water conservation and energy efficiency and recommends acceptance of the participation and evaluation form. Following discussion the SACEE unanimously approved the form as revised for presentation to Council.

> "SACCE supports the Water Line Application and Evaluation Form for Affordable Housing and Infill development in recognition that long term community sustainability involves economic, environmental, and social considerations and that this form provides a good first step towards balancing the aforementioned tenants of sustainability."

On June 19th staff provided the revised form to the Mayor's Affordable Housing Taskforce for review and comment. The Task Force provided no comments or questions regarding the form.

This action complies with the City Council Strategic Operating Plan in that it addresses the following goals: (1) Pursue strategies to increase the supply of sufficient, safe and affordable workforce housing opportunities; (2) Reduce energy consumption in privately owned buildings; and (3) Promote sustainable, high-density, infill growth that makes efficient use of existing resources

Pro:

- This application and evaluation form will address affordability of projects, land use, water conservation and energy efficiency of new projects.

Con:

- These requirements could add cost to projects which could affect the affordability of housing units.

The fiscal impact is $500,000 annually to the Water Fund.

Staff recommends City Council accept the Water Line Cost Participation Application and Evaluation Form

Ms. Cindy Weeks, representing Mountain Housing Opportunities, supported the program and said that if the program is approved, they plan to use the proceeds, they get through the incentive monies, to increase the affordability of their units. She did have some mixed feelings about the results, especially in the definitions of affordable and green building, but staff has made numerous compromises. She felt that with this point system, there will be some changes that need to be made as they move forward. She asked for Council's consideration, if there are adjustments to the point system or some definitions after approved, that it be allowed to be done by the Housing & Community Development Committee.

Councilwoman Cape said that the Housing & Community Development Committee talked about the various incentives that were put forward. And, the SACEE Committee is looking at

incentives for energy efficiencies. She felt this document is a good start but it's not the end product. She felt the end product will be a comprehensive program that offers a variety of incentives and rebates and supports achieving the strategies Council has put forward. Those strategies are not only affordability and green, but safety incentives as well.

Councilman Mumpower could not support the motion as he felt the water customers will be paying for Council initiatives.

Councilwoman Jones felt the City Council owns their own water system and they can promote the public goals – one of which is affordable housing. She felt that one of the biggest barriers for affordable housing is the running of water lines. She also pointed out that one of the best things we can do for the environment and sustainability of our community is to be able to build closer in, so we are not traveling back and forth. She hoped this program will be a model for other communities in North Carolina.

Councilman Newman supported the program as well in that people want to see Asheville remain a place for people who work here to live here.

Vice-Mayor Davis supported the program but noted why there may not have been consensus on some of the items. If the program is approved, he asked that staff track the performance of the program to see if more units are on the ground and that this issue be revisited in one year to see that progress.

Councilwoman Cape moved for the adoption of the Water Line Cost Participation Application and Evaluation Form and that staff track the performance of the program to see if more units are on the ground and that this issue be revisited in one year to see that progress. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote, with Councilman Mumpower and Councilman Russell voting "no."

B. RESOLUTION NO. 08-159 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONTRACT WITH CORT ARCHITECTURAL GROUP, P.A. TO PROVIDE CONSTRUCTION PLANS AND DOCUMENTS, AND CONSTRUCTON ADMINISTRATION SERVICES TO REPLACE THE EXISTING ROOF ON THE CIVIC CENTER ARENA AND CONCOURSE WITH AN ENVIRONMENTALLY SENSITIVE HIGH EMISSIVITY ROOF

Director of Transportation and Engineering Cathy Ball said that this is the consideration of a resolution authorizing the City Manager to execute a contract with Cort Architectural Group, PA in the amount not to exceed $132,099 plus a contingency of $20,000 to provide construction plans and documents, and construction administration services to replace the existing roof on the Civic Center arena and concourse with an environmentally sensitive high emissivity roof.

In July 2007, Council authorized Cort Architectural Group, PA to complete a structural analysis to determine if the existing truss system on the Civic Center arena and concourse could support a living roof. The analysis determined the existing structure could not support the load necessary to support a living roof without additional reinforcement. The cost of the additional reinforcement is estimated at $36,500. This price does not include the removal of lead primer paint that will need to be removed prior to reinforcing the members. Even with the additional reinforcement, the consultant could not with certainty say that truss tees used would support an intensive living roof.

During this evaluation period, the Civic Center roof has continued to deteriorate. Patrons at several events over the past few months have been relocated due to leaks in the roof. Due to the need to replace the Civic Center roof as soon as possible, staff recommends that construction plans and documents be completed to begin the replacement of the roof. Staff recommends that the existing roof be replaced with an environmentally sensitive high emissivity roof.

The Civic Center Commission unanimously approved the resolution.

This recommendation complies with City Council's 2008-09 Strategic Plan by providing a green alternative roof option and sustainability of addressing capital needs of the Civic Center.

Pros:

- The development of the plans and specifications can begin within the next four weeks. The construction phase of the project could begin spring 2009, pending the scheduled events at the Civic Center.
- The cost of the project continues to increase due to rising oil prices. Expediting the project will help keep these increases to a minimum.
- An environmentally sensitive high emissivity roof reflects light thus reducing cooling costs.
- The recommended roof decreases the heat island effect in downtown.
- A living roof is expected to cost an additional $1.3 million, which is not currently budgeted.

Con:

- Staff had hoped to replace the existing roof with a living roof. Due to the uncertainty of our ability to structural support a living roof and the continued deterioration of the existing roof, we recommend moving forward with the environmentally sensitive high emissivity roof.

Funds for the development of the construction plans, specifications and construction administration have been budgeted in the Civic Center Capital Budget.

City staff recommends City Council consider of a resolution authorizing the City Manager to execute a contract with Cort Architectural Group, PA in the amount not to exceed $132,099 plus a contingency of $20,000 to provide construction plans and documents, and construction administration services to replace the existing roof on the Civic Center arena and concourse with an environmentally sensitive high emissivity roof.

Mr. Alan Ditmore spoke against the resolution in that the building is for entertainment which is not a human need. He felt the site should be used for high density affordable housing.

Mr. Dennis Justice supported the resolution. He felt that regardless of what is done with the facility, the roof has to be replaced.

Councilwoman Cape was frustrated that it has taken a year to have someone look at the question of whether it was feasible for a green roof on the Civic Center. In addition, from the beginning no one thought an extensive roof would work and always believed if there was going to be a green roof, it would be a light-weight green roof. And, to have this report come back and say it won't support an extensive roof was nothing new. She felt that green roofs are seen as a viable an important resource in many communities. In the future, she hoped that when Council asks for a fair analysis to come back, that it be done in a timely fashion. She would continue to push for new technologies to see if they are applicable in our community.

In response to Councilman Mumpower, Mr. John Cort, representing Cort Architectural Group, P.A., explained the different kinds of roofs.

In response to Councilman Mumpower, Ms. Ball said that the City has spent $18,000 (this contract with Cort Architecture) on studies related to a living roof. Regarding delays, she said there was about a 4-month delay in getting the contract to Mr. Cort to execute and the green roof issue has taken approximately six months.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 08-159. This motion was seconded by Vice-Mayor Davis and carried unanimously.

RESOLUTION BOOK NO. 31 – PAGE 259

C. DIRECTION FOR NEXT STEPS IN THE CITY-OWNED PROPERTY REQUEST FOR PROPOSAL PROCESS

Economic Development Director Sam Powers said that this is the consideration by City Council of direction for next steps in the City owned property Request for Proposals (RFP) process for Eagle Market properties and for Park Maintenance properties.

The City has engaged in a Request for Qualifications/Proposals (RFQ/RFP) for potential redevelopment of three city owned/controlled properties to achieve strategic economic and community development goals. At the April 22, 2008, City Council meeting, staff was directed to proceed with negotiations for a draft development agreement on the Haywood Street properties. Staff expects to return to Council in the next 90 days with an update on Haywood Street site. At the April 22nd meeting Council also directed staff to continue due diligence on the Eagle Market site and the Park Maintenance site. Status and recent activities are outlined below.

The RFP process addresses multiple goals of the 2008-09 Strategic Plan. Specific goals include: (1) Promote sustainable, high density infill growth that makes efficient use of existing resources; (2) Develop and implement the comprehensive affordable housing plan and proactively pursue strategies, including completing the city-owned land redevelopment process, to increase the supply of workforce housing; (3) Support diversified job growth and small business development; (4) Reduce energy consumption in privately owned buildings; and (5) Increase downtown cleanliness and beautification efforts.

Pros:

- Provides reinforcement to the RFP process.
- Proposals meet multiple Council Strategic Goals.
- Proposals meet multiple goals of 2025 Plan.
- Job creation (construction and permanent).
- Proposals received are consistent with Asheville's moderate, stable growth market.
- Proposals received are in the small to mid-scale range.

Cons:

- Extends the time frame for possible work force housing at Park Maintenance site.
- Cost-benefit of relocation of municipal facilities.

There is no immediate impact. Intermediate and long term impacts include: (1) Tax base enhancement by returning public sites to private sector; (2) City Council has indicated that proceeds from sale of land be directed to provide workforce housing opportunities; and (3) Relocation of existing city facilities at Park Maintenance to other city property will require up fit for Parks Department use, but will allow site development thereby eliminating negative equity of Park Maintenance site.

City staff recommends City Council approve a motion to move forward with recommended next steps: (1) Allow staff and Eagle Market Street Development Corporation (EMSDC) to enter negotiations with Eagle Market Renaissance LLC to draft a development agreement that outlines roles and responsibilities of City, EMSDC, and developer Eagle Market Renaissance; and (2) Allow staff to enter into negotiations with MHO to draft a development

agreement, including a Purchase and Sale Agreement, that outlines roles and responsibilities of City and MHO.

Councilwoman Cape moved to excuse Councilwoman Jones from participating in the Eagle-Market Street properties matter due to a conflict of interest. This motion was seconded by Councilman Mumpower and carried unanimously. At this time, Councilwoman Jones left the Chamber.

Eagle-Market Street Properties: The development group, Eagle Market Renaissance LLC, (EMR) has proposed a mixed use residential project with street level commercial sites. The proposal is an intensified use of the existing site. There would be limited on site parking. The developer proposes historic preservation of existing facades, and to provide retail space to anchor the cultural heritage of the area. The proposal is responsive to the RFP in the following criteria: diversity of development team; proposed sustainable job creation and business incubator space; equity involvement with Eagle-Market Street Development Corporation (EMSDC); enhanced tax base; increased site density.

In summary, it has (1) mixed use, multi-family residential with street-level commercial; (2) anchors cultural heritage district; (3) African American development team; (4) EMSDC directly involved in developer discussions; (6) equity partnership between EMR and EMSDC; and (7) desire to use Section 108 and Community Development Block Grant (CDBG) funds.

Mr. Alan Ditmore felt that if developments are taller, they could provide more affordable housing with more mixed income.

Councilman Mumpower felt that due to the economic downturn and real estate market he felt we may be setting ourselves up for failure.

In response to Councilman Mumpower, Mr. Powers said that the amount of staff time involved will probably be pretty intensive. They do, however, understand this has been a high priority of Council for a long time and it's important to the community and residents of the South Pack Square area.

In response to Vice-Mayor Davis, Mr. Powers said that they will continue to conduct and open and inclusive project.

In response to Mayor Bellamy, Mr. Powers said that the City has up-to-date information posted on their website regarding these projects and initiatives.

Councilwoman Cape moved to allow staff and Eagle Market Street Development Corporation (EMSDC) to enter negotiations with Eagle Market Renaissance LLC to draft a development agreement that outlines roles and responsibilities of City, EMSDC, and developer Eagle Market Renaissance. This motion was seconded by Councilman Newman and carried on a 5-1 vote, with Councilman Mumpower voting "no" (with Councilwoman Jones being excused). At this time, Councilwoman Jones returned to the Chamber.

Councilman Mumpower moved to excuse Mayor Bellamy from participating in the Park Maintenance properties matter due to a conflict of interest. This motion was seconded by Councilwoman Cape and carried unanimously. At this time, Mayor Bellamy turned over the gavel to Vice-Mayor Davis to conduct the remainder of the meeting.

Park Maintenance Properties: This is an optimal site for workforce housing to support and link downtown, the hospital/community college district, and the river area due to the land cost basis and consistency with the neighborhood plan. The City received a proposal on May 30 from Mountain Housing Opportunities (MHO) to develop a mixed income, multifamily residential project with limited street side commercial/community space. The residential mix would include rental

and ownership. There would be potential for future phases of additional units. MHO is proposing green and sustainable design. The proposal is responsive and meets adopted neighborhood plans.

In summary, it has (1) mixed income, multi-family residential with limited street-side commercial; (2) 54 residential units (for rent and potentially for sale affordable workforce and market rate housing); (3) potential for additional units in future phase; (4) goals for green and sustainable design; (5) community room planned; (6) sustainable job creation; (7) local business involvement; and (8) consistent with West End/Clingman Avenue Neighborhood Citizens Master Plan and Clingman Forest Greenway Plan.

When Vice-Mayor Davis asked for public comments, he received none.

Councilman Mumpower reiterated his earlier comments relative to the economic downturn and real estate market.

There was a brief discussion, initiated by Councilman Mumpower, about relocating the existing Park Maintenance facilities to another location. Mr. Powers responded that staff will be making a presentation on August 19 regarding all the City's facilities, with a specific staff recommendation to move forward with relocating the Park Maintenance facilities to property already owned by the City at the Armory site on Shelburne Road.

Councilman Mumpower did not see the urgency of a Council decision on surrendering this property to a development initiative, however good, before we know the details of the proposed transition of the facility.

In response to Councilman Russell, Mr. Powers explained that part of the Park Maintenance site has topography challenges. How we utilize the remainder of the land for future phases is very much a part future discussions. He did note that part of it has been proposed for the Clingman Forest Greenway.

Councilman Russell felt ideally it would be nice to get more than just 50 units on this large site. Due to our economic climate, he wondered if this is something that should be tabled for a couple of years.

Councilman Newman supported staff moving forward on this good opportunity for quality infill development.

In response to Vice-Mayor Davis, City Manager Jackson said that the City is not boxing itself in with moving forward to the next step and that City staff is prepared to discuss the facilities master plan in August.

Councilwoman Cape moved to allow staff to enter into negotiations with MHO to draft a development agreement, including a Purchase and Sale Agreement, that outlines roles and responsibilities of City and MHO. This motion was seconded by Councilwoman Jones and carried on a 4-2 vote, with Councilman Mumpower and Councilman Russell voting "no" (with Mayor Bellamy being excused).

VI. NEW BUSINESS:

VII. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of June 13 - 26, 2008: David Albertson (Water), Bruce Fitchett (Fire), Rod Brombacher (Police), Hugh R.

Trent (Transit Services), Brenda Banks (Parks & Recreation), Timothy J. Carter (Sanitation), Ashley Bolen (Transit Services), Marian Chambers (Transit Services), Elizabeth Maskell (Police), AT&T (Water), Terry Clark (Streets), Cindy Plemmons (Streets) and Valarie Menard (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Pam Stewart presented Council with several concerns regarding the operation of the Asheville Transit System, summarized as follows: (1) Asheville Transit System is operating understaffed with presents concerns; (2) there is a serious lack of communication between the Transit Director and her staff and the transit staff; (3) bus operators are expected to maintain the time schedule on routes that are too tight to make safely; (4) members of City staff are improperly involving themselves in personnel issues concerning Union Represented Transit employees; and (5) the Transit Director, Transit Manager and Parking Manager met once a week over the past three years to report matters of concerns, but this has not happened with new Transit Director. She then described maintenance concerns including (1) upper side of Transit Center is sinking; (2) concrete in bus washer at the Haywood Street garage is deteriorating; (3) roof in the shop area of the Haywood Street garage facility needs to be replaced; and (4) damaged bus stops due to lack of communication. In addition, she raised several personnel issues regarding the Asheville Transit System.

Councilman Mumpower said that Mayor Bellamy has scheduled the transit issues to be discussed at the September 16 worksession but felt that due to the urgency of these items, that Council give some consideration to advancing this matter.

City Manager Jackson said that City staff has attempted to open the lines of communication. He said that after the presentation on June 24, 2008, staff provided Council with follow-up memo to the transit issues. Because he has not received a copy of what Ms. Stewart just presented to Council, he cannot respond without consulting with the Director of Transportation and Engineering to see if there are new issues, ones that have been addressed, if there are policy matters; or matters of contract administrative procedures. He is, however, committed to a timely response. Once he receives a copy of the material presented, he will delineate those things that are time sensitive, urgent and operational. Regarding the policy related matters, he will leave it to the Mayor's judgment as to whether or not those should be combined with the policy briefing on September 16.

Mr. Mike Fryar outlined his concerns while presenting Council with the various contracts and documents regarding the transit management contract. He then questioned a Transit Committee member's address being located in Buncombe County and not in the City of Asheville.

City Manager Jackson felt there are three issues involved (1) the verification of Mr. Yuri Koslen address (which will be addressed); (2) the contractual framework and the authorization to extend the contract (which is being addressed with the City Attorney); and (3) the protest in the middle of the contract process (which caused the City to conduct individual opportunities for the 3 finalists to make presentations which resulted in a changing of the ranking of the companies).

After a brief discussion, Vice-Mayor Davis asked that the City Manager address these matters honestly, fairly and expeditiously.

IX. ADJOURNMENT:

Vice-Mayor Davis adjourned the meeting at 8:37 p.m.

Magdalen Burleson
CITY CLERK

Jerry M Bellamy
MAYOR

Tuesday – July 29, 2008 - 5:00 p.m.
Civic Center – Thomas Wolfe Auditorium

Special Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

RESOLUTION NO. 08-160 - RESOLUTING AMENDING THE 2008 CITY COUNCIL MEETING SCHEDULE

Councilman Mumpower moved to adopt Resolution No. 08-160 amending the 2008 City Council Meeting Schedule to cancel the August 12, 2008, formal meeting. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 31 – PAGE 260

CLOSED SESSION

At 5:03 p.m., Councilwoman Cape moved to go into closed session for the following reason: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville; State of North Carolina; and Buncombe County/ The statutory authorization is contained in N.C.G.S. 143-311(a)(3). This motion was seconded by Councilwoman Jones and carried unanimously.

At 6:05 p.m., Councilman Mumpower moved to come out of closed session. This motion was seconded by Councilman Russell and carried unanimously.

ADJOURNMENT

At 6:05 p.m., Mayor Bellamy adjourned the special meeting.

Magdalen Burleson
CITY CLERK

Terry M Bellamy
MAYOR

Tuesday – August 19, 2008 - 3:00 p.m.

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

EMPLOYEE RECOGNITONS

City Manager Jackson recognized the following City Employees: (1) Greg Grayson – Outstanding Executive Manager; Michael L. Coggins – Outstanding Technical Assistant or Aide; Erika Germer – Co-Winner for Outstanding Contribution to Improvement Diversity; Sergeant Stony Gonce – Outstanding Heroic Act Award - Excellence in Public Service Awards Program; (2) Michelle Massey, Brenna Cook, Pam Carter, Sonia Salgado and Phillip Buckner – Trainer - Women's Champion Water Line Tapping Team; Erail June and Det. Mike Downing – Asheville Police Department Employees of the Year; Captain Mike McCoy - Optimist's Firefighter of the Year; Allen Dunlap - Optimist's Police Officer of the Year; and Battalion Chief Barry Hendren - Chief Fire Officer Designation.

Mayor Bellamy announced that we have a professional organization and it's Council's goal to promote our organization. She was pleased that we have new police officers that have been trained in-house; and was pleased to hear of our assistance with the Town of Brevard. She was proud of City staff and looked forward to highlighting more accomplishments.

WATER DROUGHT AND CONSERVATION UPDATE

Mayor Bellamy said that Water Resources Director David Hanks has accepted a position in Florida and it will be a great loss to our community. On behalf of City Council, Mayor Bellamy wished Mr. Hanks much success in his future endeavors.

Superintendent of Water Production Leslie Carreiro updated City Council on the water drought and Conservation Plan. The Conservation Plan includes the computerized drought model which looks at (1) historic and current precipitation and lake levels; and (2) North Fork Water Treatment Plant consumption demand. It also monitors the North Fork lake level and precipitation daily and runs the drought model twice weekly.

Current water levels and capacities include (1) system-wide capacity of 43.5 million gallons per day; (2) system-wide safe yield of 31.5 million gallons per day; (3) average daily consumption of 21.5 million gallons per day; (4) current (8-15-08) North Fork lake level is 2588.58 feet – 12.42 feet below full capacity; (5) current Bee Tree lake level is near full; and (6) Mills River Water Treatment Plant is unlimited (draws from Mills River and French Broad River).

Regarding area water usage, customers of the Asheville Water System conserve water: (1) average residential customer uses 5 CCF's per month; (2) continue to encourage customers to conserve water; (3) no large industrial users; and (4) largest customer by volume is the City of Hendersonville – wholesale customer – currently buys 1 million gallons per day – could supply up to 3 million gallons per day. The City of Asheville is continuing their conservation education program and focus on proactive media and customer awareness plan of water conservation efforts.

She said when she ran the drought model on August 14, it showed that in 10 weeks we could potentially be down 26 feet. However in 10 weeks it will be the end of October and typically with the cooler weather demands drop off and we get more precipitation.

Throughout discussion, Ms. Carreiro responded to various questions/comments from Council, some being, but are not limited to: how does Asheville citizens use of 5 CCF's per month compare to other water distribution systems; and what does the City's conservation education program consist of.

Council members voiced pleasure in noting that Asheville has been very proactive and invested in a plan that has a good drought model. In addition, Asheville's residents are very good at conserving.

When Councilwoman Jones asked about the City's conservation education program, City Manager Jackson said that he will provide Council with a status report containing the work plan for the water conservation staff person and when they will be hired. He said that staff will be coming to Council for guidance regarding public relations and marketing plan for transit and other services as well.

Councilwoman Jones said that the Revenue and Finance Committee will look at our water rate structure of the more you buy, the less it costs. She felt that that issue needs to be reviewed and some decisions made before the state imposes their standards upon us.

Mayor Bellamy stressed that Asheville is willing to sell water to the City of Hendersonville noting that we have the capacity to provide 3 Million gallons per day to them.

City Manager Jackson said that Asheville has been in regular conversations with Henderson County and the City of Hendersonville, both of whom are aware that Asheville has the ability to sell additional water to them. He noted that he has also spoken with the Town of Marshall regarding their options regarding water.

Councilwoman Cape noted that Asheville has undertaken a huge water conservation program of repairing major water lines.

UPDATE ON I-26 CONNECTOR PROJECT

Mr. Derrick Weaver, N.C. Dept. of Transportation (NCDOT) Project Engineer, updated Council on the latest alternative. He said that earlier this year Figg and Lockner presented the N.C. Dept. of Transportation an alternative that was an attempt to bring the original Asheville Design Center (ADC) alternative to the same design standards as the other alternatives in Section B. Regarding the revised ADC alternative, several iterations were made to address design and capacity concerns. On June 28, 2008, the NCDOT did accept the Figg and Lockner design, called Alternative 4-B, with the acknowledgement that is still a need for future refinements, particularly at some of the ramp intersections. As further refinements are made, the NCDOT will discuss them with the Technical Review Committee. In order to proceed with project development, they will hold a public hearing on September 16, 2008, at the Renaissance Hotel and will show Alternative 4-B, as well as the other alternatives in the draft Environmental Impact Statement (EIS). There will be a local officials meeting at 11:00 a.m., followed by a public open house from 3-6:30 p.m. and then the formal presentation at 7 p.m. – all on September 16. He said that Figg and Lockner delivered quantities for their alternative to the NCDOT last week and they are currently working to prepare a cost estimate for the September 16 public hearing, so that alternative will be comparable with the other alternatives. They will have a map displaying this alternative as well as the other alternatives. At the public hearing there will also be visualizations on all of the alternatives, including Alternative 4-B. They are giving the Aesthetics Advisory Committee an opportunity to have input on the visualizations. The next step in the process is to hold the September 16 public hearing. After the public hearing they will review the public

comments and reassess the schedule. However, currently they are on track to meet the currently funded Transportation Improvement Plan (TIP) right-a-way and let schedules. Once they have the cost estimates and the preliminary designs for Alternative 4-B, they will be able to address the human and natural environment impacts so they will be comparable with the other alternatives. At that time, they will determine if they need to include that in a supplemental draft EIS.

Throughout discussion, Mr. Weaver and Mr. Alan Thornburg, Board Member on the N.C. Dept. of Transportation, responded to various questions/comments from Council, some being, but are not limited to: why Alternative 4-B isn't already included in the draft EIS; Alternate 4-B originally had the intersection with Patton Avenue going under it and now the current plans envision it going over Patton Avenue; will economic opportunities for the City be considered with Alternative 4-B; is there any change in the timeline; is there an informal cost estimates of Alternate 4-B; what is the revenue picture for the NCDOT going forward with this project; what is the revenue drop this quarter compared to this quarter last year; when will the community know what pieces of property will be acquired and the date for the preferred alternative; and has Buncombe County been updated on this project by the NCDOT.

Mr. Weaver said that they have worked hard and close with the team of Figg and Lockner to make sure that this project stays on schedule.

Mayor Bellamy noted that the 21st Century Transportation Committee recently met and they heard that the funding for the first phase for this project is in place.

Councilwoman Cape felt we will be seeing dramatic changes in the role of transportation.

In response to Mayor Bellamy, Mr. Weaver said that the preferred alternative will be chosen next year and then a final design public hearing will be held in 2010. Then right-of-ways will be acquired in 2011.

Mayor Bellamy noted that information is available to the community on the NCDOT website at www.ncdot.org along with information on the City's website at www.ashevillenc.gov.

FACILITIES MASTER PLAN UPDATE

Assistant City Manager Jeff Richardson reviewed with Council the following PowerPoint presentation:

Facilities master planning is planning to provide for the orderly growth and location of municipal services to best serve citizens. It addresses immediate needs while remaining flexible enough to respond to future changes. It's purposes are (1) it identifies opportunities to improve delivery of services to citizens; (2) it evaluates land values and land use compatibility in the context of overall community development goals; and (3) it's a long-term financial planning tool.

We are proceeding with the facilities master planning now in order to (1) achieve City Council's strategic goals (a) sustainable – develop a long-term plan to address the city's aging infrastructure including facilities; (b) sustainable – reform and streamline the development review process to improve the customer's experience; (c) affordable – support redevelopment of city-owned land to achieve affordable housing goals; and (d) green – support energy efficient facilities and operations; and (2) align with Council's policy direction (a) facilities master planning is a component of the comprehensive capital planning effort kicking off this fall; and (b) the effort also aligns with planning efforts necessary to achieve Council's redevelopment goals of city-owned property.

Based on Council's strategic plan, policy direction and immediate facility needs in the organization, staff has started a three-phase project to comprehensively evaluate municipal facilities. Phase I is the critical needs assessment and recommendations. Phase II is a

comprehensive facility analysis included in capital planning project. And, Phase III is implementation planning for mid – and long-term needs.

Project goals include (1) achieve Council's strategic goals & policy direction (a) City Council's Strategic Plan, redevelopment goals for city-owned property, Downtown Master Plan, 2025 Plan, etc.; and (b) align with upcoming comprehensive Capital Improvements Analysis; (2) enhance service delivery/accessibility; (3) provide services at lowest possible cost; (4) emphasize proper maintenance of existing buildings; (5) plan for staffing and security needs; and (6) incorporate citizen input throughout the project.

Phase I – Complete a space needs analysis for critical areas: (1) focus on facilities where lack of space for staffing and/or public access is expected to have a negative impact in the next 12-24 months; (2) develop recommendations for mitigating space constraints while improving customer service and aligning with long-term strategic goals; and (3) timeline - (a) space needs analysis complete; (b) develop recommendations complete; and (c) planning for Fiscal Year 2009 implementation during August 2008 – June 2009.

Phase II – In conjunction with the capital planning project, evaluate all city facilities on current condition, best use, and future community needs based on growth: (1) examine facility needs in the next 5-10+ years including fire stations, police substations, recreation facilities, and other municipal facilities; (2) develop recommendations and prioritize capital projects; (3) identify funding source(s) to support facility improvements, relocation and/or deferred maintenance where necessary; and (4) timeline – capital planning project – July 2008 – Fiscal Year 2009 budget process.

Phase III – Develop implementation plan for addressing mid-term and long-term facility needs identified through capital planning project: (1) timeline and implementations will be based on findings and Council direction from capital planning project; and (2) identify opportunities to co-locate functions where appropriate and beneficial.

The purpose of this presentation is to share findings and recommendations from Phase I only and seek Council feedback on preliminary recommendations. The Phase I update includes (1) critical space needs analysis completed; (2) short-term priority projects to mitigate space and citizen service constraints identified; and (3) feasibility analysis, project planning and stakeholder input underway.

From the Phase I findings, the following are near-term priority areas. The analysis showed significant constraints in the following facilities: (1) City Hall (all floors) – impacts customer service division, development services, internal support services; (2) Public Works Building (Department of Public Works and Building Safety) – impacts development services and Public Works administrative operations; (3) Municipal Building (Police & Fire) – impacts downtown public safety operations; (4) Oakley Police Community Center – inadequate space with critical building code issues; (5) Parks Maintenance Facility (Aston area property) – inadequate space to maintain location and achieve redevelopment goals; and (6) Hunt Hill Purchasing Facility (McCormick Heights area) – inadequate space to maintain location and achieve redevelopment goals.

Regarding City Hall, the current challenges include inadequate customer parking and citizen access; space constraints; inadequate meeting space; loading/unloading challenges; long-term deferred maintenance issues; and building security.

Regarding the Public Works Facility, the current challenges include employee office space constraints; customer parking constraints; development services is fragmented between several city buildings; no opportunity to co-locate services due to space constraints; lack of storage; and lack of plans review/meeting space.

Regarding the Municipal Building, the current challenges include forty additional police personnel since Fiscal Year 2002-03; existing building space inadequate to meet service demands; inadequate storage space; inadequate customer parking; inadequate employee offices; no ability for future growth; and renovated in 1998.

The Oakley police community center is a 1910 residential structure – 1200 usable square feet; serves as northeast district office; 40 assigned sworn personnel; structural issues – space compatibility issues; and renovation analysis underway.

Regarding the Parks Maintenance Facility, the current challenges include (1) address land use compatibility issues with surrounding properties; and (2) pursue housing affordability and other strategic goals through redevelopment.

Regarding the Hunt Hill Purchasing Facility, the current challenges include (1) address land use compatibility issues with surrounding residential neighborhood; and (2) potential to pursue housing affordability and other strategic goals through redevelopment.

Phase I recommendations include (1) One-Stop Citizen Service Center (a) relocate Customer Services Division; and (b) complete planning for relocating development services in one location; (2) optimize police substation locations (a) pursue location for downtown police substation; and (b) complete renovation analysis for Oakley substation; and (3) consolidate maintenance and purchasing facilities (a) complete master development plan for Aston area property; and (b) complete master development plan for Armory property as potential relocation site for maintenance and purchasing facilities.

The One-Stop Citizen Service Center would be located in the Innsbrook Mall (a) customer services and water administration; (b) development services "one-stop-shop"; and (c) property remains past of tax base with City leasing space.

Step 1 for the One Stop Citizen Service Center would be relocation of key citizen services (1) customer service (City Hall First Floor) – citizen access for utility payments, establishing water service, processing business privilege licenses, paying parking tickets, etc.; (b) water maintenance staff dedicated to development services; (c) 60 staff total; and (d) estimated completion of Spring, 2009.

Step 2 for the Development Services One Stop Shop: (1) development review center to house key staff from Planning, Engineering, Building Safety, Fire, and Water Resources; (2) 10,180 square feet office space to Customer Service Center; (3) development review process based on improved customer experience; and (4) planning and recommendations completed June2009 and budgeting and physical implementation in Fiscal Year 2009-10.

Regarding optimizing police substation locations (1) pursue location for downtown substation; (2) complete renovation analysis for Oakley substation; and (3) evaluate all police substations in Phase II.

Regarding consolidating the maintenance and purchasing facilities (1) complete Aston area development master plan in December 2008; (2) complete Armory site development master plan in March 2009; and (3) budgeting and physical implementation is to be determined.

Next steps include (1) receive Council feedback on Phase I recommendations; (2) prepare project plans for Phase I recommendations and schedule ongoing updates; (3) incorporate implementation with upcoming capital planning project and Fiscal Year 2009-10 budget process; and (4) incorporate ongoing public participation in planning and implementation phases.

Mr. Richardson responded to various questions/comments from Council, some being, but are not limited to: is this an opportunity to eliminate some of the redundancy in the 911 PSAP; hope that we give consideration to police substations in public housing; how does Asheville measure up with other cities our population in terms of square footage that we use for City services; and are we being realistic financially in restoring the armory and moving City facilities.

Councilwoman Jones supported the next steps and hoped the One Stop Shop can proceed quickly as it will be good for the community. City Manager Jackson explained that when you change work places, lines of supervision, communication flows and business processes, it's easy to under-estimate the challenges that has and we don't want an impact on the customers. As this will be a significant change for the organization, he felt that it will take approximately 12 months to do it right, borrowing from best practices in other states and the commitment of key staff members.

In response to Councilman Mumpower, City Manager Jackson said that in terms of water customer service, there is a lease involved. They currently lease space in City Hall so it should be a neutral impact on the water rate customer. We have good negotiations with the Innsbrook Mall property and staff will be bringing that to Council with what they have offered to the City. There is an impact for moving the One Stop Shop to the Innsbrook Mall and a cost for implementing the software systems. The Park Maintenance Facility and the Hunt Hill Facility are on our own land so we are not acquiring land to relocate these facilities. We are freeing up land that we hope will go back on the tax rolls. We will also be doing as much design and master planning as we can in-house, but there will have to be some structure modifications to accommodate these facilities.

In response to Councilman Mumpower, City Manager Jackson said that we used City employee project teams in bringing this to Council.

Councilwoman Cape felt this is the right move and supported the next steps; however, she hoped to see the costs as we move forward.

Councilman Newman supported looking at these opportunities and other opportunities to put City land back into the private sector and back on the tax rolls.

Mayor Bellamy said that staff has received support from Council to move forward to the next steps. She said that accessibility and communication between departments is important to the community. Access to parking is important as well. She said that a lot of the land that we are looking at freeing up was done with redevelopment dollars and personally she will not be supportive of any additional sale. She would be open to seeing some land leases and creativity with that issue, but a lot of public dollars were used to acquire land in the East End. City Manager Jackson said that private development on long-term leases is taxable as well.

At 5:00 p.m., Mayor Bellamy announced a short recess.

TRANSIT POLICY ISSUES

Director of Transportation and Engineering Cathy Ball provided council with a memorandum dated July 15, 2008, of follow-up to transit issues from the Council's June 24, 2008, meeting; staff report and minutes of the June 10, 2008, meeting where City Council approved the professional service agreement with First Transit Inc. for management of the City's transit system; the Asheville Transit System's start-up plan action items from the new management company; and the minutes from the Asheville Transit Commission's retreat on November 9, 2007.

She explained that the Transit System's key values are (A) environmentally sustainable (1) environmentally sensitive operations; (2) response to dynamic transportation needs; and (3)

support air quality and land use goals; (B) fiscally responsible (1) reduce expenses/increase revenues; (2) accountable; and (3) effective and efficient operations; and (C) increase mobility (1) coordinate integrated transportation planning; and (2) support economy.

The system aligns itself with the Council's Strategic Operating Plan with action plans as follows: (A) affordable (1) maintain or reduce taxes (a) increase efficiency of system (new management company and Transit Master Plan); and (b) develop alternate funding sources (Transit Master Plan); (B) green (1) reduce emissions by 2% (a) evaluate current routes for efficiency (Transit Master Plan); (b) replace buses; and (c) continue implementation of PassPort Program; (2) sustainable funding sources (a) identify additional funding sources (Transit Master Plan); and (3) environmentally efficient decisions (a) develop an environmentally sustainable operations plan (environmental/management system grant and new management company); and (C) sustainable (1) leverage funding for transportation initiatives (a) increase ridership (Transit Master Plan and increase marketing initiative); and (b) identify additional funding sources (Transit Master Plan); and (2) comprehensive growth management plan (a) integrated transportation planning.

Next steps include (1) consider revised rate structure for advertising – September 2008; (2) capital purchasing – bus technology analysis – October 2008; (3) receive six-month progress report on management company transition – October 2008; (4) approve transit budget – July 2009; and (5) review and approve Transit Master Plan transition – October 2009.

Councilman Mumpower suggested seeking public input from the people that are closest to reality and encouraged the City, as part of the Transit Master Plan to ask those people to provide input. City Manager Jackson said that this is a contract and transit service employees are unionized employees. We are open to further guidance on that but previous advice would caution him against dialoging directly with the unionized employees or not holding the contractor responsible. If we are doing strategic planning and if Council is suggesting that as we do long-range planning that we encourage the contractor to gather input from the drivers, dispatch operators, etc. and feed that input into the transportation planning, he would want to be clear that would be the limit. There has been some misunderstanding about dialoging, day-to-day reporting, maintenance, etc. by the unionized employees directly to City Council. The transit employees are not City employees – they are contract employees for a management company.

In response to Councilman Mumpower, Ms. Ball clarified that the general manager for the former management company was part of the Steering Committee and was present when the Request for Proposals were being developed.

City Manager Jackson said that the new management company is systematically going through every aspect of the operation as seen on the start-up plan of action items provided to Council. They have already identified some "low-hanging fruit" problems and have remedied those. They have also identified issues with documentation internal to that operation in claims and benefits. Some of these questions were raised and looked at prior to the change of management company and were a factor in the decision to go with a new management company. There is a comprehensive transition that is taking place. Their initial work has been to manage the transition with the employees and deal with the concerns the employees had about their benefits, their compensation, supervisory relationships, etc. This is a wholesale change of a management company and we need to give them an opportunity to address the issues. If there are specific things, under collective bargaining, that union employees need to grieve and bring forward to the management company, they've had the meetings to communicate on how that occurs. If there are specific issues with the new management company's performance, those concerns can be forward to him or Ms. Ball for follow-up.

Mayor Bellamy supported the next steps outlined by Ms. Ball and supported a budget amendment being brought to Council to purchase the fare boxes.

Ms. Ball responded to Mayor Bellamy when she asked if a consolidation effort with Mountain Mobility is part of the master planning process.

When Mayor Bellamy asked if there has been any consideration to Sunday bus service, Ms. Ball said that was the Transit Commission's number one request but it was very difficult to fund due to increases already experienced as a result of gas prices. She said that it basically comes down to an economically decision. Mayor Bellamy asked for more information on that and maybe phase it in.

Mayor Bellamy supported the continuation of the route on Leicester Highway out to the Land-of-Sky Regional Council. There are great number of new residents along that route that could benefit from bus service. There is also a need that goes beyond our master planning process and that is a truly integrated transportation plan for our area. She encouraged Council to be supportive of a true multi-modal system for our region.

Councilwoman Jones spoke in support of the next steps outlined by Ms. Ball and looked forward to the updates.

Councilman Newman supported the next steps and said that a lot of positive things have been happening in the transit system. Management transitions are inherently challenging, even in the best of circumstances. Last month the ridership was 22% higher this year than 12 months ago. Some of our challenges come from our success. The community involvement process will help us tweak our system in good ways and help determine where the best places are to strategically invest in the system that will have a good return on investment.

RESOLUTION NO. 08-161 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSIONAND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE GOOMBAY FESTIVAL

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Goombay Festival on August 22-24, 2008.

The YMI has requested, through the City of Asheville Parks, Recreation & Cultural Arts Department, that City Council permit them to serve beer and/or unfortified wine at the Goombay Festival and allow for consumption at this event.

The Goombay Festival will be held on Friday, August 22, 2008, from 12:00 PM – 10:00 PM, Saturday August 23, 2008, from 12:00 PM – 10:00 PM and Sunday, August 24, 2008 from 1:00 PM – 6:00 PM within the boundaries of Eagle Street, South Market Street & Wilson Alley, as per the event area limits referenced on the accompanying site map.

This action ties into the previously approved plan for event co-sponsorships.

Pro:

- Allows fundraising opportunities for charity

Con:

- Potential for public safety issues

The fiscal impact would be the overtime pay for Asheville Police Department officers.

City staff recommends City Council adopt a resolution authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Goombay Festival.

When Mayor Bellamy asked for public comment, no one came forward.

Councilwoman Jones moved to waive the rules and take formal action at this meeting. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

Mayor Bellamy said that members of Council have received a copy of the resolution and it would not be read.

Councilwoman Jones moved for the adoption of Resolution No. 08-161. This motion was seconded by Councilman Newman and carried on a 5-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 31 – PAGE 261

BOARDS/COMMISSIONS

It was the consensus of Council to re-advertise for the east vacancy on the Citizens-Police Advisory Committee.

It was the consensus of Council to hold interviews for the Civil Service Board.

It was the consensus of Council to interview Matthew Menne, Matthew Raker, Herbert Kupfer and Ryan Blau for a vacancy on the Sustainable Advisory Committee on Energy & the Environment.

It was the consensus of Council to interview Betty Young, Mildred Nance-Carson, John Metcalf and Sara Manuel for vacancies on the Recreation Board. It was noted that Davidson Jones was previously interviewed and Wanda Hawthorne will be an interviewee as well. On behalf of the entire City Council, Vice-Mayor Davis expressed City Council's deepest sympathy to the family of Sam Camp who was a very valuable member on the Recreation Board.

It was the consensus of Council to reappoint Eric Scheffer to the Buncombe County Tourism Development Authority.

At the request of Councilman Newman, it was the consensus of Council to reschedule the Transit Commission restructuring to the September 16, 2008, worksession as he would like some additional time to prepare some materials.

Regarding the filling of a vacant Council seat, Vice-Mayor Davis submitted the following proposal: "There currently is no clear guideline to fill unexpired terms of Council members because of resignation and fourth seat replacement created by Mayoral election. There is provision for the unexpired term to be filled by approval of Council. The Boards and Commissions Committee recommends consideration of a process similar to the way other important board seats are filled, i.e., the School Board, Planning & Zoning Commission and Board of Adjustment. The opening will be advertised, applications taken, the applications interviewed by Council and finally a selection by Council vote. The individual selected will then complete the term of the resigning Council member." The Board recognized there was a lot of open-endedness in this proposal but the seat needs to be filled very quickly. It was the consensus of the Committee that the applications contain essay questions; the interviews be longer than 10 minutes; and that person vacating the seat not vote on their replacement.

Councilman Mumpower suggested the existing Boards & Commissions Committee, along with the City Attorney's input, flesh the proposal out.

There was a brief discussion about the timing of the applications, interviews and appointment of the new member. City Attorney Oast said that he would investigate when other bodies hold their swearing in ceremonies.

Councilwoman Cape felt this is an opportunity to reach out to the community in another way than an election. She felt this would be an interesting process and would like to investigate that and see what other options are.

It was the consensus of Council to ask the Boards & Commissions Committee flesh out the specifics of this proposal.

Other Items

Grove Park Inn Area Traffic Calming Project

Councilman Mumpower asked for Council discussion on the staff report on the Grove Park Inn area traffic calming project. He felt to wait until the next worksession on this item will close a window of opportunity.

Councilman Newman did not support discussing this item as he would like to have the materials first to review and be prepared.

When Vice-Mayor Davis recalled asking for this topic to be discussed in the worksession, Mayor Bellamy refreshed his memory with a telephone conversation in which he said he would wait and not request the item be placed on a worksession agenda.

In response to Councilwoman Cape, City Manager Jackson said that the only policy direction Council could give would be to reconsider the contract and stop the project.

Mayor Bellamy instructed City Clerk Burleson to place this item on the August 26, 2008, formal meeting for community input as well as Council discussion. It was the consensus of Council that the project proceed as scheduled and not stop.

City Manager Jackson said that the City has been very deliberate in getting appropriate input.

E-Verify

Councilman Mumpower asked for Council discussion on the staff report regarding the E-verify tool being made more visible on the City's website.

Councilman Newman did not support discussing this item as he would like to have the materials first to review and be prepared.

Councilman Mumpower wondered if it was possible for old issues to be automatically placed on an agenda if it is a prior open-ended issue. Mayor Bellamy recalled discussing this under the issue of illegal immigration. She said there was not policy direction other than to make people aware of this system and to make E-verify system available on the City's website. Councilman Mumpower recalled it differently in that staff was asked to develop a report for Council so they could act on that report in terms of some of the concerns raised regarding the utility of the E-verify availability on the website. Staff has now given Council the report and he felt that Council should act on the report.

City Manager Jackson felt the staff report answered the question about how the City could use the E-verify system and how it might interface with the current screening that we do. He said the second question was to look at how we make it available on our website. He felt staff

answered the questions by Council. If that suggests policy direction from Council, he would be open to that, but he didn't recall a request to develop a staff report with a recommendation for Council action.

Mayor Bellamy felt there was Council support for the E-verify link on our website and for staff to use it in the way they felt it was appropriate. She didn't recall anything having to come back to Council. She asked City Clerk Burleson to review the minutes for clarification.

Councilman Mumpower requested this item be placed on the agenda.

2008 Ambassadors for Cities Award

Mayor Bellamy was pleased to acknowledge that the National Association of Realtors presented the City of Asheville and the Asheville Board of Realtors the 2008 Ambassadors for Cities Award on August 14, 2008, in recognition of excellence in promoting housing opportunities through public-private partnerships for the work of the Mayor's Task Force on Affordable Housing and the U.S. Conference of Mayors.

She said that one of the things coming out of the report from the Mayor's Task Force on Affordable Housing was the faces of affordable housing. The Board of Realtors working with Mission Hospitals have already put together a public service announcement to talk about who needs affordable housing in our community to dispel some of the myths out there about affordable housing. She said that the Realtors are working on a plan to really look at affordable housing in our community and some alternative products for financing affordable housing.

Closed Session

At 6:23 p.m., Councilman Mumpower moved to go into closed session for the following reason: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville, State of North Carolina and County of Buncombe. The statutory authorization is contained in G.S. 143-318.11(a) (3); and (2) To establish or to instruct City staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of contracts for the acquisition of real property by purchase, option, exchange or lease. The location of the property is on Swannanoa River Road. The statutory authority is contained in G.S. 143-318.11(a)(5). This motion was seconded by Councilwoman Cape and carried unanimously.

At 7:25 p.m., Councilman Russell moved to come out of closed session. This motion was seconded by Councilman Newman and carried unanimously.

ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 7:25 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – August 26, 2008 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Robin L. Cape (Sister City visit to Osogbo, Nigeria)

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Bellamy gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "B", "D", "F", "G", "J", "K" and "N" were removed from the Consent Agenda for discussion and/or individual votes.

At the request of Mayor Bellamy, Consent Agenda Item "O" was removed from the Consent Agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE FORMAL MEETING HELD ON JULY 22, 2008; THE SPECIAL MEETING HELD ON JULY 29, 2008; AND THE WORKSESSION HELD ON AUGUST 19, 2008, AS AMENDED

At Mayor Bellamy's request, she asked that the August 19, 2008, minutes be amended and brought back to the next formal meeting for consideration.

B. RESOLUTION SETTING A PUBLIC EHARING ON SEPTEMBER 23, 2008, TO CONSIDER AN ECONOMIC DEVELOPMENT GRANT TO UNISON ENGINE COMPONSENTS (FORMERLY SMITHS AEROSPACE)

This item was removed from the Consent Agenda for discussion and/or individual vote.

C. RESOLUTION NO. 08-163 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A SERVICE AGREEMENT WITH CORESOURCE FOR THIRD PARTY ADMINISTRATOR SERVICES FOR THE CITY OF ASHEVILLE'S HEALTH INSURANCE PLAN

RESOLUTION NO. 08-164 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A SERVICE AGREEMENT WITH CAREMARK FOR PHARMACY BENEFIT MANAGER SERVICES FOR THE CITY OF ASHEVILLE'S HEALTH INSURANCE PLAN

Summary: The consideration of resolutions authorizing the City Manager to enter in to service agreements with the City of Asheville and CoreSource for Third Party Administrator services and Caremark for Pharmacy Benefit Manager services for the City of Asheville's health insurance plan.

The City of Asheville is required to provide health insurance for our City employees. In an effort to promote Council's employer of choice strategic goal by providing the best and most cost effective benefit plan and providers for our employees, the City of Asheville utilized a formal bidding process for health insurance providers as Third Party Administrators (TPA) and Pharmacy Benefit Managers (PBM). The City utilized our brokerage firm, The Ferguson Employee Benefit Agency, to facilitate this process. We received 11 proposals and 4 declinations in response to our Request for Proposals. The Health Insurance Committee, which consists of members from Finance and Human Resources, rated each proposal on the following criteria: experience doing business in Western North Carolina, cost, ability to move the Asheville Project to the next level, ability to provide data and reporting, access to predictive modeling tools and customer service.

After a thorough review, the Health Insurance Committee heard 4 presentations from TPAs and 3 presentations from PBMs. The following vendors were unanimously selected after careful deliberation and consideration of the Committee: CoreSource and Caremark.

Pros: Enhanced services to include:

- D-2 Hawkeye, the leading software for health analysis to be used in conjunction with the Asheville Project. This software will also integrate pharmacy data.
- Frequent reporting on plan experience, cost and utilization indicators.
- Performance guarantees for claims processing.
- Web and phone support tools for employees to include online disease management and cost comparison tools.

Cons:

- Possible transition issues that normally may occur when switching providers of these services.

The projected administrative costs for the new TPA and PBM service contract is $609,580 for 10 months, which represents a 15.6% increase over last year. This increase is due primarily to CoreSource's ability to provide expanded financial reporting and employee benefits management services. All bidders for these contracts proposed typical increases in administrative costs including our current provider.

City staff recommends City Council adopt resolutions authorizing the City Manager to enter in to service agreements with the City of Asheville and CoreSource for Third Party Administrator services and Caremark for Pharmacy Benefit Manager services for the City of Asheville's health insurance plan.

RESOLUTION NO. 08-163 - RESOLUTION BOOK NO. 31 – PAGE 265
RESOLUTION NO. 08-164 - RESOLUTION BOOK NO. 31 – PAGE 266

D. RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CHANGE ORDER WITH PAYNE, MCGINN & CUMMINS INC. FOR THE INSTALLATIO OF A NEW 12-INCH WATERLINE ON CLINGMAN AVENUE

This item was removed from the Consent Agenda for discussion and/or individual vote.

E. RESOLUTION NO. 08-166 - RESOLUTION AMENDING THE 2007 COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME ACTION PLAN

ORDINANCE NO. 3644 – BUDGET AMENDMENT TO AMEND THE 2007 COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME ACTION PLAN

Summary: The consideration of a resolution amending the Fiscal Year (FY) 2007-08 Consolidated Action Plan for Community Development Block Grant (CDBG) and HOME Program funding to reduce an anticipated amount of program income, and revise the program descriptions to which these funds were assigned; and associated budget amendment.

The approved 2007-08 Action Plan included an estimated program income amount of $274,000 from an anticipated sale of City-owned land on Ralph Street to Mountain Housing Opportunities (MHO). This sale did not occur in FY 2007-08, and while a future sale date is anticipated, that date is unknown at this time. MHO has also redesigned the project intended for this site to include additional land; however, the project start date is also currently unknown.

As part of the 2007-08 Action Plan process, this anticipated program income was allocated in the plan to three programs, with the proviso that funds would not be available for use until the sale was actually completed. Anticipated program income was allocated in the 2007-08 Action Plan as follows:

Agency	Program	CDBG Grant	Land Sale Revenue	Total
1. MHO	Emergency Repair Tier II	$110,000	$40,000	$150,000
2. MHO	Direct Homebuyer Assistance	$392,238	$50,000	$442,238
3. Mtn. BizCapital	Small Business Loan Pool	$68,000	$40,000	$108,000
4. --	CDBG Contingency	--	--	$144,000

In the end, each agency's program met its performance goals without needing this anticipated program income.

When a date for the land sale has been established, the revenue can be re-allocated in a future Action Plan to meet the needs identified in the City's Strategic Operating Plan and the 5-year Consolidated Strategic Plan for Housing and Community Development.

Pros:

- Corrects the Action Plan so that it accurately reflects the fiscal and programmatic reality for FY 2007-08; and
- Describes how the future land sale revenue program income will be assigned when these funds are available.

Con: None noted.

City staff recommends City Council adopt a resolution amending the FY 2007-08 Consolidated Action Plan to delete this anticipated program income and revise the plan's programs to which it was assigned; and associated budget amendment.

This item was removed from the Consent Agenda for discussion and/or individual vote.

H. RESOLUTION NO. 08-169- RESOLUTION ACCEPTING LOVERS LANE IN THE SKYLAND AREA OF SOUTH ASHEVILLE AS A CITY MAINTAINED STREET

Summary: The consideration of a resolution to accept Lovers Lane as a city-maintained street in the Skyland Area of South Asheville.

Section 7-15-1 (e) (4) (a) of the Code of Ordinances requires that streets dedicated for public uses be accepted by resolution of the City Council.

Lovers Lane is a developer-constructed street beginning at Maple Lane and ending at Pond Street that has an average width of 18 feet, a length of 0.04 mile, and a recorded 45-foot right-of-way. Since Lovers Lane was constructed several years ago, the exact timeframe is unknown, there will be no warranty period associated with its acceptance as a city-maintained street. The purpose of accepting Lovers Lane as a city-maintained street is to provide access to another city-maintained street, Maple Lane, without traveling along a privately-maintained street.

Transportation and Engineering Department staff and Public Works Department staff inspected this street and determined that its current maintenance condition is acceptable and it will not require any upgrading or improving to meet current City standards.

This action complies with the City Council Strategic Operating Plan in the sustainable focus area by adding to the street infra-structure to better serve the citizens of Asheville.

Following City Council's approval of this resolution, Lovers Lane will be added to the official City Maintained Street Inventory (Powell Bill List).

Pros:

- The City of Asheville will receive Powell Bill Funds from the North Carolina Department of Transportation (NCDOT) to help fund the maintenance of the street.
- Residential development along the subject street enhances the tax base for the City.
- The street provides connectivity within an existing residential community.

Con:

- Powell Bill Funds will not cover 100% of the total cost to maintain the street.

There will be no initial financial impact to the City, although the responsibility of maintenance will belong to the Public Works Department. The City will receive Powell Bill Funds in the future to help maintain the street. Currently, the Powell Bill Funds equate to $1,886 per mile compared to the City's maintenance cost of $8,200 per mile.

City staff recommends that City Council adopt a resolution accepting Lovers Lane as a city-maintained street.

RESOLUTION BOOK NO. 31 – PAGE 271

I. RESOLUTION NO. 08-170 - RESOLUTION SETTING A PUBLIC HEARING ON SEPTEMBER 9, 2008, TO CONSIDER THE VOLUNTARY ANNEXATION OF 131 OLD CHARLOTTE HIGHWAY, ASHEVILLE, N.C.

Summary: The consideration of a resolution fixing the date of a public hearing on September 9, 2008, for the voluntary annexation of properties located at 131 Old Charlotte Highway.

The City of Asheville Board of Alcoholic Beverage Control Board has petitioned the City of Asheville for the annexation of one parcel located at 131 Old Charlotte Highway containing a total of approximately .85 acres. The area is not contiguous to the primary corporate limits of the City and therefore is subject to the standards for annexation of noncontiguous areas contained in N. C. Gen. Stat. sec. 160A-58.1.

Pursuant to N.C. Gen. Stat. sec. 160A-58.2 such petitions must be investigated by the City Clerk for sufficiency in accordance with state law. This investigation has been completed and the Certificate of Sufficiency accompanies this petition request.

The next step in this process is for City Council to fix the date for the public hearing on this matter. Should City Council decide to proceed with this request, the effective date for the annexation would be December 31, 2008.

This action complies with the Council goal of working to enable voluntary annexation to support healthy growth of the City.

Pros:

- Complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas and meeting the goal of continued use of the urban development tool of annexation in providing for the orderly growth of the City.

Cons:

- Marginal increase in service costs.

While the property is not taxable since owned by a governmental entity, the City will receive a distribution from the profits of the store. Information from the Chief Financial Officer of the local ABC Board states that "early projections indicate that the Fairview area store would generate sales at between $1,250,000 and $1,800,000 annually. At these levels we would project the initial net income before distributions of approximately $30,000, since the Board would incur debt for the construction of the building. We believe that the benefit to the City from a store in this location will only increase in future years." Service costs will be limited to fire and police service and are not significant.

City staff recommends City Council adopt a resolution setting the date for a public hearing on the annexation petition.

RESOLUTION BOOK NO. 31 – PAGE 273

J. **RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CHANGE ORDER WITH HICKORY CONSTRUCTION COMPANY FOR THE IMPROVEMENTS AT THE NORTH FORK AND WILLIAM DEBRUHL (BEE TREE) WATER TREATMENT PLANTS**

BUDGET AMENDMENT FOR CHANGE ORDER REGARDING IMPROVEMENTS AT THE NORTH FORK AND WILLIAM DEBRUHL (BEE TREE) WATER TREATMENT PLANTS

These items were removed from the Consent Agenda for discussion and/or individual vote.

K. **RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN CHANGE ORDERS INCREASING THE PROJECT BUDGETS AND CONTRACT AMOUNTS FOR ELEVEN WATER SYSTEM IMPROVEMENT PROJECTS**

BUDGET AMENDMENT TO INCREASE THE PROJECT BUDGETS AND CONTRACT AMOUNTS FOR ELEVEN WATER SYSTEM IMPROVEMENT PROJECTS

These items were removed from the Consent Agenda for discussion and/or individual vote.

L. **RESOLUTION NO. 08-173- RESOLUTION APPOINTING A MEMBER TO THE BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY**

Summary: The term of Eric Scheffer, as a member on the Buncombe County Tourism Development Authority, expires on August 30, 2008.

At the August 19, 2008, worksession, it was the consensus of Council to reappoint Mr. Sheffer (as the individual who is involved in the tourist business and who has demonstrated an interest in tourism development but who does not own or operate a hotel, motel or other taxable tourist accommodation) to serve an additional three year term, term to expire August 30, 2011.

RESOLUTION BOOK NO. 31 – PAGE 278

M. **RESOLUTION NO. 08-174 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH IKON OFFICE SOLUTIONS TO SUPPLY COPYING AND DUPLICATING EQUIPMENT FOR THE CITY OF ASHEVILLE**

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Ikon Office Solutions to supply printing and duplicating equipment for the City of Asheville for an amount not to exceed $66,142.

City Council approved funding in the Fiscal Year 2008/09 budget for the continued lease of printing and duplicating equipment used by various departments of the city.

This contract consolidates the monthly costs of multiple printer and copier leases into a single contract to provide more cost effective operational expenses and improved service and support.

This action complies with the City Council Strategic Operating Plan in that it keeps costs for services to the public as low as possible. It is also a green focus area making use of newer, more energy efficient equipment that supports power save functions.

Pros:

- Provides for the lease of printing and duplicating machines used by city departments.
- Improves cost effectiveness and support provisions for equipment provided under this contract.

Con:

- None noted

Funding for this lease has already been approved by City Council in the 2008/09 Fiscal Year budget. This action simply seeks City Council approval of the contract.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with Ikon Office Solutions for an amount not to exceed $66,142.

RESOLUTION BOOK NO. 31 – PAGE 279

N. RESOLUTION ADOPTING CITY COUNCIL TRAVEL AND TRAININIG POLICY

This item was removed from the Consent Agenda for discussion and/or individual vote.

O. RESOLUTION MAKING PROVISINGS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE FOR THE FUNDRAISER FOR THE APPALACHIAN SUSTAINABLE AGRICULTURE PROJECT

RESOLUTION MAKING PROVISINGS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE FOR THE LEXINGTON AVENUE ARTS & FUN FESTIVAL

This item was removed from the Consent Agenda for an individual vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Jones moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Davis and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

B. RESOLUTION NO. 08-162 - RESOLUTION SETTING A PUBLIC HEAERING ON SEPTEMBER 23, 2008, TO CONSIDER AN ECONOMIC DEVELOPMENT GRANT TO UNISON ENGINE COMPONSENTS (FORMERLY SMITHS AEROSPACE)

Summary: The consideration of a resolution setting a public hearing on September 23, 2008, to consider an economic development incentive grant to Unison Engine Components.

Unison Engine Components is an internationally recognized leader in the manufacture of aerospace components with a facility in Asheville. The company is proposing new, taxable, capital investment of $15,000,000 for additional production equipment and facility improvements. Unison Engine Components has requested consideration for an incentive grant under the City of Asheville Economic Development policy. The City of Asheville is considering offering Unison Engine Components a performance-based grant totaling $236,250.

North Carolina state law requires a public hearing be held before an incentive grant can be officially awarded.

The economic development incentive grant to Unison Engine Components ties into City Council's Strategic Operating Plan as it addresses the Affordability Strategic Plan focus area by meeting the objective to support diversified job growth and small business development. The grant also addresses the Sustainability Strategic Plan focus area by promoting sustainable, high density infill development that makes efficient use of existing resources.

Pros:

- Performance driven grant that is distributed after job and investment is achieved;
- Supports job creation and capital investment in manufacturing in Asheville;
- Supports development of an identified economic cluster in the City; and,
- Supports regional and state cooperation in the project.

Con:

- Grant is formulated based on use of 75% of value of new incremental tax revenue for a 5 year period.

The project has a positive fiscal impact on tax revenues received by the city. Initially (during the grant period), the City will receive approximately 25% of the new incremental ad valorum revenues from the project, in addition to the current taxes paid by the company. After 5 years, the City will henceforth receive 100% capture of new taxes.

City staff recommends Council approve a resolution setting a public hearing on September 23, 2008, on an economic development incentive grant to Unison Engine Components.

Councilman Mumpower spoke against the action in that he felt the City is granting special deals to corporations.

Councilman Newman moved for the adoption of Resolution No. 08-162. This motion was seconded by Vice-Mayor Davis and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 264

D. RESOLUTION NO. 08-165 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CHANGE ORDER WITH PAYNE, MCGINN & CUMMINS INC. FOR THE INSTALLATION OF A NEW 12-INCH WATERLINE ON CLINGMAN AVENUE

Summary: The consideration of a resolution authorizing the City Manager to sign a change order increasing the original contract amount of $509,623 to $590,000 with Payne, McGinn & Cummins, Inc. for the installation of a new 12-inch waterline on Clingman Avenue.

At the November 13, 2007, City Council meeting, Payne, McGinn & Cummins, Inc., was selected as the contractor to install a new 12-inch waterline on Clingman Avenue at an estimated project cost of $509,623. The contractor had to navigate the new 12-inch waterline along a different route than originally anticipated due to encountering more utility lines and rock in the ground on Clingman Avenue. These conditions caused the need to purchase unexpected and additional materials, which have lead to a necessary increase in the original contract amount from $509,623 to $590,000.

This project is part of the City Council strategic plan to improve City infrastructure.

Pro:

- The new 12-inch waterline on Clingman Avenue will replace an old and undersized waterline, will coincide with planned street improvements, and will improve fire protection and the City's fire insurance rating.

Con:

- Failure to approve the increase in contract amount will result in a time delay to complete the project.

Cost of the Clingman Avenue project was initially estimated at $509,623. The $80,377 change order will increase the project budget to $590,000. These funds are available within the project budget and will not have an additional impact on the budget.

City staff recommends City Council adopt a resolution authorizing the City Manager to sign a change order increasing the original contract amount of $509,623 with Payne, McGinn & Cummins, Inc. for the installation of a new 12-inch waterline on Clingman Avenue to $590,000.

Councilman Mumpower was concerned that the City has no procedure to hold contractors accountable, in a meaningful way, to hiring legal workers.

Councilwoman Jones moved for the adoption of Resolution No. 08-165. This motion was seconded by Councilman Newman and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 267

F. RESOLUTION NO. 08-167 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT GRANT FUNDS UNDER THE N.C. OFFICE OF JUSTICE PROGRAM OF THE DEPT. OF JUSTICE FOR TECHNOLOGY IMPROVEMENTS IN THE AREA OF POLICE RADIOS FOR THE ASHEVILLE POLICE DEPARTMENT

ORDINANCE NO. 3645 - BUDGET AMENDMENT TO ACCEPT FUNDS UNDER THE N.C. OFFICE OF JUSTICE PROGRAM OF THE DEPT. OF JUSTICE FOR TECHNOLOGY IMPROVEMENTS IN THE AREA OF POLICE RADIOS FOR THE ASHEVILLE POLICE DEPARTMENT

Summary: The consideration of a resolution authorizing the City Manager to accept grant funds under the North Carolina Office of Justice Programs of the Department of Justice (JAG); and the associated budget amendment, in the amount of $19,068.

The City of Asheville has been awarded a grant from the JAG in the amount of $19,068 to be shared with Buncombe County Sheriff's Department. The Asheville Police Department (APD) and the Buncombe County Sheriff's Department have signed a Memorandum of Understanding and APD will be the grant funds administering agency. There is no local match and the City of Asheville's portion of the grant is $12,712. The purpose of the grant program is to make technological Improvements in the area of police radios for the Asheville Police Department.

Motorola, Inc. is the vendor and below is the description of the products:

XTS2500 Model III Handheld Radio:	$3,382
Extra batteries (One per radio):	$87
Noise canceling speaker microphones:	$76
Total per Radio:	$3,545
Total for three (3) complete radios:	$10,635
Total of Federal grant funds:	$12,712

This action complies with City Council's Strategic Operating Plan in the Focus Area - Safe - Asheville will be one of the safest and most secure communities when compared to similar cities.

Pros:

- Will contribute to the reduction of crime by improving the effectiveness of police officers while working special events.
- By reducing injures to law enforcement as well as the public, this will aid in quality of life issues.
- By using these grant funds for this needed equipment, APD officers will have the items they need to properly respond to violent group incidents, that budget constraints would not allow otherwise.

Con:

- The City Of Asheville and the Asheville Police Department would be required to maintain the upkeep of the equipment, replacing equipment when needed.

There is no fiscal impact with this grant as there is no match required.

City staff recommends City Council adopt (1) the resolution authorizing the City Manager to enter into an agreement with the North Carolina Office of Justice Programs of the Department of Justice for grant monies; and (2) the associated budget amendment, in the amount of $19,068.

Councilman Mumpower felt the State should fix the dysfunctional court system. Acceptance of these funds is a misinvestment of dollars as the City can't fix the court system, but they can provide for their police officers.

Vice-Mayor Davis moved for the adoption of Resolution No. 08-167. This motion was seconded by Councilwoman Jones and carried on a 5-1 vote, with Councilman Mumpower voting "no."

Vice-Mayor Davis moved for the adoption of Ordinance No. 3645. This motion was seconded by Councilwoman Jones and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 269
ORDINANCE BOOK NO. 25 – PAGE 21

G. RESOLUTION NO. 08-168 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AMENDMENT TO A CONTRACT WITH MCGILL ASSOCIATES TO COVER APPLICATION FOR CLEAN WATER MANAGEMENT TRUST FUND GRANT AND ADDITIONAL SURVEY WORK FOR THE DINGLE CREEK WATERSHED ENGINEERING ANALYSIS

Summary: The consideration of a resolution authorizing the City Manager to sign an amendment with McGill Associates for the Dingle Creek Stormwater Engineering Analysis in the amount of $21,000 for additional survey work and application of a Clean Water Management Trust Fund grant. This amendment will increase the project cost by an additional $21,000 from the original cost of $321,000. The total amount of the contract including this amendment will be $342,000.

In December 2004, City Council adopted a Stormwater Utility. As part of the budget, City Council endorsed a program for the expenditure of the funds. Of the approximate $2 million of

expected revenue, $200,000 per year was programmed to prepare stormwater master plans for watersheds. The total amount of the contract, including this amendment will be $342,000.

Staff prepared a Request for Qualifications in the summer of 2006. Ten proposals were received. Based on qualifications, staff along with citizen input selected McGill Associates to perform this work.

Staff has developed the following question and answer format to help Council and the public understand the components of a Stormwater Engineering Analysis:

- What is a Stormwater Engineering Analysis? A stormwater engineering analysis is a detailed engineering study that evaluates the stormwater drainage system in a watershed. In order to complete the study, the consultant must prepare an inventory of the drainage system. A hydraulic model is developed to analyze the capacity of the system. The model will indicate which pipes, ditches and/or streams need repair and in what priority. The study also evaluates water quality concerns such as stream bank erosion, hazardous materials, etc.

- What are the goals of a Stormwater Engineering Analysis? The goals of completing this study include the following:

    - Developing a capital improvement program that evaluates upstream and downstream impacts of improvements;
    - Prioritizing the storm drainage needs within the watershed;
    - Developing a hydraulic model that can be used to determine improvements that need to be made as part of new development; and,
    - Assisting in the justification for funding from available grants.

- What are the deliverables of a Stormwater Engineering Analysis? The deliverables of this study include:

    1. Detailed GIS Inventory of the Storm Drainage System in the watershed;
    2. Hydraulic Model of the Watershed;
    3. Capital Improvement Program of water quality and water quantity needs; and,
    4. Detailed cost estimates for the improvements.

- How do we prioritize what Watersheds get done in what order? Watershed are prioritized based on flooding, funding opportunities, opportunity to impact development and water quality concerns.

While performing this analysis it was necessary to complete $14,000 additional survey work. This additional survey work will allow us to complete our stormwater inventory for the Dingle Creek Watershed. The additional amount of $7,000 is to apply for a Clean Water Management Trust Fund Grant to complete construction of wetlands in the Dingle Creek Watershed.

This action complies with the City Council Strategic Operating Plan in the focus area of sustainable and green. This project develops a plan for needed infrastructure replacements/upgrades in the Dingle Creek Watershed. This project develops a long term plan to address the city's aging infrastructure and provides improved water quality to the area, by constructing wetlands.

This action complies with the Dingle Creek Watershed Master Plan in that the engineering analysis conducted is necessary in order to apply and obtain the Clean Water

Management Trust Fund Grant in which will be used to implement a portion of the watershed master plan.

Pros:

- Implement a portion of the watershed master plan through the Clean Water Management Trust Fund Grant
- Improve water quality to the area

Con:

- None

The original amount of the project of $321,000 was funded in a prior year budget from the stormwater utility enterprise fund. The amendment increases the contract amount by $21,000 for a total project cost of $342,000. This additional $21,000 will be funded in the 2008-2009 Fiscal Year from the stormwater utility enterprise fund.

Staff recommends City Council authorize the City Manager to sign an amendment with McGill Associates for the Dingle Creek Stormwater Engineering Analysis in the amount of $21,000 for additional survey work and application of a Clean Water Management Trust Fund grant.

Councilman Mumpower said that he made a request for an itemized list of how much money the City has spent on planning documents, consultants, etc. and until he gets clear information on our investment of dollars, he would vote against this action.

Councilwoman Jones moved for the adoption of Resolution No. 08-168. This motion was seconded by Councilman Newman and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 270

J. RESOLUTION NO. 08-171 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CHANGE ORDER WITH HICKORY CONSTRUCTION COMPANY FOR THE IMPROVEMENTS AT THE NORTH FORK AND WILLIAM DEBRUHL (BEE TREE) WATER TREATMENT PLANTS

ORDINANCE NO. 3646 - BUDGET AMENDMENT FOR CHANGE ORDER REGARDING IMPROVEMENTS AT THE NORTH FORK AND WILLIAM DEBRUHL (BEE TREE) WATER TREATMENT PLANTS

Summary: The consideration of a resolution authorizing the City Manager to sign a change order increasing the original contract amount of $6,362,500 to $6,432,261.43 with Hickory Construction Company for the improvements at the North Fork and William DeBruhl (Bee Tree) Water Treatment Plants; and the associated budget amendment.

At the March 20, 2007, City Council meeting, Hickory Construction Company was selected as the contractor to make improvements to the North Fork and William DeBruhl water plants at an estimated project cost of $6,362,500.00. During construction, defects in chemical feed lines and piping was discovered and added to the project scope. This caused a slight time delay and the purchase of additional materials, which have lead to a necessary increase in the original contract amount from $6,362,500.00 to $6,432,361.43. This is an increase of $69,861.43.

This project is part of the City Council strategic plan to improve City infrastructure.

Pro:

- This project will enhance the water system, provide better safety for employees working around water treatment chemicals, and ensure all federal and state mandated clean water drinking act regulations are met.

Con:

- Funding for this change order increase requires $69,861.43 to be reallocated from another capital project.

Cost of the Water Plant Upgrades project was initially estimated at $6,362,500.00. The $69,861.43 change order will increase the project budget to $6,432,361.43. These funds are not available within the project budget and will be reallocated from another capital project.

City staff recommends City Council adopt a resolution authorizing the City Manager to sign a change order increasing the original contract amount of $6,362,500.00 with Hickory Construction Company for the improvements at the North Fork and William DeBruhl (Bee Tree) Water Treatment Plants to $6,432,361.43; and the associated budget amendment.

Councilman Mumpower was concerned that the City has no procedure to hold contractors accountable, in a meaningful way, to hiring legal workers. It is his personal believe that the sub-contractors are hiring illegal immigrants to work on these projects.

Councilwoman Jones moved for the adoption of Resolution No. 08-171. This motion was seconded by Councilman Russell and carried on a 5-1 vote, with Councilman Mumpower voting "no."

Councilwoman Jones moved for the adoption of Ordinance No. 3646. This motion was seconded by Councilman Russell and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 276
ORDINANCE BOOK NO. 25 – PAGE 23

K. RESOLUTION NO. 08-172 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN CHANGE ORDERS INCREASING THE PROJECT BUDGETS AND CONTRACT AMOUNTS FOR ELEVEN WATER SYSTEM IMPROVEMENT PROJECTS

ORDINANCE NO. 3647 - BUDGET AMENDMENT TO INCREASE THE PROJECT BUDGETS AND CONTRACT AMOUNTS FOR ELEVEN WATER SYSTEM IMPROVEMENT PROJECTS

Summary: The consideration of a resolution authorizing the City Manager to sign change orders increasing the project budgets and contract amounts totaling $35,518,671.67 for the eleven Water System Improvement Projects to $38,331,310.67, or an increase of $2,812,639.00; and the associated budget amendment.

On November 27, 2007, the City Council approved eleven water system improvement projects as part of a $40 million revenue bond. The projects authorized for construction were estimated at $35,518,671.67. The $40 million total also included cost of issuance and engineering design charges of $4,481,328.33 for a total of $40 million.

Numerous issues have arisen since the beginning of construction on the revenue bond projects that were not accounted for in the original project bids. These issues include but are not limited to rerouting lines due to encountering unknown underground utilities; additional easement, right-of-way and property acquisitions; encountering subsurface rock which required removal; changes in N.C. Dept. of Transportation roadway repair requirements; and unsuitable subsurface conditions that required placement of crushed stone backfill. These issues have resulted in

unplanned work requirements and time delays, which lead to a necessary increase in the original contract amount from $35,518,671.67 to $38,331,310.67. Details of the cost increase are outlined in the attached document: Exhibit A.

In Fiscal Year 2007-08, some projects listed on the Water Resources capital projects list were converted to revenue bond projects once the City of Asheville received the bond funding. This freed up $3,320,000.00 in pay-as-you-go and unused funds, which were set aside in a contingency fund and is available for the revenue bond projects anticipating they would go over budget due to the nature and size of the projects. These contingency funds should cover any additional expenses associated with the revenue bond projects. The attached budget amendment appropriates those funds into the revenue bond projects. The water fund will have approximately $500,000 in additional funds available for any other unforeseen project cost increases that may occur.

All projects are funded and on or ahead of schedule. No projects have been decreased or cut due to funding issues.

This project is part of the City Council Strategic Operating Plan to improve City infrastructure.

Pros:

- Approval of the increase in contract amount will allow completion of the eleven water system improvement projects in a timely manner.
- These projects meet the City's goal to systematically repair / replace the aging water system infrastructure, improve the reliability of water service to affected customers, and improve available fire protection.
- The escalation of maintenance and repair costs for the aging water infrastructure will be reduced creating a more efficient system, which will reduce energy costs and the City's overall carbon footprint.

Con:

- Failure to approve the increase in contract amount will result in major changes in the scope of these projects, which would require some of the projects to be only partially completed resulting in failure to achieve the intended goals of the projects.

Cost of the eleven Water System Improvement Projects was initially estimated at a total cost of $35,518,671.67. The $2,812,639.00 total in change orders will increase the total project budget to $38,331,310.67. These funds are available within the revenue bond project budget and will not have an additional impact on the budget.

City staff recommends City Council adopt a resolution authorizing the City Manager to sign change orders for $2,812,639.00 additional increasing the original total contract amount of $35,518,671.67 for the eleven Water System Improvement Projects to $38,331,310.67 and further allow staff to move the additional funds as needed between the 11 projects as cost estimates come in higher or lower than expected; and the associated budget amendment.

Councilman Mumpower was concerned that the City has no procedure to hold contractors accountable, in a meaningful way, to hiring legal workers. It is his personal believe that the sub-contractors are hiring illegal immigrants to work on these projects.

Councilwoman Jones moved for the adoption of Resolution No. 08-172. This motion was seconded by Councilman Russell and carried on a 5-1 vote, with Councilman Mumpower voting "no."

Councilwoman Jones moved for the adoption of Ordinance No. 3647. This motion was seconded by Councilman Russell and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 277
ORDINANCE BOOK NO. 25 – PAGE 25

N. RESOLUTION NO. 08-175 - RESOLUTION ADOPTING CITY COUNCIL TRAVEL AND TRAINING POLICY

Summary: This is the consideration of a resolution adopting the City Council Travel Policy and Procedures.

In the past, Asheville City Council training and travel procedures followed the City of Asheville's travel policies for city employees. However, the employee policy did not provide clear guidelines for processing City Council travel forms, authorizations, and expense reimbursements.

In order to clarify specific guidelines for Council members, a new policy was drafted that provides clearly defined administrative steps for processing travel and training requests and related travel arrangements. It also outlines guidelines for incurring and processing payment for reimbursable expenses.

The policy was shared with members of the City Council Revenue and Finance Committee for input prior to its finalization. It has also been reviewed and approved by the City Attorney's Office and the Finance Department to ensure compliance with accounting, audit and legal considerations.

Pros:

- Provides clear guidelines for submitting travel requests, processing travel arrangements, and receiving timely reimbursement of travel expenses.
- Streamlines the travel authorization and reimbursement process.
- Provides more information to Council on a regular basis about the status of the training and travel budget.

Cons:

- Adjusting to changes in administrative procedures, which include the use of new forms and deadlines for processing travel arrangements.

Adoption of the policy does not cause a fiscal impact. During the Fiscal Year 2008-09 budget process, City Council approved a training and travel budget allocation for each Council member. While the attached policy references this allocation, the specific amount will be determined by Council on a year-to-year basis as part of the budget process. Staff will provide Council with a regular accounting of the training and travel budget throughout the year.

City staff recommends City Council adopt a resolution adopting the City Council Travel Policy and Procedures.

In response to Councilman Mumpower, City Manager Jackson said that the designated expense allocation this fiscal year (noting that it is approved annually by City Council) for the Mayor is $9,000 and $3,000 each for the Vice-Mayor and Council Members.

Councilman Mumpower believed this policy is an improvement over past practices; however, he was concerned that the amounts might be excessive.

Councilman Newman felt that the policy may need to be updated periodically and suggested that the policy contain the current designated expense allocations for this fiscal year.

Councilman Newman moved for the adoption of Resolution No. 08-175, amending said policy to include the $9,000 designated expense allocation for the Mayor and $3,000 each for the Vice-Mayor and Council Members for this fiscal year. This motion was seconded by Vice-Mayor Davis and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO 31 – PAGE 280

O. RESOLUTION NO. 08-176 - RESOLUTION MAKING PROVISINGS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE FUNDRAISER FOR THE APPALACHIAN SUSTAINABLE AGRICULTURE PROJECT

RESOLUTION NO. 08-177 - RESOLUTION MAKING PROVISINGS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ORGANIC FEST

RESOLUTION NO. 08-178 - RESOLUTION MAKING PROVISINGS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE LEXINGTON AVENUE ART & FUN FESTIVAL

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Asheville City Market Fundraiser on August 28, 2008; the Organicfest Festival on September 6, 2008; and the Lexington Avenue Arts & Fun Festival on September 7, 2008.

(1) Appalachian Sustainable Agriculture Project (ASAP) has requested through the Asheville Parks, Recreation & Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at the Asheville City Market Fundraiser and allow for consumption at this event.

The Asheville City Market Fundraiser will be held on Thursday, August 28, 2008, from 6:00 PM – 9:00 PM within the boundaries of the Public Works Parking Lot, as per the event area limits referenced on the accompanying site map.

(2) Imagine Center has requested through the Asheville Parks, Recreation & Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at the Organicfest Festival and allow for consumption at this event.

The Organicfest Festival will be held on Saturday, September 6, 2008 from 10:00 AM – 6:00 PM within the boundaries of Battery Park Avenue & Otis Streets, as per the event area limits referenced on the accompanying site map.

(3) Arts2People has requested through the Asheville Parks, Recreation & Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at the Lexington Avenue Arts & Fun Festival and allow for consumption at this event.

The Lexington Avenue Arts & Fun Festival will be held on Sunday, September 7, 2008 from 11:00 AM – 10:00 PM within the boundaries of Lexington Avenue, as per the event area limits referenced on the accompanying site map.

These actions tie into the previously adopted plan for event co-sponsorships.

Pro:

- Allows fundraising opportunities for charity

Con:

- Potential for public safety issues

There is no fiscal impact for the Asheville City Market Fundraiser or the Lexington Avenue Arts & Fun Festival. For the Organicfest Festival, fiscal impact would be overtime pay for the Asheville Police Department officers.

City staff recommends City Council adopt resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Asheville City Market Fundraiser on August 28, 2008; the Organicfest Festival on September 6, 2008; and the Lexington Avenue Arts & Fun Festival on September 7, 2008.

At the request of Councilman Mumpower, City Attorney Oast said that he would confirm that under state law the City is required to authorize the consumption of malt beverages and/or unfortified wine on City streets on a case by case basis.

Councilwoman Jones moved for the adoption of Resolution Nos. 08-176, 08-177 and 08-178. This motion was seconded by Councilman Newman and carried on a 5-1 vote, with Mayor Bellamy voting "no."

III. PRESENTATIONS & REPORTS:

A. ASHEVILLE AREA CENTER FOR THE PERFORMING ARTS

RESOLUTION NO. 08-179 - RESOLUTION RESERVING PROPERTY FOR A PERFORMANCE CENTER AT PARKSIDE

Project Manager and Executive Director of the Center for the Performing Arts James Baudoin said that the vision of the Asheville Area Center for the Performing Arts' vision for the performance center in Asheville is to build a state-of-the-art performance center to serve all of western North Carolina in order to enhance the unique culture and quality of life of our community.

He explained (1) the City of Asheville passed a resolution that it will continue to evaluate the feasibility of locating a new performance hall within a mixed-use development at Parkside (Resolution No. 06-217 dated December 12, 2006); (2) another resolution passed that the City of Asheville commits to support in principle the design of a facility either in an adaptive reuse or in a stand alone performing arts facility (Resolution No. 07-215 dated November 27, 2007); (3) the recommendation at this meeting is to reserve property south of Parkside and bordered by Spruce Street to the west, Eagle Street to the south and South Charlotte Street to the east, expecting that construction will commence within five years; and (4) all pertinent details will be included in a forthcoming joint development agreement between the City of Asheville and the Asheville Area Center for the Performing Arts, Inc.

Showing pictures, he described (1) the hall will be a new regional landmark for generations to come; (2) state of the art production facilities will support both local organizations and tours; (3) intimate performances by emerging cultural groups will be featured; (4) large banquet and meeting events will be held in the foyer and on stage; (5) banquet setups in lobby and main hall at Cerritos Center for Performing Arts; (6) exterior entry points will be both Parkside and facing South Charlotte Street – The project will support redevelopment along Eagle Street

and be a good partner; (7) this will be a daytime destination: inviting lobby, outdoor café, informal stage and showcase local artists; (8) professional musicians and dancers will engage the area's youth in studio instruction; (9) the center will be a home for student activities; (10) the Asheville music scene will be supported in center programming; (11) the center will be the performance home for a wide variety of artists; (12) the Best of Broadway will be offered each session; and (13) great concerts artists from country, classical and jazz music will be presented.

The site selection criteria includes availability, cost, support (government), site lines, location, access, space, red tape, neighbors, and site preparation.

He said the Parkside site was conceptualized in June of 2006. A massing study program commenced in spring of 2007. Work in the coming year will begin facility designs tailored to the site. Community involvement is a high priority.

He introduced the leadership of the Asheville Area Center for the Performing Arts Board of Directors, Board of Advisors, and Resource Council.

He said that now is the time to approve the site so they will be able to refine cost and financial issues (and cost options); conceptualize the physical layout on site; expand our projections on economic impact; forge future partnerships with our neighbors; clarify the phasing components of our project; define the opportunities for municipal involvement; and identify commercial partners for project development.

The project momentum continues as the Phase 1 fundraising campaign has been successful; the best possible site has been identified; design team selection process is now underway; and construction timeline will be established in the coming year. Process considerations for city owned Parkside site as related to the Asheville Area Center for Performing Arts.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Vice-Mayor Davis moved to adopt Resolution No. 08-179 to commit to reserve space for a performance center within the area targeted for a multi-use redevelopment project on property bounded by Marjorie Street to the north, Spruce Street to the west, Eagle Street to the south and South Charlotte Street to the east, expecting that construction will commence within five years of the date of this resolution, with all pertinent details to be included in a forthcoming joint development agreement between the City of Asheville and the Asheville Area Center for the Performing Arts, Inc. This motion was seconded by Mayor Bellamy.

When Councilman Mumpower asked if, with this action, we are binding future Councils, City Attorney Oast said that the resolution is an expression of Council's intent to work with the Center for Performing Arts' staff to place a performance center within the area. He noted that any vote tonight would not bind future Council's of this Council's intent. Again, this is not a contract – only an expression of intent.

Mr. Alan Ditmore felt the performance center is unnecessary as it serves no human need.

Mr. Steve Rasmussen felt a performance center is an excellent use of the property. He hoped that (1) the silver maple be preserved; and (2) the Hayes and Hopson Building; the stone jail; and the historic rock wall all be restored and integrated into the project.

Mr. Bill Massey, President-Elect of the Asheville Area Center for the Performing Arts Inc., spoke in support of the performance center in that it will uplift the community.

Ms. Donna Clark, Communications Director for the Pack Square Conservancy, supported the initiative which will enrich our citizens lives and ensure the quality of life for generations to come.

Vice-Mayor Davis said that the silver maple does have challenges; however, the Tree Commission will do an aggressive campaign in order to save the tree. Regarding human needs, children will have the opportunity to see performances by quality touring and local groups that will enrich their lives and provide them an opportunity they may not otherwise have. He noted that there is a lot of entertainment in the Civic Center and we still need to take care of that building.

Economic Development Director Sam Powers briefly reviewed the following staff report: "In early 2006, City Council directed staff to begin a process to review existing city owned properties for possible redevelopment to meet Council strategic goals. Eighteen city owned sites in the greater downtown area were identified as potentially suitable for redevelopment. Staff then reviewed the remaining sites in greater detail and in November 2006 presented the results to Council. Council approved moving forward with seven sites. One of the seven sites was the City Hall employee parking lot which has been referred to as "Parkside."

"The City conducted a market overview of the Asheville area to determine the best recommended approach for the seven sites. This included meetings with over 20 stakeholder groups, in addition to city staff, and quantification of Council member's goals to help prioritize the sites so they reflect highest and best use, maximize residual land values for public purpose, and reflect City Council policy objectives.

"City Council agreed that the Parkside site offered substantial potential for future development, but based on the long term seven to ten year timeline of realizing maximum development potential and public benefit, City Council agreed to withhold the Parkside property from the initial RFQ/RFP process.

"City staff has been asked to review the Parkside city owned site as it relates to a possible Performing Arts Center as a component of redevelopment of the site. City Council has indicated that it has established the existing RFQ/RFP process as an effective mechanism to help achieve City Council strategic goals. Including the AACPA in a RFQ/RFP process offers a number of potential advantages to the City for redevelopment.

Pros:

- Allows the City to author a Joint Development Agreement stipulating roles and responsibilities of various parties.
- Generates multiple responses from qualified development teams to the RFQ.
- Encourages broad range of development experience by respondents.
- City can request specific experience and qualifications/areas of expertise, including development of workforce housing, mixed use development, public performance venues, hotel and conference center development, public parking, and transit oriented development.
- Sets base line values for proposed development of the site to maximize private investment potential from site.
- Allows City to influence phasing of project to meet Council goals and market conditions.
- Allows transparency and public involvement in the process.
- Allows City to conduct marketing and advertising of the RFQ to improve the response rate.
- Leverages real estate for community benefit.

Cons:

- Limited staff resources to manage the development process for this complex public offering.

- The five-year timetable for the performance center may be ahead of the market for the private sector development component
- Construction, disruptions and temporary displacement of employee parking
- Cost of project management services

"Management of a project of this magnitude and complexity would require a commitment of existing staff resources and a compliment of professional services, such as real estate, architectural and engineering. The project management cost estimates would be developed in the course of negotiating the joint development agreement.

"Staff recommends that City Council consider the Asheville Area Center for the Performing Arts as a component in a RFQ/RFP process for development of the Parkside city owned site."

Councilman Newman asked if mixed-use meant different art uses or a performing arts center along with other types of uses on this site. He envisioned a variety of different redevelopment opportunities on this site of which a performing arts center could be a component, but would not consume the entirety of this city property.

Mr. Powers believed that the performing arts group is most interested in multiple uses on that site. That is one of the things a joint development agreement would allow us to refine – what the roles and responsibilities of each of the groups would be and also what the kinds of appropriate and highest and best uses for the site would be. Two years ago when we looked at the site, we envisioned that there would be multiple uses that could include residential uses, commercial or office uses as well as a performance center. They have not concluded that any of those would be included or excluded, but the potential of an RFP process would allow us to determine what the market could support and what might be most appropriate in terms of multiple uses on the site. From a staff perspective we are looking for uses that would be potentially other commercial type uses.

Councilman Newman supported the idea for there to be a performing arts center if the resources come together from the community to do that. And, he would like for it to be Council's goal that if it's possible (and the market supports it) that we would be able to optimally utilize that property in ways that would serve other economic development and community development goals for the City as well. He hoped there is an opportunity to do more than just a performing arts center on this large piece of property.

In response to Councilman Newman, Mr. Baudoin said that they are looking for a partnership with the City with a commercial component that can help bring about a community center. They want it to be more than just a performing arts center. It needs to have components that will compliment the uses on that site, e.g., restaurants, shops, housing. To make this project work they will have to create some significant revenue streams as an arts center and as well for the government entities that will be supporting this project. It will have to be a partnership.

Councilman Newman wanted to be clear that if there are opportunities to do private sector development in that area that not 100% of all future values from the development of the site would automatically be earmarked for the performing arts center. Mr. Baudoin responded that is not their assumption that they will try to capture every dollar related to earning potential on this block. They want to see a partnership with the government sector where everyone benefits. They do not need to have every square inch of that property serving their financial needs.

Councilman Mumpower voiced the following concerns: (1) most references are to large cities with strong city cores and most of those projects have marginal success; (2) the City has had other large projects that we haven't been able to bring the project to life; (3) timing of in the economy; (4) binding future Councils; (5) the City has a tendency to back into projects that obligates City tax dollars; and (6) the project will need either an extraordinary generous

benefactor or City taxpayers to succeed. Until he gets a sense of an extraordinary generous benefactor to take on the lion share of this project, he will not support this project that will ultimately burden the city taxpayers.

In response to Councilman Newman, City Manager Jackson said that there is no fiscal impact associated with this resolution, however, as noted in the staff report, there will be some due diligence on a joint development agreement and when that is brought back to Council (in approximately 90 days), there will be a fiscal impact.

Councilman Newman said that up to this point the study process has been raised by private dollars. He felt the resolution is basically setting aside this property. If the community can support this, this City-owned property is available for that purpose, if funds are raised by others to do it.

City Manager Jackson said that the City would be the managing partner and through negotiations with the group would determine what the cost of services would be and their financial participation covering those costs. There will be engineering, design and architectural services needed. He felt it was fair of Council to ask what their plan is for participation in those costs. At this time, our primary costs would be the in-house management and oversight of the project and in the past we have always complimented that with some outside consulting services.

In response to Councilman Newman, Mr. Powers said that as we move forward, the staff time will become more substantial. He felt that in the next 90 days there will be a fairly substantial amount of staff time in terms of project management, working with other Economic Development staff and Planning staff. As we look more at the joint development agreement and how the responsibilities of developing the site are put together, he thought we would have to look outside, because he didn't think the City has all of the expertise in-house that would be necessary to help structure those kinds of deals. He approximated 60-100 man hours based on prior experience. He did say this would be very time intensive from a staff standpoint. He felt that from a staff level, he believed that the best position for the City is to lead the process because it's our property.

Councilman Newman understood that what Council is voting on is reaffirming our support that this land is available for a project like this. It's his understanding that the City has land and we are happy to make it available, but it's different to say the City is going to financially lead this process as we have a lot of other processes going on that are important. Whether or not we decide to make an extensive financial commitment to a planning process is an entirely different matter for him.

Councilman Mumpower felt the City might be backing into dollar accountability incrementally that that's a danger. The City is interested and we want to get behind the project, but not financially.

Mayor Bellamy supported what is before Council, not a potential for what might happen in the future. She read the following paragraphs from the resolution: "Whereas, the ability to move into the next funding phase is contingent upon a site now being designated; and Whereas, the establishment of the Parkside site will provide for the next phase in project planning which will lead to construction and grand opening; Now, therefore, ..., the City of Asheville hereby commits to reserve space for a performance center within the area targeted for a multi-use redevelopment project on property bounded by Marjorie Street to the north, Spruce Street to the west, Eagle Street to the south and South Charlotte Street to the east, expecting that construction will commence within five years of the date of this resolution, with all pertinent details to be included in a forthcoming joint development agreement between the City of Asheville and the Asheville Area Center for the Performing Arts, Inc." She said that our consultants advised us that when we look at redevelopment of that site, that it would take five years. She sees this as an opportunity to do further do due diligence. They need a site in order to increase their fundraising potential.

She's excited to offer her support behind this initiative. The community has been talking for years about the importance of having a better performing arts center regardless of Asheville's size. Today Council is telling the community that we have set aside the site and believe their goal can be achieved. She felt that we can then really focus on what we want to do as a community with the Civic Center.

The motion made by Vice-Mayor Davis and seconded by Mayor Bellamy carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 294

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER PERMANENTLY CLOSING AN UNOPENED PORTION OF PEACE STREET

RESOLUTION NO. 08-180 - RESOLUTION PERMANENTLY CLOSING AN UNOPENED PORTION OF PEACE STREET

Mayor Bellamy opened the public hearing at 6:25 p.m.

Assistant Director of Public Works Richard Grant said that this is the consideration of a resolution to permanently close an unopened portion of Peace Street. This public hearing was advertised on August 1, 8, 15 and 22, 2008.

N. C. Gen. Stat. sec. 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, the adjoining property owners have requested the City of Asheville permanently close an unopened portion of Peace Street.

Public Works Department staff has researched and contacted all agencies and the Greenway Commission and determined easements are required for Progress Energy. The Greenway Commission at their meeting of 7/10/08 recommended the unopened portion of Peace Street be retained as future opportunities for greenways, bike, pedestrian or vehicular connections. The owners of the properties abutting the unopened right-of -way has committed to providing a 20 foot easement on the unopened portion of Peace Street. .

Regarding the Strategic Operating Plan, this closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pro:

- There will be no future compromise of ingress/egress to other property

Con:

- Staff can find no potential challenges regarding the closure of an unopened portion of Peace Street

There will be no fiscal impact related to this closure.

City staff recommends adoption of the resolution to permanently close a portion of Peace Street

Mayor Bellamy closed the public hearing at 6:27 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 08-180. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 31 – PAGE 296

B. PUBLIC HEARING TO CONSIDER THE ADOPTION OF AN ORDINANCE DESIGNATING THE PROPERTY KNOWN AS THE LEGAL BUILDING, LOCATED AT 10-14 SOUTH PACK SQUARE, AS A LOCAL HISTORIC LANDMARK

Historic Resources Commission Director Stacy Merten said that the petitioner has requested this public hearing be continued to October 28, 2008. Therefore, Councilman Newman moved to continue this public hearing until October 28, 2008. This motion was seconded by Councilwoman Jones and carried unanimously.

C. PUBLIC HEARING TO CONSIDER THE ADOPTION OF AN ORDINANCE DESIGNATING THE PROPERTY KNOWN AS THE JACKSON-WESTALL BUILDING, LOCATED AT 20-22 SOUTH PACK SQUARE, AS A LOCAL HISTORIC LANDMARK

Historic Resources Commission Director Stacy Merten said that the petitioner has requested this public hearing be continued to October 28, 2008. Therefore, Councilman Newman moved to continue this public hearing until October 28, 2008. This motion was seconded by Councilwoman Jones and carried unanimously.

D. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE CONDITIONAL ZONING FOR PROPERTY LOCATED AT 7 PACODA STREET REGARDING INCREASED BUILDING HEIGHT AND OTHER SITE PLAN REVISIONS FOR THE ABBERLY RIDGE PROJECT

ORDINANCE NO. 3648 - ORDINANCE AMENDING THE CONDITIONAL ZONING FOR PROPERTY LOCATED AT 7 PACODA STREET REGARDING INCREASED BUILDING HEIGHT AND OTHER SITE PLAN REVISIONS FOR THE ABBERLY RIDGE PROJECT

Mayor Bellamy opened the public hearing at 6:27 p.m.

Urban Planner Nate Pennington said that this is the consideration of an ordinance amending the conditional zoning for property located at 7 Pacoda Street regarding increased building height and other site plan revisions for the Abberly Ridge Project. This public hearing was advertised on August 15 and 22, 2008.

He said that on April 22, 2008, City Council unanimously approved a conditional zoning request, for property located at 7 Pacoda Street, from RM-8 to RB as part of a master development plan for the construction of 422 apartment units. Since the time of the zoning change and conceptual site plan approval, a number of revisions and modifications have been made to the plans. The following list provides a summary of these changes:

- A reduction in the number of total apartment buildings from 14 to 11.
- A reduction in the overall number of units from 422 to 360 (254 units in phase I and 106 units in phase II).
- The addition of one story to the "Manor Building" (building type 4 located in the center of the subject property) increasing the height from 3 stories to 4 and the unit count from 90

to 92 but decreasing the overall footprint. Further, the orientation of this building has been redesigned so that it faces south, internal to the site, instead of facing east towards Brevard Road.

- A reduction in the number of total parking spaces from 887 to 720.
- The addition of 41 accessory garage/storage units located throughout the site.
- A re-alignment of the site entrance from Pacoda Street.
- Additional impervious/open space areas interspersed throughout the site.

The changes noted above and reflected on the revised plans do not have an impact on the seven conditional use standards that were presented with the original application. Staff therefore, recommends approval of the proposed modifications pursuant to the site plans and supporting documentation.

Mr. Clay Mooney, land planner, explained in detail the site plan amendments. He felt there are very positive improvements to the project.

Mr. Alan Ditmore was disappointed with the loss of units. He hoped the owner would restore the units.

Mayor Bellamy closed the public hearing at 6:36 p.m.

After finding that the request is reasonable based on information provided in the staff report and stated in the staff recommendation, Councilman Mumpower moved to adopt Ordinance No. 3648 to approve the amendment to the conditional zoning for property located at 7 Pacoda Street regarding increased building height and other site plan revisions for the Abberly Ridge Project, as follows: (1) A reduction in the number of total apartment buildings from 14 to 11; (2) A reduction in the overall number of units from 422 to 360 (254 units in phase I and 106 units in phase II); (3) The addition of one story to the "Manor Building" (building type 4 located in the center of the subject property) increasing the height from 3 stories to 4 and the unit count from 90 to 92 but decreasing the overall footprint. Further, the orientation of this building has been redesigned so that it faces south, internal to the site, instead of facing east towards Brevard Road; (4) A reduction in the number of total parking spaces from 887 to 720; (5) The addition of 41 accessory garage/storage units located throughout the site; (6) A re-alignment of the site entrance from Pacoda Street; and (7) Additional impervious/open space areas interspersed throughout the site. This motion was seconded by Councilman Newman and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 28

V. UNFINISHED BUSINESS:

A. DISCUSSION REGARDING THE OFFER BY W&K HOTELS LLC FOR THE PURCHASE OF CITY-OWNED PROPERTY LOCATED AT 550 AIRPORT ROAD (AIRPORT HOLIDAY INN)

At the request of City staff, Councilman Mumpower moved to continue this matter until September 9, 2008. This motion was seconded by Councilwoman and carried unanimously.

B. CONSIDERATION OF THE SECOND AND FINAL READING OF ORDINANCE NO. 3642 – ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE FOR THE PURPOSES OF FILLING IN MISSING INFORMATIN, CORRECTING MISTAKES, RESOLVING DISCREPANCIES AND CLARIFYING THE ORDINANCE AS IT RELATES TO SIGN REGULATIONS

At the request of City staff, after a brief discussion on Councilman Mumpower's opinion that the continuance is being orchestrated to pass the ordinance, Councilman Newman moved to

continue the matter until September 9, 2008. This motion was seconded by Councilwoman Jones and carried on a 5-1 vote, with Councilman Mumpower voting "no."

C. DISCUSSION REGARDING CONTRUCTION EASEMENT TO ALLOW FOR A PERMANENT ROAD IMPROVEMENT ON PUBLIC LAND (PACK SQUARE PARK)

Mayor Bellamy requested this matter be continued to September 9, 2008, as reports indicate that the Judge in the Pack Square Park lawsuit plans to rule by this Friday, August 29, 2008, and this may be a moot point. In addition, she felt that on September 9, 2008, there will be a full seated Council.

Vice-Mayor Davis agreed that discussion on this conservation easement might be premature; however, time is money for the developer.

When Mayor Bellamy asked for public comment, no one spoke.

Councilman Mumpower moved to continue this matter until September 9, 2008. This motion was seconded by Councilman Russell and carried unanimously.

D. GROVE PARK INN AREA TRAFFIC CALMING PROJECT

In response to Mayor Bellamy, City Attorney Oast said that a motion to reconsider, under Council's rules and Roberts Rules of Order, has to be made at the same meeting where the action was taken and it must be made by someone who voted with the majority and it has to pass by a 2/3 vote.

Councilman Mumpower said that there was a unanimous vote about two years ago to support an undeveloped traffic calming plan in this area. A plan has now been developed and is in the process of implementation. Concerns have been raised about the extremes of this plan and that the long-term impact may be detrimental to this community as a whole as well as to the neighborhood. Based on those concerns, he asked that this item be addressed.

Mr. Ken Putnam, Assistant Director of Transportation and Engineering, said that the contract was signed on July 24, 2008, and the completion date was established as December 31, 2008. The primary purpose of traffic calming measures including speed humps is to slow traffic and/or divert traffic. As a result, all vehicles using a particular street are impacted including emergency vehicles (police, fire trucks and ambulances). There is well documented research that indicates the response times for fire trucks can be delayed three to five seconds per speed hump and ambulances carrying a patient can be delayed up to ten seconds per speed hump. City staff has met with citizens, emergency responders, and other large vehicle users, including the Public Works Sanitation Division, Asheville City Schools, and Young Transportation, to address their individual concerns and to make adjustments to the proposed traffic calming measures before they are installed. Young Transportation as well as other transportation carriers makes regular trips to and from the Grove Park Inn typically using 45-foot motor coaches. At this time, all speed humps on Grovewood Road are installed and one speed hump along Country Club Road is in place.

He said that as a result of our meetings with emergency responders and other large vehicle users, including the Public Works Sanitation Division, Asheville City Schools and Young Transportation, we agreed to make the following adjustments (after testing once the roads were painted): (1) no speed humps will be installed along Edwin Place or Kimberly Avenue (this decision was made as a part of the original design); (2) a minimum travel lane width of 12 feet will be provided on each side of all median islands; (3) the proposed median island along Kimberly Avenue at its intersection with Country Club Road will be shortened by five feet; (4) the proposed median island along Kimberly Avenue at its intersection with Evelyn Place will be shortened 10

feet (five feet on each end) to accommodate turning movements for school buses and vehicles at a private alley; (5) the proposed median island along Edwin Place at its intersection with Celia Street/Gertrude Street will be shifted five feet southward and an existing streetlight will be removed and relocated; (6) the proposed median island along Edwin Place at its intersection with Charlotte Street might be eliminated; and (7) the proposed curb extension along Macon Avenue at its intersection with Charlotte Street will be eliminated. He said the biggest area that is still not fully finalized is the median island at the intersection with Charlotte and Macon Avenue. As it's laid out the buses cannot make that turn so they are looking at some different options: (1) eliminate the median island all together; (2) possibility of an all-way stop; or (3) a speed hump. They are working with the neighborhood representatives and emergency responders and other large vehicle uses to try to find the best treatment.

Buncombe County Emergency Medical Services Director Jerry Vehaun said that he has met with Fire Chief Grayson and Mr. Putnam on this issue. He felt the City was fortunate to have Mr. Putman on staff because of his wealth of experience in dealing with traffic. Regarding emergency services, his concern is any kind of traffic calming that sticks something on a roadway, i.e., a speed hump or a blub out. One of their primary routes for ambulances is Edwin Place and Kimberly Avenue for north Asheville or Beaverdam. When a vehicle is traveling in an emergency situation, people get confused with the bulb outs and don't know where to go, thus adding an additional time delay. Also, with bulb outs if it's raining and the driver is looking for a house number, the driver may run into them doing damage to the vehicle. The speed hump, on the average, will cost an ambulance 10 seconds since they must go over them extremely slow, especially if there is a patient in the back. He supported a traffic light at the intersection of Edwin Place and Charlotte Street instead of a median island. He also supported a speed hump on Macon Avenue going up to the Grove Park Inn. He could live with the speed humps, but he didn't like them. He suggested traffic calming be with signage, especially from an emergency vehicle standpoint.

In response to Vice-Mayor Davis, Mr. Putnam said that they have done all they can do in the tweaking process. If we continue to look at other things, we would begin to eliminate these devices which would place us back into doing the whole process all over again. We've kept the integrity of the plan that 60% of the people bought into, but if we try to eliminate some of the islands beyond the intersection with Edwin and Charlotte Street, he felt we would have to start over. In our existing contract, we have the ability to remove and add certain items, but if we were to try to take 60-90 days to revamp it, we would stand to lose the contractor because he has been waiting patiently as it is and prices continue to rise.

Councilman Mumpower moved to postpone additional action on traffic calming measures within the identified project area at the discretion of our Traffic Engineer and request that he do an additional study on a timely basis for managing some of the concerns raised tonight regarding impediments to our safety vehicles and perhaps other safety concerns. This motion was seconded by Vice-Mayor Davis.

Mr. Louis Neeves, resident on Charlotte Street, read the following statement from Mr. Jerry Sternberg: "The use of signs to promote traffic calming was dismissed out of hand by the previous traffic director eliminating one of the most valuable tools available. If we are really serious about traffic calming we must increase the number and variety of signs including warning signs and traffic boards promoting driver awareness cooperation and safety consciousness. Neither the Fire Chief; Mr. Vehaun, Emergency Management Services Director; or the various bus operators were consulted or signed off on this proposal before it was submitted. A proposed traffic isle at the intersection of Charlotte Street and Edwin Place will prohibit a left turn north on Charlotte Street in order to access the two churches and the Grove Park Inn. The locals who know about this problem will use Evelyn Place as a cut through thus dramatically increasing traffic on this narrow street creating a hazard. Many tourists and large vehicles that do not know about this will have to turn right (toward town) then have to find a side street or a parking lot to make a dangerous u turn. I understand that there is a proposal to install a traffic light at this

intersection, which appears to be a very satisfactory solution. A traffic study could be done with an eye toward eliminating the light at Hillside to improve the traffic flow. The lights at Edwin and Chestnut Streets would break the traffic flow permitting Hillside traffic to safely enter Charlotte Street. The blub outs on Kimberly Avenue will narrow the traffic lanes reducing separation between vehicles especially large buses and trucks. This could lead to head on collisions or vehicles being forced off the road and making these corridors biker unfriendly. These planned obstructions will delay fire and other emergency vehicles increasing response time especially for large vulnerable senior population in this area. In the event that a terrible fire, gas explosion or even a terrorist situation occurs in such places as the Grove Park Inn, the Longchamps Apartments or Jones School an enormous number of emergency vehicles will need unfettered access to hospitals, fire and police vehicles. I am well aware that there are serious political, legal, financial and contractual issues in this matter that must weigh heavily on your decision, but public safety must trump all other concerns. Tweaking this plan will not be enough and once this is in place it will be costly to undue the mistakes. We need another meeting of all the stakeholders. Trading one set of unsafe conditions for another set of unsafe conditions is not a win for anyone."

Mr. Alan Ditmore felt the City should continue to let the City streets deteriorate and let the pot holes slow people down. He felt that traffic island would inhibit drivers from driving around bicyclists.

Ms. Glenda Burgin, Grove Park neighborhood resident, read the following statement: "This traffic calming project means so much to the safety and environment for our streets and families. For many, many years we have struggled with all the hazards associated with increased traffic in our area. The usual attempts to regulate – ticketing, signs, patrol – produced little improvement, which is why we appealed for help with traffic calming measures. Since November, 2004, when the City Council recognized this need, directed the Grove Park Inn to deposit $375,000 in the city budget explicitly for that project, and directed the city staff to begin the process, we neighbors acted in good faith. Directed by the city as to which streets and citizens (407 households) needed to be involved, we diligently 'spread the word' with small groups, newsletters, door-to-door and phone-to-phone contact and discussion. We have cooperated and successfully completed every step required, including working with traffic engineers and consultants to draw up professional, legal plans, the required six public meetings for input, the 40% and again, the 60% consent-to-approve signatures. We are presently working on plans for individual and group donations and volunteerism in maintaining the traffic islands, which are the responsibility of the residents. The input of the city staff, the Grove Park Inn, the fire, school, emergency departments, the private property owners – all that input has been considered many times over and compromises have been made. As always, some folks do miss the conversations, the meetings, the newspaper and TV articles, the notices, the emails, etc., but there has been a concentrated effort to include everyone's needs and suggestions and to constantly take time to educate those who have not been aware of each step involved in the process. It has taken these many years, a long time, but that is the only fair way. Our neighborhood feels this has been a good example of city, citizens, and corporations communicating – working together and moving forward with change. We certainly feel it was a responsible decision of the Council to approve this project. It is a huge and costly enterprise, but involves a huge and historic neighborhood ... a neighborhood that provides not only housing for taxpayers, but a great deal of employment for taxpayers ... and enjoyment, as well (the proms, dances, restaurants, annual events, etc.). Our streets which are used by so many Ashevillians and tourists are where we live (24/7). As taxpayers, we are sensitive to budget costs and restraints, which is why this collaboration of private funds from the GPI and residents, and public funds from the city is appropriate. As citizens, we want safety and service vehicles to ably navigate our streets, which is why some changes and tweaking of the original plans are necessary. Not every driver's complaint or every homeowner's complaint will be satisfied, but these proposed measures will achieve the goal for all this work, thought, and discussion – traffic calming. We appreciate the Council's help in accomplishing this for our neighborhood and city."

Ms. Gloria Dastoli, resident on Innsbrook Road, she read the following paragraph from a February 12, 2008, letter from the City Manager: "City staff has concluded since the subject project was required by the City Council and the Grove Park Inn to fulfill their responsibility by submitting the total requested fund and the affected citizens fulfill their responsibility by participating in the traffic calming design process as set forth in the current traffic calming policy. It is the City's responsibility to accomplish the agreed upon work."

Ms. Liz McKenna, resident on Evelyn Place, emphasized that for the neighborhood it is a safety issue. Young families leave their neighborhood and pets get killed because of people speeding continuously. This is for safety reasons.

Mr. Hank Garvey, Vice-President of Young Transportation, stated that Mr. Putnam did spend time to go with them over this process. He has been open with their suggestions. He is pleased with the traffic light proposal. Their one concern left to iron out is the right hand turn onto Macon Avenue.

In response to Councilman Russell, Mr. Putnam said along Kimberly Avenue between Country Club and Edwin, there is already on-street parking allowed in front of the houses and there are proposed to be five curb extensions that take up no more width than a car. Two of them will be in front of fire hydrants. As you go through the traffic signal up toward Charlotte Street there are two intersections where we have curb extensions, but they are really cross walks - noting again that they are only taking the place where an on-street car would be parked.

In response to Councilman Russell, Mr. Putnam said that both sides are still offering up suggestions. What we have in place now is a good solid plan that has done a good job to minimize the negative impacts without compromising the overall goal of what we are trying to accomplish with traffic calming. If we go any further, we won't have a traffic calming plan.

Councilwoman Jones noted that Mr. Putnam has been commended by Mr. Vehaun, Young Transportation, and the neighborhood for his expertise and responsiveness. As a result of all the meetings with emergency responders and other large vehicle users, etc. he made the adjustments he outlined above. We have a professional everyone trusts, a process well underway and money being spent. She hoped this action is not a political decision but a professional decision. Public safety is job one and it is clearly demonstrated in the modified plan.

Councilman Mumpower was concerned that this plan reaches too far and instead of reducing safety, it's producing safety concerns. Until the Emergency Medical Services Director and the Fire Chief approve this plan, it should be delayed. Personally he felt enforcement of signs, etc. is a key to compliance.

Councilman Newman said that when this process began three years ago, everyone knew that traffic calming is to slow all traffic down. He felt we do have a good process and competent people to strike the appropriate balance between the public safety benefits of traffic calming and the effect it has on emergency response times. When City Council approved the Grove Park Inn project, traffic calming in this area was part of that agreement.

In response to Mayor Bellamy regarding the on-going work plan, Mr. Putnam said that as far as working with the contractor and continuing to tweak the plan the process is not over. On some of the adjustments, we still need to get the Fire trucks to drive the area once the markings are on the pavement.

Mayor Bellamy said that Mr. Putnam has provided Council with the construction work plan he is still finalizing resulting from concerns from emergency responders, other large vehicle users, including the Public Works Sanitation Division, Asheville City Schools and Young Transportation.

The motion made by Councilman Mumpower and seconded by Vice-Mayor Davis failed on a 2-5 vote, with Vice-Mayor Davis and Councilman Mumpower voting "yes" and Mayor Bellamy, Councilwoman Jones, Councilman Newman and Councilman Russell voting "no."

At the request of Mayor Bellamy, it was the consensus of the majority of Council to instruct Mr. Putnam to provide regular updates on additional contacts made with the emergency responders, other large vehicle users, Public Works Sanitation Division, Asheville City Schools, Young Transportation, and the neighborhood detailing the results of those meetings.

At 7:28 p.m., Mayor Bellamy announced a five minute recess.

VI. NEW BUSINESS:

A. RESOLUTION NO. 08-181- RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH CAMP DRESSER AND MCKEE FOR DEVELOPMENT OF THE STRATEGIC ENERGY MANAGEMENT PLAN

ORDINANCE NO. 3649 - BUDGET AMENDMENT FOR THE MATCHING FUNDS TO DEVELOP THE STRATEGIC ENERGY MANAGEMENT

Ms. Maggie Ullman, the City's Energy Coordinator, said that this is the consideration of a resolution authorizing the City Manager to enter into a contract with Camp Dresser and McKee (CDM) for development of the City of Asheville Strategic Energy Management Plan; and the associated budget amendment, in the amount of $50,000.

She explained that explained the green house gas (GHG) emission reduction 5 step strategy: (1) establish baseline – Fiscal Year 2000-01 - 32,000 tons (GHG); (2) Build stakeholder consensus – Sustainability Advisory Committee on Energy & the Environment (SACEE) focus groups, internal dialogue; (3) set reduction goal (Council's goal) – 80% reduction by 2050 – 2% per year; (4) create a strategic energy management plan – current stage; and (5) implement initiatives – selective projects underway.

We need a strategic plan because (1) of the commitment of the Mayor's Climate Protection Agreement – October of 2005; (2) of Council Resolution 07-90 calls for an energy management plan; (3) to identify realistic early wins and long term strategies; and (4) cost effective energy reduction strategies.

The strategic energy plan will provide (1) comprehensive interdepartmental energy plan; (2) long range plan to achieve reduction goal; (3) tool to achieve Council's strategic goals; and (4) a model for the community.

The strategic energy plan is in partnership with Camp Dresser and McKee (CDM). CDM provided a research and development grant of $140,000 and the City of Asheville matched funds of $50,000.

She then reviewed the time table for completion with the final report expected in mid-March of 2009.

In summary, in April 2007 City Council passed a resolution committing to develop a Strategic Energy Management Plan. On December 14, 2007, Mayor Bellamy wrote a letter of support regarding partnership for the development of the Strategic Energy Management Plan to CDM. In March 2008 CDM committed $138,900 to provide services to the City of Asheville for the development of a Strategic Energy Management Plan. CDM committed these funds and requested a match contribution of $50,000 be provided by the City.

This action supports the City Council Strategic Operating Plan in that it dedicates funding to the following Council goal, "Complete an Internal Energy Management Plan for conservation, technology and retrofitting, and sustainability management."

Pros:

- Funding this request will expedite the completion of this plan.
- Funding this request will provide technical expertise and insight from a non bias third party.

Con:

- The funding requested is not allocated in the current budget and will therefore have to be appropriated from fund balance.

The fiscal impact would be $50,000 reduction in fund balance.

Staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with Camp Dresser and McKee for development of the Strategic Energy Management Plan, and the associated budget amendment, in the amount of $50,000 to pay for services to conduct a portion of the Strategic Energy Management Plan.

When Mayor Bellamy asked for public comment, no one spoke.

Ms. Ullman responded to Councilman Mumpower when he asked what the motivation is for CDM to give the City $140,000 for the plan and have they done a study of this type in the past.

Councilman Mumpower felt that Council is preparing to spend further dollars on ways to conserve our resources when he believed we have the expertise in-house to identify. He spoke against additional studies, spending money on people when we have the expertise in-house, and contracting with a company who has not done a study of this type. He also felt we should have reached out for volunteers to help with this plan.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolution and budget amendment and they would not be read.

Councilwoman Jones moved for the adoption of Resolution No. 08-181. This motion was seconded by Councilman Newman and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 298

Councilwoman Jones moved for the adoption of Ordinance No. 3649. This motion was seconded by Councilman Newman and carried on a 5-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 31

B. RESOLUTIN NO. 08-182 - RESOLUTION APPOINTING MEMBERS TO THE CITIZENS-POLICE ADVISORY COMMITTEE

Vice-Mayor Davis said that the terms of Tim Flora (north representative), Ed Taylor (central representative), Davidson Jones (east representative) and Mary Ann LaMantia (south representative) expired on June 30, 2008.

At the July 15, 2008, worksession, it was the consensus of Council to (1) interview Ada Volkmer and Angelica Reza Wind for the north representative; and (2) appoint Charlie Hume

(South representative) and Bob Smith (Central representative) to each serve a three-year tern respectively, terms to expire June 30, 2011. Ms. Volkmer was unable to attend the interview.

In addition, at the August 19, 2008, worksession, it was the consensus of Council to readvertise for the east representative.

After Council spoke highly of the candidates, Ada Volkmer received 2 votes and Angelica Wind received 3 votes. Therefore, Angelica Wind was appointed as the north representative on the Citizens-Police Advisory Committee to serve a three-year term, term to expire June 30, 2011, or until her successors has been appointed.

It was the consensus of Council to appoint Charlie Hume (South representative) and Bob Smith (Central representative) to each serve a three-year tern respectively, terms to expire June 30, 2011.

RESOLUTION BOOK NO. 31 – PAGE 299

C. RESOLUTION NO. 08-183 - RESOLUTION APPOINTING MEMBERS TO THE RECREATION BOARD

Vice-Mayor Davis said that there currently exists three vacancies on the Recreation Board as follows: Carolyn Stanberry (term expired June 30, 2008), Carol Ann Pothier (term to expire June 30, 2009), and Sam Camp (term to expire June 30, 2009).

At the June 17, 2008, worksession, it was the consensus of Council to interview Davidson Jones and Wanda Hawthorne.

At the August 19, 2008, worksession, it was the consensus of Council to interview John Metcalf, Mildred Nance-Carson, Betty Young and Sara Manuel. Ms. Manuel was interested in appointment; however, would be out of town and unable to attend the interview. Ms. Young and Mr. Metcalf did not attend their scheduled interviews.

After Council spoke highly of the candidates, Davidson Jones received 1 vote; Wanda Hawthorne received 3 votes; John Metcalf received no votes; Mildred Nance-Carson received 4 votes; Betty Young received no votes; and Sara Manuel received 4 votes. Therefore, (1) Mildred Nance-Carson was appointed to serve a three-year term, term to expire June 30, 2011, or until her successor has been appointed; and Wanda Hawthorne and Sara Manuel were appointed to each serve an unexpired term, terms to expire June 30, 2009, or until their successors have been appointed.

RESOLUTION BOOK NO. 31 – PAGE 300

D. RESOLUTION NO. 08-184 - RESOLUTION APPOINTING A MEMBER TO THE RIVER DISTRICT DESIGN REVIEW COMMITTEE

Vice-Mayor Davis said that Wendy Kussrow (at large representative) has resigned from the River District Design Review Committee, thus leaving an unexpired term until September 1, 2010.

On July 15, 2008, City Council instructed the City Clerk to arrange interviews for Gregory Sills and Terry Meek. Prior to the interview time, Mr. Sills withdrew his name for consideration.

It was the consensus to appoint Terry Meek as the at-large member to the River District Design Review Committee, to serve the unexpired term of Ms. Kussrow, term to expire September 1, 2010, or until his has been appointed.

RESOLUTION BOOK NO. 31 – PAGE 301

E. RESOLUTION NO. 08-185 - RESOLUTION APPOINTING A MEMBER TO THE SUSTAINABLE ADVISORY COMMITTEE ON ENERGY & THE ENVIRONMENT

Vice-Mayor Davis said that Lach Zemp has resigned from the Sustainable Advisory Committee on Energy & the Environment, thus leaving an unexpired term until December 31, 2008.

On August 19, 2008, City Council instructed the City Clerk to arrange interviews for Matthew Menne, Matthew Raker, Herbert Kupfer and Ryan Blau.

After Council spoke highly of the candidates, Matthew Menne received no votes, Matthew Raker received 2 votes, Herbert Kupfer received no votes and Ryan Blau received 2 votes. Another vote was taken and Matthew Raker received 2 votes and Ryan Blau received 3 votes. Therefore, Ryan Blau was appointed to the Sustainable Advisory Committee on Energy & the Environment to serve the unexpired term of Mr. Zemp, term to expire December 31, 2008, and then to serve a full three-year term, term to expire December 31, 2011, or until his successors has been appointed.

RESOLUTION BOOK NO. 31 – PAGE 302

VII. OTHER BUSINESS:

Western Carolina Rescue Ministries Inc.

Mayor Bellamy said that she has just received the following e-mail from Mr. Vic Howard, President and CEO of Western Carolina Rescue Ministries, Inc. and would like to see how the City can participate in this exciting opportunity: "We had a great thing happened here at Western Carolina Rescue Ministries on Friday, Aug 22nd. Sonopress came down and interviewed 35+ homeless men and women for employment. Only three failed the drug test. It looks like Sonopress may be able to hire 20-25 of them. This means that 20+ men and women will be off the streets of Asheville and employed. The ones who are hired are going to get special privileges here at The Ministry. They will be guaranteed a bed each night, a lunch will be packed each day and they will be able to keep their belongings here at the Ministry. We will also be providing them any clothes they need. We do need your help. We need bus passes for the first two weeks or until they get their first pay check and they start on this Wednesday, August 27th. We are also trying to figure out their Sunday transportation. Please let me know quickly if the city can provide bus passes for the 1st couple of weeks."

City Manager Jackson provided Council with a memorandum that is in response to the Western Carolina Rescue Ministries' (WCRM) request for a transportation assistance grant from the City to support their recent job placement program with Sonopress Inc. Recently, WCRM was able to refer and place over 20 homeless clients in jobs at Sonopress Inc. in Weaverville, N.C. The new employees will reside at WCRM facilities downtown and travel by transit to the employer's place of work. WCRM is requesting a grant in the amount of $500 to provide one monthly transit pass to each client. If Council approves this grant, the source of funds would be the Planning Department's homeless division operating budget.

Vice-Mayor Davis was very supportive of this action. However, he expressed concern over the bad behavior of homeless men and women at the Western Carolina Rescue Ministries on Patton Avenue, which is the western gateway corridor into Asheville. He asked, and it was the consensus of Council, that this item be addressed at the City Council Public Safety Committee regarding accountability of service providers, especially in the western gateway corridor.

Mayor Bellamy said that she has been meeting with the WCRM about a greater level of responsibility that needs to happen with their recipients of services. They are willing to raise the bar on themselves and she felt they would be happy to be a part of that discussion.

Councilman Mumpower said the WCRM does a lot of good things for our community; however, he could not support the action as it steps outside of our outside agency funding process. In the alternative, he said that he would be happy to personally contribute to this venture.

Mayor Bellamy was happy to support this initiative. When we look at how we use our funding dollars for the homeless community, this will help them get to work so we can have 20 people part of the solution and not part of the problem. She said that an outside agency contract will be prepared with measurable goals so there is some accountability to this action.

Councilman Newman felt this is one of the best uses of $500 we have ever allocated – full-time jobs for 20 homeless people. Plus, the grant is for City bus passes.

Councilman Russell agreed with Councilman Mumpower that this request didn't go through the right process. He supported of efforts of WCRM but he wished they would have asked the private sector first for the money because he felt people would have been happy to contribute to this initiative.

Councilman Newman felt this is not sidestepping the established process. The outside agency process is when a program is going to be run over a series of months and it goes through the appropriate budget process. That is not what this is. This is a situation that arose after the budget was approved. It is a small amount of money being discussed in an open session of Council. He felt it was very appropriate for Council to be able to respond to needs as they arise and it comes out of the funds that are appropriated in a department for these kinds of purposes.

Vice-Mayor Davis moved to approve a $500 grant to WCRM to provide one monthly transit pass to each client. This motion was seconded by Councilwoman Jones and carried on a 4-2 vote, with Councilman Mumpower and Councilman Russell voting "no."

Claims

The following claims were received by the City of Asheville during the period of July 18-31, 2008: Ranier Allen (Police), David Sprangrude (Water), Carolyn Bouffard (Streets), Stephen Bowman (Police), Shannon Murry (Transit Services), Patricia Northrup (Streets), Lenard Carrier (Parks & Recreation), Michael Bolanos (Police), Sassi McClellan (Water) and Juanita Wilson (Streets).

The following claims were received during the period of August 1-14, 2008: Lawrence E. Peterson (Fire), Coleman Smith (Transit Services), David Sprouse (Sanitation), Celeste Fletcher (Water), Progress Energy (Water), and Cletus Hamilton (Sanitation).

These claims have been referred to Asheville Claims Corporation for investigation.

Lawsuit

The following Summons and Complaint was received by the City of Asheville on August 8, 2008: Calvert & Melton Investments LLC vs. Nationwide Mutual Insurance Company and the City of Asheville. The nature of the proceeding is a complaint for property damage resulting from corroded and leaking water main line, water meter, and/or service line. This matter will be handled by an attorney outside of the City Attorney's Office.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Mary Steiner spoke to Council about tent worms killing all walnut trees, thus starving our squirrels. Vice-Mayor Davis, liaison to the Tree Commission, said that he would be happy to take Ms. Steiner's concern to the Tree Commission to see if there is something that can be done.

Closed Session

At 8:16 p.m., Councilman Mumpower moved that the Asheville City Council go into closed session for the following reasons: (1) To consider the qualifications, competence, performance, character, fitness, conditions of appointment of an individual public officer or employee. The statutory authorization is contained in G.S. 143-318.11(a)(6); and to prevent the disclosure of information that is confidential pursuant to G.S. 160A-168, the Personnel Privacy Act. The statutory authorization is contained in G.S. 143-318.11(a)(1); (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville; Asheville Jet, Inc. d/b/a Million Air Asheville; and Asheville Regional Airport Authority. The statutory authorization is contained in G.S. 143-318.11(a)(3); and (3) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilwoman Jones and carried unanimously.

At 9:25 p.m., Councilman Mumpower moved to come out of closed session. This motion was seconded by Councilman Newman and carried unanimously.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:25 p.m.

Magdalen Burleson
CITY CLERK

Terry M. Bellamy
MAYOR

Tuesday – September 9, 2008 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Jones gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING SEPTEMBER 9, 2008, AS "FAMILY DAY – A DAY TO EAT DINNER WITH YOUR CHILDREN"

Mayor Bellamy read the proclamation proclaiming September 9, 2008, as "Family Day – A Day to Eat Dinner with your Children" in the City of Asheville. She presented the proclamation to Ms. Jackie Latek, representing Families Together, who briefed City Council on some activities taking place during the day.

B. PROCLAMATION PROCLAIMING THE WEEK OF SEPTEMBER 22-26, 2008, AS "MINORITY ENTERPRISE DEVELOPMENT WEEK"

Mayor Bellamy read the proclamation proclaiming September 22-26, 2008, as "Minority Enterprise Development Week" in the City of Asheville. She presented the proclamation to Minority Business Coordinator Brenda Mills, who briefed City Council on some activities taking place during the week.

II. CONSENT AGENDA:

Mayor Bellamy removed from consideration Consent Agenda "F" from the Consent Agenda. She said that late last week the Western Carolina Rescue Ministries found other means (Employment Staffing Inc. donation) to supply the transit passes, and has relayed to City staff that the budget amendment is no longer needed. She thanked the community for stepping up and making other donations as well to the Western Carolina Rescue Ministries.

At the request of Councilman Mumpower, Consent Agenda Items "D" and "G" were removed from the Consent Agenda for individual votes.

A. APPROVAL OF THE MINUTES OF THE WORKSESSION HELD ON AUGUST 19, 2008; AND THE FORMAL MEETING HELD ON AUGUST 26, 2008

B. RESOLUTION NO. 08-186 – RESOLUTION OF INTENT TO CLOSE A PORTION OF SHADY LANE AND SETTING A PUBLIC HEARING ON THE QUESTION FOR OCTOBER 14, 2008

Summary: The consideration of a resolution of intent to close an unopened portion of Shady Lane and request a public hearing for October 14, 2008, regarding this issue.

N.C. Gen. Stat. sec. 160-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, the adjoining property owners have requested the City of Asheville permanently close an unopened portion of Shady Lane.

At the August 14, 2008, Greenway Commission meeting, they unanimously approved the closure in that they could find no visible use for retaining that portion of Shady Lane.

Regarding the Strategic Operating Plan, this closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties.

Con:

- In consideration of the location of the unopened right-of-way, staff can find no potential challenges regarding the closure of the alley.

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt a resolution setting a public hearing for October 14, 2008, to close an unopened portion of Shady Lane.

RESOLUTION BOOK NO. 31 – PAGE 303

C. RESOLUTION NO. 08-187 – RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A LICENSE AGREEMENT WITH T-MOBILE SOUTH, LLC, FOR ANTENNAS AND RELATED EQUIPMENT ON CITY-OWNED REAL PROPERTY AT 36 RESERVOIR ROAD

ORDINANCE NO. 3650 – BUDGET AMENDMENT REGARDING LICENSE AGREEMENT WITH T-MOBILE SOUTH, LLC, FOR ANTENNAS AND RELATED EQUIPMENT ON CITY-OWNED REAL PROPERTY AT 36 RESERVOIR ROAD

Summary: The consideration of a resolution authorizing the City Manager to execute a License Agreement with T-Mobile South, LLC for antennas at 36 Reservoir Road; and the associated budget amendment, in the amount of $56,200.

The property at 36 Reservoir Road known as White Fawn Reservoir is on a knoll at the western end of the Beaucatcher Mountain ridge. It has exceptional range for telecommunication with approximately 300° coverage from northeast to west to southeast. Two telecommunication towers are located on the property and the City of Asheville leases antenna space on the towers and ground space for related equipment.

T-Mobile South, LLC has offered to enter into a license agreement for antenna space and related equipment on the tower known as the "Lower Tower" which is the smaller tower to the west. A tower analysis is required by the license agreement to assure that the new installation does not interfere with existing installations and that the tower is structurally able to support the additional installation, to be paid for by T-Mobile South, LLC. The proposed License Agreement will enable T-Mobile to operate six (6) panel antennas at that site; however, there is a provision,

which allows either the Licensor or the Licensee to terminate the agreement upon 180 days notice. The term of the License Agreement will be five (5) years with one renewal period of five (5) years. T-Mobile will pay an annual License Fee based on the initial rate of $30,000 with a 4% increase annually thereafter. Two years of license fees will be collected in advance; the first two months exempted to allow for installation of equipment.

The initial rate was determined by gathering and comparing rate structures used by other municipalities across the state, including the Cary, Hickory, Charlotte and others. Formal findings were presented to the Planning and Economic Development Commission on August 20, 2008. Results indicate that base fee of $30,000 per annum represents fair market value for this type of installation.

The Notice of Intent to enter into a License Agreement with T-Mobile South, LLC was published on August 28, 2008, in the Asheville Citizen-Times. Ten days have passed since the publication and authorization to execute the License Agreement is being requested.

Regarding the Strategic Operating Plan, strategic tower asset management, through the creation of new license agreements, presents the City with revenue enhancements. These revenue enhancements can help the City's telecommunications operations become more sustainable.

Several new tenant leases are anticipated in Fiscal Year 2009. A portion of this additional revenue has been planned to underwrite a cost savings plan for the City's own telecommunication operations. Specifically, the City is planning on utilizing an estimated $80,000 of these new revenue enhancements to re-locate equipment from the Spivey Mountain site (where the City pays $29,000 per year with a 7% escalation each year) to the White Fawn site (owned by the City). This re-engineering was proposed in the Fiscal Year 2009 budget, and once implemented, will promote significant cost savings to the City over time. The attached budget amendment will appropriate $56,200 into the re-engineering account.

Pros:

- Enhanced revenue through the license fee income
- Maximized vacant space on existing tower infrastructure
- Underwrites long term cost savings plan for telecommunications

Con:

- None

Fiscal Impacts:

- Fiscal Year 2009: $56,200 revenue
- Fiscal Year 2009: $56,200 investment programmed to support re-location of City equipment
- Beyond Fiscal Year 2009: Additional revenue stream based on initial rate of $30,000 per year with 4% escalation per year.
- Beyond Fiscal Year 2009: Resulting savings of initial rate of $29,000 per year with 7% rent escalations.

City staff recommends City Council (1) adopt a resolution authorizing the City Manager to execute the license agreement with T-Mobile South, LLC on behalf of the City of Asheville; and (2) approve associated budget amendment.

RESOLUTION BOOK NO. 31 – PAGE 304
ORDINANCE BOOK NO. 25 – PAGE 33

D. BUDGET AMENDMENT FROM A DONATION FROM THE FRIENDS OF THE NATURE CENTER TO SUPPORT CONSTRUCTION OF THE NEW RACCOON, FOX AND RED WOLF HABITATS AT THE NATURE CENTER

This item was pulled from the Consent Agenda for discussion and/or an individual vote.

E. RESOLUTION NO. 08-188 – RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT SERVICE AGREEMENT WITH MOTOROLA INC. FOR MAINTENANCE COVERAGE OF OUR RADIO SYSTEM INFRASTRUCTURE EQUIPMENT

Summary: The consideration of a resolution authorizing the City Manager to sign a contract service agreement with Motorola, Inc in the amount of $126,297.36 for maintenance coverage of our radio system infrastructure equipment.

The City of Asheville continues to use Motorola, Inc. to perform maintenance coverage on the infrastructure of the Motorola 800MHz radio system. The system is used by Public Safety departments as well as other operational departments.

Annual maintenance payments are required in order to keep the radio system in a reliable and supported state. A contracted agreement also means that the City has access to technicians and repair equipment immediately upon a problem arising.

Because the radio system provides basic support and enhanced safety functionality for officers, this action ties into City Council's goal of being one of the safest and most secure communities when compared to similar cities.

Pro:

- Prioritize public safety and infrastructure investments that support health and safety.

Con:

- If we do not have a maintenance contract in place we could have lengthy and more costly service interruptions on the radio system.

The fiscal impact would be for Fiscal Year 2009: $126,297.36. Having to pay for repairs on a basis per call and per part would be extremely likely to be much more costly.

City staff recommends City Council adopt a resolution authorizing the City Manager to sign a contract with Motorola, Inc. for maintenance coverage of our radio system infrastructure equipment.

RESOLUTION BOOK NO. 35 – PAGE 305

F. BUDGET AMENDMENT TO ACCEPT DONATION FROM EMPLOYMENT STAFFING INC. FOR THE PURPOSE OF REIMBURSING TRANSPORTATION EXPENSES INCURRED BY WESTERN CAROLINA RESCUE MINISTRIES INC. ON BEHALF OF HOMELESS CLIENTS SEEKING WORK OPPORTUNITIES

Mayor Bellamy removed this item from the Consent Agenda. She said that late last week the Western Carolina Rescue Ministries found other means (Employment Staffing Inc. donation) to supply the transit passes, and has relayed to City staff that the budget amendment is no longer needed.

G. RESOLUTION AMENDING THE CITY'S FISCAL YEAR 2007-08 AND FISCAL YEAR 2008-09 CONSOLIDATED ACTION PLANS TO REALLOCATE FUNDS

TO THE ONTRACK FINANCIAL EDUCATION AND COUNSELING SERVICES AGENCY

This item was pulled from the Consent Agenda for discussion and/or an individual vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Councilwoman Jones moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Russell and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

D. ORDINANCE NO. 3651 – BUDGET AMENDMENT FROM A DONATION FROM THE FRIENDS OF THE NATURE CENTER TO SUPPORT CONSTRUCTION OF THE NEW RACCOON, FOX AND RED WOLF HABITATS AT THE NATURE CENTER

Summary: The consideration of a budget amendment, in the amount of $69,160, for a donation from the Friends of the Nature Center for the Nature Center.

The Friends of the Nature Center is a 501 (c) 3 non-profit organization whose purpose is to act as an advocate for the Western North Carolina Nature Center, and to raise funds to support the programs and enhancements at the Nature Center.

The Friends has donated $69,160 to the City of Asheville to support construction of the new raccoon, fox, and red wolf habitats at the Nature Center. The funding will be applied to the cost of irrigation, landscaping, hot wire equipment, signage, and whelping boxes.

Construction of the raccoon, fox and red wolf habitat supports these City Council strategic goals:

- Critical Services and Infrastructure – Support and enhance basic city services and customer services
- Sense of Place, Heritage and the Arts – Embrace Asheville's vibrancy, character and cultural art – Sustain Asheville's unique character and heritage, develop regional assets

Pros:

- Provide funding that completes the funding plan for construction cost.
- Support the overall well being and safety of the red wolves, foxes and raccoons living at the Nature Center.
- Demonstrate a strong collaborative effort between the City of Asheville and the Friends of the Nature Center.

Con:

- None

The budget amendment will increase the budget for the red wolves, foxes and raccoons living at the Nature Center by $69,160 and provide additional funds to enhance the habitat at no cost to the City of Asheville.

City staff recommends City Council to adopt a budget amendment authorizing the City Manager to establish a budget for funds received from the Friends of the Nature Center in the

amount of $69,160 to support construction cost of the new raccoon, fox, and red wolf habitats at the Nature Center.

Councilman Mumpower wanted to highlight the efforts of those who are willing to help the City run the Nature Center.

Councilman Mumpower moved for the adoption of Ordinance No. 3651. This motion was seconded by Councilwoman Jones and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 35

G. RESOLUTION NO. 08-192 - RESOLUTION AMENDING THE CITY'S FISCAL YEAR 2007-08 AND FISCAL YEAR 2008-09 CONSOLIDATED ACTION PLANS TO REALLOCATE FUNDS TO THE ONTRACK FINANCIAL EDUCATION AND COUNSELING SERVICES AGENCY

Summary: This is the consideration of a resolution amending the FY 2007-08 and FY 2008-09 Consolidated Action Plans for HOME Program funding, and the 2008-09 Consolidated Action Plan for CDBG funding to reallocate these funds to the OnTrack Financial Education and Counseling services agency to provide counseling and rental assistance services to low-income clients.

On July 29, 2008, staff was contacted by the Affordable Housing Coalition of Asheville and Buncombe County (AHC) advising that the agency would discontinue providing counseling and rental assistance through its CDBG and HOME agreements with the City. AHC anticipated taking this action by mid-September. Since that date, staff has worked closely with AHC to identify an alternative agency to provide these services through the CDBG and HOME programs. Several community agencies were approached; however, OnTrack Financial Education and Counseling Services (OnTrack) was the only agency interested in assuming these services. OnTrack, a well-established and successful counseling agency, is very enthusiastic about continuing this important work for our community.

In order to minimize an interruption in these services, OnTrack quickly prepared the required applications for CDBG and HOME funds for review by the Housing and Community Development Committee (HCD) and the Asheville Regional Housing Consortium Board (the Board). OnTrack's CDBG application was approved by the HCD Committee on August 18, 2008; and the agency's HOME application was approved by the Board on August 20, 2008. Both the HCD Committee and the Board expressed their appreciation to OnTrack for stepping forward to assume this responsibility on behalf of those who are in need of this assistance.

This request supports and implements the City's 2008-09 Strategic Plan goal of providing affordable housing by targeting financial resources to initiatives that end homelessness in Asheville. In addition, this request supports the goals and objectives established in the City's 2005-10 Consolidated Strategic Plan for Housing and Community Development

Pros:

- Corrects each Action Plan so that it accurately reflects that OnTrack will now provide these services to the community;
- Updates the fiscal and programmatic information for each plan;
- Minimizes a gap in rental assistance services for the community; and
- Allocates CDBG and HOME funding to OnTrack to deliver these services.

Con: None noted.

Fiscal Impact: None.

City staff recommends City Council amend the Fiscal Year 2007-08 and Fiscal Year 2008-09 Consolidated Action Plans for HOME Program funding, and the 2008-09 Consolidated Action Plan for CDBG funding to reallocate these funds to the OnTrack Financial Education and Counseling services agency to provide counseling and rental assistance services to low-income clients.

Councilman Mumpower suggested these monies might be better invested in core City activities.

Councilman Newman moved for the adoption of Resolution No. 08-192. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 309

III. PRESENTATIONS & REPORTS:

A. STRATEGIC PLAN QUARTERLY UPDATE

Assistant City Manager Jeff Richardson said that the Asheville City Council identified short and long term goals at the January 2007 strategic planning retreat and staff is providing its fourth quarterly update on progress in several key areas.

City Council has asked City staff to provide quarterly updates on key strategic initiatives associated with the eight priority areas reflected in the City's Strategic Plan. Staff has tracked projects using performance indicators and measurements through the fourth quarter of Fiscal Year 2007-08. In addition, as a subset to this presentation, staff has provided Council with the additional information: (1) Economic Development Key Indicator Report; and (2) Police Department Drug & Community Policing Quarterly Report.

He then presented the following Fourth Quarter Fiscal Year 2007-08 Strategic Plan End of the Year Report.

The following are the focus areas for 2007-08: (1) Community Building; (2) Critical Services & Infrastructure; (3) Economic Development; (4) Growth, Development, & Land Use; (5) Housing Opportunities; (6) Sense of Place, Heritage & the Arts; (7) Natural & Built Environment; and (8) Intergovernmental Relations.

The following are the 2008-09 Strategic Plan focus areas: (1) Affordable; (2) Green; (3) Safe; and (4) Sustainable.

In the focus area of community building, the following goals have been accomplished:

Continue to Develop Resources and Tools for Increasing Citizen Participation in Government - Neighborhood and Community Outreach Progress: (1) twenty neighborhood meetings prove successful; (2) five neighborhood walks; three community meetings; (3) three neighborhood groups receive technical assistance; (4) Neighborhood E-News (3 issues); and (5) Neighborhood event planning assistance (3 events).

Citizen's Academy Graduation – (1) Graduation on June 24, 2008; (2) Last class graduated 28 students; and (3) Largest Citizen's Academy graduation

Develop Public Outreach to Communicate City Council's Strategic Goals - Downtown Master Plan Success: (1) High attendance for public meetings (Average 120 - 200 people); (2)

Issue/specific topic meetings (Average 50 - 60 people); (3) Mailings to property owners; (4) E-mail newsletters; and (5) Website with documents from public/group meetings.

"Promote Inclusive Decision-Making" – 2007-08 progress: (1) communications improvements – City Channel programming, Map Asheville, website redesign; and (2) increase citizen participation: (a) Citizens Academy; (b) community/neighborhood outreach; (c) neighborhood planning (pilot) program; (d) neighborhood E-News; (e) neighborhood walks; and (f) development forums.

In the focus area of critical services & infrastructure, the following goals have been accomplished:

Enhance Commitment to Public Safety and Drug Approach - Weed and Seed Initiative Progress at West Riverside: (1) Drug arrests up 14%; (2) Calls for service (Asheville Police Department) down 18%; (3) Weed and Seed patrols net 216 arrests; (4) Services provided to 344 citizens by Resource Officers; and (5) Asheville Police Department Officers facilitate Community Oriented Problem Solving (COPS) Meetings.

Continue Commitment to Public Safety - Traffic Safety Unit's Wreck Reduction Efforts: (1) 47% cumulative reduction for targeted areas (excluding fender benders); (2) Intersection of US 19-23 & Louisiana Ave down 46%; (3) Intersection of Tunnel Road & S. Tunnel Road down 50%; and (4) Hendersonville Road in the area of Boston Way, Lodge Street and surrounding areas down 47%.

Enhance Basic City Services by Providing an Enhanced Level of Customer Service and Response – (1) Street Maintenance Progress: (a) 1410 potholes filled within 24 hours; and (2) Downtown Cleanliness: (a) Downtown public restrooms; (b) Park Ambassador; (b) weekly street cleaning.

"Supporting and enhancing basic City services" - 2007-08 notable enhancements include: (1) Downtown garbage collection (7 days per week); (2) Pritchard Park Ambassador; (3) Bee Tree Water Treatment Plant On Line; (4) Sidewalk Project Completions 56% up; (5) Asheville Police Department Gang Suppression Unit introduced; (6) City facility security improvements up; (7) Two new fire stations on-line – emergency response time up; and (8) water revenue bond implementation.

In the focus area of Economic Development, the following goals have been accomplished:

Improve Parking and Pursue Public-Private Partnerships to Address Downtown Parking Needs - Parking Improvements Progress: (1) Civic Center Garage improvements ($561,280); (2) New equipment for three parking garages; (3) completed feasibility study: Rankin Avenue Garage; (4) completed parking lot improvements under I-240; and (5) pursuing private/public partnerships.

Develop strategies for youth and education programs and increase awareness of City government – City of Asheville Youth Leadership Academy (CAYLA) success: (1) 100% acceptance into college acceptance; (2) high ratings on the summer job success; (3) community service enrichment was broad level of community service; and (4) City knowledge has been increased.

"Supporting a dynamic and robust Asheville economy with balanced growth" – 2007-08 notable initiatives: (1) job development: Volvo, Biltmore Farms, Unison Engine Components, Colbond, Highway Clays; (2) customer service center/development services; (3) Eagle-Market Street Request for Proposals mixed-use proposal; (4) UNC-Asheville "Rising Star" Program; (5)

CAYLA; (6) Riverfront property acquisition (Senate Bill 7); and (7) access to capital: Mountain Bizworks.

In the focus area of Growth, Development & Land Use, the following goals have been accomplished:

Pursue redevelopment of City-owned property to advance Council's goal of affordable housing – (1) City Owned Land Redevelopment: (a) Aston Gateway; (b) Ralph/Choctaw; and (c) Hunt Hill Purchasing Site; and (2) City Facility Master Planning process - plans underway.

Continue to Support Programs Such as the Greenway Master Plan and Increase the Amount of Linear Feet of Paved Greenways in the City - Greenway Development Progress: (1) Master Plan to City Council next month; (2) French Broad River Corridor Connector: planning, design, and land acquisition underway; (3) Hominy Creek Greenway: preparing for construction; and (4) Reed Creek Greenway: Phase I between Cauble and Catawba Street is complete; Phase II underway.

In the focus area of Housing Opportunities, the following goal has been accomplished:

Address the City of Asheville's Growing Need for Affordable Housing – Mayor's Affordable Housing Task Force Progress: (1) June 2008, City Council accepts Affordable Housing Plan; (2) July – August, 2008, Affordable Housing Working Group works with Housing & Community Development Committee – Unified Development Ordinance amendment work begins; and (3) September 2008, Unified Development Ordinance amendment recommendations (Presentation September 15 to Housing & Community Development Committee) – if accepted, then September 23, 2008, City Council agenda.

"Providing sufficient, safe and affordable housing opportunities for all citizens" – 2007-08 notable progress: (1) City of Asheville Homeless Coordinator (in-house); (2) 10-Year Plan progress continues; (3) Housing Code presentations (19 meetings); (4) Housing Trust Fund (a) Council appropriated $600,000; (b) awards - $590,000; (c) units: 12 market and 6 rental; and (d) loans repaid - $202,908; and (5) additional $500,000 Glen Rock/60 units (year two).

In the focus area of Sense of Place, Heritage and the Arts, the following goals have been accomplished:

To Support Asheville's Unique Character and Promote Opportunities for Social Interaction and Local Products - The Downtown Asheville Farmers Market: (1) produce; (2) baked goods; and (3) people.

Embrace Asheville's Cultural Heritage - Urban Trail maintenance project: (1) Maintenance assessment completed; and (2) Restoration repair work beginning Fall 2008.

Develop Recommendations & Implement Wayfinding Project - Implementation will include: (1) 35 pedestrian level signs; (2) 13 informational kiosks; and (3) 290 directional and destination signs.

"Embracing Asheville's vibrancy, character and cultural heritage" – 2007-08 significant progress: (1) Pack Square Park (Phase III); (2) Downtown Farmers Market; (3) Lexington I-240 Mural Project; (4) Bike Plan; (5) Downtown public restrooms on-line; and (6) Energy Loop restoration.

In the focus area of Natural & Built Environment, the following goals have been accomplished:

Continue to Improve Energy Conservation Efforts - Public Works 4/10 Work Schedule Pilot Program: (1) Preliminary results: (a) energy use reduction in Public Works Building: 13%; (b) building energy use reduction in Fleet Building: 6%; (c) avoided building cost energy bill: $1665; (d) expected annual fuel savings per employee: $521; and (e) expected green house gas emissions avoidance: 249 tons.

Continue to Improve Energy Conservation Efforts - Staff Energy Conservation Education (Better Energy Savings Today Program, or B.E.S.T.) Progress: (1) distributed conservation educational materials throughout 23 city buildings; (2) alternative community staff education; and (3) management education on sustainability leadership. This results in 1.2% total energy reduction in 23 City buildings.

"Preserving and Enhancing Asheville's natural beauty" – 2007-08 notable progress: (1) Council acquisition of 20.9 acres (preserved open space); (2) Beaucatcher Overlook Park 30 acres (2/3 paid); (3) Steep Slope Ordinance approved; (4) stormwater/erosion control permit Review process enforcement up ($94,000 fines); (5) two watershed engineering analyses; (6) zoning enforcement up: routine enforcement yielded 300% increase in violation; and (7) City's environmental education efforts underway.

In the focus area of Intergovernmental Relations, the following goal has been accomplished:

Collaborate with Local and Regional Partners – Collaborate on Regional Issues (1) Collaborative Efforts Include: (a) City operations proposal/ County parking decks; (b) One Stop Citizens Service Center; (c) Asheville Police/Buncombe Co. BCAT; (d) City Asheville Police Department/Department of Social Services Substation effort; (e) UNC-Asheville/City of Asheville Rising Star Program; and (f) environmental education: City of Asheville/Metropolitan Sewerage District/Water.

"Collaborating with State/Local Agencies to Achieve Regional Goals" – 2007-08 notable progress: (1) Oaks Subdivision Water Project ($200,000); (2) mental health Community Development Block Grant funding for Dobbins Center; (3) wholesale municipal water contracts; (4) DEA/Asheville Police Department Task Force; (5) City of Asheville/Buncombe County 911 consolidation; (6) regional emergency services training center; (7) City of Asheville Fire & Rescue mutual aid agreements; and (7) WNC Green Building Council Partnership ($5,000 rebate/ environmental building incentives.

This information is to update City Council on key operational initiatives specific to City Council's Strategic Operating Plan. No action is necessary at this time.

Upon inquiry of Mayor Bellamy, Parks & Recreation Director Roderick Simmons updated City Council on the temporary closing (approximately 2-3 weeks) of the Burton Street Center for renovations. He said the programs will be conducted at the West Asheville Center in the interim.

Councilman Newman was pleased to see the expected annual fuel savings per employee of $521 with the 4/10 work schedule pilot program.

In response to Mayor Bellamy, Director of Public Works Mark Combs explained how the City has been working with the N.C. Dept. of Transportation regarding mowing and notifying adjacent property owners about their responsibility of keeping gutters and sidewalks in front of their homes clear of weeds.

At the request of Mayor Bellamy, and by consensus of Council, she asked that the City place on their website and on the government channel information to raise the citizens' level of awareness of their responsibilities.

When Councilman Russell asked when the Civic Center parking deck stairwell would be completed, Director of Transportation and Engineering Cathy Ball said she would be happy to provide Council a timeline for that project.

Mayor Bellamy commended Civic Center Director Sherman Bass and his staff on improvements to the Civic Center.

Mayor Bellamy was pleased to see the increase in success over last year's success and thanked the City staff for the work they do on behalf of the citizens of Asheville.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE VOLUNTARY ANNEXATION OF 131 OLD CHARLOTTE HIGHWAY, ASHEVILLE, NORTH CAROLINA

ORDINANCE NO. 3652 – ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE, NORTH CAROLINA, BY ANNEXING ONE LOT LOCATED AT 131 OLD CHARLOTTE HIGHWAY

Mayor Bellamy opened the public hearing at 5:53 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance for the voluntary annexation of one lot located at 131 Old Charlotte Highway. This public hearing was advertised on August 29, 2008.

She said that Curtis Canty, on behalf of the City of Asheville Board of Alcoholic Beverage Control Board, has petitioned the City for the annexation of one parcel located at 131 Old Charlotte Highway (PIN 9667.16-73-7727) containing approximately .85 acres.

The lot is located on the northern side of Old Charlotte Highway just past the entrance to Eastwood Village. The parcel is approximately 1.9 miles from the nearest boundary of the City of Asheville's primary corporate limits and is, therefore, subject to the standards for annexation of noncontiguous area contained in N. C. Gen. Stat. sec. 160A-58.1. The parcel and the petition meet all applicable requirements of the State of North Carolina.

A single-family home is currently located on the property and they propose to build a new ABC store. The current appraised valuation for this property, according to the Buncombe County tax records, is $90,100.00. As this property is owned by a governmental entity, it is exempt from property taxes. The City of Asheville will, however, share in the revenues produced at this store.

Pursuant to N. C. Gen. Stat. sec. 160A-58.2 a public hearing must be held prior to adopting any ordinance for voluntary annexation. If City Council decides to proceed with this request, it is proposed that the annexation become effective on December 31, 2008.

This action complies with the City Council's Strategic Operating Plan with the goal of working to enable voluntary annexation to support healthy growth of the City.

Pro:

- Complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas and meeting the goal of continued use of the urban development tool of annexation in providing for the orderly growth of the City.

Con:

- Marginal increase in service costs.

Regarding fiscal impact, while the property is not taxable, since owned by a governmental entity, the City will receive a distribution of the profits of the store. Information from the CEO of the local ABC Board states that,

> "Early projections indicate that the Fairview area store would generate sales at between $1,250,000 and $1,800,000 annually. At these levels we would project the initial net income before distributions of approximately $30,000, since the Board would incur debt for the construction of the building. We believe that the benefit to the City from a store in this location will only increase in future years."

Information from the Fire Department indicates costs would include: a $100 debt service payment to the Reynolds Fire Department, tri-annual inspections, and emergency responses. The Department indicates that these expenses would be negligible.

The Police Department indicates that this annexation will not have a significant impact on the operation. They base this comment on information on calls from other ABC stores in our jurisdiction.

City staff recommends City Council adopt the ordinance annexing the property set forth in the petition.

Mr. Curtis Canty, CEO of the Asheville ABC Board, said that this area was identified in their five-year plan early on as a growth area for Asheville. They secured this site in December of 2007. At this site they will expand their operations to better serve that market as it continues to grow.

Mayor Bellamy closed the public hearing at 5:55 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 3652. This motion was seconded by Councilman Newman and carried unanimously.

ORDINANCE BOOK NO. 25 - PAGE 37

V. UNFINISHED BUSINESS:

A. DISCUSSION REGARDING THE OFFER BY W&K HOTELS LLC FOR THE PURCHASE OF CITY-OWNED PROPERTY LOCATED AT 550 AIRPORT ROAD (AIRPORT HOLIDAY INN)

At staff's request, Vice-Mayor Davis moved to refer this discussion to the City Council Finance Committee. This motion was seconded by Councilman Newman and after the Mayor asked for public comments and received none, the motion carried unanimously.

B. CONSIDERATION OF THE SECOND AND FINAL READING OF ORDINANCE NO. 3642 – ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE FOR THE PURPOSES OF FILLING IN MISSING INFORMATIN, CORRECTING MISTAKES, RESOLVING DISCREPANCIES AND CLARIFYING THE ORDINANCE AS IT RELATES TO SIGN REGULATIONS

Mayor Bellamy said that the public hearing and adoption on first reading of Ordinance No. 3642 was held on July 22, 2008, and due to the vote, it needed to be brought back for a second and final reading. On August 26, 2008, by City staff request, the second reading of this ordinance was continued until this date.

Urban Planner Julia Cogburn said that this is the consideration of amending Ordinance No. 3642, which was adopted on first reading only to address Council concerns with respect to the proposed amendments to Chapter 7 of the Unified Development Ordinance as it relates to signs regulations.

On July 22, 2008, Asheville City Council received a report on recommended changes to sign regulations found in the City's Unified Development Ordinance. At that meeting Council voted 4-3 to approve the proposed amendments. During discussion on the proposals, certain Council members expressed concerns with two of the amendments, which have led to proposed wording changes. Specifically, Council concerns were expressed about:

- The minimum setback requirement for real estate signs and the type of sign included in the setback provision.
- The provision requiring movement of vehicles that contain signage.

The staff proposes the following modifications to the amendment language to address the issues noted above.

- The primary concern with setback requirements for real estate signage was for the larger signage on commercial/institutional/industrial zoned properties. Therefore, we would now like to propose that no setback be required if the real estate sign is less than ten (10) square feet per face, however, a set back of ten (10) feet would be required for anything greater than ten (10 feet) per face.
- The suggested amendment concerning how often a vehicle must be used in the normal course of business has been deleted. . The current language states that a vehicle with signage on it must be used "periodically." The staff had recommended that "daily" use be required. After discussion, the Council expressed a preference for "weekly" use. After further consideration of the matter, the staff feels that it would be better to retain the existing language, allowing our enforcement officers to determine whether or not it appears that a vehicle is being used as a sign based on the type of business (one requiring significant delivery services vs. one not requiring the same) rather than having to inspect a site daily to see if a vehicle is being driven at any time during a week.

In summary, Ms. Cogburn said that the concerns noted were (1) Size of signs included in the minimum setback provision for real estate signs; and (2) Provision requiring movement of vehicles with exterior signs.

Regarding real estate signs (1) No setback required if the real estate sign is less than ten (10) square feet per face; and (2) Setback of ten (10) feet for signs greater than ten (10 feet) per face. *This excludes signs typically used for residences*

Regarding vehicles with signs (1) Original proposal that required "daily" movement concerned Council, given the nature of certain businesses and environmental concerns; (2) In discussion the Council expressed a preference that this be modified to require "weekly" movement; (3) After further internal discussion of Council concerns, the staff now believes it would be better to retain the existing language (requiring "periodic" movement); and (4) This allows enforcement officers discretion to determine whether a vehicle is being used as a sign based on the type of business (one requiring significant delivery services or not) rather than having to frequently inspect a site to determine if vehicles are being regularly driven for business purposes.

Staff recommends that Council approve the revisions to the ordinance as previously presented, but incorporating the described changes.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it will not be read.

Councilman Newman moved for the adoption of the second and final reading of Ordinance No. 3642 as amended as outlined above. This motion was seconded by Councilwoman Jones and carried on a 4-3 vote, with Vice-Mayor Davis, Councilwoman Cape, Councilwoman Jones and Councilman Newman voting "yes" and Mayor Bellamy, Councilman Mumpower and Councilman Russell voting "no."

ORDINANCE BOOK NO. 25 – PAGE 14

C. DISCUSSION REGARDING CONTRUCTION EASEMENT TO ALLOW FOR A PERMANENT ROAD IMPROVEMENT ON PUBLIC LAND (PACK SQUARE PARK)

At staff's request, Councilman Mumpower moved to table this item pending resolution of litigation. This motion was seconded by Councilwoman Jones and after the Mayor asked for public comments and received none, the motion carried unanimously.

D. RESOLUTION NO. 08-189 – RESOLUTION ADDRESSING THE INCORPORATION OF THE TOWN OF LEICESTER

Assistant Director of Planning & Development Shannon Tuch said that this is the consideration of a resolution addressing the incorporation of the Town of Leicester.

In June of 2007, the Asheville City Council heard a request from representatives of the task force for the incorporation of Leicester for the adoption of a resolution of support for their incorporation efforts. This resolution of support would allow the Leicester request that is currently before the Joint Legislative Commission to move to the General Assembly with a positive recommendation; without this resolution of support, a negative recommendation would be offered which could impact the success of the incorporation request. In June, the request was not supported by the majority of Council members (motion failed for lack of a second). While the desire for self governance was generally supported by the Council, specific concerns over the size of the proposed incorporation area (66+ square miles), ability to provide adequate services, and protecting Asheville's growth interests were among the concerns cited during the discussion; Council also expressed a desire for more discussions with Leicester representatives to better understand their request and to explore a mutually acceptable and sound proposal.

Leicester representatives returned to City Council on January 8, 2008, with a revised proposal that still included a boundary that largely followed the boundary of the township but did exclude the city's extra-territorial jurisdiction (ETJ) that fell within the boundary of the township. Representatives felt that this modification should help address Asheville's growth interests along with a modification to the proposed charter that would restrict the town's ability to pursue involuntary annexations. During this meeting, the Council continued to express concern over the general size of the area but did, ultimately, approve a resolution of support with language that was designed to encourage additional modification and adjustment. It was unclear whether the adopted resolution would be viewed as a resolution of support by the Joint Legislative Committee so, rather than forward this resolution for consideration, Leicester representatives elected to continue discussions with City staff and Council members.

After several meetings and discussions Leicester representatives have now agreed to reduce the overall size by approximately 43%, excluding large areas of undeveloped forest land and/or lightly managed farm land. This change will have a positive impact on the density for the proposed area of incorporation to a number higher than the .4 persons per acre documented for the township. The staff, however, is unable to assess what the actual density would be. Also discussed during these meetings was how to better protect Asheville's interests for future growth

with some modifications to the boundary being proposed for areas along Leicester Highway and surrounding areas. This discussion resulted in a few variations with the most refined and mutually acceptable option being offered for consideration; this option results in a total area of 37.7 square miles which constitutes a significant reduction from the 66 square miles originally proposed. It is also important to note that due to the significant reduction in overall size, the restriction in the town's proposed charter that would prohibit involuntary annexations has been removed to allow for future growth options for Leicester.

As a general point of interest, between the June '07 and January '08 time period, representatives from Swannanoa approached the City of Asheville with a similar request for a resolution of support for an incorporation which was adopted in May of this year. Unlike the request from Leicester, Swannanoa desired a referendum and for this desire to be reflected in the text of the resolution. Because a referendum had not been offered by the representatives from Leicester, this language is not included in the resolution.

She said that copies of the June 27, 2007, staff report and relevant portions of the minutes of both the June 27th meeting as well as the January 8th meeting, where previous consideration occurred, are available. Under "Legal and Process Issues," the staff report explains why the City of Asheville is being requested to consider this matter.

In the City Council Strategic Operation Plan, City Council adopted the following four strategic goals: *sustainable, affordable, green* and *safe*. This report's recommendation most appropriately reflects the goal of *sustainability* by addressing growth management issues on the periphery of the city limits by forging strong, collaborative partnerships with bordering municipalities to address regional growth concerns.

Pros:
- Would allow for Leicester to have a degree of self governance
- May help contribute to regional partnerships

Cons:
- Size of area and potential delivery of service problems
- Supports a trend of rural incorporations without regional planning
- (Minor) financial impact

This modified proposal would reduce the impact that had been originally projected at $20,000 from lost sales tax revenue to a number not less than $13,000 (to be based on assessed value).

The revised proposal is a significant improvement over the original incorporation plan. However, the staff believes that the size of the area proposed for incorporation will present practical difficulties in delivering urban services, and the density and character of the area proposed for incorporation is predominately rural and does not reflect the intent of incorporation.

The staff recommends that the Council consider the information contained in the staff report and presentations offered by the Leicester representatives and make an appropriate motion with respect to the resolution. Should the Council choose to support the adoption of the resolution, suggested language is noted in the resolution, as follows: (1). The City of Asheville approves the incorporation effort of the Town of Leicester to obtain a greater degree of governance and control over its future through incorporation, but expresses the following concerns: (a) That the size of the area proposed for incorporation will present practical difficulties in delivering urban services; (b) That the density and character of the area proposed for incorporation is predominately rural and does not reflect the intent of incorporation; and (c) Incorporation affects the City of Asheville's opportunities for improved fiscal health.

In response to Councilman Russell, Ms. Tuch said that the Leicester Task Force did not express interest in including language about the incorporation being submitted to a referendum; however, City Council can include that language if they wish.

Ms. Pat Cothran requested ten minutes, however, there were not three other individuals in the Chamber that would give up their time for her to speak. Councilwoman Jones moved to waive the rules and allow Ms. Cothran ten minutes. This motion was seconded by Councilwoman Cape. Said motion failed on a 2-5 vote, with Mayor Bellamy, Vice-Mayor Davis, Councilman Mumpower, Councilman Newman and Councilman Russell voting "no."

Ms. Cothran preferred not to make a presentation but provided City Clerk Burleson her notes to circulate to Council.

When Councilman Russell asked if Leicester was interested in holding a referendum on incorporation, Ms. Cothran felt that Raleigh would ask for a referendum anyway. She asked for Council support of their incorporation without any three concerns outlined. She also asked that the referendum issue not be a part of the resolution as well.

Councilman Mumpower could not support the resolution without language recommending any act of incorporating Leicester be submitted to a referendum.

In response to Councilman Mumpower, City Attorney Oast said that charters can be adopted for cities that limit or prohibit those cities from annexing.

In response to Councilman Mumpower, Ms. Cothran said that their charter does not include language about involuntary annexations. It does not include a prohibition against involuntary annexation. Their charter has already been submitted to Raleigh – prior to beginning these deliberations. If they incorporated such a large area they would put in their charter that they would not involuntarily annex; however, they have now reduced the size by almost half. She didn't particularly envision that they will do involuntary annexations.

Councilman Mumpower noted that Asheville gets criticized for involuntary annexations and that is one of the reasons why Leicester is wanting to incorporate. He questioned why Leicester would want to retain the power of involuntary annexation – the same model that they are resisting from Asheville. He would recommend language in the resolution be added to include a referendum and a charter amendment that does not allow involuntary annexations in the Town of Leicester.

Councilman Mumpower moved to approve the resolution incorporating the three concerns with the following two additional: (1) request the Town of Leicester's ability to utilize involuntary annexation be removed from their charter; and (2) any act incorporating Leicester be submitted to a referendum by the citizens of the identified proposed Town. This motion failed for a lack of a second.

When Councilman Russell asked if there are any cities in North Carolina that don't have the power to annex, City Attorney Oast said that some have limited ability to annex. It is something that can be peculiarized to any particular city and be limited or expanded as the legislature wishes.

Councilman Russell moved to approve Resolution No. 08-189 incorporating the three concerns with the following additional: (1) any act incorporating Leicester be submitted to a referendum by the citizens of the identified proposed Town. This motion was seconded by Councilman Mumpower.

In response to Vice-Mayor Davis, City Attorney Oast said that a referendum is not a necessary part of the incorporation procedure, but it is something that can be required at the time

the legislature takes action. What Council is doing is expressing their position that they think the legislature should make that a requirement as it has the option to do. This would only be a recommendation from Council. All Council can really do is to either say they approve this or not. We include recommendations in our resolutions because they are legitimate concerns, He advised Council that the effect of their recommendations is limited.

At the request of Vice-Mayor Davis, using a map, Urban Planner Blake Esselstyn showed Council where the new boundary line is in relationship to the City.

Councilwoman Cape could not support the motion because we only have the option of saying yes to the incorporation or no. She felt the size was still to large, lack of a referendum and some of the other issues. Just because we add the concerns in the resolution, does not mean they will be heard.

Councilman Newman felt that it is not right the right thing to do to allow people to organize large rural areas for incorporation. The areas in North Carolina that get organized into municipalities should be what most people view as towns and cities – not large areas of farm and forest land. He felt the revised boundary is still an overwhelming rural area. There may be a more appropriate area narrowly defined around what most people see as the Town of Leicester, but this proposed area is far too expansive to meet what would be good policy for Buncombe County or North Carolina.

In response to Councilwoman Jones' comments regarding the balance of good planning of what is important to preserve and what is appropriate to develop, Ms. Cothran said they are certainly agreeable to regional planning efforts.

Even though Vice-Mayor Davis felt the area was not urban enough for incorporation, he would support the motion with the inclusion of a recommendation for a referendum.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

The motion made by Councilman Russell and seconded by Councilman Mumpower to approve the resolution, with the following four concerns (1).The City of Asheville approves the incorporation effort of the Town of Leicester to obtain a greater degree of governance and control over its future through incorporation, but expresses the following concerns: (a) That the size of the area proposed for incorporation will present practical difficulties in delivering urban services; (b) That the density and character of the area proposed for incorporation is predominately rural and does not reflect the intent of incorporation; and (c) Incorporation affects the City of Asheville's opportunities for improved fiscal health; and (d) any act incorporating Leicester be submitted to a referendum by the citizens of the identified proposed Town, carried on a 5-2 vote, with Councilwoman Cape and Councilman Newman voting "no."

RESOLUTION BOOK NO. 35 – PAGE 306

E. RESOLUTION NO. 08-190 – RESOLUTION ADOPTING THE ASHEVILLE AREA WAYFINDING MASTER PLAN

RESOLUTION NO. 08-191 – RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A COOPERATIVE INTERLOCAL AGREEMENT FOR MAINTENANCE OF THE ASHEVILLE AREA WAYFINDING PROGRAM

Transportation Planner Dan Baechtold said that this is (1) Consideration of a resolution adopting the Asheville Wayfinding Master Plan; and (2) Consideration of a resolution authorizing the City Manager to sign a cooperative interlocal agreement for the maintenance of the Wayfinding program.

Per City Council's direction, staff is working with other area partners toward implementing a comprehensive wayfinding and signage program for the Asheville area. The master plan phase of the project is complete, and the next step is fabrication and installation of the signs. All of the participating local governments are being asked to adopt the Wayfinding Master Plan and the interlocal agreement.

- The City of Asheville, Buncombe County, the Towns of Weaverville, Woodfin, and Black Mountain, and the Asheville Regional Airport jointly funded the development of the Asheville Area Wayfinding Master Plan.
- Hillier Architecture was hired in April 2007 to design and program the county-wide wayfinding system.
- The Partnership on Wayfinding task force, made up staff from the City of Asheville and the Convention and Visitors Bureau (CVB), the Towns of Weaverville, Woodfin, and Black Mountain, Buncombe County, the Asheville Regional Airport, and the North Carolina Department of Transportation worked with Hillier on the wayfinding analysis and designs, and identified needed signage in the community.
- Through a public input process, designs were selected that included pedestrian level signs and kiosks, vehicular signs, and gateway signs.
- In December 2007 Buncombe County Tourism Development Authority approved funding for construction of the wayfinding system in the amount of $1.65 million.
- The CVB is leading the project management.

Current Status: The Asheville Area Wayfinding Program is entering the implementation phase of the project, which includes the fabrication and installation of approximately 35 pedestrian level signs, 13 informational kiosks, and 290 directional and destination signs within Buncombe County, of which 230 are within the City of Asheville.

- Programming for the wayfinding elements is complete.
- Three Buncombe County artists have been selected to create five designs for "finials" that will be on top of some of the sign poles.
- Eight kiosks and approximately 35 pedestrian-level signs are planned for installation throughout downtown Asheville.
- A construction management team is being assembled to guide the steering committee through the bid process, encroachment agreements with the NCDOT, and the construction and installation of the wayfinding elements.

The Asheville City Council 2008-09 Strategic Plan lists this project as action item under the Sustainable Category. The strategic plan reads: "Partner with the Convention and Visitors Bureau to implement the regional wayfinding project."

Next Steps:

- The CVB will begin the bid process in mid-September. It is expected to take approximately six weeks.
- The installation will be phased beginning with the pedestrian program. The second phase includes installation of signs in downtown Asheville, followed by the remaining signs in the program.

- The steering committee anticipates fabrication to begin in November with installation beginning in December and continuing through April 2009.
- A plan for removal of obsolete signage will be finalized.

Pros:

- Successful regional partnership.
- Most of the project is funded by the Tourism Development Authority.
- The wayfinding program addresses several identified City Council goals: 1) improving signage into and out of City parking facilities; 2) providing information kiosks in the downtown; 3) removing sign clutter and obsolete signage; 4) improving directional signage for residents and visitors.

Cons:

- The project requires an ongoing commitment from the City to maintain the signs.
- The project requires a financial contribution from the City Parking Fund to purchase the signs that will be attached to City parking structures (a $90,000 commitment spread over two years).

The City of Asheville contributed financially to the master plan phase of the project. The Tourism Development Authority has committed the majority of the funding for the fabrication and installation of the signs. The City's parking fund will be used to pay for signage that is physically attached to the City parking structures. The City of Asheville and other municipalities will assume an ongoing maintenance role for the signs, which will result in additional responsibilities for the sign maintenance crew in the Public Works Department.

City staff recommends (1) approval of the resolution adopting the Asheville Area Wayfinding Master Plan; (2) approval the resolution authorizing the City Manager to sign a cooperative interlocal agreement.

Mr. Kelly Miller, Executive Director of the Buncombe County Tourism Development Authority, briefly explained the final phase of the wayfinding project. Showing people clearly and succinctly how to get to point A and point B is crucial in the area of fuel consumption. He said that fabrication and installation will begin in early November and we should be completed in April of 2009. They will begin installation of pedestrian signs and informational kiosks, followed by vehicular signage in Asheville and then the surrounding towns. They will focus on the City of Asheville first. Regarding removal of existing signs, they will be identifying where the signs are located and make sure that new signs are in place as old signs come down. He said that the Tourism Development Authority has budgeted $150,000 (for 5-years) to go towards the maintenance effort and have worked closely with City staff and the other municipalities to come up with a unique maintenance program – the Tourism Development Authority will pay half and the other half is to be paid for by the other cities in the area.

There was a brief discussion regarding the maintenance contract of these expensive signs. Mr. Miller said that if the signs are vandalized by graffiti, there is a coating on the signage that will make it easy to take graffiti off. If the $150,000 allocated by the Tourism Development Authority is not enough for the 5-year contract, Mr. Miller said they would talk about amending the agreement.

When Vice-Mayor Davis asked if there is a willingness of the Tourism Development Authority to consider an extension after the five-year maintenance period is up, Mr. Miller said, not speaking for the Tourism Development Authority, said that he felt there will be a real desire to continue this relationship for many years.

In response to Councilman Mumpower, Ms. Kate Marble, project manager, said that there is a removal plan as part of the program. At this point, there are approximately 50 existing signs slated to be removed.

Councilman Mumpower felt this program has advantages to the tourism industry in Asheville but significant risks to the taxpayers of Asheville. Since Asheville residents know where to go, he suggested partnering with the Tourism Development Authority with the City's involvement being the utilization of City staff to make sure the equipment is maintained, but the Tourism Development Authority carry the entire maintenance costs for the five years, or at least for two years until we find out what the risk factors are.

In response to Councilman Mumpower, Mr. Miller felt that retail sales can increase as much as 20% with an effective, unified, integrated community wayfinding program. When more people walk in an attraction or know how to get to Biltmore Village, those businesses can hopefully generate more revenue to hire more people.

In response to Councilman Mumpower, Mr. Miller said the Tourism Development Authority's operating budget this year is $5.2 Million and they have about $1.6 Million in our product development fund.

There was a brief discussion, initiated by Councilman Mumpower, about how other cities in North Carolina receive a portion, if not all, of the room tax revenue. He said the City of Asheville does not enjoy this revenue source that he believed every other large city in North Carolina enjoys. On that basis, it seems more fair for something that is clearly going to reward the tourism industry for the Tourism Development Authority to assume the risks associated with this good effort, than the taxpayers. He felt the direct beneficiaries are visitors. Based on the tax structure we have in Asheville, he suggested Council not put our taxpayers at risk for maintaining these signs.

Mr. Miller said the City does receive funds from the Tourism Development Authority in a huge way. They have funded ten projects for a total of over $9 Million. He noted that they are the only County in the State of North Carolina that takes one-cent and puts it into a program called "tourism product development fund" that anyone, even the Civic Center, can make application for those funds. He said that fund is working well.

Councilman Mumpower felt that we work hard in the City of Asheville to stop putting up signs, but now we are part of an effort, because it's something we want, to create more signs.

Councilman Newman felt this is an excellent partnership and a great investment of dollars.

Councilwoman Cape asked the Tourism Development Authority to consider supporting Asheville in letting Asheville have an equal share of the room tax as other large cities in North Carolina. It would be beneficial to us to be able to help with the product development of keeping our streets clean, signs maintained, etc. Mr. Miller said that he would take that message back to the Tourism Development Authority.

In response to Mayor Bellamy, City Manager Jackson said that he would research insuring the signs and report back to Council.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolutions and they will not be read.

Councilman Newman moved for the adoption of Resolution No. 08-190. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION NO. 08-190 - RESOLUTION BOOK NO. 31 – PAGE 307

Councilman Newman moved for the adoption of Resolution No. 08-191. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no.".

RESOLUTION NO. 08-191 – RESOLUTION BOOK NO. 31 – PAGE 308

Mayor Bellamy suggested a joint meeting of City Council and the Tourism Development Authority to discuss future revenues and possibilities for more collaborative efforts. Regarding the Civic Center, Council adopted a policy for basic maintenance of the Civic Center and Council committed space for a performance center, so it's about time we had a serious conversation about significant investment in other infrastructure needs for our City. Mr. Miller said that he would take that message back to the Tourism Development Authority. Mayor Bellamy asked City Manager Jackson to follow-up with a letter to the Tourism Development Authority asking for that conversation.

VI. NEW BUSINESS:

A. RESOLUTION NO. 08-193 – RESOLUTION AUTHORIZING NEW RATES FOR ADVERTISING ON CITY BUSES AND PARKING DECK PROPERTIES

Mr. Paul Van Heden, Transportation and Engineering Department employee working on sales and marketing, said that his first project was to analyze and make recommendations to improve the way Asheville generates revenue from selling ad space on the buses.

The background is (1) the outdoor industry has changed and the current advertising rates have become obsolete (a) no demographic, showing or market share data; (b) no graphics; (c) ads sold by day, rather than by month; and (d) parking services have never offered advertising products; and (2) new advertising rates (a) makes the City's advertising competitive; (b) parking services is integrated into the advertising mix; (c) graphics for all products; and (d) all data an advertiser needs will be included in a comprehensive Excel sheet.

Using a chart, he explained how the rate sheet meets best practices and increases earnings. Using a chart, he showed the old rate sheet and then the new rate sheet.

The next steps will be (1) staff will outreach to local businesses in order to educate them about advertising opportunities on buses and elevators; and (2) staff will aggressively go after local and national accounts.

The following is additional information from the staff report prepared by Director of Transportation and Engineering Cathy Ball. This is the consideration of a resolution authorizing new rates for advertising on city buses and parking deck properties.

Staff is dedicated to maximizing revenue from selling ad space on appropriate city-owned property. To this end, staff re-visited the way it sells advertising on the Asheville Transit System (ATS) and studied the feasibility of installing billboards within city-owned parking decks.

Last year ATS earned approximately $64,425 in advertising. It is staff's opinion that by streamlining the rate structure to meet best practices, aggressively market advertising opportunities to businesses, and making bus wraps available – this amount could be doubled.

In addition, staff would like to open a new venue for advertising by placing poster-lockers within the three parking-deck elevators, and selected stairwells.

Under the current rate structure and advertising products, the most ATS can generate from bus advertising is approximately $85,000. Under the proposed rate structure, ATS expects to generate $120,000 in the first year. The most staff expects to make under the new rates is $380,000 per year.

Staff estimates that allowing advertising in the poster-lockers would generate between $19,000 to 30,000 in the first year.

Staff will aggressively go after local and national accounts when the rates are approved.

New rates: **Bus Advertising** is a method for advertisers to reach the public in metropolitan areas. Ads are placed externally on the sides and rear of a public bus - thus turning it into a mobile billboard. Ads are also placed inside the vehicle, attached to the corners between the walls and ceiling overhead.

The first step in encouraging businesses to advertise with ATS is to create a rate sheet which meets industry standards, offers demographic information, and uses terms a potential media buyer would expect.

In creating this new rate sheet, staff decided to build on the old one and include best practices. Staff selected the following cities for analysis:

- Fayetteville, NC (FAST): Chosen because they are a south-eastern transit system with a similar-sized fleet of 17 buses.
- Charlottesville, VA (CTS): Chosen because they are a south-eastern transit system with an exact-sized fleet of 20 buses.
- Danville, VA (DMT): Chosen because they are a south-eastern transit system with a similar-sized population size of 53,000.
- Raleigh, NC (CAT): Chosen because their system services the capital. As such, they are a good benchmark for transit systems in North Carolina.
- Winston-Salem and Durham (WSTA, DATA): While their fleet and population is larger than Asheville's, comparing with these markets allows staff to determine what upper-end rates are possible.

Staff made a side-by-side comparison of base advertising rates to advertise for one month on transit systems listed above. Based on this comparison, staff set the following prices to advertise on one bus for one month:

Ad Product	Rate 1 month / 1 bus	Old Rate
Queen:	$200	$230
King:	$225	$105
King Kong:	$700	
Half Side:	$600	
Full Side:	$1,000	
Full Wrap:	$2,000	$833
Tail Light:	$200	$105
Supertail:	$400	
Full Back:	$600	
Interior:	$20	$15

Staff created a full rate sheet by multiplying the number of buses necessary to meet a certain showing with the base monthly rate. A *"showing"* represents the percentage of buses which carry a particular ad, represented as a number between 1 and 100. In the case of Asheville, a "50" showing can be achieved by placing ads on ten buses.

In order to motivate advertisers to invest in long-term contracts, staff included a 5% discount for three months, 6% for six months, and 7% for the entire year. Offering bulk discounts is standard practice across the advertising industry.

Applying the above calculations, staff set the rate structure for advertising on ATS buses. This rate sheet was reviewed by, and has support from, the Transit Commission.

Billboard rates: In the context of this report, a billboard is a 28 x 40.5 inch advertising space within a lockable frame. The top half (28 x 20) will be rented out to advertisers, and the bottom half (28 x 20) will be reserved for public information and civic announcements.

Since this type of product has never been offered by the city, and staff was unable to find a city in North Carolina that offered similar space - staff resorted to comparing rates with the rates for advertising on the back page of local newspapers, and researched as to what the market would support.

The Transit Commission approved staff's recommendation with a 5 to 1 vote on August 13, 2008.

Should the Council approve this proposal, a wording amendment adding language to the City's sign code specifically allowing this form of advertising will have to follow.

This action complies with the City Council's Strategic Plan in the Green focus area by assisting in the development of a sustainable funding structure for Asheville Transit.

Fiscal impact:

- Costs per billboard: Approximately $200. Total cost: $800.

Pros:

- Advertising on the buses can generate an extra $60,000 ($120,000 within a year). In the long term, this could go up to as much as $380,000 per year.

- Staff expects to generate between $19,000 to 30,000 in the first year from advertising in the city-owned elevators and hallways.

Cons:

- Adverting on buses dilutes the ATS brand.

City staff recommends City Council adopting a resolution approving the new rate sheet.

When Vice-Mayor Davis recalled the negative reaction from residents about the full wrap buses, Mr. Van Heden said that the Transit Commission discussed that at length. The outcome was to limit the full wraps to five buses. Advertisers can use different combinations for different types of wraps, but at no given time over the next two years can any one advertiser be able to dominate the entire civic space. This way we can balance the desire to meet funding requirements without having to depend on taxpayers at the same time preserve civic space.

In response to Councilwoman Cape, Mr. Van Heden said that we can generate $120,000 to $300,000 if everything worked out ideally, opposed to $64,000 if we continue on the track we are on now.

Councilwoman Cape asked how the additional revenue will be utilized. Ms. Ball responded that Assistant to the City Manager Lauren Bradley is working on creating a marketing plan so we can figure out how to better invest those monies. Staff will be reporting back to Council with that proposal.

Councilman Mumpower felt we have spent years developing heavy regulations for billboards, commercial signage and in people's yards, and now that it serves our purposes, we are prepared to approve signs. He felt we are being inconsistent. He also felt we are putting ourselves in competition with the business community and advertising firms and that is not good city government.

Councilman Russell felt that this have been approved by the Transit Commission by a 5-1 vote and it will increase the revenue stream. Therefore, he moved to approve Resolution No. 08-193 adopting new rates for advertising on City buses and parking deck properties as outlined by City staff. This motion was seconded by Councilwoman Cape.

In response to Vice-Mayor Davis, Mr. Van Heden said that we will lose approximately $110,000 if we do not allow full wraps. He explained why he did not think the prohibition of full wraps would affect the base revenue of $120,000.

Councilwoman Jones hoped we would look for opportunities for public service announcements inside the buses at a reduced cost.

Councilman Newman moved for a friendly amendment to the motion to not allow the full side or full wraps. Councilman Russell did not accept the friendly amendment. Since Councilman Russell did not accept the friendly amendment, Mayor Bellamy asked for a second to the amendment. Said motion died for lack of a second.

Councilman Newman moved for a friendly amendment to the motion to not allow the full side, full wrap or King Kong signs. Councilman Russell did not accept the friendly amendment. Since Councilman Russell did not accept the friendly amendment, Mayor Bellamy asked for a second to the amendment. Said motion died for lack of a second.

Councilman Newman moved for a friendly amendment to the motion to not allow the full side, full wrap or King Kong signs. Councilman Russell did not accept the friendly amendment. Councilwoman Cape seconded the motion and said motion failed on a 3-4 vote, with Mayor Bellamy, Councilwoman Jones, Councilman Mumpower and Councilman Russell voting "no."

Mayor Bellamy could not support the motion in that she felt it will create a problem in our community with the increase of signage on our buses, based upon the feedback we get about yard sale signs. She looked forward to seeing other opportunities to diversify funding sources.

The original motion made by Councilman Russell and seconded by Councilwoman Cape, adopting new rates for advertising on City buses and parking deck properties as outlined by City staff, carried on a 4-3 vote, with Mayor Bellamy, Vice-Mayor Davis and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 312

VII. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of August 15-28, 2008: Betty Clark (Water), Olivia M. Walton (Sanitation), Greg and Susanne Wilson (Sanitation), Southern Concrete (Sanitation), John Santangelo (Streets), AT&T (Water), Donna Mackin (Water) and Charter Communication (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Gene Hampton, founder of North Carolina Citizens for Quality Government, spoke to Council the US Constitutional right of freedom of speech at Bele Chere.

Mr. Gilian Kearns spoke about his inability to register people to vote at the Transit Station. As this is a time sensitive matter, Mayor Bellamy placed this on the September 16, 2008, worksession for Council to receive a report from City Attorney Oast.

Councilman Mumpower commended Employment Staffing Inc. for stepping forward with the donation of $500 to Western Carolina Rescue Ministries (WCRM). He also thanked WCRM for their long standing history of not reaching into taxpayers' pockets.

Councilwoman Cape said that she has just returned from a Sister City trip to Nigeria and she was able to see the value of social and governmental infrastructure and what a difference it makes regarding litter, potholes, streets, etc. She felt we take for granted the basic infrastructure., and was pleased to see how well the City of Asheville functions as a community. She commended City staff who work so hard on those basic elements.

Closed Session

At 7:50 p.m., Councilman Mumpower moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to

which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: State of North Carolina; City of Asheville; and County of Buncombe - The statutory authorization is NCGS sec 143-318.11(a)(6); and (2) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e) - The statutory authorization is contained in NCGS sec. 143-318.11(a)(1). This motion was seconded by Councilwoman Jones and carried unanimously.

At 8:57 p.m., Councilman Russell moved to come out of closed session. This motion was seconded by Councilman Mumpower and carried unanimously.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:57 p.m.

Magdalen Burleson
CITY CLERK

Jerry W. Bellamy
MAYOR

Tuesday – September 16, 2008 - 3:00 p.m.

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

WATER SYSTEM MASTER PLAN UPDATE

Interim Water Resources Director Robert Griffin said that a Water System Master Plan is typically updated every 5-10 years. The City of Asheville Water Resources Department's Master Plan was last updated in1995. A Water System Master Plan helps project future area growth and what water system updates will be needed to accommodate that growth.

In June 2007, the Water Resources Department partnered with Jordan, Jones & Goulding (JJG) to update the Water System Master Plan. JJG has completed their study and made the following projections and recommendations:

- Buncombe County Growth – In 2007, Buncombe County population was 243,565. In 2012, 2017 and 2037, the population is projected to be 264,326, 285,088, and 368,135, respectively. The major growth is projected to be in the southern part of Buncombe County.
- Model Development – JJG developed a model to project future needs for treatment plants, pipes, pump stations, and valves. Model Development will also provide GIS integrated water computerized hydraulic model and maps.
- System Evaluation – with future growth projections, the water treatment plant capacity will be needed to be increased around the year 2025.
- Capital Improvement Plan – between now and 2037, JJG projects 14 pipeline installations, one pump station replacement, one new pump station, and additional water treatment plant capacity at a total estimated cost of $60,449,000. This amount does not included recommended annual costs for pipe replacement due to age or any line extensions that the City accepts from developers.

This project is part of the City Council strategic plan to improve City infrastructure.

Pros:

- The Water System Master Plan Update will help ensure that Asheville builds the water infrastructure to accommodate future growth.

Cons:

- Failure to update the Water System Master Plan will not prepare the Water Resources Department for future growth.

The Master Plan recommends additional long-term improvements that will need to be planned for and financed through future system revenues.

Mr. Eric Nease, Water Resources Practice Leader with Jordan, Jones & Goulding, reviewed with Council the population projections for Buncombe County; and Buncombe County's projected growth to the year 2037.

He explained that the model development (1) treatment plants, pipes, pumps, and valve locations based on the City's mapping system; (2) updated pressure zone boundaries; (3) actual pump data used to simulate pumps; (4) system controls included in model; and (5) model verified to simulate actual system data.

The system evaluation consisted of (1) total system demand for 2037 is 41 MGD; (2) exceeds current treatment capacity of 37 MGD; (3) additional water treatment capacity needed in 2025 ±; (4) pipes evaluated for velocity; (5) tanks evaluated for ability to drain and re-fill; and (6) pumps evaluated for capacity.

Using a map, he then reviewed the recommended improvements.

He explained the growth capital improvement plan summary as follows: Completed by year 2012 would be (1) 6 pipeline projects - $4,740,000; and (2) Walnut Cove Pump Replacement - $292,000. Completed by year 2017 would be (1) 4 pipeline projects - $5,892,000; and (2) New Mills Gap Pump Station - $1,556,000. Completed by year 2037 would be (1) 4 pipeline projects - $10,797,000; and (2) additional water treatment capacity - $37,172,000. The total cost at 2008 dollars is $60,449,000. These costs do not include recommended annual costs for pipe replacement due to age.

Throughout discussion, Mr. Nease, Mr. Griffin and Mr. Ron Thomas responded to various questions/comments from Council, some being, but are not limited to: is the Walnut Cove Pump Station needing to be expanded due to the growth in the area; what kind of models or information was used to obtain the Buncombe County growth projections and where the County will grow; how were other area water systems factored into this model; did the consultants look at how we might be working together with other water systems in our area; is there anyway to cost-share with developers if their development overtaxes our pump station; what is the cost of a pump station; is the completion timeline for the improvements realistic; when water lines are upgraded, do most cities spread the costs out amongst present customers, new customers and developers; in the projected Buncombe County population growth chart, were manufacturing or economic industry numbers factored in; should we dredge the existing lakes; and are some growth patterns more expensive for infrastructure than others.

Councilwoman Jones cautioned using this Buncombe County projection model in the future because it was based on a county that didn't have zoning opposed to using a land use plan of where we would like to drive our infrastructure and growth.

In response to Vice-Mayor Davis about discussions with the surrounding communities, Mayor Bellamy said the Land-of-Sky Regional Council is working on a comprehensive water study taking into consideration all the municipalities and the unincorporated areas. Recently the Mayors in Buncombe County met to discuss the same issues about water. She asked the City Manager to provide Council members with information previously provided to the Mayors in Buncombe County. Woodfin is able to grow because of the supplemental water they receive from the City of Asheville. She has asked City Manager Jackson to look at Woodfin's system, which is not run by the Town of Woodfin, about their capital improvement plan and how they will grow.

In response to Mayor Bellamy about staff's recommendation, Mr. Griffin recommended Council modify the Water Master Plan with these updated recommendations, understanding it is a 30-year plan and situations can change.

Mayor Bellamy requested staff research best practices on funding going forward. She suggested staff look at the Metropolitan Sewerage District model on how they deal with impact fees and developments tapping into the sewerage system. We may be able to duplicate some of their successes. She also suggested staff look at other cities around the state that have had to deal with infrastructure upgrades, so the City would not have to bear the full cost of upgrading the pump stations. She also asked we begin some deliberate conversations with the Woodfin Water

System and how and where they are going to grow. She looked forward to the City's participation with the Land-of-Sky Regional Council's comprehensive water study and how we can work together regionally.

FUEL CONSUMPTION UPDATE

Assistant City Manager Jeff Richardson said that the purpose of this report is to update Council on fuel supply and its impact on service delivery.

Recent Hurricanes Ike and Gustav have temporarily interrupted some gasoline supplies to the pipelines that serve North Carolina. As a result of these interruptions, North Carolina is experiencing high gas prices and gas shortages. Staff is currently working to promote the Asheville Transit System during this time as a way to conserve fuel, avoid high gas prices, and avoid gas shortages. Staff is proactively reviewing the City-wide fuel conservation plan on a department-by-department level and making any necessary modifications in the event that the plan needs to be implemented. The conservation plan is designed to provide distinct levels of fuel consumption reduction which, if implemented at higher reduction levels, can impact City services.

As of Friday, September 12, 2008, market conditions and City supply quantities were 26,000 gallons of diesel and 14,000 gallons of unleaded fuel. Fuel conservation measures have been emphasized to City employees. On a department-by-department level review, the City-wide fuel conservation plan is being reviewed for any imperative modification. The Public Information Officer will alert citizens through press releases and website that all City services are continuing as normal.

As of Monday, September 15, 2008, market conditions and City supply quantities were 22,000 gallons of diesel and 17,000 gallons of unleaded fuel. By the end of the day, the City Manager called for implementation of the first phase of the accelerated fuel conservation operational plan for City government. The first phase of the plan will not interrupt police, fire and rescue, and transit services. Fuel conservation measures will be taken in order to make the most efficient use of City supplies. City employees will consolidate services where possible and delay some maintenance functions.

As of midday Tuesday, September 16, 2008, market conditions and City supply quantities were 20,000 gallons of diesel and 16,000 gallons of unleaded fuel.

Conservation measures of Level 1 include (1) no disruption of core City services; (2) delay non-essential travel when possible; and (3) consolidate services were possible. Conservation measures of Level 2 include (1) no disruption of police, fire and rescue, and transit services; and (2) non public-safety related services will be reduced (a) inspectors carpooling to work sites; (b) planning field inspections are delayed; (c) suspension of street cleaning and tree crew work; (d) yard waste, bulky items and white goods collection will be suspended; and (e) parks center programs. Conservation measures of Level 3 include is to reduce services in order to fully focus on public safety and health as well as transportation.

Our goal is to promote the Asheville Transit as a way to conserve fuel and avoid high gas prices and shortages. Media outreach includes (1) press release on September 15, 2008 to all outlets; (2) contacted television highlighting public transit; (3) newspaper op-ed submitted; (4) radio and public service announcements; (5) website – Asheville Transit is featured; (6) website – all current service information posted; and (7) City Channel – all transit and other information current.

The ridership numbers remain strong over the past two weeks. Arterial route ridership is up on Merrimon Avenue, Hendersonville Road and Tunnel Road. Additional analysis is underway.

The next steps include (1) monitoring; (2) fuel supply management; (3) conservation; and (4) public relations.

This report is for information purposes only as the City is currently remaining in Level 1.

In response to Councilwoman Jones, Mr. Richardson said that he would provide Council with a comparison of ridership before the hurricanes and after.

In response to Councilwoman Jones, Mr. Richardson said that the City will have conversations with the Transit Management Company to make sure they are sensitive to the stressful conditions of the bus drivers as ridership increases.

Mayor Bellamy hoped that if the City must proceed to Level 2 conservation measures, that parks center programs be reduced last as the centers provide affordable after-school care. She again lobbied for buses to run on Sundays.

UPDATE ON STATUS OF PROPOSED PARKING GARAGE AT 51 BILTMORE AVENUE

Director of Transportation and Engineering Cathy Ball said that the purpose of this report is to update City Council on the terms of the proposed parking garage on Biltmore Avenue. Staff recommends consideration of these terms and approval at the October 14, 2008, City Council Meeting.

The City of Asheville provides public parking in Downtown Asheville as an economic development incentive for merchants, restaurants, retailers and offices. The City currently operates a parking system that consists of three parking garages, several surface parking lots and on-street parking. A parking study prepared by Kimley-Horn and Associates this year evaluated the demand for parking versus the supply in the Central Business District. The study determined that the area know as the Biltmore Avenue had a current peak deficit of parking in the amount of 622 spaces and a normal demand of 476 parking spaces. The proposed location of the garage is a surface parking lot with approximately one hundred parking spaces.

The project is a mixed-use building that includes: an Aloft Hotel; sub-leased retail spaces along Biltmore Avenue; a City owned parking garage (437 spaces); and a component that will be a second phase for an area along Biltmore Avenue and Lexington Avenue to include housing units. The second phase portion of the project will come back through the review process including the Downtown Commission. This site is identified in the City Development Plan 2025: Center City Plan as both a potential parking garage site and as a possible location for a catalytic development because of its important location and size. Catalytic developments are projects that because of their size, location or programming have the potential to stimulate additional investment or provide missing uses that are critical to maximizing downtown vitality.

The initial concept for the building was nine levels above grade on the Biltmore Avenue site and four levels under ground. The Downtown Development Commission was concerned about the height of the building, parking spaces fronting on Biltmore Avenue and the lack of retail space on Biltmore Avenue. The design team moved the lobby to the second level and created a balcony an expanded the footprint of the building to the Hot Dog King site. At the last meeting a subcommittee of the Downtown Planning Commission, they were pleased with these changes.

The current proposed parking garage will have 437 spaces on seven levels. The garage has access points from three streets: one-way in from Biltmore Avenue and Aston Street, and two-way movement at Lexington Avenue. Several garage levels are below grade with the design taking advantage of the natural terrain across the site to eventually meet Aston Street and Biltmore Avenue at grade. The retail spaces and hotel use cover and top the garage along Biltmore Avenue. Along Aston Street the garage fronts directly at the street and provides a

driveway into the garage. Public restrooms are provided in the garage with direct access from Aston. Because of the presence of the garage on the sidewalk edge, a space for public art will be provided to soften the façade and create pedestrian interest.

In summary of the current parking proposal is (1) public (a) 437 parking spaces; (b) public restrooms; and (c) City owns and operates parking garage; and (2) private (no public funds will be spent on private development) (a) 145 hotel rooms; (b) ground floor retail on Biltmore Avenue; and (c) future workforce housing liner on Lexington Avenue.

The retail and hotel uses occupy the frontage areas along Biltmore Avenue and above the street level along Aston Street. The building is seven stories along Biltmore Avenue and measures about 95 feet to the top of the roof structure. Ground level retail space along Biltmore Avenue will total about 4,800 square feet which will likely be subdivided and leased depending on demand. The hotel use occupies the second floor and above as measured from Biltmore Avenue and has 145 guest rooms. A balcony space for the hotel is located on the second level of the building and will serve to activate the street. A hotel amenity floor is provided at the top of the garage level.

Phase Two areas of this project are made up of: a larger space lining the garage along Lexington Avenue and a smaller space adjacent to the retail spaces on Biltmore Avenue. King James, LLC will hold these properties and will develop plans for them at a later date.

The cost associated with building a parking garage includes property acquisition, design and hard construction. A stand alone parking garage would be $17,000 to $20,000 per space. A multi-use parking garage would be $25,000 to $30,000 per space.

When Public Interest Projects (PIP), the owner of the property at 51 Biltmore Avenue, approached the City with a public/private partnership, they did not want to sell the property but rather lease this property. Following the financial analysis, the City determined that it was a better financial decision to purchase the property rather than lease. Pubic Interest Projects has agreed to sell at a price of $3,110,000.

During the course of the last year, the Hot Dog King property adjacent to 51 Biltmore Avenue became available for sale. Our parking consultant, Kimley Horn Associates, evaluated the potential to expand the footprint of the garage to the Hot Dog King property. Preliminary cost estimates indicate that the City would save $5,200 per parking space or $2,272,400. PIP has a contract for the Hot Dog King property in the amount of $1,450,000. The total project savings as a result of purchasing the Hot Dog King property is approximately $800,000.

Kimley Horn has developed an opinion of probable cost for the parking garage on the expanded footprint of $1,800 for design and $26,200 for hard construction. The total estimated cost for design and hard construction of the 437 car parking garage is estimated at $12,236,000.

In efforts to facilitate a good urban design of the project to include mixed-uses, there are a number of easements and air-rights required for the project. The project is such that it fits together like a three dimensional puzzle. The lowest level of the parking garage fronts under the hotel on Biltmore Avenue, requiring a cross-easement. Some of the hotel will be constructed over the parking garage, requiring air-rights. PIP will retain air-rights over the parking garage on the Hot Dog King property for future residential development.

The terms of the partnership is proposed for sixty years. McKibbon Hotel Group, MHG, has requested a maximum of 35 monthly reserved parking spaces on the Biltmore Avenue level. They have requested an additional 115 evening/weekend parking spaces. The rate for these spaces would be market rate plus a premium rate associated with financing of the dedicated spaces which is estimated at an additional $39 per month.

MHG and PIP have requested that the $39 per month be waived. Staff would agree with this provided that the construction cost (hard construction) budget is reduced $3,000 per parking space. This would result in a total saving to the City of $1,311,000. MHG may be able to reduce the construction cost by building the hotel and parking garage at the same time. Additionally, the private sector has been able to construct project at a lower cost than the public.

PIP has agreed to sell a portion of the property at 51 Biltmore Avenue and the Hot Dog King Property for $4.56 million dollars. This sell would include all cross easements and air-rights necessary to build the project as currently designed. Additionally, the City would have the right of first option for the property owned by PIP at 85 South Lexington Avenue, adjacent to the site.

PIP has requested a maximum of 50 monthly parking spaces. The City proposes to lease these spaces for the same terms as indicated above for MHG. PIP has requested to be included in waiving the additional taxable rate if the project is constructed at a $3,000 cost per space to the City.

In summary of the terms of PIP, the purchase price is $4,560,000 for land and first right offer (approximately $1 Million in savings over land use) (a) 51 Biltmore Avenue garage site; (b) Hot Dog King garage site; (c) air rights for parking deck under frontage on Biltmore Avenue; and (d) PIP retains air rights over garage on Hot Dog King land. Regarding the frontage (a) construction staging on Lexington Avenue; and (b) first right of offer to expand deck over 85 South Lexington Avenue. The maximum of 50 monthly parking spaces (1) 60 years; (2) $101 market + taxable rate (taxable rate estimated at $39 per space per month); and (3) $140 per month per parking space.

In summary of the terms of McKibbon Hotel Group (MHG), (1) MHG constructs garage/City takes possession after CO issues; (2) maximum of 35 monthly 24/7 spaces (a) 60 years; and (b) $101 market + taxable rate; and (3) maximum 115 evening/weekend spaces (a) 60 years; and (b) $60 market + taxable rate. If MHG saves the City $3,000 per space from probably construction costs, City waives the taxable rate. (PIP has requested to participate in this savings.) She then explained how this would work.

This project is consistent with the current recommendations of the Downtown Master Plan, City Council's Downtown Parking Plan, Council's Strategic Goals and the 2025 Plan. The Downtown Commission has reviewed the project informally three times and will have a formal recommendation on September 12, 2008. The Technical Review Committee of the City of Asheville will review the project at its September 15, 2008 meeting.

Next Steps

This project is scheduled for the Planning and Zoning Commission Meeting on October 1, 2008. Staff has requested this item be reviewed at City Council's formal meeting on October 14, 2008. Staff will request the following approvals at that meeting:

- Conditional zoning;
- Downtown development agreement;
- Parking agreement;
- Land purchase agreement;
- Cross easement/air rights agreement;
- Reimbursement resolution; and,
- Construction management agreement.

The project would move into the final design stages after the October meeting. Construction would be expected to being in the Summer/Fall of 2009.

Considerations of adopting a resolution authorizing the City Manager to execute this contract are as follows:

Pros:

- According to the findings of the downtown parking study, this area has a deficit of public parking. This parking garage would address this need.
- Project should allow the development of workforce housing more feasibly due to reduced capital requirements for constructing private parking which in turn supports lower priced housing units.
- Capitalize on relationship with mixed use developer who is willing to partner with the City and make private property available for public use.
- Offer the opportunity to leverage public parking as an economic development tool.
- Offers community benefits such as additional jobs and tax base for the City created by the mixed use elements.
- Public parking helps sustain existing investments and future growth of retail and office uses in the area.
- Public parking is critical for downtown office job expansion.

Cons:

- Public-private partnerships tend to be complicated and require additional coordination between the City and the private sector than traditional stand-alone projects.
- Specific performance guarantees must be made by the City to third parties. Corresponding grantees are required of the developer to the City regarding the quality and sustainability of the mixed use components.
- The cost of the land is higher than the appraised value. Originally the owner did not want to sell the property but rather lease the property to the City for sixty years. After the City determined that it was a better financial decision for the City to purchase the property, the owner agreed to sell but with the restriction that they recoup the capital gains taxes.

The pro forma for this project indicates that the annual operating deficit for the first year to be approximately $650,000. This amount will be reduced every year until the debt service (loan) is paid. After the debt service is paid, the revenues for the parking garage will exceed the expenditures. All of the operating deficit will be paid from the parking enterprise fund.

Staff recommends consideration of these terms and approval at the October 14, 2008, City Council meeting.

Mr. Pat Whalen, President of PIP, spoke in support of all the things this partnership will accomplish.

Mr. Wes Townsend looked forward to working on this kind of project downtown.

Throughout discussion, Mr. Whalen and Ms. Ball responded to various questions/comments from Council, some being, but are not limited to: who assumes the cost of the extra foundation on the Hot Dog King property in order for PIP to retain air-rights over the parking garage for future residential development; are there any points of vulnerability on this project in terms of the economy; and what is the tentative timeframe to begin construction if approved by Council.

There was a brief discussion regarding predatory towing from the existing parking lot. Mr. Whalen felt that once more monthly parking is made available downtown, non-consensual towing will decrease. He said that he would be happy to work with the City to find a solution to predatory towing.

EMPLOYER OF CHOICE PROGRESS REPORT

Human Resources Director Lisa Roth said that regarding the labor force, (1) the U.S. workforce is aging; (2) in the next 5 to 15 years, 76 million baby boomers will be replaced by only 66 million new employees; and (3) thirty percent of City employees are eligible to retire in the next five years.

Using a chart she explained the percentage change in population by age group for the years 2000-2010.

Regarding competition for labor, (1) finding qualified candidates is becoming more difficult; (2) competing with other government agencies and the private sector for the same talent; and (3) Asheville's cost of living creates recruitment and retention issues.

She then reviewed a cost of living index chart of Asheville, Charlotte, Raleigh and Winston-Salem. The City's lowest wage of $10.37 per hour with benefits exceeds the $9.85 per hour with benefits proposed.

She explained how we are bridging the gap with (1) market based pay; (2) health insurance options; (3) flexible work hours; and (4) other benefits. That is working in that (1) the market plan is helping; (2) turnover rate is declining; (3) positive feedback on benefits; and (3) recruitment issues still exist.

Using a chart she showed how the market plan is helping and how the turnover rate is declining.

The old paradigm is "The City pays better than the County but the County has better benefits." She showed a salary comparison of staring pay for a City telecommunicator and auto mechanic vs. a County telecommunicator and auto mechanic. Regarding the benefit comparisons on health insurance comparison – the City budgets approximately $6,100 per employee vs. the County budgets approximately $11,000 to $12,000 per employee. With regard to 401 (k) comparisons, the City provides 5% 401 (k) contribution, whereas the County provides 8$ 401 (k) contribution.

She said we need to (1) continue market pay plan until July 2010; (2) classification study underway with completion in July 2009; (3) new compensation structure implementation July 2010; and (4) continuous evaluation of best practices to achieve Employer of Choice goal.

In response to Councilman Russell, Ms. Roth said the City is discussing succession planning.

In response to Councilman Newman, Ms. Roth said that the City is in the third year of the market pay plan.

ACCIDENT/COLLISION AVOIDANCE TRAINING FOR YOUNG DRIVERS

Vice-Mayor Davis said that the Public Safety Committee reviewed the Collision Avoidance Driver Training Program to be offered to high school age drivers.

He said that at the direction of the Public Safety Committee, the Asheville Police Department has evaluated the feasibility of implementing a Collision Avoidance Driver Training Program to be offered to high school age drivers.

Earlier this year, the Asheville Police Department was approached by a citizen who was familiar with a driver training program offered in other areas of the United Stated for new drivers, in an effort to reduce new driver traffic accidents. Police Department staff member Sgt. Stony

Gonce has analyzed several program options in an effort to determine the feasibility and cost associated for offering this type of driver training program.

Pros:

- National statistics show dramatic decreases in new driver traffic crashes for drivers who participate in this type of training.
- Local efforts to emphasize safe driving habits to young drivers can help to save lives.
- This program provides the Police Department community relations outreach opportunities with our youth.

Con:

- Mid-year start-up of an unbudgeted program.

The program cost ($8,500) is not budgeted in the current fiscal year. Opportunities may exist to obtain private funding assistance from the local insurance industry.

The Public Safety Committee recommends Council consider starting the program either mid-year or at the start of Fiscal Year 2009-10.

Sgt. Gonce provided Council with a brief overview of the Collision Avoidance Training (CAT) is an advanced defensive driving and vehicle control program. It is a two-day program designed for teenager drivers.

Program objectives include (1) enhance driver awareness; (2) develop skills to anticipate and react appropriately; and (3) develop a foundation of safe driving habits.

The classroom portion, consisting of four hours, covers (1) crashes and driver responsibilities; (2) defensive driving; (3) vehicle safety devices; (4) acceleration/deceleration; (5) vehicle maneuverability; (6) reaction time; and (7) other material. We do want the parents involved in the classroom and driving range portions.

Five basic skills are covered: (1) evasive maneuvers; (2) threshold/emergency braking; (3) forward serpentine cornering; (4) backing; and (5) skid recovery.

There are 8 hours of driving range exercises (1) shuffle steering/figure 8; (2) evasive maneuvers and controlled braking; (3) forward/reserve serpentine; (4) backing; (5) cornering; and (6) skid recovery. Each student provides his/her own vehicle for the driving exercises.

Extra subject material covered includes (1) safety belt usage; (2) drinking and driving issues; (3) cell phone usage; and (4) general driver distractions.

Regarding fees, (1) training is provided by the National Traffic Safety Academy (NTSA); (2) three year NTSA licensing fee of $7,600; (4) total annual program cost of $8,500; and (4) cost of $105 per student (to cover their course material and program fees).

The Public Safety Committee recommendations are (1) to implement the CAT program; and (2) schedule consideration and a budget amendment or include in the 2009-10 budget.

As discussion occurred surrounding support of the program, Sgt. Gonce responded to various questions/comments, some being, but are not limited to: is this program designed only for teens or can it be modified for adults as well; is there a way to solicit some scholarships; is there a private service in Buncombe County or North Carolina that provides this service; is there a system for selecting young adults if the program is a huge success; is there a way to encourage this program other than asking the teens themselves to enroll, i.e., perhaps a requirement to play

sports; are there opportunities to cost-share with other partners, i.e., the YMCA Teen Program, Buncombe County or the insurance industry; does the annual program cost of $8,500 include the $7,600 three-year license fee; will after-hour law enforcement driver instructors staff the actual program; how much will the after-hour instructors receive in compensation; what will the $105 per student pay for; is there a system for selecting young adults; if the program is a huge success, is it anticipated if the program is a real success, that it will become time intensive at some point; is there a way to get the kids not pre-deposed to be safe drivers to get these skills; and is it possible to target youth who have already had accidents be mandated to go through this program.

Councilman Russell sees benefits of this program to the City and to the people in the car. This ties in well with City Council's goal of being a safe city. As far as the costs are concerned, he was looking at this program entirely through his company of State Farm Insurance, without the City being involved. Having police officers involved would have a profound impact on the young drivers. He thinks there are ways to almost eliminate the public cost of this and he will be happy to champion the efforts on behalf of the insurance industry.

It was the consensus of Council to support this program and to ask Vice-Mayor Davis meet with Councilman Russell and the Public Safety Committee regarding funding options and to report back to the full Council.

REGULATION OF ACTIVITES AT TRANSIT CENTER

City Attorney Oast said this is the consideration of policy direction for activities at Transit Center said that this is the consideration of policy direction for activities at Transit Center

Last week, an individual attempted to conduct voter registration activities in the City's Transit Center. He was advised that such activities were not allowed in the Transit Center. This matter was brought to Council's attention at your September 9 meeting; and Council requested consideration at the September 16 work session.

One of the issues that has been raised with respect to this matter is that the City has no rule or policy regarding activities in the Transit Center. While the City Council certainly can adopt rules and regulations regarding the use of City facilities, State law and the City's Charter also confer this authority on the City Manager and, through the Manager, to the directors of the various City departments. The Manager's authority is subject to the general direction control of the Council, and other general legal and constitutional limitations.

Accordingly, the responsibility for the operation of the transit facility, as well as other City-operated facilities, is the responsibility of the City Manager and administrative staff. Written rules and policies exist for some but not all City facilities. It is not possible to have a set of rules that address every possible activity, and in some facilities, the conduct of users is monitored by those in charge to ensure that operations are not interfered with.

The central issue here – legal and operational – is whether the City can or should limit or prohibit activities in the Transit Center that are not related to the operation of the facility. Such activities, even if limited to non-commercial activities, could include petition drives, speech making, and distribution of leaflets, to name a few (herein collectively "speech activity").

The Transit Center has been in operation since 1997. Although the issue of speech activities has not arisen often during this time, the Transit Division advises that such activity historically has not been allowed. On a few occasions in the past, individuals wishing to engage in speech activity have been directed to the sidewalk immediately adjacent to the Center, an alternative that appears to have been satisfactory.

The Transit Services Director has identified some operational issues with allowing unrelated activities in the Transit Center. These include:

1. Users of the Center may be distracted and less alert to vehicular traffic, potentially compromising their safety.

2. The Transit Center is an area that frequently sees a high level of pedestrian traffic, when multiple buses are discharging passengers at the same time. The space available for this pedestrian flow is limited, and obstructions to the flow can reduce its efficiency and compromise safety.

3. Activities involving the distribution of leaflets or fliers create the potential for litter in the Transit Center and surrounding area.

4. Activities that involve subject matter that is controversial or offensive to some may create an uncomfortable environment for users and Transit employees, who are essentially a captive audience.

The Transit Center is a use-specific facility that has not historically been used for activities such as voter registration or petition drives. It is not a traditional public forum in the same way that parks and sidewalks are. There is space available directly adjacent to the Transit Center where these activities can occur, and historically have occurred. If these activities are allowed within the Transit Center itself, the City may not regulate them on the basis of content (except for "commercial" activities, which is not always an easy distinction to make). Thus, if the Transit Center is made available for voter registration or another similar speech activity, it essentially becomes a public forum and it is extremely difficult to limit its use for other similar activities.

If speech activity is allowed to occur, the fact that the Transit Center is a use-specific facility may permit the City to take appropriate steps to ensure that the use is not interfered with, such as designating space where speech activity can occur. If this is done, however, there may be practical issues associated with monitoring this activity with a limited staff.

The fiscal impact is difficult to assess without knowing the level of activity that will occur if allowed.

A motion to provide policy direction to the City Manager is appropriate. If the direction is to allow speech activity, it is recommended that the Manager be allowed to designate areas where it can occur, and develop other regulations to ensure that such activity does not interfere with the operations of the Transit Center.

After a brief discussion regarding the inability of Council to permit voter registration at the Transit Center and not allow other first amendment rights, it was the consensus of Council to permit speech activity at the Transit Center with the City Manager designating space where that speech activity can occur, so as not to be overbearing to the customers and so the activities do not interfere with the operations of the Transit Center. In addition, Council directed that the activities be monitored and the City Manager report back to Council for further policy guidance, if necessary. City Manager Jackson said that he would work with the Transit Manager and the City Attorney to have something in place in a week, noting that he would make contact with the person who brought this to Council's attention to advise them of Council's guidance.

BOARDS/COMMISSIONS

It was the consensus of Council to interview Brock Moore, Ronald Maynard and Kyle Ross for the east vacancy on the Citizens-Police Advisory Committee.

It was the consensus of Council to re-advertise for a vacancy on the Civic Center Commission. Vice-Mayor Davis said that the Boards & Commissions Committee will give thought

to asking for the age of applicants on our Board & Commission Application, for diversity, not only with race and gender, but with maturity.

It was the consensus of Council to reappoint Stephanie Cooper and James Lewis and appoint Dr. Stephen Hulkower to the Police Officers and Firefighters Disability Review Board.

It was the consensus of Council to interview Michael Orford, Bruce Emory and Larry Chapman for a vacancy on the Transit Commission. David Lack will also be a candidate; however, he will not be brought in for an interview.

It was the consensus of Council to re-advertise for a vacancy on the Civil Service Board.

It was the consensus of Council to invite the Transit Commission to a meeting to discuss their desire for restructuring. Vice-Mayor Davis said if a restructuring is recommended by the Transit Commission, he strongly urged that it be with a staff recommendation as well.

Other Business

Mayor Bellamy reminded City Council of the reception on September 23, 2008, in Room 209 of the City Hall Building at 4:15 p.m. The Chamber of Commerce will present a gift of appreciation to the City for its support of the new Chamber Building and Visitor Center through the Advantage Asheville capital campaign. They will give the City three pieces of artwork to be displayed in the lobby area of Room 209. Former Mayors Sitnick and Worley will be invited as they helped launch and support the campaign during their tenures.

ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 5:50 p.m.

Magdalen Burleson
CITY CLERK

Jerry W. Bellamy
MAYOR

Tuesday – September 23, 2008 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Newman gave the invocation.

FUEL SUPPLY UPDATE

Chief Financial Officer Ben Durant updated City Council on the fuel supply. He explained the conservation measures for Level I (1) no disruption of core City services; (2) delay non-essential travel when possible; and (3) consolidate services where possible. Level 2 conservation measures include (1) no disruption of police, fire and rescue, sanitation, and transit services; and (2) non public safety related services will be reduced (a) inspectors carpooling to work sites; (b) planning field inspections are delayed; (c) suspension of street cleaning and tree crew work; (d) yard waste, bulky item and white goods collection will be suspended; (e) parks center programs; and (f) minimal staffing. Level 3 conservation measures include reducing services in order to fully focus on public safety and health as well as transportation.

Marketing transit and alternatives include (1) press release on 9-15-08 and 9-22-08 (all outlets); (2) contacted television highlighting public transit; (3) newspaper op-ed submitted; (4) website – Asheville Transit is featured; (5) website – All current service information posted; (6) City Channel – All transit and other information current; (7) Share the Ride NC; and (8) Emergency Ride Home.

Regarding the Asheville Transit ridership, (1) ridership numbers remain strong; (2) arterial route ridership up on Merrimon Avenue, Hendersonville Road, and Tunnel Road; and (3) ridership analysis has been provided.

The next steps are to monitor, fuel supply management, conservation and public relations.

Mr. Mack Sulley, representing the Buncombe County Emergency Management Services, explained what Buncombe County is doing regarding fuel conservation.

Mr. Allen Johnson, representing the Buncombe County Schools, updated Council on how the Buncombe County Schools are implementing conservation measures.

Mr. Randy Flack, representing Congressman Heath Shuler's Office, explained how Congressman Shuler has been making contact with all the counties in Western North Carolina to keep them updated regarding the status of the Colonial Pipeline (which supplies Spartanburg). Congressman Shuler spoke with the Dept. of Energy, Governor Easley's Office, the Attorney General's Office and Mr. Sam Whitehead who is the President of Colonial Oil. The fuel supply is

getting better, although slowly. They hope within a week the pipeline will be running at full capacity.

Mayor Bellamy spoke with representatives from Senator Burr's office as well. They have contacted the distributor in Wilmington to see if we can get additional tankers into our community. She also contacted the Assistant Director of the U.S. Dept. of Energy to see what he could do to get additional fuel to our community. In addition, she too talked with Mr. Whitehead and the two lines that serve our area are running at reduced rates and Asheville is on the lower end. She explained that Wilco-Hess continues to get gas as they are connected to a larger oil company coming out of Wilmington. She said that we do not have any oil companies in our community. The biggest oil company in our area is Wilco-Hess and they are serviced by Wilmington. The three oil companies in our area have been in our community for many years and they are not here to price gauge. She hoped these reports will clear up the misinformation circulating in our community. She stressed the need to be civil to each other during this period of time as we are all in this together. Since our community will not have full capacity for 7-10 days, she urged the community to make concerted efforts to conserve fuel. The City Council wants business as usual in our City and not for students to miss class. She asked that City staff continually update the City's website in order to give our community up-to-date and accurate information.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING OCTOBER 2008 AS "NATIONAL ARTS & HUMANITIES MONTH"

Councilwoman Jones read the proclamation proclaiming October, 2008, as "National Arts & Humanities Month" in the City of Asheville. She presented the proclamation to Ms. Dana Irwin, member of the Public Art Board and Ms. Barb Lothrop, Chair of the Urban Trail Committee who briefed City Council on some activities taking place during the month.

B. PROCLAMATION PROCLAIMING OCTOBER 5-12, 2008, AS "MENTAL ILLNESS AWARENESS WEEK"

Mayor Bellamy read the proclamation proclaiming October 5-12, 2008, as "Mental Illness Awareness Week" in the City of Asheville. She presented the proclamation to Mr. James Pitts and a member of the National Alliance on Mental Illness, who briefed City Council on some activities taking place during the week.

Mayor Bellamy noted that the City has invested in the Neil Dobbins Center that is providing assistance to individuals. In addition, the City has also invested in a crisis intervention training program for our police officers.

C. PROCLAMATION PROCLAIMING OCTOBER 4, 2008, AS "AIDS WALK DAY"

Vice-Mayor Davis read the proclamation proclaiming October 4, 2008, as "AIDS Walk Day" in the City of Asheville. He presented the proclamation to Ms. Keisha Hightower who briefed City Council on some activities taking place during the day.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "E" and "F" were removed from the Consent Agenda for individual votes and/or discussion.

A. APPROVAL OF THE MINUTES OF THE FORMAL MEETING HELD ON SEPTEMBER 9, 2008, AND THE WORKSESSION HELD ON SEPTEMBER 16, 2008

B. RESOLUTION NO. 08-194 – RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH H & M CONSTRUCTORS TO SUPPLY, CONSTRUCT AND INSTALL A NEW CHILLDER UNIT FOR CITY HALL

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with H & M Constructors to supply, construct and install a new chiller unit for City Hall for an amount not to exceed $206,815.00.

City Council approved $200,000 in funding for the City Hall chiller replacement as part of the City's Fiscal Year 2007-08 capital improvements budget. As a part of this project, the City hired a firm to complete engineering drawings at a cost of $13,000. The City then issued a request for proposals for the project and the lowest, responsible bid was received from H & M Constructors for a cost not to exceed $206,815. Therefore, the total cost of the project, including the engineering drawings, will be $219,815. The additional $19,815 that was not included in the initial budget for this project will be taken from the City's FY 2007-08 general building maintenance fund.

This action complies with the City Council Strategic Operating Plan in that it supports and enhances basic city services and is part of the public facilities maintenance program to make facility improvements. It is also a green focus area by making an energy efficient capital improvement decision and supporting energy efficient funding for facilities and operations.

Pros:

- Provide funds to supply, construct and install a new chiller unit at City Hall.
- Fulfill commitment to replace aging infrastructure that is failing and cost more every year to maintain.
- Reduce energy consumption.

Con:

- The total cost of the project ($219,815) exceeds the original budgeted amount by $19,815.

$200,000 was approved in the City's Fiscal Year 2007-08 capital improvement budget for this project. The additional $19,815 needed to complete this project will be taken from the general building maintenance fund that was approved in the City's Fiscal Year 2007-08 budget.

City staff recommends City Council to adopt a resolution authorizing the City Manager to enter into a contract with H & M Constructors to supply, construct and install a new chiller unit for City Hall for an amount not to exceed $206,815.00.

RESOLUTION BOOK NO. 31 – PAGE 317

C. RESOLUTION NO. 08-195 – RESOLUTION APPOINTING MEMBERS TO THE POLICE OFFICERS AND FIREFIGHTERS DISABILITY REVIEW BOARD

Summary: The consideration of reappointing members to the Police Officers and Firefighters Disability Review Board.

The terms of Dr. Alexander Maitland, Stephanie Cooper and James Lewis, as members on the Police Officers & Firefighters Disability Review Board, expired on July 19, 2008.

On September 16, 2008, it was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to appoint Dr. Stephen Hulkower (as the licensed physician); and reappoint Stephanie Cooper and James Lewis to each serve a two year term respectively, terms to expire July 19, 2010, or until their successors have been appointed.

RESOLUTION BOOK NO. 31 – PAGE 318

D. RESOLUTION NO. 08-196 – RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A LICENSE AGREEMENT WITH NEW CINGULAR WIRELESS PCS, LLC, FOR ANTENNAS AND RELATED EQUIPMENT ON CITY-OWNED REAL PROPERTY AT 36 RESERVOIR ROAD

ORDINANCE NO. 3653 – BUDGET AMENDMENT REGARDING THE LICENSE AGREEMENT WITH NEW CINGULAR WIRELESS PCS, LLC, FOR ANTENNAS AND RELATED EQUIPMENT ON CITY-OWNED REAL PROPERTY AT 36 RESERVOIR ROAD

Summary: The consideration of a resolution authorizing the City Manager to execute a License Agreement with New Cingular Wireless PCS, LLC for antennas at 36 Reservoir Road; and the associated budget amendment, in the amount of $61,200.

The property at 36 Reservoir Road known as White Fawn Reservoir is on a knoll at the western end of the Beaucatcher Mountain ridge. It has exceptional range for telecommunication with approximately 300° coverage from northeast to west to southeast. Two telecommunication towers are located on the property and the City of Asheville leases antenna space on the towers and ground space for related equipment.

New Cingular Wireless PCS, LLC has offered to enter into a license agreement for antenna space and related equipment on the tower known as the "Lower Tower" which is the smaller tower to the west. New Cingular is an existing tenant on the lower tower, seeking to reinstate the contractual relationship with the City. The proposed License Agreement will enable New Cingular to continue operating their existing equipment at the tower; however, there is a provision, which allows either the Licensor or the Licensee to terminate the agreement upon 180 days notice. The term of the License Agreement will be five (5) years with one renewal period of five (5) years. New Cingular will pay an annual License Fee based on the initial rate of $30,000 with a 4% increase annually thereafter. Two years of license fees will be collected in advance.

The initial rate was determined by gathering and comparing rate structures used by other municipalities across the state, including the Cary, Hickory, Charlotte and others. Formal findings were presented to the Planning and Economic Development Commission on August 20, 2008. Results indicate that base fee of $30,000 per annum represents fair market value for this type of installation.

The Notice of Intent to enter into a License Agreement with New Cingular Wireless PCS, LLC was published on September 12, 2008, in the Asheville Citizen-Times. Ten days have passed since the publication and authorization to execute the License Agreement is being requested.

Regarding the City Council Strategic Operating Plan, the strategic tower asset management presents the City with revenue enhancements. These revenue enhancements can help the City's telecommunications operations become more sustainable.

Several new or renewing tenant leases are anticipated in Fiscal Year 2009. A portion of this additional revenue has been planned to underwrite a cost savings plan for the City's own telecommunication operations. Specifically, the City is planning on utilizing an estimated $80,000 of these new revenue enhancements to re-locate equipment from the Spivey Mountain site (where the City pays $29,000 per year with a 7% escalation each year) to the White Fawn site (owned by the City). This re-engineering was proposed in the Fiscal Year 2009 budget, and once implemented, will promote significant cost savings to the City over time. The budget amendment will appropriate $61,200 into the re-engineering account.

Pros:

- Enhanced revenue through the license fee income
- Maximized vacant space on existing tower infrastructure
- Underwrites long term cost savings plan for telecommunications

Cons:

- None

Fiscal Impact:

- Fiscal Year 2009: $61,200 revenue
- Fiscal Year 2009: $61,200 investment programmed to support re-location of City equipment
- Beyond Fiscal Year 2009: Additional revenue stream based on initial rate of $30,000 per year with 4% escalation per year.
- Beyond Fiscal Year 2009: Resulting savings of initial rate of $29,000 per year with 7% rent escalations.

City staff recommends City Council adopt (1) a resolution authorizing the City Manager to execute the license agreement with New Cingular Wireless PCS, LLC on behalf of the City of Asheville; and (2) approve associated budget amendment to be used for cost savings plan for telecommunications.

RESOLUTION BOOK NO. 31 – PAGE 319
ORDINANCE BOOK NO. 25 – PAGE 39

E. BUDGET AMENDMENT FOR THE PURCHASE OF 20 NEW FAREBOXES FOR THE ASHEVILLE TRANSIT SYSTEM

This item was removed from the Consent Agenda for an individual vote and/or discussion.

F. BUDGET AMENDMENT TO CLOSE OUT LAND ACQUISITION IN RICHMOND HILL

This item was removed from the Consent Agenda for an individual vote and/or discussion.

G. ORDINANCE NO. 3656 – BUDGET AMENDMENT TO INSTALL A TRAFFIC SIGNAL AT THE INTERSECTION OF FAIRVIEW ROAD AND THIRD STREET IN THE OAKLEY COMMUNITY

Summary: The consideration of a budget amendment, in the amount of 50,000, to install a traffic signal at the intersection of Fairview Road and Third Street in the Oakley community because of a sight visibility problem.

Fairview Road can be classified as a collector-type residential street with a posted speed limit of 30 mph. According to traffic counts that were collected during October 2007, 4,600 vehicles per day use Fairview Road in the immediate area of Third Street and the 85th percentile speed for these vehicles is 37.9 mph. Full-turning movement traffic counts were collected at the intersection of Fairview Road and Third Street during November 2007 and these counts determined that about 4,700 vehicles per day were using the subject intersection. During the 12-hour count timeframe from 6:30 am until 6:30 pm, 54 vehicles entered Fairview Road from Third Street; 24 vehicles made a left turn and 30 vehicles made a right turn.

Third Street can be classified as a local-type residential street with a statutory speed limit of 35 mph. It is a dead-end street with an average pavement width of 16 feet and an overall length of 0.28 mile. Third Street provides access to about 21 properties.

According to our records, five angle-type crashes have occurred at the subject intersection during the past year including one crash in 2006 and four crashes in 2007. All of these crashes involved a vehicle attempting to turn left onto Fairview Road that was struck by a westbound vehicle traveling along Fairview Road. One of the crashes involved injuries and the rest were property damage only. A contributing factor to all of the crashes is limited sight distance, which is the primary issue that you and the other residents along Third Street are concerned about and you have suggested a traffic signal as a possible solution. Compounding the limited sight distance is the fact that Third Street intersects Fairview Road on the inside of a horizontal curve. Also, vegetation including mature trees and shrubs, a fence, and parked vehicles contribute to the limited sight distance. The City of Asheville installed a pair of mirrors at the subject intersection during December 2006 in order to help improve the decision making process for the drivers attempting to enter Fairview Road. I believe the mirrors have been partially successful; however, they are not intended to be used as a long-term solution and four of the angle-type crashes occurred after the mirrors were installed.

Although from a traffic volume standpoint, the nationally recognized traffic signal warrants are not satisfied, the decision to install a traffic signal at the subject intersection was based on several factors, including the fact that a definite crash history exists that could be eliminated and/or minimized with the installation of a traffic signal and that no reasonable alternatives to traffic signal control can be identified that would significantly improve the limited sight distance. Compared to some other traffic-related projects, the subject project was originally listed as a number 5 priority; however, recent conditions have changed that should move the subject project to a number 1 priority. A special needs child now lives along Third Street and is transported on a daily basis to Fairview Elementary School. Due to the limited sight distance at the subject intersection, the bus driver has been directed not to pickup or drop-off the child directly at his/her home but to do so at the intersection. We have contacted the Buncombe County School Bus Transportation staff to confirm this information and they have told us that if a traffic signal is installed, they would then direct the bus driver to go directly to the child's home.

This action complies with the City Council 2008-09 Strategic Operating Plan by protecting the traveling public and giving citizens an opportunity to have safe and reasonable access to and from their homes.

Pros:

- The traffic signal will enable vehicles attempting to enter Fairview Road from Third Street opportunities to make the movements in a safe and reasonable manner.
- An actuated traffic signal will minimize the potential delay to vehicles along Fairview Road compared to a pre-timed traffic signal.

Cons:

- When the traffic signal provides a green indication for the Third Street approach, vehicles along Fairview Road will come to a STOP condition.
- The total cost of the project including survey and design is $57,275.

The total estimated construction cost is $50,000 assuming there will be no right-of-way and/or easement issues. The survey and design work was accomplished during Fiscal Year 2007-08 at a cost of $ 7,275. As mentioned in earlier staff reports, on September 19, 2008, there was $410,000 available in the General Capital Reserve Fund. The previous appropriations for the fareboxes and the Richmond Hill project, along with this $50,000 appropriation, will lower the available funds in the General Capital Reserve fund to $238,316.

Staff recommends that City Council approve a budget amendment, in the amount of $50,000, from the General Capital Reserve fund to install a traffic signal at the intersection of Fairview Road and Third Street in the Oakley community.

Also, staff encourages review in the coming months for budget planning to accommodate additional projects of this nature.

Mayor Bellamy said that City staff will be bringing back some opportunities for City Council to look at other projects in the community of this nature, as well as an overall policy for items like this.

ORDINANCE BOOK NO. 25 - PAGE 45

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Councilwoman Cape moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Davis and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

E. ORDINANCE NO. 3654 – BUDGET AMENDMENT FOR THE PURCHASE OF 20 NEW FAREBOXES FOR THE ASHEVILLE TRANSIT SYSTEM

Summary: The consideration of a budget amendment, in the amount of $233,417, 20% of which will come from the City's capital reserve funds, to purchase twenty fareboxes to replace the existing ones.

City staff has identified the acquisition of new fareboxes as the number one priority in the capital program, after replacement of existing fleet.

The fareboxes are an essential part of operations; they are used to collect the cash fares ensuring a safe environment for drivers and system users. The fareboxes currently installed in City's transit fleet operate with a very simple technology that only receives cash and tickets. Five of the fareboxes installed in the 2006 buses were borrowed from High Point transit system. These fareboxes are smaller than the regular ones and cannot be used in high demand routes because of the lack of capacity to store the fares.

During the last years, Asheville Transit ridership has been growing, and the city has provided diverse alternatives to facilitate the trips, such as 11-ticket booklet, monthly passes and annual passes.

In addition, the city has been promoting very successfully the Passport program of employer-provided passes. Under this program, the only requirement is to show the ID card to the driver, in order to use the bus.

The acquisition of new fareboxes will enhance driver effectiveness and work conditions. Currently the driver is responsible to record all these movements, and count all the passengers who are using the system as well as to identify the programs. The driver has to be able to identify each of the passes and ID cards of riders that are boarding the bus; this task disrupts the driver's ability to focus on driving the bus and ensuring passenger safety.

City staff is proposing to acquire GFI GENFARE CENTSaBill electronic registering fareboxes. This decision was made in conjunction with Transit Operations. The proposed technology stores cash, and accept magnetic swipe cards which will expedite boardings and will increase safety. The farebox system records fares and passenger data and produce accurate and reliable reports about system usage. This technology can be upgraded to issue tickets, handle transfers and read smart cards.

The fareboxes will be acquired through a State contract which expires on September 30, 2009. The use of an existing contract (piggy back) facilitates and expedites the procurement process. The city is required to issue a purchase order for the fareboxes and perform sole source procurement for the software which is not part of the contract. The vendor estimates that production will take four months after receiving the purchase order.

This project will cost $233,417. The City will fund this project using section 5307 of the Federal Transit Administration which provides eighty percent (80%) for capital projects or $186,733. The City will be required to provide the remaining twenty percent (20%) of the funding, which will total $46,684. The City's funding will be taken from the general capital reserve fund which consists of the accumulated savings from capital projects that have been competed and come in under budget. City staff will also apply for a North Carolina Department of Transportation grant to cover ten percent (10%) of the total price. If this grant effort is successful, the City's contribution will be reduced to $23,342 and the unused funding will be returned to the capital reserve fund.

This action complies with the Strategic Operating Plan in the acquisition of new technology that will support the area of environmental sustainability.

Pros:

- Increases financial reliability and better usage of resources and funds.
- Improves system operation, promoting smoother and faster boardings.
- Produces accurate and reliable passenger data related to usage of the transit system.
- Increases safety.
- Promotes a better work place reducing the driver's stress.
- Expedites the procurement process using the State contract currently in place.
- 80% of the cost will be covered by the Federal Transit Administration.

Cons:

- The City match of $46,684 was not budgeted in the Fiscal Year 2008-09 budget; therefore, the funding will have to be taken from the City's capital reserve funds, which will reduce the funding available to other projects.

The project cost will be $233,417, with 80% of this total to be paid by federal funds - FTA section 5307 and 20% by the City. On September 19, 2008, there was $410,000 in the General Capital Reserve fund. Appropriating the $46,684 for the fareboxes will reduce this amount to $363,316.

City staff recommends City Council adopt a budget amendment, in the amount of $233,417, 20% of which will come from the City's capital reserve funds, to purchase twenty new fareboxes to replace the existing ones.

Director of Transportation and Engineering Cathy Ball and Interim Transit Director Mariate Echeverry responded to various questions/comments from Councilman Mumpower, some being, but are not limited to: are there other less expensive opportunities to purchase fareboxes; are there different qualities of fareboxes; where do these fareboxes fall in those different categories; how much were the fareboxes that we currently borrow from High Point;

does the cost of the farebox include software; why did the City purchase the new buses without fareboxes; and were the drivers of the buses consulted about what kind of farebox works best.

Councilman Newman explained why he felt this is a good investment, especially with the partnerships we are building in the community.

Councilman Mumpower felt our transit system is one of the best social services we have in Asheville, but it is a highly subsidized service and this action represents another increase in that subsidy. He was concerned that we are losing our point of realism in our ability to sustain that subsidy.

Councilman Newman moved for the adoption of Ordinance No. 3654. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 41

F. ORDINANCE NO. 3655 – BUDGET AMENDMENT TO CLOSE OUT LAND ACQUISITION IN RICHMOND HILL

Summary: The consideration of a budget amendment, in the amount of $75,000, to amend the annual budget to close out land acquisition in Richmond Hill.

In 2005, the City entered into a contract for the acquisition of real property to facilitate access to the recreation facilities that were under development at Richmond Hill. At the time, those facilities were planned to include athletic fields and a National Guard training center and equipment maintenance facility. The owner of the adjacent property needed for the access was Chris Peterson, and it was part of a larger tract owned by him. As part of the consideration for the access, the agreement provided for the City to provide 20,000 cubic yards of fill material on adjacent property, and to grade and compact it sufficiently to allow for construction of a road. Most of this fill was planned to come from grading and excavating activities on the City's Richmond Hill property, especially the planned athletic fields.

The scope of the Richmond Hill project has been significantly reduced; the training center is reduced in size, and the athletic fields are not being constructed. As a result, the fill material that was to be placed on the adjacent property is not available on site. At this point, fulfilling this term of the agreement would mean trucking the material in, which would be prohibitively expensive (estimates as high as $200,000) and disruptive for the neighborhood, even if the fill was generated by the City's activities.

In lieu of the City providing the fill, Mr. Peterson has agreed to accept $75,000 to close this contract out.

Regarding the fiscal impact, $75,000 is to come from other Capital Projects. As mentioned in the previous staff report for the transit fareboxes, on September 19, 2008, there was $410,000 available in the General Capital Reserve fund. The previous appropriation for the fareboxes, coupled with this $75,000 appropriation for Richmond Hill, will lower the available funds in the capital reserve to $288,316.

Pros:
- Closes contract out
- Less cost than actual performance of contract
- Minimizes disruption to neighborhood

Con:
- Additional cost in tight budget year

Adoption of the budget amendment is recommended.

Vice-Mayor Davis moved for the adoption of Ordinance No. 3655. This motion was seconded by Councilman Russell and carried on a 4-3 vote, with Councilwoman Jones, Councilman Newman and Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 43

III. PRESENTATIONS & REPORTS:

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN ECONOMIC DEVELOPMENT GRANT TO UNISON ENGINE COMPONENTS (FORMERLY SMITHS AEROSPACE)

RESOLUTION NO. 08-197 – RESOLUTION AUTHORIZING AN ECONOMIC DEVELOPMENT GRANT FOR UNISON ENGINE COMPONENTS

ORDINANCE NO. 3657 – BUDGET AMENDMENT FOR ECONOMIC DEVELOPMENT GRANT FOR UNISON ENGINE COMPONENTS

Mayor Bellamy opened the public hearing at 5:52 p.m.

Economic Development Director Sam Powers said that this is the consideration of a resolution approving a $236,250 economic development incentive grant to Unison Engine Components; and the corresponding budget amendment in the amount of $47,250 for the estimated first year's installment of this five-year economic development incentive grant. This public hearing was advertised on September 12 and 19, 2008.

This is consideration for an economic development incentive grant under the City of Asheville Economic Development policy. Unison Engine Components (herein "Unison") operates and maintains a manufacturing facility in Buncombe County substantially all of which is located in the City of Asheville. Unison is proposing new, taxable, capital investment of $15,000,000 for additional production equipment and facility improvements at the local facility, and has requested consideration for a cash grant under the City of Asheville Economic Development policy. The purpose of this investment is to allow Unison to expand its operations, and is projected to result in the retention of jobs that pay at or above the average wage for Buncombe County.

The City of Asheville proposes to offer Unison a performance-based grant not to exceed $236,250. The performance-based grant will be paid over a five (5) year period. Payments begin after the investment is made, taxes are paid and verified, and the company requests payment. The amount of the annual payment will take into consideration the estimated annual ad valorem property tax revenue attributable to the capital improvements, and each annual payment is projected to equal approximately 75% of said estimated revenue.

The City will fund the payments from the general fund. The first year estimated payment of $47,250 will be funded with an appropriation from fund balance; subsequent years' payments will be included in the annual general fund budgets adopted by Council.

The economic development incentive grant to Unison Engine Components ties into City Council's Strategic Operating Plan as it addresses the Affordability Strategic Plan focus area by meeting the objective to support diversified job growth and small business development. The grant also addresses the Sustainability Strategic Plan focus area by promoting sustainable, high density infill development that makes efficient use of existing resources. Staff believes that the project will stabilize and improve the economic prospects of the City and the area.

Pros:

- Performance driven grant that is distributed after job and investment is achieved;
- Supports job creation and capital investment in manufacturing in Asheville;
- Supports development of an identified economic cluster in the City; and,
- Supports regional and state cooperation in the project.

Con:

- Grant is formulated based on use of 75% of value of new incremental tax revenue for a five year period.

The project has a positive fiscal impact on tax revenues received by the city. Initially (during the grant period), the city will receive approximately 25% of the new incremental ad valorem revenues from the project, in addition to the current taxes paid by the company. After five years, the City will henceforth receive 100% capture of new taxes.

City staff recommends Council approve the resolution authorizing an economic development incentive grant to Unison Engine Components not to exceed $236,250 payable in five (5) annual installments, subject to compliance of a performance agreement between the City and Unison Engine Components, and also the corresponding budget amendment in the amount of $47,250 for the estimated first year's installment of this economic development incentive grant.

Mr. John Bellows, financial leader at Unison Engine Components, said they have been a part of the Asheville community for over 60 years. Their decision to grow the business is directly related to the quality of the local work force and the incentives not just from the City, but in conjunction with the county, state and other agencies. They are nearly doubling the manufacturing footprint. They have spent over $2 Million in upgrading the existing facility. To date, we have exceeded the $15 Million investment and they have plans to make similar investments in the future. They have increased their workforce by approximately 70 employees out of the 200 they originally identified in their goal. They currently have 390 employees in our two facilities. Their business plan is to grow the business approximately 50% and next year they are looking forward to an additional top line growth in the 37% range.

Mr. Jerry Rice questioned how many Unison employees are from Asheville and Buncombe County. He felt that if their employees are from other counties, those counties should be contributing as well.

Mayor Bellamy closed the public hearing at 6:02 p.m.

In response to Councilwoman Jones, Mr. Bellows said that he did not have the exact number of Asheville and Buncombe County employees with him at this meeting; however, he guessed it would be approximately 50% of his workforce. He said he would be happy to provide Council with the accurate information as early as tomorrow.

When Councilman Mumpower asked if Unison uses the E-verify program which is a federal program used for verification of citizenship, Mr. Bellows responded that they use a private agency to perform a detailed background check on all their employees, which check does include citizenship. At Councilman Mumpower's request, Mr. Bellows said that he would be happy to provide him with information on their verification program.

Councilman Mumpower felt this action represents an exercise in corporate welfare and is a special deal for an employer. He felt the City helps businesses best by having a safe, clean and affordable city and not by granting tax exemptions that most taxpayers do not receive. Most taxes in Asheville are paid by citizens and not businesses.

Councilman Newman noted that Asheville does have an economic development policy that any business can apply for if they meet the criteria outlined in our policy. However, he questioned if the policy, even if administered consistently, is a good public policy. It is an issue that communities and states struggle with. If we got rid of economic incentive policies across the board, he feels most people would support that. That way cities could compete on who has the best schools, best infrastructure, cleanest environment, etc. Since that is not the case, it is extremely important to have good paying jobs in our community to be competitive.

Mayor Bellamy said that members of Council have previously received copies of the resolution and ordinance and they would not be read.

Councilman Newman moved for the adoption of Resolution No. 08-197. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

Councilman Newman moved for the adoption of Ordinance No. 3657. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 320
ORDINANCE BOOK NO. 25 - PAGE 47

B. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS HAYWOOD PARK MIXED-USE REDEVELOPMENT PROJECT

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

City Attorney Oast said that the Authorized Practice Committee of the North Carolina State Bar has issued an advisory opinion that appearing in a representative capacity for a party before a local governmental body in a quasi-judicial proceeding is the practice of law, especially with respect to such aspects of the hearing as examining or cross-examining witnesses, or advocating for legal conclusions or results. This does not prevent persons, including land use professionals, from presenting information or expressing opinions within their knowledge or area of expertise.

City Attorney Oast also noted that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 6:17 p.m.

Urban Planner Jessica Bernstein submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Bernstein said that this is the consideration of the issuance of a conditional use permit for the project identified as Haywood Park Mixed-Use Redevelopment Project, with 130,000 square feet of retail, office and ballroom space, 200 hotel rooms and 100 condominium units, located at 1 and 35 Battery Park Avenue, 34 and 46 Haywood Street and Page Avenue.

She said the Smart Growth principles adopted in the *2025 Plan* encourages higher-density, mixed-use developments. Retail, residential, office and hotel uses align with economic development priorities, supporting the needs of local residents as well as the tourism industry, helping the downtown become and remain a "destination." This project supports objectives of the *Plan* by providing not only a variety of uses suitable to a Central Business District, but also a range of housing options and sizes appealing to different income levels, located in close proximity to public transit and in a walkable urban location.

The tower structures would be the tallest in the City (surpassing the BB&T by approximately 39'), but the project has been designed to maintain a human-scale experience from the street/pedestrian level and promote compatibility with the existing urban context. Although the Kostas building and a four-story mixed use building along Haywood Street will be demolished to accommodate this proposal, the adaptive reuse of two existing buildings (the Haywood Park Hotel and Starnes Building) into the overall project will aid in maintaining the existing streetscape and character. The proposal includes a dedication to LEED certification (base level), which corresponds to the City's dedication to environmentally-responsible development.

Goals in the Center City Plan are addressed through aspects of this proposal as well – the project has a mix of uses which can work towards ensuring a balanced and lively downtown; provides a variety of residential spaces; the design complements and stimulates pedestrian activity; existing structures are preserved and incorporated into the project; and includes needed parking spaces.

Three catalytic projects are located in the immediate vicinity: the Grove Arcade, Civic Center and Battery Hill City-Owned Property. Catalytic sites are identified as such for their potential to stimulate additional investment. It may have originally been thought that the "additional development spurred" would be on vacant or underutilized property, and not on parcels already occupied by uses and structures. However, the investment expected due to proximity to those sites has begun to be realized by this proposal.

One area of possible (temporary) discord with the Center City Plan is the goal "actively work to retain existing downtown businesses and foster their continued success and growth." There is the possibility of unavoidable consequence or negative impact on surrounding businesses during the extended construction period for this project as well as the displacement of active businesses in the buildings proposed for demolition.

City Council adopted the following four strategic goals: *sustainable, affordable, green* and *safe*; this development proposal supports the strategic goal of *sustainability* and reflects other vision plans by providing for high-density infill growth; supports and provides amenities for downtown living; and encourages economic development in the downtown. Additionally, the LEED elements of the development proposal address the desire for *green* development features and practices.

While this proposal has many positive aspects and clearly supports several key goals, it fails to address the issue of affordability in that it does not provide affordable units within the development. Additionally, the donation offered to the Eblen Foundation as part of the public benefits package does not contribute to the creation of new affordable units, although it is a valuable endowment dedicated to helping citizens in need of housing assistance.

Other hotel/residential projects planned or approved include:

- Hotel Indigo (currently under construction) which includes 100 hotel rooms and 12 residential units, and
- Ellington (approved in 2007 – not yet under construction) which proposed 125 hotel rooms and 52 residential units.
- These projects will bring the number of hotel rooms in the CBD to 774 (549 existing). If approved, this project would bring the total to 974 rooms.

Residential projects recently planned include 452 residential units approved in the Central Business District (CBD) over the past year and a half, with 80 units currently under construction (Hotel Indigo and 60 North Market). If approved, this project would bring the total to 552 units approved. Data on the number of existing residential units in the CBD is not accurately available.

This is a request for review of site plans for a mixed-use redevelopment project with residential and commercial components. Pursuant to section 7-5-9(a) of the Unified Development Ordinance (UDO), any residential development of more than 50 units and any mixed-use structure with more than 45,000 square feet located within a half-mile of the CBD shall be considered as a Level III project and a Conditional Use.

The project area consists of five parcels with a combined area of approximately 1.92 acres (Attachments to City Exhibit 3 – Location Map and Aerial Map). The site is located on the downtown block bordered by Page Avenue to the west (Grove Arcade), Battery Park Avenue to the south and Haywood Street to the east. The proposal includes construction of a mixed-use redevelopment, incorporating some existing structures. The 4-story Haywood Park Hotel and Starnes Building (northwest corner of Battery Park and Haywood) will remain as office uses.

The project will include a mix of uses including approximately 200 hotel rooms; approximately 100 residential units; 80,000 square feet of retail space (including a multi-story internal arcade); 50,000 square feet of office space; and 506 parking spaces. This is an increase of approximately 170 hotel rooms (currently +/- 33 rooms in the Haywood Park Hotel); 100 residential units (currently none); 40,000 sq. ft. of retail space (currently +/- 40,000 sq. ft. existing); +/- 20,000 sq. ft. of office space (currently +/- 30,000 sq. ft. existing); and a net gain of 226 parking spaces available to the public (30 currently available to the public). (Attachment to City Exhibit 3 – Site Plan)

The proposed new construction is separated into five parts for ease of review: Haywood Street base, Haywood Street tower, Page Avenue base, Page Avenue tower and underground parking (although it should be noted that the project is proposed as a whole and will be constructed as such):

Haywood Street base: 5 levels (expanded 16'6" ground story level with 10'6" upper floors), includes retail spaces on ground level with residential above (units ranging in size from 632 to 1,700 square feet, all units with balconies facing onto Haywood). Includes pedestrian entry to arcade, pedestrian entry to residential lobby, vehicle entry/exit for the parking garage (30' wide). This "platform" is a similar height to adjacent structures and maintains visual consistency along the streetscape.

Haywood Street tower: The tower is proposed at 258' 6" from the street to the top of the architectural element (approximately 23 levels) and includes residential units (units ranging in size from 1,800 to 2,200 square feet – four units per floor). The structure steps back after the 5th level with proposed floor-plates of approximately 9,900 sq. ft. This creates a slender structure with a less bulky visual impact. In addition, the tower's walls curve away from the street, further diminishing the mass of the structure. This tower has a contemporary design. (Attachment to City Exhibit 3 – Haywood Street Elevation)

Page Avenue base: The 36 foot high base of this side of the structure has 2-3 levels (all expanded floor-to-floor heights) that include retail/restaurant space on the ground level with hotel ballroom/meeting rooms above. The base includes a pedestrian entry into the retail arcade, a pedestrian entry into hotel lobby, and a vehicle entry/exit for parking garage (25'9" wide) from Page Avenue. This "platform" is similar to the height of adjacent structures as well as the Grove Arcade across Page Street, maintaining visual consistency along the streetscape and a complementary relationship to the Arcade.

Page Avenue tower: The tower is proposed at 339' 9" from the street to the top of the architectural element (approximately 25 levels) and includes approximately 200 hotel rooms. The number of levels could increase depending on the floor-to-floor ratios desired by the yet-to-be-determined hotelier. This structure does not step back from the street face until the 14th level. The floor-plates are approximately 7,400 sq. ft. on the lower floors with front and rear step-backs resulting in a reduced 4,200 sq. ft. footprint, further diminishing the mass of the structure. This tower is designed in the spirit of the original tower intended to be built on top of the Grove Arcade, which was proposed at a height around 300'. (Attachments to City Exhibit 3 – Page Avenue Elevation and Battery Park Avenue Elevation)

Parking: Parking for the project is proposed primarily underground, with 6 levels for 506 spaces (159 proposed as tandem spaces). There are 2 automobile access points proposed for entry/exit to the underground parking, one on Haywood Street and one on Page Avenue. This project will require cutting off a portion of Battery Park Alley due to the new structure covering the entire width of the block, which must be coordinated through Public Works to maintain the existing level of service for residents of 21 Battery Park and other existing businesses on the block. The project proposes assigning 250 parking spaces to the hotel and condominium, with 256 available at a fee for public use (a net gain of 226 parking spaces).

Other Public Improvements: Significant streetscape improvements are proposed as a part of this project, including bump-outs, space for outdoor dining, benches, bollards, special pavers and 10' wide sidewalks. All proposed street furniture is subject to final approval by Public Works. Landscaping for this project will include street trees along Page and Battery Park Avenues and Haywood Street. There will also be screening for the loading zone, accessed from the north via Battery Park Alley.

Impact to the Built Environment: As noted above, office uses are proposed for the Haywood Park Hotel structure (blt. 1923) and Starnes Building (1930). There are, however, several structures that will be demolished as a part of this proposal: the Kostas Building (northeast corner of Battery Park and Page Avenue), the parking garage and surface parking located near the center of the block, and a 4-story mixed-use building along Haywood Street.

Public Benefits Package: The applicant has submitted a Public Benefits Package listing job created by the project (approximately 200), increased tax base (estimated to generate over $1,000,000 in annual taxes), parking (net gain of 226 spaces available to the public), LEED certification, Preservation/Adaptive reuse of historic buildings and public contribution to housing assistance. Additionally the applicant has agreed to implement a list of construction mitigation improvements. Their benefits package consists of (1) job creation - they anticipate that 200 jobs will be created, broken down as follows – 180 hotel employees, 10 retail and office (supervisory and maintenance personnel), and 10 in condominium building (supervisory and maintenance personnel); (2) increased tax base - it is estimated that the project will generate over $1 Million in annual ad valorem taxes to the City and County governments; (c) parking - they will be asking 250 parking spaces to the hotel and condominium, and the remainder (256) parking spaces will be available at a fee to the public; (d) LEED certification – the project will be committing to obtain a base LEED certification; (e) preservation/adaptive re-use of historic buildings – the existing Haywood Park Hotel and Starnes building will be preserved and renovated; (f) public contribution – a minimum contribution of $3 Million, taken from the condominium sales, will be made directly to The Eblen-Kimmel Charitable Foundation, which will distribute the funds to meet the housing

needs of our most vulnerable citizens; and (g) construction mitigation measures – they will work with City staff per their Construction Mitigation Measures Agreement. This agreement includes efforts to keep sidewalks open, an "Open for Business" marking campaign, and hiring an ombudsman.

The affordable housing contribution promises 1.5% of the initial sales price of each condominium or a total of $3 million (whichever is greater) to be allocated to the Haywood Park Housing Assistance Program (HAP), which will be administered by the Eblen-Kimmel Charitable Group and will provide housing, utility and emergency assistance to local families in need. This contribution seeks to satisfy Council's goal to provide sufficient, safe and affordable housing opportunities. While the HAP will provide assistance to local residents with housing issues, there is no new construction of affordable units within the project or elsewhere included as a part of this proposed benefit.

Required Reviews

Downtown Commission Review: This project was reviewed by the Downtown Commission (DTC) over the course of five months. The Commission voted on July 1, 2008, to recommend approval of the project's design (6-2) after the developer incorporated DTC requested modifications, incorporating suggestions on improving the design of the Haywood Street tower and cap. No variances from the UDO CBD requirements were required. The Commissioners expressed positive comments regarding:

- the activation of the street level,
- the compatibility of the platform with existing adjacent structures,
- the stepping-back of the towers from the street level, and
- the small footprint of the towers that creates a slender structure to minimize viewshed impact.

Some Commissioners expressed concerns regarding:

- the scale of the development,
- the height of the towers, and
- the necessity for the craftsmanship and materials to be of utmost quality.

The largest concerns of the Commission focused on the impact of the construction and resulting project on the existing and displaced businesses in the immediate area.

At their meeting on September 12, 2008, the Downtown Commission voted to recommend Council consider the following construction mitigation measures:

- Allow affected businesses to purchase free parking garage vouchers at a reduced price from the City to offer to their customers, and
- Require the developer to run a monthly newspaper ad supplementing the "Open for Business" marketing campaign, listing affected business as open.

At the Downtown Commission hearings, members of the community expressed concerns regarding:

- the impact of the development with regard to shadows and air flow;
- how this project would mesh with the recommendations of the upcoming Downtown Master Plan;
- the scale of the project and impact on existing businesses, especially the Grove Arcade;
- the potential physical impact of construction on adjacent commercial and residential structures; and
- the design of the contemporary Haywood Street tower.

Technical Review Committee (TRC) Review: The project was approved with conditions by the TRC on July 21, 2008. Several members of the community voiced comments, including:

- ensuring adequate access for residents of 21 Battery Park to their building in the event of the proposed alley closure;
- safety concerns associated with high-rise buildings; and
- concerns regarding safeguarding the City from fiscal harm in the event that the developer is unable to complete the project as proposed.

Planning & Zoning (P&Z) Review: The project was unanimously approved by the Planning & Zoning Commission (5-0) on August 6, 2008, (one commissioner absent, and one position vacant). The applicant provided an outline of their public benefits package, with includes LEED-certification and a minimum $3 Million donation to the Eblen-Kimmel Charitable Foundation for assisting housing needs of the less-affluent residents of Asheville. They also stated that they will not demolish any existing structures until they have a hotel operator secured and at least 60% of the residential units pre-sold.

The P&Z members proposed modifications to several conditions included in the staff report including:

- requiring that the applicant finalize the LEED-certification proposal and commitment to affordable housing prior to moving forward to City Council,
- requiring that the funds dedicated to affordable housing be earmarked for distribution within the City limits.
- requiring that staff and the applicant come to an agreement on traffic mitigation measures and construction mitigation measures prior to moving forward to City Council.

These items have all been discussed and agreed to by the applicant. Details can be found in the *Public Benefits Package* section of this report.

Approximately 11 members of the public provided comment on this proposal, including:

- concern about the economic impact on adjacent businesses during the construction process;
- the impact from increased traffic congestion, especially around the parking deck access points;
- the economic viability or need for a project of such a significant scale;
- concern that this development will house "chain stores" and impact street-level character;
- support for the narrow tower design and the pedestrian gateway created from Page to Haywood; and
- support for the additional retail and office spaces in the downtown.

City Council must take formal action as set forth in section 7-5-5(e)(3) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case pursuant to section 7-16-2(c) of the UDO. Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The project will meet State building code requirements and will be reviewed in detail by the TRC to ensure compliance with safety requirements.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate**

vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.
There are no significant natural or topographic features on the site that will pose a major issue with this development. The project has been designed to accommodate the existing (12') grade change from Page Avenue to Haywood Street with a ramped walkway through the arcade at a 4% slope.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
When the project is complete, the project should not injure the value of adjoining or abutting property. The uses proposed are should complement existing businesses and augment the needs of both residents and visitors. However, without conditions to limit disruption during construction, there are likely to be adverse economic impact to smaller businesses.

There has been some concern expressed by the Downtown Commission and members of the public that the construction period may have negative impacts on businesses in the vicinity. Concerns have also been raised regarding what fiscal security or protection the City has in the event that the developer is unable to complete the project as proposed.

4. **That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
Uses: The mix of uses proposed is allowed and appropriate for the CBD.

Height: The proposed towers at 258 feet and 340 feet will be the tallest in the city and can be considered to be out of scale with the existing structures immediately adjacent to the project site. However, as stated in the Downtown Design Review Guidelines, tall structures identify the CBD as an urban core and these buildings have been designed to respect views to and from neighboring properties (such as 21 Battery Park, the Basilica, the Grove Arcade). Also, there is a precedent of height in this end of the CBD, including the +/- 160' Battery Park Apartments and the +/- 145' Vanderbilt Apartments, although the proposed towers are considerably taller than these buildings. The tower originally planned for the Grove Arcade was planned to be nearly as tall as these two structures.

Design: The small floor-plates with stepped-back towers follow basic urban design principles by creating slender structures with significantly less visual mass than if they were shorter but had no step-backs, and thereby appearing more bulky when viewed from the street. When towers are stepped-back from a platform building, they create more compatible rooflines from the pedestrian level, especially when the platform is proposed at roughly the same height as adjacent structures. Also, the designs of the towers are significantly different from one another, which is supported by the Landmark Guidelines in the Downtown Design Review, which state that "new, unique designs may be appropriate to deviate from the norm and add special accent to the urban fabric".

Character: Typical building heights in this established core of downtown are around 3-4 stories, with some exceptions (see heights of Vanderbilt and Battery Park Apartments as mentioned above). The proposed 23 and 25-story structures will bring a substantial change to the character of the area.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
Smart Growth principles adopted in the 2025 Plan encourage these types of higher-density, mixed-use developments). Retail, residential, office and hotel uses align with economic development priorities, supporting the needs of local residents as well as the

tourism industry, helping the downtown become and remain a "destination"). This project agrees with objectives of the Plan by providing a not only a variety of uses suitable to a CBD, but also a range of housing options and sizes appealing to different income level), located in close proximity to public transit and in a walkable urban location.

Although the tower structures would become the tallest in the City, the project has been designed in a way that maintains a human-scale from the street/pedestrian level and seeks to encourage compatibility with the existing urban context. Also notable is the adaptive reuse of existing buildings (the Haywood Park Hotel and Starnes Building) into the overall project, which aids in maintaining the existing streetscape and character. The proposal includes a dedication to basic LEED, which corresponds to the City's dedication to environmentally-responsible development.

Goals in the Center City Plan are addressed through aspects of this proposal as well – the project has a mix of uses which can work towards ensuring a balanced and lively downtown;; provides a variety of residential spaces; the design complements and stimulates pedestrian activity; existing structures are preserved and incorporated into the project; and includes needed parking spaces – 226 net gain of parking spaces available to the public.

Three catalytic projects are located in the immediate vicinity: the Grove Arcade, Civic Center and Battery Hill City-Owned Property. Catalytic sites are identified as such for their potential to stimulate additional investment. It may have originally been thought that the "additional development spurred" would be on vacant or underutilized property, and not on parcels already occupied by uses and structures. However, the investment expected due to proximity to those sites has begun to be realized by this proposal.

One area of possible (temporary) discord with the Center City Plan is the goal "actively work to retain existing downtown businesses and foster their continued success and growth." There is the possibility of unavoidable consequence or negative impact on surrounding businesses during the extended construction period for this project as well as the displacement of active businesses in the buildings proposed for demolition. Appropriate mitigation measures are vital to avoid this impact.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
The project is located in the CBD in an area easily accessed for transportation, life and safety facilities and utility infrastructure.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
Traffic Engineer: The proposed project is anticipated to generate 289 vehicles per hour (168 vph ingress and 121 vph egress) during the morning peak hour and 604 vehicles per hour (274 vph ingress and 330 vph egress) during the afternoon peak hour at full build-out conditions (three years). In addition, the proposed project could generate 6,100 vehicles per day during a typical weekday. Existing weekday traffic volumes along Haywood Street are about 4,300 vehicles per day. It is anticipated that about 48 percent of proposed traffic will use the Haywood Street access point.

Based on these anticipated peak hour traffic volumes, a traffic impact study was required. The scope of work included 16 intersections (eight signalized intersections and eight unsignalized intersections) in the immediate area of the project site and the annual traffic growth rate was 3 ½%.

Based on the anticipated traffic that the proposed project could generate, it is reasonable to conclude that the project would impact the surrounding street network and as a result, certain mitigation improvements should be required It should be noted that common mitigation improvements such as providing left and/or right-turn lanes are difficult to construct in a downtown setting due to physical constraints. Therefore, mitigation improvements that would improve the existing street infrastructure such as upgrading existing signalized intersections are typically required for projects in a downtown setting. Mitigation improvements that have been identified and agreed to by the developer (letter dated August 28, 2008) include the following items:

1. *The existing traffic signal at the intersection of the I-240 WB On/Off Ramps and Montford Avenue will be upgraded to provide 2070 technology. The total estimated cost including appropriate design and approval is about $30,000.*
2. *The existing traffic signal at the intersection of Haywood Street and Montford Avenue will be upgraded to provide 2070 technology. The total estimated cost including appropriate design and approval, new signal heads, cabinet and controller, pedestrian signals, and metal poles and mast arms is about $100,000.*
3. *The existing traffic signal at the intersection of the I-240 EB On/Off Ramps/O.Henry Avenue and Haywood Street should be revised to remove the split side street phasing subject to review and approval by the North Carolina Department of Transportation. Remove existing vegetation along the southbound approach to improve overall sight distance at the intersection subject to approval by the N.C. Dept. of Transportation. The total estimated cost including appropriate design and approval is about $20,000.*

The total estimated cost for the proposed mitigation improvements is about $150,000.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable, if certain conditions, as included in this report, can be met.

Pros:

- Incorporation of existing structures (adaptive reuse)
- Project provides a mix of housing options, including smaller-sized units available at a "workforce" rate
- Includes 506 added parking spaces in the heart of downtown – 256 available to the public – a net gain of 226 parking spaces
- Provides a variety retail sizes to encourage a mix of businesses
- Applicant has indicated an intent to support affordable housing goals through the $3 Million minimum contribution to the Eblen-Kimmel Charitable Foundations
- Buildings are proposed to be LEED-certified at the basic level
- Applicant has agreed to implement construction mitigation measures to lessen the negative impacts of the construction process on adjacent businesses and residents
- Building design follows sound urban design principles (slender towers reduce massing and are stepped-back from the street, platform level is at a compatible height with adjacent structures, street-level activation for pedestrians)
- Design provides variety and diversity to skyline and downtown architecture

Cons:

- Proposal includes the demolition of currently occupied, economically viable buildings/businesses
- Potential negative impact of large scale development on adjacent businesses and residents during the extended construction process
- While there is a financial contribution to support affordable housing goals included with this proposal, no new affordable units are to be created with this money

- Downtown Master Plan not yet completed, but is expected to indicate "appropriate" areas for height and may also include market analysis on the economic potential of downtown (currently no means to determine the cumulative impact of this large development proposal)
- While the Haywood Street tower does step-back from the street after the 5th level, the Page Avenue tower does not step-back until the 14th level, thereby appearing more visually massive from a pedestrian perspective.

Based on the findings and analysis above, staff feels there is reasonable cause to support this project inclusive of the conditions by the TRC, Downtown Commission and Planning & Zoning Commission. However, members of City Council may want to consider community and stakeholder concerns and comments to help mitigate the potential impact of this proposal.

Should City Council choose to support this project, staff would recommend the consideration of a condition that would redirect a portion of the donation to the City's Housing Trust Fund, or other comparable fund dedicated to the creation of new affordable units.

Should City Council choose to include the Downtown Commission's two additional construction mitigation measures to the conditions for approval of this project, Parking and Engineering staff should be consulted as to the financial implications of offering reduced-rate parking vouchers.

Mr. Tony Fraga, developer of the Haywood Park Complex, spoke in support of the project and explained the existing conditions and the proposed conditions. Existing: hotel, 4 levels, 33 keys; office - approximately 29,000 sq. ft.; retail - approximately 40,000 sq. ft.; residential - none; and parking - approximately 119. Proposed: 25 levels, approximately 189 keys; office - 42,000 sq. ft.; retail - approximately 80,000 sq. ft.; residential - 23 levels (97 units); and parking - approximately 500 spaces. While describing the project he showed images of the towers and various views of the proposed buildings. He said they have tried to design the project in the harmony and in respect to the existing streetscape, along with trying to respect the views of their neighbors. He briefly reviewed the public benefits package outlined above by Ms. Bernstein. The goal of the Haywood Park office complex is to have sustainable companies and sustainable retailers. He said they have redesigned their project to address the view concerns raised by area residents.

Mr. Pat Whalen, representing the Downtown Commission, said they reviewed the project in five separate meetings. Some of the following comments were received: the Downtown Commission should table the project until the Downtown Master Plan is adopted; massive size of the project; negative impact on local businesses during construction process; potential physical impact to the 60 Haywood condominium project; compliment on design and thoughtfulness of slender towers; added vitality to the downtown after the project is completed; negative comments on design of the contemporary Haywood Street tower; issues about the driveway cut on Haywood Street; compliments of arcade connecting Page and Haywood Street; concerns of public benefit package; questions of green or LEED certification; and questions about the length of the project. Because the project activates Page Avenue, creates a connection between Page Avenue and Haywood Street, puts eyes on the street from the residential balconies, has slender buildings; has step-backs on the property; includes addition of parking spaces with only two access points; and no UDO variances, the Downtown Commission approved the project on a 6-2 vote. He said that on September 12, 2008, the Downtown Commission voted to recommend Council consider the following construction mitigation measures: (1) The City allow affected businesses to purchase free parking garage vouchers at a reduced price to offer to their customers, and (2) Require the developer to run a monthly newspaper ad supplementing the "Open for Business" marketing campaign, listing affected business as open.

The following individuals spoke in support of the conditional use permit for several reasons, some being, but are not limited to: letter of understanding signed regarding satisfaction

of outstanding issues and impacts raised by the 60 Haywood Condominium Association; well thought out project; solution to parking problems downtown; positive impact to the downtown businesses once the project is complete; background history of the Eblen-Kimmel Charitable Foundation and how they work with families; increased tax base; project will house national and global tenants who exercise corporate responsibility and practice sustainability at the highest level; entire project will be LEED certified; project will bring more people downtown to shop; had E.W. Grove lived past 1927, the tower probably would have already been constructed and been an historic gem; if project is approved, request it be conditioned upon 21 Batter Park Condominium Association receiving a letter of understanding similar to the 60 Haywood Condominium Association; project will be a strong economic pillar in the downtown area; the project will bring in more eyes on the street to deter crime and drugs trafficking; project will bring in more people to the downtown area to purchase items from the unique shops; thin towers will not block mountain views; one of the towers matches the Grove Arcade; support the use of parking vouchers; since growth is inevitable, this is a good project which will bring more jobs and parking downtown; growth occurs in cities all the time and people do not give up because of construction; long term positive impact on downtown Asheville; the restaurant experience on Page Avenue must be preserved during the construction process through monitoring the construction staging and traffic flow to minimize the impact; and parking issues must be addressed with a suggestion of off-site parking for construction workers, hotel staff, retail staff and condominium visitors:

Mr. Patric Mullen, President of the 60 Haywood Condominium Association
(Neighborhood Exhibit 1)
Mr. Joe Kimmel, businessman in downtown Asheville
Mr. Bill Murdock, Executive Director of Eblen-Kimmel Charitable Foundation
Mr. Joe Eblen, with the Eblen-Kimmel Charitable Foundation
Mr. Greg Tolen, Executive Director of the National Center for Sustainability
Mr. Mark Ellis Bennett, restoration and craftsman for historic buildings
Mr. Bill Winkler, representing 21 Battery Park Condominium Association
Owner of a Days Inn
Mr. and Mrs. Tom Gallagher, owners of 26 Battery Park
Mr. Bill Foley, owner of the Chocolate Fetish
Mr. Bill Lehnert, representing the Grove Arcade merchants
Mr. Bill Waddell, community relations with Eblen-Kimmel Charitable Foundation

The following individuals spoke in opposition of the conditional use permit for several reasons, some being, but are not limited to: height of the buildings are too high; scale of the buildings are too large; the underground parking will eliminate two parking spaces on Haywood Street mid-block; Haywood Street is one of the smallest thoroughfares downtown; request the City postpone action until the Downtown Master Plan is adopted; project should be scaled down to medium-rise buildings that fit into the landscape; project promotes gentrification of downtown Asheville for a small group of rich people; the St. Lawrence Basilica will cease being a focal point and turn into a smudge in the shadow of the huge towers; the towers will monopolize the views; funds will go to a foundation but will not promote affordable housing in that area; the construction process will cease operation on the west side of Haywood Street; concern of Montford Street bridge durability from dump trucks; concern of no traffic downtown during the construction process; negative impact to the Civic Center events during construction; since Mr. Fraga told the press that he wouldn't be able to begin construction until 2010, the process should be continued until that date and then let it conform with the Downtown Master Plan; disregard to the historic surroundings; people come to downtown Asheville for the uniqueness of the area; tall buildings will destroy downtown and diminish the visual beauty; there will be large shadows looming over the downtown area; increase in traffic resulting in more pollution; more people trolling for parking spaces; narrow streets not capable of handling increase in traffic; project is not economically feasible at this time; and there is no demand for high end residential units, offices, retail or condominiums:

Ms. Paula Dawkins, business owner on Haywood Street
Mr. John Lantzius, property owner on Lexington
Mr. David Wheeler
Mr. Bud Crawford, co-owner of the Earth Guild
Mr. Steve Rasmussen
Mr. Mac Coxe, native of Asheville
Owner of two businesses in the affected area
Ms. Amina Spengler, Asheville resident
Mr. Alan Berger, representing the Buncombe Green Party and Park

At 7:50 p.m., Mayor Bellamy closed the public hearing. She then announced a short 10-minute recess.

Vice-Mayor Davis expressed concern regarding pedestrian and vehicular conflicts with the driveway cuts on Haywood Street.

In response to Councilwoman Cape, Ms. Bernstein explained where the loading docks will be located and what size trucks will be able to access that area.

As Council is to take serious consideration of the seven standards for approval of a conditional use permit, Councilman Mumpower explained how the project dramatically fails to meet Condition No. 4. Regarding the $3 Million contribution to the Eblen-Kimmel Charitable Foundation, he felt the developer should be allowed to give their money to whoever they wish and we should be grateful for that contribution. He was concerned that we have created a complex document (UDO) so that no one can figure it out and no one can have any predictable confidence in success when they go through this horrific process.

Councilwoman Cape felt this project may work in a different area of town. She felt this project may be very disruptive and counter productive to the long term health of this growing and thriving downtown. She believes this materially endangers public health with the addition of 6,100 cars on our streets that are already difficult to navigate on. She also feels the project is out of scale for this area.

Councilman Russell felt everyone has talked about growing up and not out and to have a dense downtown. He felt the seven conditions for approval of conditional use permits is an evasion on people's property rights. He felt that scale includes the entire downtown area and because there is some history of this type of project in that area, he felt the project is appropriate. He noted there are a lot of positive benefits for the community.

Councilman Newman felt that a lot of these issues were debated when the Ellington project was considered. He liked the commitment to green building, parts of the project that are outstanding from a design standpoint, and for projects that are not going to include affordable housing unit, he felt this is a sound way to materially and significantly contribute towards addressing an important need for affordable housing in downtown. The way he interprets the UDO is when projects are of this scale they come to City Council - a process of whether the benefits of the project outweigh some of the inherent pain that goes along with this kind of growth in the community. Developers have ideas for ways they can help the project contribute to those community goods. Comparing this project with the Ellington building, the Ellington building is on the down slope and in a location where based of the building would not seem out of character for the community if you simply looked at the height of it compared to other buildings. In this case, we have two buildings next to each other that are even taller and they are on one of the highest points in the downtown. We do have tall buildings downtown, but we have a pattern of lower-rise buildings (2-4 stories) interspersed with tall buildings downtown. He felt if the project was one building, rather than two buildings of this scale immediately adjacent to each other, he felt the community would see the project differently. With the greatest respect for the Eblen-Kimmel Charitable Foundation, he felt that if we are going to have resources contributed to a public

benefits fund from a project like this, then he felt we needed additional discussion about how we want to structure that. We have created an Affordable Housing Citizens Task Force which came up with an Affordable Housing Plan for the City. He felt that before we make a specific decision about how to program those funds, he felt we should get input from that group on that question. He wouldn't suggest automatically putting it in the Housing Trust Fund, but it is an important question that should be thought through carefully as part of the overall decision.

Vice-Mayor Davis felt it was obvious that the project does not comply with Condition No. 4 regarding the project being in harmony with the scale, bulk ... character of the area. He did think this is a great project, but the two tall buildings in such close proximity are not in harmony with the scale in the area. He hoped that the developers might reconsider some of the project to see if they can get to a better place.

Upon inquiry of Mayor Bellamy, City Attorney Oast said that if the project is denied by Council, the one year waiting period does not apply if the project has changed substantially.

Mr. W. Louis Bissette Jr., attorney representing the developer, said he has seen a lot of development in Asheville and has never seen one done in a more sensitive way than this project. Mr. Fraga has had 50 meetings on the project and 5 meetings with the Downtown Commission. The project has been approved by the Downtown Commission, TRC and the Planning & Zoning Commission. Now one year into the process, and no telling how much money has been spent, they are told the project is not in harmony with the area.

Regarding the process (seven standards which must be met to approve a conditional use permit), Mayor Bellamy said that there have been times (on the south slope) where she personally voted in favor of a project when she could not find project being in harmony with the scale, bulk ... character of the area.

Councilman Mumpower outlined the dramatic differences between this project and the Ellington project.

Mr. Bissette asked for a continuance of this matter. He was uncertain what the developer could do to change the project to gain support by Council, but they will look to do that.

Vice-Mayor Davis noted that this is a quasi-judicial process and as such Council doesn't have the opportunity to discuss the project outside of the Council Chamber. In addition, information was provided to Council on Friday, which leaves a short amount of time for Council to digest all the applicable information.

Councilman Newman hoped the developer could find some ways the project can be adjusted, noting that even though the projects received approval by the Downtown Commission, TRC and Planning & Zoning Commission, many comments heard today were expressed during those reviews as well.

Councilwoman Cape noted some of her following concerns: (1) two buildings that tall so close together; (2) need better pictures for scale; (3) that many cars on Haywood Street with difficult turning radii; (4) concern of entryway for trucks; and (5) what is the realism of 80,000 sq. ft. or retail being served with the truck size mentioned.

Councilman Newman moved to continue this matter until November 11, 2008. This motion was seconded by Vice-Mayor Davis and carried unanimously.

Closed Session

At 9:22 p.m., Councilman Mumpower moved to go into closed session for the following reason: (1) To consult with an attorney employed by the City about matters with respect to which

the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: State of North Carolina; City of Asheville; and County of Buncombe - The statutory authorization is contained in G.S. 143-318.11(a) (6); and (2) To prevent the disclosure of information that is confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e) - The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Russell and carried unanimously.

At 9:40 p.m., Vice-Mayor Davis moved to come out of closed session and return to the formal meeting. This motion was seconded by Councilman Mumpower and carried unanimously.

V. UNFINISHED BUSINESS:

A. GRAFFITI PROGRAM UPDATE AND POLICY DIRECTION

Public Works Director Mark Combs said that City Council requested an update on graffiti program efforts.

In March 2007 the Asheville Police Department (APD) formed a Graffiti Task Force in response to more than 200 incidents throughout the City. Their efforts included over 50 surveillance operations including 10 search warrants, which to date resulted in 20 charges for damage to property. In May 2007 the Public Works Department formed a graffiti removal team, procured specialized removal equipment & chemicals, and formed a partnership with Quality Forward (to promote removal of graffiti on private property to include supplies). Staff continues to aggressively pursue vandals and clean up public property.

Based on interviews with key staff from cities with graffiti programs, the following common elements were noted:

- Graffiti adds to 'visual' feeling that the community is not safe
- Graffiti should be removed as soon as possible
- Public/private partnerships (for removal) are effective
- Good programs consist of two key elements:
    - Enforcement: Zero tolerance, arrests, severe penalties, education
    - Logistics: Consistent & diligent removal, public/private partnerships
- Some communities (Los Angeles) provide locations for 'painters'
- It requires the entire community, businesses, neighborhood associations, police and prosecutors, etc. to work together to put out the message: "Graffiti is not acceptable in this community!"
- Removal compliance (once established by ordinance or policy) must be strictly enforced
- 5-10% of graffiti in Asheville is gang-related

In response to outcomes from the Social Issues Task Force regarding removal of graffiti on private property, in July 2007 staff completed research and benchmarking and drafted a pilot graffiti program in the Central Business District (CBD) for the removal of graffiti on both public and private property. With increased emphasis by APD, input from community stakeholders and field experience, the draft pilot program was further refined and submitted as an enhancement project for funding in the Fiscal Year 2008-09 budget; however, due to budgetary constraints the program was not funded.

The draft graffiti removal program addresses reporting, removal process, department responsibilities and future considerations (regarding program expansion/refinement). Following is a chart comparing Asheville's existing efforts to the proposed formal program (including private property):

	Existing program	Proposed program
Reporting:	Call APD; Customer Svc.	Graffiti 'hotline'; Cust. Svc.
Removal: Public ROW: Public Buildings: Private property:	 48 hours (DPW staff) 48 hours (multi-city staff) **NONE**	 48 hours (DPW staff) 48 hours (multi-city staff) 48 hours (**owner-voluntary?**) **or** 48 hours (**PW staff w/release?**) **or** 48 hours (**by ordinance?**)
Priorities:	APD-ID'd graffiti Key corridors-high visibility	APD ID'd graffiti Key corridors- high visibility **Private property**
Cost:	In current budget	$279,500 ($190,590/yr.)

A formal graffiti program would be consistent with the following Strategic Plan initiatives: SAFE: Strengthen enforcement of existing laws and regulations; and, GREEN: Increase downtown cleanliness and beautification.

Pros:

- A formal graffiti program will provide the means and resources to remove graffiti from both public and private property
- Aggressive removal of graffiti will eliminate 'visual' feeling of unsafe community
- Combination Graffiti/weed/median crew will improve visual aesthetics of community in 3 key areas: graffiti, sidewalks & gutters and islands & bulb-outs

Cons:

- Mandatory removal of graffiti on private property may be a financial burden to property owners
- Court system does not currently mete out severe punishment for such crimes
- Total eradication of graffiti will take a long time with effort from entire community

Initial investment of equipment & staff: $279,590; annual costs: $190,590

Using a PowerPoint presentation, Mr. Combs said the on March 2007, the Asheville Police Department (APD) formed a Graffiti Task Force (a) 200 incidents recorded; (b) 10 search warrants; (c) 50+ surveillance ops (500 man hours); (d) 20 people charged; and (e) aggressive public relations campaign.

In May of 2007, the Public Works Department formed a removal crew to remove graffiti on public property (a) mission was to remove it as quickly as possible; (b) pressure washer, chemicals and training; and (c) partnership with Quality Forward on supplies.

On public property the graffiti was removed as soon as possible; coordinated efforts with the APD, N.C. Dept. of Transportation, Quality Forward, neighborhoods and associations; and sporadic (a) 'tagged' areas vary; and (b) volume varies.

The key challenge is removal from private property (a) property owners are victims of graffiti crime; (b) many property owners do not live in community; (c) requires constant vigilance (time and money); (d) requires cooperation/effort from entire community; (e) no current ordinance requiring removal; and (f) three key options (1) continue to encourage voluntary removal; (2) City

removes it which will require an ordinance; liability release from damages, if any; and staff and equipment; and (3) ordinance requiring removal within 24 hours (enforcement required).

The following is a summary of policy options (1) maintain current program (APD focus/removal on rights-of-way/partnerships); (2) require removal on private property (a) property owner responsible for removal – ordinance, enforcement system required; and (b) City staff removes (with liability release) – staff/equipment/administrative resources and ordinance authorizing such work required; and (3) other.

Councilman Mumpower felt graffiti is a form of urban terrorism. He could not support penalizing business owners who are really victims of the crime. Since the City cannot keep up with removing graffiti off public property it is not fair to lay harsh demands on private property owners. He wondered if there are any additional civil penalties for people who abuse the City. He also advocated for some establishment of a reward program. He would be happy to contribute to the initial effort to get it started.

In response to Mayor Bellamy, Councilman Mumpower said this program would be different from the Asheville-Buncombe Crime Stoppers program. This would be a more specific targeted element. He suggested we partner with some other organizations, like the Tourism Development Authority (TDA) and others, who are affected by this crime. Mayor Bellamy noted that a letter was sent to the TDA requesting a meeting with them and this is a possible item that may be included in that meeting discussion.

Vice-Mayor Davis noted that Mr. Kelly Miller, Executive Director of the TDA, came to the Downtown Commission meeting and outlined a list of what the TDA saw as the community needs and graffiti was very high on the list. He asked Mr. Keller forward the list to all of Council.

Mayor Bellamy felt that since the City is responding quickly to removal, we should request the N.C. Dept. of Transportation remove graffiti on their properties in a timelier manner. She noted our corridors are being impacted tremendously.

In response to Councilman Newman, Mr. Combs said that the City is investing approximately $5,000 in graffiti removal now.

Councilman Russell responded to Councilwoman Cape's inquiry about whether property owners can purchase insurance for this kind of damage. He noted that insurance is optional and business deductibles are fairly high.

Councilwoman Jones suggested a prominently placed phone number on the City's website for citizens to call in and report graffiti. She felt that everyone needs to become more actively involved in reporting graffiti.

Police Chief William Hogan responded to Councilwoman Cape's inquiry on whether graffiti adds to the dangers of crime in the community. He felt that if graffiti is not removed immediately it leaves the impression the City doesn't care. Private property owners need to be encouraged to remove graffiti from their property quickly. The City and private property owners need to be hard core about taking it down quicker than they are about putting it back up.

In response to Councilwoman Jones, Police Chief Hogan felt there is a profile for "taggers" and a pattern that is sometimes associated with other activities and specific age groups. He felt there is some informal network of taggers that is inter-connected with each other.

Councilman Newman suggested that if there is an ordinance requiring property owners to remove graffiti on their property that there be an opt-out clause for property owners to call to say they do not want the City or Quality Forward not to come onto their property for graffiti removal.

In response to Councilwoman Cape regarding a property owner signing a release, City Attorney Oast said that if we are operating pursuant to an ordinance that the City may enjoy some kind of immunity.

Mayor Bellamy summed up the discussion by saying that Council would like more options before it gives policy direction. She suggested staff research best practices for other cities on how they handle removal of graffiti. Once staff has compiled that information it will be scheduled on Council's agenda for further consideration.

B. E-VERIFY SYSTEM

Human Resources Director Lisa Roth said that the purpose of this memorandum is to respond to a request made by Councilman Mumpower on July 15, 2008, for the following information:

- An evaluation of how the e-verify tool could be utilized for verification of citizenship. This would apply to verification of citizenship for (a) city employment and (b) contractor / subcontractor employment
- A review of the acceptability of how E-verify is displayed as a link on our city web pages.

E-Verify, formerly known as Basic Pilot, was developed in 1996 and is operated by the Department of Homeland Security (DHS) in partnership with the Social Security Administration (SSA). The purpose of the internet-based system is to verify employment eligibility in the United States by cross-checking identification information presented for employment with information in the Social Security Administration's (SSA) database. The system is not equipped to verify the authenticity of the identity, immigration status or citizenship.

Once employment information has been entered, the system provides either a confirmation or a tentative non-confirmation of a match in the SSA database. If a tentative non-confirmation is received, the employee must be contacted to notify him or her of the right to contest the tentative non-confirmation. The employee must be allowed to continue to work during this period. If a final non-confirmation is received, which can take up to several weeks or months, and then the employer can terminate the employee.

It is important to note that it is illegal to discriminate against any individual (other than an alien not authorized to work in the U.S.) in hiring, discharging, or recruiting or referring for a fee because of that individual's national origin or citizenship status. It is illegal to discriminate against work eligible individuals. U.S. citizenship is not a requirement of work eligibility.

The city's current employment processes include steps to ensure compliance with Federal requirements regarding work eligibility and Social Security number verification. In addition, the city's contracting process includes a clause that requires all contractors to comply with local and Federal laws, including the same work eligibility requirements with which the City of Asheville must also comply.

Employment Eligibility Verification

All U.S. employers are responsible for completion and retention of a Form I-9 for each individual they hire for employment. This includes citizens and noncitizens. On the form, the employer must verify the employment eligibility and identity documents presented by the employee and record the document information on the Form I-9. The City of Asheville complies with this requirement.

Identification Verification

When a new employee is hired by the City of Asheville, his or her Social Security number is verified when he or she is entered in the payroll system and a contribution is sent to the SSA and Medicare. If the Social Security number is not valid, the city receives a "no-match" letter. On

average, the city receives two "no-match" letters per year, usually due to clerical errors in the employee's paperwork. Asheville has resolved all "no match" issues to the SSA's satisfaction, and the organization has not terminated anyone in recent years due to a fake social security number.

The processes described above are required by Federal law. Based on these requirements and the city's current employment practices, the use of E-Verify would create a redundant system for verifying identification information. Implementing the system would require additional staff work and resources to manage. In addition, the use of E-Verify in conjunction with city contracts would also require additional resources to track and monitor compliance by third-party vendors.

Concerns about the U.S. Citizen and Immigration Services' ability to provide adequate staffing resources to properly manage E-Verify's appeal and reverification process have been raised by the U.S. Government Accountability Office in testimony to Congress. Additional concerns about the system's error rate (4.1 percent error rate on routine verifications and as high as 10 percent for legal foreign-born workers) have also been noted.

Based on previous Council direction, staff has included a link to the e-Verify system at www.ashevillenc.gov. The link can be found under the section entitled "Doing Business with the City" and is called "Voluntary Participation in e-Verify." Staff believes the link's placement and title are reflective of Council's current policy direction and are ready to modify the placement based on additional Council feedback.

If the majority of the City Council is interested in further pursuing the use of E-Verify, staff would recommend additional in-depth analysis be conducted to thoroughly examine the concerns noted above, other legal considerations, required resources and potential benefits of utilizing the system.

Chief Financial Officer Ben Durant provided Council with comparative information about enforcement practices from other cities. Ms. Roth reviewed with Council a survey of other cities about their use of E-verify.

Councilman Mumpower explained that E-verify is a federal system to validate the legal work status of a potential employee. He feels the City is part of a conspiracy to ignore illegal immigration (not of the City's own employees) but our subcontractors, especially with the contract work on the City's water system upgrades. He felt the City should be encouraging our subcontractors to use E-verify and the City should be a model for others.

In response to Councilman Mumpower, Mayor Bellamy said that there is a visible link on the City's website regarding the use of E-verify. She felt that to ask our contractors to take the extra step to validate work status shouldn't be too hard. In addition, she noted that the City will be looking at living wage information.

In response to Councilwoman Cape, Ms. Roth said that at this time this is a free government service from the U.S. Dept. of Justice. They are in the process of discussing charging for this service in the future.

There was a brief discussion, initiated by Councilwoman Cape, about the 4.1% error rate has been documented by the U.S. Government Accountability Office and the 10% for legal foreign-born workers. She asked for additional information about the error rate and if there is an appeal process in place. Councilwoman Cape agreed in that it's not easy to fix things in the federal system if something is wrong. She too would like some clear process in safeguarding civil liberties.

Councilman Mumpower moved that the City of Asheville immediately require our subcontractors to use the federal E-verify system in affirming the legal employment status of all employees connected with City contracts.

In response to Councilman Russell regarding staff recommending an additional in-depth analysis be conducted to thoroughly examine legal considerations, required resources and potential benefits of utilizing the system, City Attorney Oast said that the City currently has a requirement that contractors and sub-contractors comply with all applicable federal, state and local laws which he interprets to include immigration laws.

Councilman Mumpower withdrew his motion noting that the City does require our subcontractors pay a certain wage. He was pleased that the City can also require subcontractors affirm, in a legal manner, the legal status of their employees. He would like to refer this to the City Attorney for further research.

Mayor Bellamy corrected Councilman Mumpower's statement in that the City does not require subcontractors to pay a certain wage. However, there is research being conducted that will come back to Council in the very near future.

In response to Vice-Mayor Davis, Ms. Roth said that staff feels we are doing a thorough job in meeting the federal requirements. She noted that the other North Carolina cities she surveyed do not use this system. She felt this would require additional staff to monitor, however, she would be happy to proceed with Council's direction.

It was the consensus of the majority of Council to instruct the City Attorney's Office conduct an additional in-depth analysis regarding the legal considerations, required resources and potential benefits of utilizing the system for contractors and sub-contractors and report back to Council on November 11, 2008. In addition, his research will also consist of (1) whether the City can require as a condition of the contract or subcontract that they further produce verification of employment eligibility status; (2) what ability the City has as a political subdivision of the state to be monitoring compliance with federal law; (3) what are the unintended consequences for contractors and what that would mean in terms of bidding on our contracts; (4) what kind of administrative burden this will put on the City and our contractors to monitor this, as many of the contractors we have employ labor that is not well paid or have a different work force show up every day; and (5) will the City be taking on any legal liability by requesting this of our contractors and subcontractors.

VI. NEW BUSINESS:

A. RESOLUTION NO. 08-198 – RESOLUTION SUPPORTING A FULL AND PROPER CLEANUP OF THE FORMER CTS OF ASHEVILLE

Councilwoman Cape said that this is consideration of a resolution of support for the CTS/Asheville efforts to encourage Environmental Protection Agency (EPA) restoration of soil and water quality in the area impacted by the CTS facility. On August 20, 2008, Mr. Barry Durand appeared under Public Comment at the meeting of Council's Planning and Economic Development Committee. Mr. Durand informed the Committee of the petition effort in the neighborhood, and he requested action from the City of Asheville. She said that all of our federal representatives are looking into this issue and have a great deal of interest in helping this community move this clean-up forward. It would be useful for the City of Asheville to say we are interested in having this clean-up happen, especially in terms of groundwater and water supplies in this area. This kind of contaminant is extremely dangerous and will continue leeching into the groundwater. The sooner we can get this cleaned up the better. This is in the Dingle Creek Watershed which the City has spent so much money to figure out how to make a good watershed. She urged City Council to adopt the resolution in support of the EPA doing a full and

proper clean-up of this site, which is something they said they would do, but it has slowed down and it needs to be reactivated.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Jones moved for the adoption of Resolution No. 08-198, as amended. This motion was seconded by Councilman Mumpower.

The following individuals spoke to Council about the history of this contamination site and the history of sickness and death from individuals who breath the vapors and drink the water from subdivisions and neighborhoods surrounding the plant, noting that the EPA has know about this issue since the mid 1980's. Since then contaminants have shown up in several springs and wells surrounding the property. It has been almost a year since residents living near the plant began asking federal, state and local county officials to clean up the site after tests indicated the contaminants might be spreading. They urged Council to request the EPA to perform a full and proper clean-up of the contributing source area of contamination and to endorse the efforts being made by the federal government to hold the EPA administrators accountable for enforcing, addressing and containing further groundwater contamination by effecting an expeditious clean-up at the plant site.

Mr. Tate MacQueen, Buncombe County resident in affected area
Mr. Aaron Penland, Buncombe County resident in affected area
Mr. Jerry Rice, Buncombe County resident (who suggested amendments to the resolution regarding public health, safety and welfare)
Mr. James Wilson, Buncombe County resident in the Oaks Subdivision
Buncombe County resident who lives 500 feet from contamination site
Mr. Eric Penland, family member of individuals who lived in affected area
Mr. Scott Hollowell, Buncombe County resident in affected area
Buncombe County resident in affected area (School Board will not move bus stop which is contaminated with the highest toxic fumes tested by the EPA)

Councilman Mumpower noted that this area is out of the City's jurisdiction. However, it is such an important matter that he suggested area residents update Council in the future under the information discussion and public comment section of their agenda.

At Councilman Mumpower's request, it was the consensus of City Council to instruct City Manager Jackson to prepare a short staff report regarding Mr. Rice's assertion that the Enka Plant, located in the City limits, is the most hazardous waste site.

Mayor Bellamy requested City Manager Jackson provide Council with information on the City's waterline extension plans for this area, because there may be opportunities to partner with Buncombe County to provide the area with clean drinking water.

Mayor Bellamy asked for a friendly amendment as outlined by Mr. Rice. Said amendment would be to (1) amend the first Whereas as follows: "The Asheville City Council ... supports the protection of ... groundwater resources ... in the interest of protecting the health, safety and general welfare of its citizens."; and (2) amend the Now, therefore paragraph as follows: "The City Council ... request of the EPA for a full and proper cleanup ... to protect the public health, safety, welfare and environment from a still pending threat from release." Councilwoman Jones and Councilman Mumpower accepted the friendly amendment.

At Mayor Bellamy's request, it was the consensus of Council to send a letter to the Buncombe County School Board requesting they move the bus stop which area resident alleges is contaminated with the highest toxic fumes tested by the EPA.

The amended motion made by Councilwoman Jones and seconded by Councilman Mumpower carried unanimously.

RESOLUTION BOOK NO. 31 – PAGE 321

B. RESOLUTION APPOINTING A MEMBER TO THE CITIZENS-POLICE ADVISORY COMMITTEE

Vice-Mayor Davis said that the term of Davidson Jones (east representative) expired on June 30, 2008.

At the September 16, 2008, worksession, it was the consensus of Council to interview Kyle Ann Ross, Brock Moore and Ronald Maynard. Mr. Maynard was not able to attend the interview due to fuel conservation measures. Therefore, it was the consensus of Council to postpone action on this appointment until Mr. Maynard could be brought in for an interview.

C. RESOLUTION NO. 08-199 - RESOLUTION APPOINTING A MEMBER TO THE TRANSIT COMMISSION

Vice-Mayor Davis said that Yuri Koslen has resigned from the Transit Commission, thus leaving an unexpired term until December 31, 2010.

At the September 16, 2008, worksession, it was the consensus of Council to interview Michael Orford, Bruce Emory and Larry D. Chapman. In addition, David Lack was a candidate; however, no interview is necessary. Mr. Orford could not be reached by telephone or letter arranging the interview.

After Council spoke highly of the candidates, Michael Orford received no votes, Bruce Emory received 1 vote, Larry Chapman received 3 votes, and David Lack received 1 vote. Therefore, Larry Chapman was appointed to serve the unexpired term of Mr. Koslen, term to expire December 31, 2010, or until his successor has been appointed.

RESOLUTION BOOK NO. 31 – PAGE 322

VII. OTHER BUSINESS:

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Vice-Mayor Davis reported to Council the Tree Commission's report on tent worms. Councilwoman Cape asked that Ms. Steiner, who brought this to Council's attention, be sent the report.

Vice-Mayor Davis presented Council with a draft timeline for replacement of vacant Council seats. He asked that Council review the draft and contact him with any additions or corrections.

Mayor Bellamy congratulated the Minority Enterprise Development (MED) Committee for their hard work on the 26th Annual Awards Luncheon. She also congratulated the several MED Week Award nominees from Asheville and Buncombe County.

Mr. Jerry Rice questioned the purpose of the bridge over to the Enka Plant.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:46 p.m.

Magdalen Bullock
CITY CLERK

Jerry M. Bellamy
MAYOR

Tuesday – October 7, 2008 - 5:00 p.m.

Special Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

Mayor Bellamy announced the purpose of this special meeting is to (1) receive staff briefings on the City's financial market and fuel shortage impacts; and (2) consider policy directions.

Fuel Update

Assistant City Manager Jeff Richardson said that the City of Asheville continues internal conservation efforts in order to maximize fuel supplies necessary to provide basic city services to Asheville's citizenry and stakeholders.

Since the recent storm damage experienced at the gulf coast, oil refineries have struggled to provide adequate supplies of fuel to various areas of the southeast, including Western North Carolina. City staff continues to monitor fuel availability for city use, as well as external availability to the general public.

As of today, the public fuel supply is (1) 80% of gas stations have fuel; (2) production is increasing, deliveries escalating; and (3) supplies supplemented from other east coast courses.

As of today, regarding the City's fuel supply, Purchasing staff has been able to procure fuel as follows: (1) current diesel and unleaded gas supply is improving; (2) sources from as far away as Baltimore and Cleveland; and (3) local distributors also working hard to find fuel.

Regarding Asheville's fuel status, our two-week conservation efforts include (1) diesel fuel usage is down 20%; (2) unleaded fuel usage is down 19%. The operational effect is (1) reduction/postponement of selected operational services: street/sidewalk services, minor water system repairs, building inspections, code enforcement; and (2) Asheville Police Department bike/foot patrols, less idling and no air conditioning.

He explained the current status of modified Level II (1) public safety remains at 100%; (2) Water Department at 100%; (3) Building safety at 100%; (4) recreation centers, Nature Center, Golf Course re-opened on October 3; (5) yard waste, tree maintenance, construction projects reinstated; (6) code enforcement reinstated; and (7) administrative staffing levels at full status.

The City will continue to (1) procure fuel to maintain maximum operations; (2) promote telecommuting; (3) suspend street sweeping and storm drainage maintenance; (4) minimize trip and carpool; (5) use GNC, electric and hybrid vehicles if possible; (6) minimum vehicle idling; and (7) adjust service levels as necessary.

The next steps for fuel for City government include (1) explore mutual aid fuel agreements (a) stronger 'web of connectivity'; and (b) seek partnerships with federal, state and other local agencies; and (2) explore other logistical opportunities (a) example – increased fuel storage capacity.

In summary, (1) fuel supplies and deliveries continue to stabilize; (2) City staff can reliably get to work; (3) staff will continue to monitor and adjust as necessary; and (4) long term (a) partnership development; and (b) logistical planning.

Councilwoman Cape explained why this is a good time to have a conversation with the community on the City's emergency preparedness plan so if we are in a more complex situation, the community understands the City's contingency plans.

Mayor Bellamy said that she and Vice-Mayor Davis (who have been representing Asheville) have been meeting on a regular basis with the Buncombe County Commissioners and the Emergency Management team to talk about plans that will be brought before Council for consideration moving forward. She noted that some long-term planning items do have budgetary impacts. Some items include how we use our transit system, opportunities for park and ride, additional fuel storage especially as it relates to emergency management needs and the police department needs, and how can we work with the gas stations that were successful because they were receiving gas shipments from connections in Wilmington.

Vice-Mayor Davis said that Fire Chief Grayson will have a report on the emergency management team discussions which will be useful to include in the discussion regarding emergency management plans.

Mayor Bellamy wanted to be sure that Council was aware that September 30 was the last day that Environmental Protection Agency (EPA) had authorized for allowing delivery to North Carolina of fuel having an alternative formula. The State of Georgia has asked for the EPA to extend their standards until the end of this year. We also talked about the need to have the EPA standards reduced until the end of the year to ensure that our community has enough fuel and heating oil. Senator Burr has supported an EPA waiver for our area until the end of the year. Other conversations are moving forward to discuss natural gas, heating oil and the overall fuel needs for our community will include not only the City and Buncombe County, but other municipalities, PSNC Energy as well as Progress Energy.

In response to Councilwoman Jones about communication, Mayor Bellamy noted that it was not communicated that the refineries were going to shut down in advance. When the City received word that was happening, that item was immediately placed on Council's agenda and a press release was issued asking people to start conserving.

City Manager Jackson said the two hurricanes in Texas set off an unusual set of circumstances, culminated with the seasonal switchover of fuels. The lead at this point needs to be taken by the emergency preparedness people, and the Department of Energy at both state and interstate commerce levels. Some aspects anticipated include the interstate impact; the dependence upon centralized refineries; and the limited amount of storage and terminals along the pipeline. In fact, that there may be some alternative federal bills regulating and investing in decentralization of some of these facilities and enhancing some of the supplies and terminals along such pipelines and facilities. In respect to emergency preparedness, both on a local, regional, state and federal level, we need to have good plans for what we have in place now and understand the limits of the infrastructure and how that infrastructure will impact not only our fuel supplies, but deliver of food and the delivery of heating fuel. These are interstate commerce issues and can't be solved at a local level; however, we do need to have emergency preparedness plans in place. That task was delegated to our emergency preparedness people by the individuals at the meetings that the Mayor and Vice-Mayor attended.

Mayor Bellamy noted that the relationships are now in place to get information (e.g., delays, maintenance, etc.) from Colonial, which is the fuel distributor to Spartanburg. They are to contact the Mayor and/or City Manager's Office. That system was not in place prior to this incident. She said that the Federal Emergency Management Agency (FEMA) advises cities that they are on their own for 72 hours before federal assistance comes in. We must have a plan to

make sure that we take care of ourselves, e.g., water availability, working with the Red Cross, as well as advising the community where the emergency shelters are located in advance.

Mayor Bellamy met with a representative from WLOS-TV and they have put in place a good plan for the City to disseminate accurate information. She congratulated City staff for their regular updates on the City's website, which included valuable information and links to obtain more like information. Moving to the 4-day, 10-hour workweek was a great conservation measure. One thing we did not do, but will in the future, is daily updates with the news media to calm the community's fears – with WLOS-TV being the host. We did send out press releases, but that wasn't as successful as a daily update with the news media. Also, we need to be mindful of people who are visiting our community and how we made sure those people have factual information as well. We will provide information to our hotel/motel industry. UNC-Asheville and A-B Technical Community College were at the discussion table; however, we will be expanding those meetings to include Warren Wilson College and Montreat College.

Councilman Mumpower felt the most important key is providing timely, consistent, reliable information with maximum our use of the City's website, television stations and daily releases. He felt that all those tools should have a date and time noted so people are aware that they are receiving the most current information.

Mayor Bellamy said that we will be clear moving forward to provide all pertinent information, noting that we were providing facts on percentages of the amount of fuel going to the pipeline, but didn't explain that it takes 5-7 days to get from the refinery to the Spartanburg distribution center. We will work on being as clear as possible going forward.

Councilman Newman suggested a larger conversation between the City and gas station operators to encourage them to implement voluntary policies limiting the amount of gas for each vehicle. The limited supply was compounded by people who went our of their normal behavior to fill up extra gas tanks, top of their gas tanks, etc. That just makes the situation collectively worse.

Vice-Mayor Davis noted that if we asked for voluntary policies with our gas stations within the City limits, people would be driving to stations in the County. Oddly enough, different counties had different fuel problems. Mayor Bellamy noted that after speaking with most of the local gas station owners, people ignored the voluntary limits. The issue of enforcement arose and it was determined that enforcement would have to be through the Asheville Police Department and Buncombe County Sheriff's Department. They have asked that the Land-of-Sky Regional Council be a forum of that discussion to see how that can be addressed as a region rather than just in the City.

Mayor Bellamy noted that October if Fire Prevention Month and we must realize that if people don't have good fuel, they will use kerosene heaters and they may not have a good carbon monoxide detector or a good smoke detector. Regardless of what we do, some people will panic and they will use whatever means they have. She felt it would be better to give out a carbon monoxide detector rather than send out a fire truck.

City Manager Jackson spoke about the concerted City team effort through this process and recognized various individuals for their extraordinary efforts during this period of time.

Mr. John Mitchell said that Senator Burr asked him to read the following statement: "Senator Burr continues to be in daily communication with state and local officials as well as the Department of Energy concerning the situation in western North Carolina. He is continuing to press distributors and others to bring more product into the mountains, some from as far away as Alabama, Georgia and Virginia. Although the shipment of gas is returning to pre-hurricane levels, the Senator is continuing to ask citizens to conserve. Finally, the Senator believes that we should now begin to look at both the causes of this shortage and how we can prevent it from happening

in the future. We look forward to working with the City of Asheville on this important issue. Senator Burr's office will be available as we move forward."

Mayor Bellamy noted that she had talked to Senator Burr several times during this process and he has already written to the Governor asking him to request the EPA for a waiver for our area for the blend that we usually get until the end of this year to ensure that we have on-going fuel and heating oil.

In response to Councilwoman Cape, Vice-Mayor explained how the Western North Carolina Air Pollution Agency is diligent in watching the issue regarding the EPA standards and what they mean to Asheville regarding the ozone season from April to mid-September. She raised concerns about allowing fuels of a lower standard.

Mr. Richardson noted that no Council action is necessary. He said this report was for updating purposes only.

Financial Update

Chief Financial Officer Ben Durant said that the City of Asheville is beginning to see the impacts of current national economic trends.

The City of Asheville continues to monitor the national and international financial markets for potential impact on our budget, our investments and capital project planning.

He described the national trends of (1) instability in the financial markets; (2) borrowing slowdown; and (3) weakening economy.

The local economy statistics are (1) Asheville unemployment - Fiscal Year 2007 – 3.4%; Fiscal Year 2008 – 4.3%; (2) residential building permits - Fiscal Year 2007 – 764; Fiscal Year 2008 – 598; and (3) City business licenses – Fiscal Year 2007 – 7,150; Fiscal Year 2008 – 7,036.

He summarized the budget trends regarding revenues as follows (1) Fiscal Year 2008 property tax growth is 2.0% vs. 10-year average of 3.3%; (2) Fiscal Year 2008 sales tax growth (excludes change in City's share of local distribution) is 2.0% vs. 4-year average of 7.0; and (3) Fiscal Year 2009 Powell Bill revenue is down 9.0%.

He then summarized the budget trends regarding expenditures in significant price inflation in key areas as (1) employee health care is 28% increase in City contribution vs. Fiscal Year 2008; (2) fuel is 25% increase since last year this time; (3) asphalt is 89% increase since 2006; (4) concrete is 77% increase since 2006; (5) road salt is 121% increase over prior contract; and (6) utilities from December 1 Progress Energy increase is $143,000 annual cost.

Using a graph he showed the budget trends regarding capital markets for (1) fixed interest rates on highest quality bonds; (2) variable interest rates; and (3) capital markets.

Steps taken during the budget process include (1) eliminated 10 positions in the General Fund; (2) reduced Capital Improvement Plan contribution by $1.6 Million; (3) reduced training budgets to defer non-essential training; (4) eliminated the Manager's Contingency; (5) reduced items for professional services and small capital; and (6) delayed implementation of take-home vehicles.

Next steps under consideration include (1) further reduce capital and equipment; (2) continue re-engineering; (3) service level prioritization; and (4) operating reductions.

At the request of Mayor Bellamy for clarification, Mr. Durant said that local governments can't invest in the stock market. We typically invest in low risk instruments, such as treasury notes, CD's and money market accounts. He said our investment portfolio is fine.

In response to Councilwoman Jones, Mr. Durant said that staff will update Council in detail during their first quarterly report in November regarding the City's finances. At this point, he felt we will miss our mark on our sales tax estimates. Even though we did start the year with a conservative estimate of 2% on our sales tax growth, he didn't believe we will reach that and that we will probably come in under by about $600,000 by the end of the year. In addition, he guessed we will probably miss our mark on the property tax revenue estimate. Some other revenues will come in higher than budgeted and after it all settles down, he thinks we will have a net figure of less than what we budgeted, but again we will monitor that on a regular basis and report back to Council as needed.

In response to Councilwoman Jones, City Manager Jackson said that are not in a hiring freeze but are being selective in positions and cutting back on staffing through attrition. The more we can manage at this point the less we can avoid those kinds of actions. Likewise on the capital side, we are also in discussions about postponing projects and postponing equipment purchases until we have a better handle on the budget. He said we are off about $250,000 in revenue estimates, and the inflation numbers on key supplies we are buying show similar number on those expenses. He felt that number is manageable. We are really concerned, however, about an economic slowdown going into the Christmas season and the heavy retail purchases. We are monitoring that weekly and will report back in the first quarterly report.

In response to Councilman Mumpower's concern about the state reaching into cities pockets, City Manager Jackson said the state's direction for their departments to find cost-cutting measures inevitably will roll down to cities. The City's two greatest concerns are (1) sales tax; and (2) what will be passed down to us from the state.

Mayor Bellamy said that City Managers Association and the U.S. Conference of Mayors are putting together information for the N.C. League of Municipalities to use to educate our legislators about the local impacts of whatever is passed down to cities across North Carolina.

Councilman Mumpower supported the City's efforts in being conservative financially and encouraged the City Manager to be overly conservative in anticipation of what might happen financially.

Councilwoman Cape also supported the City's conversation efforts. She asked that City staff continue to provide Council with the right information in order for them to make good decisions regarding reduction of capital improvement investments vs. the rising costs of energy, gas, materials, etc. City Manager Jackson responded that staff will provide Council with options regarding specific policy decisions, noting that in times of economic decline we need to have strong public safety services. He said we are right-sizing the Capital Improvement Plan before we raise expectations about what we are going to do. Mr. Durant and our Budget Director Tony McDowell have seeking outside financial advice in looking at what our capacity is in the municipal markets compared to other organizations. That report should be coming to Council later this month.

Mayor Bellamy looked forward to the continuous updates to the City's website and urged citizens to sign up for the City's e-News for up to date information.

Mr. Durant said that no Council action is necessary. He said this report was for updating purposes only.

Adjournment

At 6:17 p.m., Mayor Bellamy adjourned the meeting.

Magdalen Burleson
CITY CLERK

Jerry M Bellamy
MAYOR

Tuesday – October 14, 2008 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; Assistant City Manager Jeffrey B. Richardson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Robin L. Cape

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Russell gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING OCTOBER 2008 AS "FIRE PREVENTION MONTH"

Vice-Mayor Davis read the proclamation proclaiming October, 2008, as "Fire Prevention Month" in the City of Asheville. He presented the proclamation to Fire Chief Greg Grayson, who briefed City Council on some important safety issues. He also urged the community to sign up on the City's website for the free CodeRed service which allows officials to deliver pre-recorded emergency telephone information to targeted areas regarding emergencies.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Item "E" was removed from the Consent Agenda for discussion and/or individual votes.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON SEPTEMBER 23, 2008, AND THE SPECIAL MEETING HELD ON OCTOBER 7, 2008

B. RESOLUTION NO. 08-200 - RESOLUTION SETTING A PUBLIC HEARING ON NOVEMBER 11, 2008, TO CLOSE A PORTION OF SUMMIT AVENUE

Summary: The consideration of a resolution of intent to close excess right-of-way located on both sides of Summit Avenue and setting a public hearing on November 11, 2008, regarding this issue.

N.C. Gen. Stat. sec. 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, the adjoining property owners have requested the City of Asheville permanently close a portion of Summit Avenue.

The Greenway Commission reviewed the closure of a portion of Summit Avenue at their meeting on October 9, 2008, and concluded there was no visible use for retaining this portion of Summit Avenue.

Regarding the Strategic Operating Plan, this closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties.
- The closing on both sides of Summit Avenue will not affect possible future roadway improvements.

Con:

- In consideration of the location of the unopened right-of-way, staff can find no potential challenges regarding the closure of the alley.

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt a resolution setting a public hearing for November 11, 2008, to close excess right-of-way located on both sides of Summit Avenue.

RESOLUTION BOOK NO. 31 – PAGE 323

C. RESOLUTION NO. 08-201 - RESOLUTION SETTING A PUBLIC HEARING ON OCTOBER 28, 2008, TO CONSIDER THE VOLUNTARY ANNEXATION OF CROWELL APARTMENTS LOCATED ON CROWELL ROAD AND FARM STREET IN WEST ASHEVILLE

Summary: The consideration of a resolution fixing the date of a public hearing on October 28, 2008, for the voluntary annexation of properties located on Crowell Road and Farm Street.

Crowell Apartments, LLC has petitioned the City of Asheville for the annexation of two parcels located at Crowell Road and Farm Street containing a total of approximately 3.53 acres. The area is contiguous to the existing corporate limits and qualifies for annexation by petition as set forth in N. C. Gen. Stat. sec. 160A-31.

The lot contains the Crowell Apartments, comprised of 63 affordable dwelling units. A tax valuation has not yet been placed on this development as it has only recently been completed.

Pursuant to N. C. Gen. Stat. sec. 160A-31, a public hearing must be held prior to adopting any ordinance for voluntary annexation. Should City Council decide to proceed with this request, the effective date for the annexation would be December 31, 2008.

This action complies with the Strategic Operating Plan in that it complies with the Council goal of working to enable voluntary annexation to support healthy growth of the City.

Pros:

- Complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas and meeting the goal of continued use of the urban development tool of annexation in providing for the orderly growth of the City.

Con:

- Marginal increase in service costs.

The fiscal impact is not yet available as the development of the site has only recently been completed. The 2008 assessed value for the land alone is $270,500. Additional fiscal impact information will be provided in the staff report for the public hearing.

City staff recommends City Council adopt a resolution setting the date for a public hearing on October 28, 2008, on the annexation petition.

RESOLUTION BOOK NO. 31 – PAGE 324

D. RESOLUTION NO. 08-202 - AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY DIVISION, DIVISION OF EMERGENCY MANAGEMENT, FOR THE PROCUREMENT OF EQUIPMENT TO BE USED BY THE HAZARDOUS MATERIALS REGIONAL RESPONSE TEAM 6 – ASHEVILLE

ORDINANCE NO. 3658 - BUDGET AMENDMENT FROM THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY DIVISION FOR THE PROCUREMENT OF EQUIPMENT TO BE USED BY THE HAZARDOUS MATERIALS REGIONAL RESPONSE TEAM 6 – ASHEVILLE

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Crime Control and Public Safety, Division of Emergency Management, in order to accept a non-matching grant in the amount of $205,714 for the procurement of equipment to be used by Hazardous Materials Regional Response Team 6 – Asheville, and the associated budget amendment.

The U.S. Department of Homeland Security and the Office of Domestic Preparedness has made funds available through State Homeland Security Grant Number: FY2008-GE-T8-0033 to implement the State Homeland Security Strategy. The strategy identifies the NC Hazardous Materials Regional Response Teams (RRT) as an integral component of North Carolina's preparation and response to manmade and natural emergencies and disasters. The purpose of the grant is to purchase specialized equipment to be used on-scene and to prepare for threatened or actual weapons of mass destruction or domestic terrorists attacks or major disasters

There are seven Regional Response Teams (RRT) strategically located throughout the state. Asheville Fire and Rescue hosts one of the seven state funded teams - RRT 6. The team responds to hazardous materials incidents in the twenty westernmost counties of North Carolina.

Each of the seven RRTs will receive an equal amount of non-matching funding and each will procure comparable equipment. The equipment consists of updated detection and monitoring instruments, personal protective equipment and mitigation materials required to lessen the affects of terrorist's attacks and hazardous materials incidents.

The grant is non-matching and all equipment provided through this grant will become the property of the Asheville City Government.

This action complies with the Strategic Operating Plan by better equipping the Hazardous Materials Team with upgraded equipment; this grant will assist in making Asheville a safer city, based on appropriate metrics for similarly sized cities.

Pros:

- The Department of Crime Control and Public Safety, Division of Emergency Management, will provide $205,714.00 in non-matching funds for the purpose of upgrading Asheville and Western North Carolina's terrorism response capabilities.
- The equipment is state of the art and will better address the risk of terrorist's attacks and hazardous materials incidents.
- All statewide regional response teams will be comparably equipped and interoperability will be realized should an event require the resources of additional teams.

- This equipment is immediately available to Asheville residents and businesses. This level of equipment would most likely not be able to be obtained through the city's general budget process.
- Firefighter and citizen safety will be enhanced.

Con:

- The City of Asheville will be responsible for maintenance and upkeep of the equipment.

There is no fiscal impact associated with this grant, as it is non-matching.

City staff recommends that City Council authorize the City Manager to enter into the agreement and accept the non-matching grant from the NC Department of Crime Control and Public Safety, Division of Emergency Management, to enhance AFR's capabilities to protect Asheville and Western North Carolina, and the associated budget amendment.

RESOLUTION BOOK NO. 31 – PAGE 327
ORDINANCE BOOK NO. 25 – PAGE 49

E. RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE "JUST BECAUSE YOU'RE ASHEVILLE' OUTDOOR SPECIAL EVENT ON OCTOBER 25, 2008

This item was removed from the Consent Agenda for discussion and/or an individual vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Councilman Russell moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

E. RESOLUTION NO. 08-203 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE "JUST BECAUSE YOU'RE ASHEVILLE' OUTDOOR SPECIAL EVENT ON OCTOBER 25, 2008

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the "Just Because You're Asheville" outdoor special event on October 25, 2008.

Dogwood Alliance in conjunction with Mountain Roots Management has requested through the Asheville Parks, Recreation & Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at "Just Because You're Asheville" and allow for consumption at this event.

"Just Because You're Asheville" will be held on Saturday, October 25, 2008, from 4:00 PM – 10:00 PM within the boundaries of the 100 block of Lexington Avenue, as per the event area limits referenced on the accompanying site map.

This action does not tie-in with the Strategic Operating Plan or any of the adopted City plans.

Pro:

- Allows fundraising opportunities for charity

Con:

- Potential for public safety issues

There is no fiscal impact associated with this action.

City staff recommends City Council adopt a resolution authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at "Just Because You're Asheville".

Councilman Mumpower would not support the motion in that he felt there is a remarkable difference in the quality of a festival that allows alcohol vs. a festival with no alcohol.

Councilman Newman moved for the adoption of Resolution No. 08-203. This motion was seconded by Councilman Russell and carried on a 4-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 328

III. PRESENTATIONS & REPORTS:

A. FUEL UPDATE

Mayor Bellamy asked for this update regarding our fuel status.

Assistant City Manager Richardson briefed the Council on the following e-mail to all City employees on Wednesday, October 8, 2008: "Thank you for your commitment over the past days to conserve fuel. Our region has really been challenged with fuel supply for both public consumers and governmental agencies. Your efforts have enabled city government to continue to provide core health and public safety services through this difficult time. Indicators now advise us that most of our community has fuel available again at local stations. Also, our purchasing and fleet divisions have been more successful in securing a fuel supply for our city government operations. Due to these improving conditions, city government is able to return to level 1 of our accelerated fuel conservation plan at this time. This complete plan is available for you on the city's intranet at: http://cityhall-nt/citynet/policies/COA%20Fuel%20Conservation%202008-3.PDF. Please discuss any concerns that you may have about this move with your supervisor or department director."

"It is important that we continue to conserve fuel in every manner possible to offset the budget impact of higher fuel costs. We will remain under the level 1 accelerated fuel conservation measures until further notice. Again, thank you for working together to be able to continue to provide excellent municipal services to our citizens."

He then advised Council that we continue to track fuel availability for our community. As of today, gas merchants are reporting a 96% gas availability across all service stations. Internally, while the City is remaining at Level I in our fuel conservation plan, most all services are operating normal and we will continue our conservation efforts.

Mayor Bellamy asked the community to continue to conserve as well. She noted that the City will be meeting with the Chamber of Commerce to discuss fuel, heating oil, natural gas, etc. in the next 3 weeks after which she will update the community on that discussion.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER PERMANENTLY CLOSING AN UNOPENED PORTION OF SHADY LANE

RESOLUTION NO. 08-204 - RESOLUTION PERMANENTLY CLOSING AN UNOPENED PORTION OF SHADY LANE

Mayor Bellamy opened the public hearing at 5:18 p.m.

Assistant Director of Public Works Richard Grant said that this is the consideration of a resolution to permanently close an unopened portion of Shady Lane. This public hearing was advertised on September 19, 26, October 3 and 10, 2008.

N. C. Gen. Stat. sec. 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, the adjoining property owners have requested the City of Asheville permanently close an unopened portion of Shady Lane.

The Greenway Commission reviewed the requested closure at their meeting on August 14, 2008, and concluded there was no visible use for retaining this unopened parcel of Shady Lane

Regarding the Strategic Operating Plan, this closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties.

Con:

- In consideration of the location of the unopened right-of-way, staff can find no potential challenges regarding the closure of the alley.

There will be no fiscal impact related to this closure.

City staff recommends adoption of the resolution to permanently close an unopened portion of Shady Lane.

An attorney with Roberts-Stevens, representing Skyland First Baptist Church, spoke in support of the closing.

Mayor Bellamy closed the public hearing at 5:20 p.m.

In response to Councilman Russell, Mr. Al Braddock representing Skyland First Baptist Church, explained that right now the space will be left open. He did note that the Church is expanding and suspect that the property may be used for additional parking.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 08-204. This motion was seconded by Councilwoman Jones and carried unanimously.

RESOLUTION BOOK NO. 31 – PAGE 330

B. PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING OF THE PROJECT IDENTIFIED AS ALOFT – MIXED USE DEVELOPMENT, LOCATED AT 51 BILTMORE AVENUE, FROM CENTRAL BUSINESS DISTRICT TO CENTRAL BUSINESS DISTRICT/CONDITIONAL ZONING FOR THE DEVELOPMENT OF A 145 UNIT HOTEL, 83 SEAT RESTAURANT, 2,600 SQUARE FEET OF RETIAL SPACE, AND A PUBLIC PARKING DECK

ORDINANCE NO. 3659 - ORDINANCE TO CONDITIONALLY ZONE THE PROJECT IDENTIFIED AS ALOFT – MIXED USE DEVELOPMENT, LOCATED AT 51 BILTMORE AVENUE, FROM CENTRAL BUSINESS DISTRICT TO CENTRAL BUSINESS DISTRICT/CONDITIONAL ZONING FOR THE DEVELOPMENT OF A 145 UNIT HOTEL, 83 SEAT RESTAURANT, 2,600 SQUARE FEET OF RETIAL SPACE, AND A PUBLIC PARKING DECK

Mayor Bellamy opened the public hearing at 5:21 p.m.

Urban Planner Jessica Bernstein said that this is the consideration of an ordinance to conditionally zone the project identified as Aloft – Mixed Use Development, located at 51 Biltmore Avenue, from Central Business District (CBD) to Central Business District/Conditional Zoning for the development of a 145 unit hotel, 83 seat restaurant, 2,600 square feet of retail space and a public parking deck. This public hearing was advertised on October 3 and 10, 2008.

Ms. Bernstein said that this is a request for review of a proposed Conditional Zoning in the CBD to accommodate the construction of a mixed-use development including a City-operated public parking structure.

The project area consists of 2 parcels with a combined area of 1.11 acres. The site is located at 51 Biltmore Avenue, towards the southern end of the CBD and is bounded by Biltmore Avenue to the east, Aston Street to the north and South Lexington Avenue to the west. Currently this site consists of a surface parking lot and a single-story commercial structure (Hot Dog King).

Structure: The proposal includes the construction of a mixed-use development, including a 145-room hotel; 2,600 square feet of retail space, an 83-seat restaurant and a public parking deck. The hotel and retail uses occupy the frontage along Biltmore Avenue and above a portion of the street level on Aston Street, with pedestrian entrances along Biltmore. The structure is 7-stories along Biltmore Avenue and measures just under 94' to the top of the structure along that street frontage. The upper floors of the structure are stepped-back approximately 10-12' from the property line (which corresponds to the front of the 2nd story balcony) which results in the structure having a less visually-bulky mass from the pedestrian perspective.

Parking: The parking deck is proposed to include 433 spaces on six levels – 85 spaces will be dedicated (leased) to McKibbon Hotel Group and Public Interest Projects on a 24/7 basis and an additional 115 spaces will be dedicated to McKibbon Hotel Group during evenings and weekends. This arrangement leaves between 233 to 348 spaces available for public use, depending on the time of day, resulting in a net gain of between 136 - 251 parking spaces available to the public (97 spaces currently exist on the site). The deck is accessed via three locations: a right-turn in (entry-only) point on Biltmore Avenue, an exit-only point on Aston Street and an ingress/egress on Lexington Avenue. Several garage levels are below grade, accommodating the natural terrain changes to meet Aston and Biltmore at grade (approximately 15' change from Biltmore to Lexington).

These uses occupy approximately 36,628 square feet (0.8 acres) of this 1.1 acre site. The project proposal includes a lot recombination which will result in a separate, undeveloped parcel fronting along Lexington Avenue. The parcel will be approximately 30' deep by

approximately 240' long (+/- 7,200 square feet) and will not be designated as CBD/Conditional Zoning (it will remained zoned straight CBD). There will also be a small area along Biltmore Avenue left undeveloped. There are no current proposals for these locations, although they are under common ownership.

Streetscape: Streetscape improvements are proposed with this project, including street trees and planters along Biltmore and Aston. Sidewalks on Biltmore will be 10' wide; however the sidewalks along Aston are less than the required 10' in width which requires approval by the City Traffic Engineer. Existing sidewalks along Lexington are approximately 5' in width. There is a passenger drop off/loading zone along the Biltmore frontage. No improvements are proposed along Lexington Avenue.

Signage: The signage proposed for this project appears to comply with the City's sign ordinance except for the individual tenant identification signs along Biltmore Avenue. According to Section 7-13-4(c) of the UDO, when more than two tenants share a common entrance, each tenant is allowed a window sign only, not to exceed 25-square feet. The developer has proposed ground floor retail that may result in a restaurant and up to three other tenant spaces, all of which gain access through the same entrance. These spaces are each proposed to have individual attached/awning signage. The restaurant sign would be 20-square feet and the individual retail space signs would each be approximately 6-square feet or approximately 17-square feet for a single-tenant option, with approximately 16-square feet of signage for the WXYZ bar located on the 2nd-level and 25-square feet of signage for the tenant identification sign on the canopy over the common entrance.

Staff is supportive of this modification request, as the individual attached signage is equal to or less than the size limits that these tenants would be allowed, per the ordinance, and is compatible with signage found on other retail spaces along Biltmore.

Development Agreements: According to submitted concept plans, the end result for this project will be four parcels under separate ownership with a number of easements and air right agreements. As submitted, the hotel would occupy a parcel fronting on Biltmore Avenue - owned by McKibbon Hotel Group. A second parcel would be owned by the City and would contain the parking garage and include the area underneath the hotel's Biltmore frontage. The remaining parcels, which would remain vacant for now include the one along the entire Lexington Avenue frontage and the other along Biltmore Avenue (where the Hot Dog King is presently located), both owned by PIP, who would also retain air rights over the garage structure.

The structure of these ownership and access agreements has not yet been finalized. Currently the building code does not allow for structures to cross property lines in the manner proposed; however, this proposal is currently being reviewed with other cases across the state and may result in changes to the building code that would allow such an arrangement. In the event that the necessary code changes do not occur, two parcels may be created (one containing the hotel/parking garage structure and Hot Dog King site and one containing the Lexington Avenue property) with the proposed development being accommodated through a condominium association.

Approval from Council on air rights is also required for an awning over the hotel entrance on Biltmore Avenue and the architectural "swoof" on the roof and the "angle" on the Aston Street façade. These will require a separate approval from the Conditional Zoning proposal.

Impact to the Built Environment: This project involves the demolition of one small, single-story retail structure (the Hot Dog King) and will necessitate temporary sidewalk closures along Aston Street and Biltmore Avenue.

As mentioned, undeveloped portions of the site include the parcel fronting on Lexington and a small area on Biltmore Avenue, just south of the hotel. Until these future phases are

completed, there will be a blank façade on both the Biltmore parcel and the entire Lexington Avenue length. It should also be noted that the Lexington Avenue parcel is only approximately 30' deep and any proposed development would be constructed against the garage façade. Structure design and streetscaping for any project proposed along Lexington would have to work with this shallow lot depth. Further, due to the hotel design, development on this site could not exceed the height of the garage or it would conflict with the hotel's pool deck and five floors of the hotel fronting Aston Street.

Public Benefits: The creation of additional parking capacity in this area of downtown and a commitment to some level of sustainable design are the primary public benefits offered for this project.

Regarding sustainable design, although not committing to achieving LEED-certification with this development proposal, the McKibbon Hotel Group has provided information regarding their planned measures toward sustainable development. This includes a list of 29 proposed "green" building features that the developers indicate they will attempt during the design/construction phase of the hotel project. Many of these items are directly from the LEED project checklist.

McKibbon has also submitted their intent to follow an "Environmental Policy," which focuses on running hotels dedicated to energy reduction, water conservation, air quality improvement, recycling and education. Additionally, information has been provided regarding the *Florida Green Lodging Program,* which although not applicable in North Carolina, is regularly implemented by the McKibbon Hotel Group and is dedicated to sustainable day-to-day operations in the hotel industry.

The modifications supported by the Downtown Commission would allow a stretch of solid wall greater than 20 feet in length along Aston Street. Commissioners felt this modification was acceptable due to the challenges of incorporating the garage structure and the change in grade as Aston falls away from Biltmore Avenue. To mitigate the stretch of blank wall along Aston Street, the developer has indicated an intent to install a public art piece and will work with the City's Public Art Board in the future to implement the art after construction of the garage is complete.

Required Reviews

Downtown Commission Review: The project was reviewed and approved (4-0 with 4 members present) by the Downtown Commission on September 12, 2008. After several informal design review meetings, the applicant modified aspects of the design to accommodate recommendations by the Commissioners and to better meet the Downtown Design Review Guidelines. Future phases of this development will be required to return for separate design review.

Members of the Commission commented on aspects of the project, including:

- praise for the incorporation of design changes that result in increased activation along Biltmore,
- concern regarding the blank facades along Biltmore and Lexington prior to future phase completion and how to deter graffiti on the site,
- concern regarding traffic congestion along Biltmore and that sufficient Wayfinding measures can be incorporated to direct motorists approaching from the south to the Aston Street entry.

Commissioners added two conditions to their vote recommending approval of this project:

- that the applicant consider applying construction mitigation measures (similar to those recommended for the Haywood Park mixed-use project, including Wayfinding and directional signage), and
- if Phase 2/3 has not started within 1-year of completion of the hotel and garage structure, a mitigation plan should be established for the blank façades along Lexington and Biltmore Avenues.

At the Downtown Commission meeting, a member of the community provided written concerns which included the potential traffic impact of additional cars on Biltmore Avenue due to the public parking deck.

Technical Review Committee (TRC) Review: This project was approved with technical conditions by the TRC on September 15, 2008. There were no citizen comments received regarding this project at the meeting.

Planning & Zoning Commission: The project was considered by the Planning & Zoning Commission on October 1, 2008. The request was approved by a vote of 5-0. There was one member of the public present (a resident of a confronting structure) who expressed positive comment regarding the proposal and design. The Commission modified language for the additional condition (#7) included in this report, agreeing with the Downtown Commission's suggesting of requiring a mitigation plan for the blank façades along Lexington and Biltmore Avenues prior to construction of "future phases."

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The project will meet State building code requirements and will be reviewed in detail by The TRC to ensure compliance with safety requirements.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   There are no significant natural or topographic features on the site that will pose a major issue with this development. The project has been designed to accommodate the existing (+/-15') grade change from Biltmore Avenue to Lexington Street with parking deck levels entering and exiting at the street level and ramps up within the structure.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   When the project is complete, there should not be a negative impact to adjoining or abutting property. The uses proposed should complement existing businesses and augment the needs of both residents and visitors. The parking garage with its public parking is expected to add value to the surrounding area by supporting nearby businesses and will be a benefit to downtown visitors during the daytime and after hours while promoting a safe 24-hour downtown area.

   Concern has been expressed that the blank façades along Lexington and Biltmore Avenues until the completion of future phases could have a negative visual impact on these streetscapes and the properties across from them. The Downtown Commission and P&Z Commission added a condition to their approval that if Phase 2/3 has not

started within 1-year of completion of the hotel and garage structure, a mitigation plan should be established for the blank façades along Lexington and Biltmore Avenues.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
The project is proposed at a height and scale similar to other buildings in this part of the historic core of the downtown and substantially below the 305' height of the Ellington project approved in 2007. The retail uses along Biltmore will complement the active pedestrian experience along this corridor. Also, the upper floors (3-7) have been designed to step-back 10-12' from property line after the 2nd story balcony, which reduces the perceived mass of the structure from the pedestrian level.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
Smart Growth principles adopted in the 2025 Plan encourage mixed-use infill developments. Retail, restaurant and hotel uses align with economic development priorities, supporting the lives of local residents as well as the tourism industry, helping the downtown become and remain a "destination". The building has been designed in such a way that the streetscape maintains an appropriate pedestrian scale and encourages pedestrian activity, by including active retail openings along Biltmore Avenue and a balcony at the second story).

This site is identified in the Center City Plan as a potential future catalytic development area – a site that has the potential to stimulate additional investment or provide Downtown with missing uses that are critical to maximizing economic vitality. The plan indicates that a proposal such as this should be "managed to achieve maximum public benefit" which is why staff feels the future phases will be critical.

Parking in the Downtown is often identified as a persistent problem and this project does include 433 structured spaces – a net gain of between 136 - 251 parking spaces available for public use (the project site was identified as in a zone with a parking deficit, per the Comprehensive Parking Study, 2008). The Center City Plan identifies parking structures as a key solution to the parking deficit and encourages wrapping the structure with retail or other active uses at the street level. The proposal to include a city parking garage is a public/private partnership, which is noted in the Plan as essential for maximizing the success of economic development efforts.

One area of possible discord with the plans is that both stress the need for a variety of housing options in the Downtown. The applicant has indicated that they may include housing (workforce) in a future phase, but the current proposal does not include any residential component nor is there any surety of what will be submitted in the future.

City Council adopted the following four strategic goals: sustainable, affordable, green and safe; this development proposal supports the strategic goal of sustainability and reflects other vision plans by providing infill growth where infrastructure currently exists and encourages economic development in the downtown.

On April 24, 2007, the City Council passed a resolution that all City-owned buildings will be LEED certified at the Gold level. There are noted difficulties with obtaining LEED certification of a parking structure, which is further complicated by the multiple entities involved in ownership of this proposal, however, as a development project that the City is involved in directly, there should be a clear dedication to sustainable design practices. The applicant has expressed the intent to incorporate LEED-eligible design elements and has provided additional information regarding their environmental policy.

Increasing the amount of housing in the downtown (especially at affordable or workforce rates) is a major component of the sustainable and affordable goals. At this time, the project does not provide any affordable residential component.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   The project is located in the CBD in an area easily accessed for transportation, life and safety facilities and utility infrastructure.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   The proposed project is anticipated to generate 241 vehicles per hour (194 vph ingress and 47 vph egress) during the morning peak hour and 246 vehicles per hour (74 vph ingress and 172 vph egress) during the afternoon peak hour at full build-out conditions (two years). In addition, the proposed project could generate 1,200 vehicles per day during a typical weekday. Existing weekday traffic volumes along Biltmore Avenue are about 12,000 vehicles per day. The proposed traffic that could be generated by the Ellington Hotel, a project that was approved earlier in the year, was included in the subject traffic study.

   Based on these anticipated peak hour traffic volumes, a traffic impact study was required. The scope of work included six intersections (five signalized intersections and one unsignalized intersection) in the immediate area of the project site and the annual traffic growth rate was 4%. Three access points, one along Biltmore Avenue, one along Aston Street, and one along South Lexington Avenue will serve the proposed project. Several scenarios regarding the operation of the access points were analyzed in the traffic impact study and all of them produce satisfactory results. The recommended scenario that should ensure safe, efficient operation and traffic flow includes a right-in only ingress access point along Biltmore Avenue, an egress only access point along Aston Street, and a full-movements ingress and egress access point along South Lexington Avenue.

   The traffic impact study has demonstrated that it is reasonable to conclude that the proposed development should not have an adverse impact on the surrounding street network provided the following mitigation measures are made, which the developer has agreed to in writing:

   1. *Intersection of Biltmore Avenue and Patton Avenue/Pack Square – Re-optimize the traffic signal timing/intersection splits and follow through with planned geometric changes to the eastbound approach. Estimated Cost = $7,000.*
   2. *Intersection of Biltmore Avenue and Hilliard Avenue – Revise the eastbound approach to provide a shared left-turn and through lane and an exclusive right-turn lane. Estimated Cost = $3,000.*
   3. *Intersection of Biltmore Avenue and Proposed Access Point – Prohibit ingress left turns. Estimated Cost = $100.*
   4. *Construct all three access points to enable future changes to their traffic operation if needed.*

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- Garage component supplies needed public parking spaces in a zone identified as deficient – a net gain of between 136 - 251 public spaces

- Building design follows urban design principles (retail activation at the street level, 2nd story balcony further creates activity and pedestrian level interest, building steps back 10-12' after the 2nd story which reduces massing when viewed from the street)
- Proposed "green" features in the design and construction of the project as well as the daily operations of the hotel show a strong commitment to environmentally-sustainable development.

Cons:

- Does not include any residential units, with no firm commitment to residential in future phases.
- No commitment to achieve LEED certification.
- Project design results in blank undeveloped façades along Biltmore and Lexington Avenues until future phases are completed, and may be a target for graffiti.

Staff recommends approval of the project and the sign modifications, subject to the conditions recommended by City staff and the Planning & Zoning Commission.

Mr. W. Louis Bissette Jr., representing the McKibbon Hotel Group (one of the partners in the project), said the project is a little unusual as it is a public/private partnership with the City, the McKibbon Hotel Group and Public Interest Projects. He said the project does meet a number of the downtown needs, including 433 structured parking spaces. He said that this project is in harmony and scale with the surrounding neighborhood, and he hoped the Commission will act favorably on their request.

Mr. Wes Townson, representing McKibbon Hotel Group, said this is collaboration in the finest sense of the word and was excited to be a partner in this effort.

Ms. Cathy Ball, the City's Director of Transportation and Engineering, explained the City's need for parking in that area, as shown by a Parking Study and a Downtown Parking Action Plan. With the opportunity to look at working with the private development sector and being able to work with the property owner, the challenge was going to put that parking in, make it look good on the site, and have a multi-use development structure. She stressed that the City's involvement in this project is the public parking component.

Mr. Pat Whalen, representing Public Interest Projects, explained how the lot on the Lexington Avenue side is only conceptual at this point, but it is their intention that it be affordable housing. He was proud of their involvement in this public/private partnership.

Mr. Jesse Plaster, representative of the Downtown Commission, said that the developer made changes to the project to address the Commissioner's concerns. The result is a better project and this is a good example of the design review process. The project did receive full support of the Downtown Commission and he urged Council to approve this good public/private partnership. He reiterated the two additional conditions the Downtown Commission requested (and staff has included in their recommendation), being (1) that the applicant consider applying construction mitigation measures (similar to those recommended for the Haywood Park mixed-use project, including Wayfinding and directional signage); and (2) if Phase 2/3 has not started within 1-year of completion of the hotel and garage structure, a mitigation plan should be established for the blank façades along Lexington and Biltmore Avenues.

Ms. Betsy Rose Weiss, owner of American Folk Art and Framing on Biltmore Avenue across the street from this project, was concerned about (1) inability to turn left onto Aston Street; and (2) diluting Asheville's uniqueness with the possible addition of corporate chain entities.

At 5:38 p.m., Mayor Bellamy closed the public hearing.

City Attorney Oast said that on October 28, 2008, City Council will be reviewing the downtown development agreement, and other documents, that will set up the City's and the other private partner's participation. He said that Council's vote on this item will not bind Council with respect to their vote on the other items.

In response to Councilman Russell, Ms. Ball said that Aston Street will be two-way.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Based on information provided in the staff report and as stated in the staff recommendation, Councilman Russell moved to approve the project identified as Aloft – Mixed Use Development, located at 51 Biltmore Avenue, from Central Business District (CBD) to Central Business District/Conditional Zoning for the development of a 145 unit hotel, 83 seat restaurant, 2,600 square feet of retail space and a public parking deck and the sign modifications, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by the TRC prior to issuance of any required permits; (6) During construction, all sidewalks around the project area will be kept open (safely covered) if possible and when not possible, a diverted pedestrian route will be clearly defined; (7) If future development on Lexington and Biltmore Avenue frontages is not in progress (meaning an application submitted to the Planning Department) within one-year of the completion of the hotel and garage structure (meaning a Certificate of Occupancy has been granted), the City shall take appropriate action in conjunction with the developer (Public Interest Projects) to cover, screen or decorate the wall in a manner approved by the Downtown Commission; (8) The traffic mitigation improvements have been identified and agreed upon; (9) A traffic mitigation/staging plan should be submitted and reviewed by appropriate City staff prior to the issuance of any permits; and (10) Future development on the Lexington Avenue parcel and the area south of the hotel along Biltmore Avenue will not be required to return to City Council for review as an amendment of this Conditional Zoning permit. This motion was seconded by Councilman Newman.

In response to Councilman Mumpower, Mr. Townson was concerned about the economy, but they are very much committed to the project. They have been located in Asheville for over 10 years and intend to proceed with preparation of construction documents with the hope that after the first of the year the financial markets will certainly be more clear and everything will go as planned. The financing and timetable will be discussed with the documents on October 28.

Councilman Mumpower was concerned about locking the City into anything that has the potential of putting the citizens of Asheville at risk. City Attorney Oast responded that in the downtown development agreement there are a number of contingencies - one of those is that we are able to obtain financing. There will be a period of time between when we approve that agreement and when we would be committed beyond the ability to get back out of it. The same thing is true of the developer. We are hopeful that within that time the financial picture will clear up enough that we can provide you more assurance than we can today.

When Councilman Mumpower asked if there was a performance bond component, Mr. Townson said no. He did say that there would be bonding required for the general contractor who they anticipate will be doing the entire project.

Councilman Mumpower felt this is a major investment and was concerned about moving forward in our current economy. However, as the issue before Council now is a land use issue, he will base his vote on that issue alone. But, he noted that unless the fog clears dramatically with regard to the economy, he would not be able to support moving forward with this project.

In response to Councilwoman Jones, Ms. Ball explained how they will utilize the property along Lexington Avenue for staging, however, that doesn't mean that sections of the street won't need to be closed off periodically. She also noted that when the infrastructure and sidewalk work commences along Biltmore Avenue and Aston Street, that work will be coordinated with the work on The Ellington project.

In response to Councilwoman Jones and Councilman Newman, Mr. Whalen spoke to Council about the plans for the affordable housing component on Lexington Avenue in Phase 2 of the project. They are uncertain at this time whether the units will be rental or for sale, but they do intend for them to be workforce housing prices. The project is not very complicated and it will give them a chance to test protocol types of new workforce lofts in downtown.

Mr. Whalen responded to Councilwoman Jones' hopes that whatever unfolds on the retail floors that they keep in mind the independent entrepreneurial flavor that we currently have in the downtown area.

Vice-Mayor Davis agreed that our economy is weak. If for some reason the Phase 2 doesn't occur within a year, he would not be in favor of any parking garage today that wouldn't involve a wrap on the Lexington Avenue side. Mr. Whalen said that PIP and the City have agreed to each bear half the cost of softening the wall with something that has some architectural or artistic character if for some reason the affordable housing units are not built right away. However, they didn't want to spend a lot of time on that because they plan on building the affordable housing.

Councilwoman Mumpower advised the developer of the following issues he would like addressed at the October 28 meeting when the downtown development agreement is discussed: (1) performance bond; and (2) timeline on project regarding the economy and financing. Regarding chain stores, since that is not a criteria in our ordinances, he didn't think it was appropriate to put subjective pressures on developers by telling them who they should lease their private property space to..

In response to Councilman Mumpower, City Attorney Oast said that the conditional zoning approval is valid for two years from the date it is adopted by Council. That two year timeframe is not for the developer to complete the project, but it is for making substantial progress on the project.

In response to Mayor Bellamy, Assistant Director of Traffic and Engineering Ken Putnam explained the entrances and exits and how they will be built if in the future a change in the access needs to occur.

When Mayor Bellamy asked about the apparatus in the parking deck, Mr. Putnam said the same type system will be used as our other parking decks to make sure the traffic flows smoothly.

In response to Mayor Bellamy, Mr. Putnam said that adding the signage to this parking garage into the Wayfinding Program is already a condition, subject to Council's approval the project.

When Mayor Bellamy asked about site lines on Aston Street, Mr. Putnam explained that site lines are addressed in the Traffic Impact Study and all site lines, even for pedestrians, are to be accounted for.

Mayor Bellamy felt that as the project begins to be built from the ground up, screening the area, similar to the Bohemian project in Biltmore Village, would be a benefit to the community from a safety and appearance reasons. When she asked for a friendly amendment to the motion for screening, Councilman Russell did not accept the amendment as he felt that (1) it is a public safety issue to be addressed by the general contractor to protect the public; and (2) there may be better technology out there when the project begins. City Attorney Oast did note that this project will go back to the TRC once the design is in place and those are the kinds of details that are covered.

Mayor Bellamy suggested the developer contact Ms. Cindy Weeks with Mountain Housing Opportunities (MHO) for creative ideas MHO has done regarding financing with affordable housing and mixed-income developments.

The motion made by Councilman Russell and seconded by Councilman Russell carried unanimously.

Councilwoman Jones felt it might be beneficial for Council to receive information the financial benefits of doing development downtown, with particular emphasis on local employment. Council can then weigh that information against the debt that would be incurred.

Mayor Bellamy also felt it would be important for Council to have information on how much we have saved for this parking deck, what we anticipate the debt service on the parking deck will be, etc.

Councilman Mumpower advised Council that he will be asking questions, if it is appropriate within the confines of our ordinances, about whether their protocol is for hiring legal citizens as well.

ORDINANCE BOOK NO. 25 - PAGE 51

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. RESOLUTION NO. 08-205 - RESOLUTION OF APPRECIATION TO THE N.C. DEPT. OF TRANSPORTATION AND THE FEDERAL HIGHWAY ADMINISTRATION FOR SUPPORT IN THE EVALUATION OF ALTERNATE 4B OF THE I-26 CONNECTOR PROJECT

Mayor Bellamy has asked that City staff prepare the following resolution: "Whereas, the North Carolina Department of Transportation and the Federal Highway Administration are developing a highway improvement project known as the I-26 Connector; and Whereas, in response to considerable public desire for constructive input into the design of this critical highway project, the City of Asheville and the Asheville Metropolitan Planning Organization requested additional opportunities for this input to occur while simultaneously maintaining the construction schedule for the I-26 Connector project; and Whereas, , during the summer of 2000, the Community Coordinating Committee, in cooperation with the North Carolina Department of Transportation and the Federal Highway Administration, held two extensive public meetings-the Education Forum and the Design Forum-to educate and involve the public regarding the necessity and the design of the I-26 Connector project; and Whereas, the Asheville Design Center identified an alternative alignment for the I-26 Connector know as Alternate 4B, which reduces the amount of right-of-way required to complete the project and separates interstate and local vehicular traffic; and, Whereas, the City of Asheville and Buncombe County funded an additional engineering study by Figg Bridge Engineering to further evaluate Alternate 4B for the purposes of consideration as the preferred alignment for the I-26 Connector; and, Whereas, the

North Carolina Department of Transportation and Federal Highway Administration had accepted Alignment 4B as one of four alternate designs for the I-26 Connector; and, Whereas, the North Carolina Department of Transportation and Federal Highway Administration held a public hearing for said project on September 16, 2008; and, Whereas, City Council wishes to provide official public comment on the Draft Environmental Impact Statement for the I-26 Connector Project. Now, therefore, be it resolved by the City Council of the City of Asheville that the North Carolina Department of Transportation and the Federal Highway Administration are hereby commended for their cooperative spirit and willingness in consideration of Alternate 4B of the I-26 Connector Project, particularly in their efforts to visually communicate the various alternates during the September 16, 2008, Public Hearing. Be it further resolved that Council supports expediting the design and construction of the I-26 Connector project. Be it finally resolved that based on review of the four alternates for the I-26 Connector Project that City Council supports selection of Alternate 4B in that it meets many of the community's strategic goals by reducing the amount of right-of-way required for the construction of the project and separates local and interstate vehicular traffic." She felt this action is important in that the City did get Alternate 4B looked at by the N.C. Dept. of Transportation (NCDOT). The engineering part was a joint effort paid by the City and County in order to get Alternate 4B to a level which the NCDOT could take it over, which they did. She did note that City Council and the community were informed that the process would not slow down what the NCDOT was doing. This did not negatively impact the timing of the project. She felt it was important to acknowledge the time and involvement by the community in Alternative 4B.

Director of Transportation and Engineering Cathy Ball reiterated the amount of cooperation they received from the NCDOT and the Federal Highway Administration in being able to move into a process that was unchartered for the work that they do. To be able to have the County and the City come together and bring in a consultant that could review a community proposal and be able to understand that that could become a viable alternative. Also, we were very pleased with the staff level interaction and willingness to share data and a true willingness on the state's part to be able to find solutions to the problems that we came up with through this alternate. We have also been able to put the information shared at the public hearing on the City's government channel. The effort that NCDOT and the Federal Highway Administration put into making visuals so that people could understand them is outstanding. We propose, as an input way into the environmental impact assessment, that Council, from the community perspective, would support Alternate 4B which meets a lot of the community's goals, separating state and local traffic, reducing the amount of right-of-way that is required for the project, reducing the amount of surface from pervious to impervious, as well as having overwhelming community support.

In response to Councilman Newman on whether the NCDOT has recognized that Alternate 4B is an official alternative within the context of the Environmental Impact Statement (ESI) process, Ms. Ball said that a draft EIS has been released and there has been an amendment to that draft. She thinks that the state has reserved the right, through the process, to say that if for some reason this alternate falls out before they re-issue in paper that final EIS then it would not be included. She thinks it's more of a technicality. She does hear them say it is a viable alternative.

Councilman Newman hoped that Alternate 4B is the preferable alternative for the project as it seems to have a lot of common ground and the most advantages for the community.

In response to Councilman Mumpower, Ms. Ball said the Connector project has 4 alternates, two of which do not separate the local and interstate traffic and two which do. Alternate Numbers 2 and 3, which do not separate local and state traffic, are in the neighborhood of $221-261 Million. Alternates 4 and 4B range from $368-425 Million. These estimates were completed using standard NCDOT methods and measures that they would use to install things. We would hope to work with them to provide engineering and looking at different types of bridge structures to be able to try to reduce that. These numbers do include right-of-way. We are

having discussions to see the value of that right-of-way and get further clarification on that number. These costs do not include bridge costs nor do they include some new types of bridge designs that actually cost less to build.

Councilman Mumpower felt that Alternate 4B is the nicest alternative but it would roughly double the cost of the next lowest alternative. He felt that Asheville politicians have delayed this project to death and was concerned that we are considering this resolution in the face of what is happening with our economy. He felt we have borrowed ourselves nationally in a terrific hole and didn't think the federal government would be in any position to proceed with this kind of activity in the foreseeable future. He would have to speak against the motion in that he did not feel it was appropriate to endorse a project that costs twice as much as what will work.

Councilman Newman briefed the Council on the original concept back in the1980's when the plan was to have an interstate loop around Asheville, but due to the high costs of building roads through our mountainous terrain and the high environmental impact, the community decided to bring the project through the heart of our City. The NCDOT supported that largely for financial reasons. If Asheville would have insisted on the same type of loop project that other cities had done, the price tag would have been 2-3 times what the most expensive way of building it through the City would be. In light of our community is saving the state taxpayers a lot of money by accepting that this project be built in the very heart of our City, it is fair for our community to say we want a really good project.

Mayor Bellamy noted that the process, outlined in the resolution, did not delay the process for this project, as specifically stated by the convener of a prior meeting that was open to elected officials.

Councilman Newman moved for the adoption of Resolution No. 08-205. This motion was seconded by Councilwoman Jones and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 331

B. ADOPTION OF THE CITY COUNCIL CANDIDATE TIMELINE

Vice-Mayor Davis, Chair of the Boards & Commissions Committee, said that there has been discussion in the past about how to fill a vacated Council seat during the middle of a term. The Boards & Commissions Committee initiated the process of the following timeline. If such process proves to run smoothly, it was the consensus of the Committee to include this process in the City Council's Rules and Regulations. He noted that this accelerated timeline is necessary as City Council's Retreat will be held on January 9-10, 2009, and it was imperative that the new Council member(s) be oriented and be a part of the retreat. The process is below:

Monday, 10-13	-	Clerk to send out e-mail to all Council asking for two questions each for Council candidate. Questions must be received by Thursday, October 16 at 5 pm
Thursday, 10-16	-	Deadline for Clerk to receive Council questions (2 each)
Friday, 10-17	-	Clerk to send to City Council Boards & Commissions Committee all 14 questions
Tuesday, 10-21	-	Boards & Commissions Committee to narrow down 14 questions to 5
Wednesday, 11-5	-	Receipt of Notice of Resignation

Wednesday, 11-5	-	Begin advertising for City Council vacancy
Wednesday, 11-5	-	Any interested person will be given an application form, with a request for a resume to be attached, along with the 5 essay questions - ½ page response each. Deadline for all applications is Wednesday, November 26 at Noon
Wednesday, 11-26	-	Deadline for applications - Noon
Wednesday, 11-26	-	Clerk to verify all candidates of (1) City of Asheville residency; and (2) that they are registered to vote in Buncombe County
Wednesday 11-26	-	Clerk to send to City Council all eligible candidates applications, along with resume and completed essay questions. In addition, a letter will sent to all candidates notifying them that if they are chosen the City Council orientation will be held one day during the week of December 15
Tuesday, 12-2 FORMAL MTG	-	City Council determine (1) how many to interview; (2) who to interview; (3) length of interviews; (4) date of interviews – December 9 before formal meeting; and (5) time interviews are to begin
Wednesday, 12-3	-	Clerk to contact candidates to arrange Interviews on December 9
Tuesday, 12- 9 FORMAL MTG	-	Interviews in Council Chamber – Interviews to be held prior to meeting **AND** listing on the formal 12-9 agenda – Appointment of new Council member
Friday, 12-12	-	New Council member sworn in with brief reception
One day during week of 12-15	-	New Council member orientation

If Council chooses to adopt the timeline, it will be necessary to amend the 2008 City Council Meeting schedule to include December 2 as a formal meeting; and December 12 as a special meeting to swear in the new Council member(s).

There as a brief discussion about the application deadline.

In response to Mayor Bellamy, City Clerk Burleson said that all applications, resumes and responses to the essay questions will be available for public inspection on Wednesday, November 26, as part of the City Council meeting agenda.

In response to Councilman Newman, City Attorney Oast said that the last meeting of the Council member resigning depends on when they make their resignation effective, which is normally the last day before they get sworn in to another office. They cannot serve on City Council once elected to the other office, whether they submit a letter or resignation or not. He said that the Council member(s) can remain on Council until they are sworn in to the other office – Buncombe County Commissioners take office on December 1, 2008; and the U.S. House of Representatives take office on January 20, 2009.

In response to Mayor Bellamy, City Attorney Oast said that a Council member who is elected to another office cannot vote on their replacement because the vacancy on Council does not exist until that Council member's resignation is effective. Their leaving Council is what creates the vacancy.

It was the expectation of Council that any Council member elected to another office would plan to participate in their City Council capacity only through November 30, 2008.

In response to Councilman Newman, City Attorney Oast said that the City's Charter reads "The mayor and members of the council, and all other officers, elected under the provisions of this Charter, shall at the time of their election be qualified electors of the City of Asheville." It was his opinion that that means the applicant must be 18 years of age and be registered to vote.

Councilman Mumpower, who is campaigning for the U.S. House of Representatives seat, assured Council that if he is elected, it will be his desire to work with the Council in whatever way he can to set up a good future for this Council and cooperate in any way possible. He thanked Vice-Mayor Davis for creating a healthy, fair process for filling vacant Council seats.

Councilwoman Jones confirmed that all Council members (including those running for other offices) can participate in the process by submitting two essay questions.

Councilman Mumpower moved to adopt the City Council Candidate Timeline as outlined above. This motion was seconded by Councilwoman Jones and carried unanimously.

C. CITY COUNCIL MEETING SCHEDULE FOR DECEMBER, 2008

Due to potential vacancies on City Council, Councilman Mumpower moved to instruct City Clerk Burleson to place an item on an upcoming agenda to amend the 2008 City Council meeting schedule for (1) December 2, 2008, be a formal meeting; and (2) December 12, 2008, be a special meeting. This motion was seconded by Councilwoman Jones and carried unanimously.

Mayor Bellamy noted that at the special meeting on Friday, December 12, 2008, not only will the new Council member(s) be sworn in but that the former Council member(s) who were elected to another office will be recognized as well.

Regarding the December 16, 2008, worksession, it was the consensus of Council to cancel that worksession; however, if there is a need for action prior to the end of the calendar year, he hoped that the Council members would be amenable to keeping that date available.

VII. OTHER BUSINESS:

N.C. League of Municipalities Board of Directors

Mayor Bellamy was pleased to announce that today she was elected to the Board of Directors to the N.C. League of Municipalities (League) to represent the City of Asheville. She explained the League is a nonpartisan, voluntary association of cities, towns and villages with 542 member municipalities as of July 1, 2008. It is a 27-member Board of Directors, elected by the membership, which oversees all League activities, which include direct services to municipal officials of member cities and towns and advocacy at the state and federal levels on behalf of cities and towns. Municipal officials representing member cities and towns develop and adopt the advocacy agenda that determines municipal legislative goals. The membership also adopts the core principles that determine and guide the organization's advocacy efforts. The area she represents will not only include Asheville, but municipalities in the following counties: Mitchell, Yancey, Buncombe, Madison, Henderson, Haywood, Jackson, Transylvania, Macon, Swain, Graham, Cherokee and Cherokee counties.

Mayor Bellamy then briefly reported to Council items of interest from the League's annual meeting, with special interest on the state's budget as it relates to transportation, in particular the taking of cities Powell Bill funds. Other pressing issues addressed were state highways, gang violence, and sustainability, all of which conversations will continue.

Award by N.C. League of Municipalities – Green Challenge

Mayor Bellamy was also pleased to announce that the City of Asheville was awarded the Level One of the N.C. League of Municipalities Green Challenge, which acknowledged the City's commitment to efficient, energy saving operations and practices. She thanked the City's Energy Coordinator Maggie Ullman for her work on the application.

Claims

The following claims were received by the City of Asheville during the period of September 13 – October 2, 2008: William Marquissee (Police), AT&T (Water), AT&T (Water), Charter Communication (Water), Dallas Norris (Water), Dawn Banks (Sanitation), David Love (Streets), Donnie Isley (Fire) and Gerald Echols (Transit).

These claims have been referred to Asheville Claims Corporation for investigation.

Lawsuit

The City was served with the following Complaint on September 18, 2008: Carroll Anderson and Ruby Anderson vs. Allstate Insurance Company and the City of Asheville. The nature of the proceeding is a complaint for property damage resulting from a waterline break. This matter will be handled by an attorney outside of the City Attorney's Office.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Jeffrey L. Meadows Sr. spoke to Council about Darwin-ism. Assistant City Manager Richardson said that he would be happy to meet with Mr. Meadows.

Rev. Christopher Chiaronmonte spoke to Council about his prophecy regarding the direction of the nation.

Closed Session

At 7:05 p.m., Councilwoman Jones moved to go into closed session for the following reason: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: State of North Carolina, City of Asheville, County of Buncombe, Asheville Regional Airport Authority; Asheville Jet Inc., d/b/a Million Air - The statutory authorization is contained in G.S. 143-318.11(a) (6); and to prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes that information privileged and confidential is N. C. Gen. Stat. sec. 143-318.10 (e). The statutory authorization is contained in G.S. 143-318.11 (a) (1). This motion was seconded by Councilman Newman.

Councilman Mumpower said that Council has made a commitment in the past to not conduct water agreement negotiations in closed session. He felt that Council's deliberations regarding negotiations should be discussed in the open forum. He would speak against the motion.

In response to Councilman Russell, Mayor Bellamy said that Council will be discussing the Sullivan Act lawsuit.

The motion made by Councilwoman Jones and seconded by Councilman Newman carried on a 4-2 vote, with Councilman Mumpower and Councilman Russell voting "no."

At 8:11 p.m., Councilman Newman moved to come out of closed session. This motion was seconded by Vice-Mayor Davis and carried unanimously.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:11 p.m.

Magdalen Burnson
CITY CLERK

Jerry M Bellamy
MAYOR

Tuesday – October 21, 2008 - 3:00 p.m.

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Robin L. Cape

FUEL UPDATE

Assistant City Manager Jeff Richardson updated City Council on the fuel status. He said that our gas stations are almost to full capacity and internally, we are continuing the exercise Level I conservation efforts. At Mayor Bellamy's request, City Manager Jackson said that we would provide information on our website regarding the ridership numbers on our buses for the different routes.

HEALTH OF DOWNTOWN PRESENTATION

Vice-Mayor Davis, member of the Asheville Downtown Commission (ADC) suggested that Mr. Kelly Miller, Executive Director of the Buncombe County Tourism Development Authority (BCTDA), address Council with the following points from a tourism perspective on issues that are currently affecting or could affect our vital tourism industry.

Mr. Miller said that some of these items made their way to them via phone calls, e-mails, and letters from visitors, residents, and Chamber members, representing consistent themes. Others, such as a master lighting plan similar to Quebec City, are suggestions by Chamber staff that would enhance the Central Business District experience for both residents and visitors.

He presented the following points, which were also presented to the Asheville Downtown Commission:

1. Overall cleanliness: Graffiti, filth, litter, and weeds growing from sidewalks and vacant lots are getting worse. Vacant store fronts remain untidy long after tenants have relocated or closed.
2. Panhandling: This seems to be increasing and is more aggressive, which translates into the perception that downtown is becoming increasingly unsafe.
3. Towing: We have got to collectively get our arms around the towing situation. The installation of the BCTDA funded wayfinding project will help direct traffic to public lots, so this should offer some relief. Still, we receive a fair number of letters from both extremely upset visitors and residents whose autos have been towed. The Chamber is ready to roll up its collective sleeves with other groups to come up with deployable solutions and welcome your input.
4. New construction and visitation coordination: An integrated staging plan that considers visitation patterns (both residents and tourists) with new downtown construction and/or infrastructure improvements could greatly mitigate the impact of these improvements. Encouraging dialog on the front end with all affected parties before work begins or is approved could pay huge economic dividends.
5. Lighting: Asheville needs a lighting master plan like Quebec City. There are streets, nooks and alleys in the Central Business District (CBD) that are fairly dim. Visitors and residents feel safer with better lighting. This might be a great way to save energy if newer technology is considered, as well.
6. Retain longer store hours: More consistent and longer retail hours in downtown

have been suggested by visitors to downtown.

7. Downtown tenant mix: Visitors continue to offer positive comments about downtown's authentic tenant mix. Preserving unique downtown shopping and dining experiences aligns with Asheville's brand promise of enrichment. Greenville, South Carolina, targets key businesses that could improve the downtown experience and recruits them into its urban fabric. Is this something the Asheville Downtown Association might want to pursue?
8. Customer service: It's all of our jobs to make sure that we are informed brand ambassadors, going the extra mile to ensure our guests (and residents) feel welcomed, not just in downtown Asheville, but in Buncombe County and western North Carolina. The Asheville Conventions Visitors Bureau (CVB) has an online program designed to achieve this goal and it is being rolled out to area businesses.

He said that downtown Asheville, as a stand-alone destination brand, is at a very critical crossroad. A vibrant, clean, safe, graffiti-free downtown offers enormous strategic advantages for business recruitment, positive visitor experiences, and improved quality of life for residents. It is reassuring to know that you and City staff are working on several of these issues as we speak and for that, we thank you. We welcome the opportunity to assist where we can to develop sustainable solutions that deliver Asheville's brand promise for years to come.

Vice-Mayor Davis said that the City has put resources in to address some of these issues but there are other tasks ahead. He noted there is a tremendous amount of litter, weeds, panhandling and prostitution in our west gateway area into the City. He was concerned about the bad impression being given for people entering the City from this area. He suggested the placement of more trash receptacles along that western gateway area would at least be a start.

Councilwoman Jones was sympathetic to the concerns and recognized how tourism is a part of our economy; however, this is a huge financial impact on the City. She suggested perhaps we could find a cost-sharing formula with the TDA to address some of these concerns.

Mr. Miller said that on any given day there is only about 6-7% of visitors on our streets. He agreed that this isn't so much of a visitor problem but a community problem. He would be willing to work staff and a variety of stakeholders to see how we can address these problems without going to just industry and asking to cost-share.

Mr. Vic Howard, President and CEO of Western Carolina Rescue Ministries (WCRM), dispelled some myths about the homeless and briefed the Council on some statistics from their shelters. He said that some of the clients from the WCRM have worked with Councilman Mumpower on his very successful Top A Stop program. In addition, they are considering a graffiti removal program as follows: (1) the money received by WCRM will go back into the community to help the poor and homeless; (2) they will hire from the people they serve; (3) they will recapture and recycle the waste water from the pressure washing; (4) they will use biodegradable removable products; (5) they recognize that the quicker you remove graffiti, the more it discourages the tagger or artist; and (6) they also recognize that the quicker you catch and remove graffiti, the easier it comes off. He also noted that last year they had less than 1 Police Department call a week to their shelter.

Mayor Bellamy was pleased that the WCRM is willing to be a partner with the City and that they are working to hold the people who use their services accountable. Some people who cause problems in the City are not going to the WCRM shelter. She also noted that the WCRM is working with Buncombe County to provide wet shelter beds. She said the WCRM has men who take ownership and discourage misbehavior and she hoped to see this accountability throughout all our homeless service providers.

Councilman Mumpower noted that there are now about 55 Top A Stops in Asheville and thanked the WCRM for their part in that effort. He suggested the City establish a reward program for graffiti vandals. The City needs to send a clear message that these people are not artists, but vandals. He felt the City should be a role model in removing graffiti off public property quickly. He also suggested a task force made up of approximately six stakeholders that has a sunset date of 30-60 days to address a specific issue. Regarding towing, he felt our goal is to provide a balance between enforcement and fairness. He urged the merchants with parking lots to contact their predatory towing service and let them know their fees represent extortion. He felt that a task force might be able to address the towing issue as well.

Mayor Bellamy was supportive of a task force as well. We are now picking up trash seven days a week, opposed to the 3-4 days. She felt we need to provide the task force with the cost of more trash receptacles downtown along with information on where they are needed. Regarding Pritchard Park, we have refurbished it, added programming and a park ranger. We now also have restrooms downtown. She wondered if the park ranger should be a sworn police officer because there is a noticeable difference between a ranger vs. a police officer. Regarding panhandling, she would like to meet with the magistrates (similar to a previous meeting with the judges) to actually get some accountability through maybe some community service. Regarding towing, perhaps the letters on the signs need to be even larger. Perhaps for the lots that aren't open on the weekends and are not leasing them out to others, maybe we can request they put a chain across the parking lot. We do have a lot of development in our downtown area and she felt we could better coordinate our infrastructure improvements with that development so as not to adversely affect our downtown merchants. The lighting issues could be a topic for the task force. She noted that City Council has invested a lot of money in seeing some steps move forward to make downtown better but there must be some kind of accountability on the users, tenants and the homeless population.

Councilman Mumpower said he wasn't suggesting one task force, but at least two committees to tackle these issues. He also spoke against using a sworn police officer as a site specific babysitter. He felt Council needs to tell the City Manager what we want to see accomplished.

Councilwoman Jones noted that we did have a Downtown Social Issues Task Force that brought Council some creative solutions, most of which didn't work for us. There was also an Asheville Cleanliness Task Force. In terms of cleanliness, we don't really need a task force – just a plan on how to get some money or how to get some volunteers. We know the answers for some of these issues, but just need the money to invest in them.

Vice-Mayor Davis said that we have implemented parts of the Downtown Social Issues Task Force's recommendations after the fact. The City has grown since then. He explained how we need help with the court system to discourage misbehavior. Regarding Pritchard Park, people feel that the park ranger does make a positive difference in the Park and the use of the Park by the general public has gone up a great deal. He felt we need to continue that effort. He felt we will also need to review the programming at Pritchard Park at the appropriate time. He supported efforts to make people feel safe downtown.

Mayor Bellamy suggested Council look at a one capital investment of some type of cleanliness tool to be able to pressure-wash the sidewalks on a regular basis. She recalled that the 2006-07 Cleanliness Task Force was collaboration between the Chamber of Commerce and City of Asheville. It would be great to have a regular schedule of clean-ups. Some immediate items to address might be the need for additional trash cans, cleaning the weeds out of the sidewalks, and pressure-washing the sidewalks. We can also work with the N.C. Dept. of Transportation and find out when they will clean up their roadways into the City.

Councilman Mumpower felt that in Charleston, South Carolina, it's very rare that you are approached by panhandlers or see people misbehaving in that environment. They have found an

equation that works for them and we are basically operating under the same laws. His idea of a Task Force is that we create some urgency around it and suggest they be specifically devoted to a single mission, with the outcome of solutions that are cost efficient, legal, creative and that they have accountability. He would be curious to find out where the professional panhandlers are living and if there are ways for us to create some accountabilities for those people. He also suggested we create an expectation in this community that if you come to Asheville and are seeking assistance, there is an expectation that you behavior yourself.

It was the consensus of Council to instruct the City Manager to work on the Task Force concept with Mr. Miller's involvement, if he is agreeable.

Mr. Miller felt we can get our arms around overall cleanliness in a quick way. There is a huge movement around the country about urban gardening. He wondered if there was a way to utilize some of the WCRM clients to train them to work with local businesses to do some beautification. Regarding lighting, the Tourism Product Development fund grant cycle is about ready to begin and they will be closing those applications in January. He would be willing to work with City staff on that and if there is a capital project that fits within the guidelines, that might be something to put forth. They did fund $1.5 Million for the Wayfinding Program which will help tremendously on the towing problem.

Mayor Bellamy looked forward to the conversations with the BCTDA at the scheduled meeting soon. She also felt Mr. Howard would be open to discussing how his clients can work with the BDTDA. She also noted that Pat Carver from First Citizens might be a good partner on some endeavors.

PROPOSED REVISIONS TO THE CIVIL SERVICE LAW

Mayor Bellamy said that Council received information earlier this year that there had been legislation drafted and submitted to our legislators for consideration that had to deal with the Civil Service Board. She and Vice-Mayor Davis met with some members of the Civil Service Board on September 19, 2008, after which time she said she would schedule a City Council worksession to discuss the issues as they relate to legislation only and then discuss the next steps.

She presented Council with the following "proposed Civil Service changes for 2008 (to be placed within or amend current language)."

"1. **Add the following to Section 2**: Former employees of the City shall be eligible to serve as a member of the Civil Service Board provided they have been separated from City employment for a period of not less than ten (10) consecutive years prior to becoming a member of the Commission. No person shall be eligible to serve as a Commission member if such person directly, or indirectly, benefits financially or otherwise from a business or professional relationship with the City, or if such person has an immediate family member or spouse of the immediate family member who directly or indirectly benefits financially or otherwise from a business or professional relationship with the city. No person shall engage or benefit or indirectly benefit from any contractual work or employment with the City for a period of not less than two years following the expiration date of that person's term of office as a member of the Commission."

2. **Add the following at the end of Section 2**: The Commission Secretary shall perform all required ministerial functions and duties for the Commission including, but not limited to, the electronic recording of and the preparation of minutes of all Commission meetings and hearings, the custody of all Commission records and the posting and issuing of meeting notices to the Commission members and to the public in accordance with the North Carolina Public Meeting Laws. To assist the Secretary in performing the functions and duties, all Commission meetings shall be electronically recorded and transcripts,

thereof, made available to the Commission members upon request without charge. All other persons shall be entitled to the Commission's recordings and records upon request pursuant to the North Carolina Public Records Act.

3. **Add the following as Section 9 and renumber the Subsequent Sections accordingly**: By a majority vote of its members present at any of its official meetings, the Commission, is authorized to designate independent counsel of its choice to advise and/or to represent the Commission on such occasions and in such matters as the Commission may, from time to time, deem appropriate and necessary. The City shall be responsible for the payment of such professional legal services as the Commission deems necessary for the conduct of its official functions and duties. In order to avoid the appearance of any possible conflict of interest, the Office of the City Attorney shall serve as legal advisor to and/or as attorney for the Commission only for those matters or proceedings when specifically requested to do so in writing that has been signed by not less than four members of the Commission.

4. **Add the following to the end of Section 2**: Regular meetings of the Commission shall be held at least once every month at a time and place to be determined by the Commission. The deadline for receiving items for the regular monthly Commission's meetings shall be seven (7) days prior to the meeting. Special Commission meetings may be called by the chairman and shall be called upon written request signed by two or more Commission members and submitted to the Commission Secretary not less than seven (7) days prior to the date of requested meeting. The notice for all meetings shall contain a meeting agenda which shall include a section for other business to hear and consider any other matters related to the Commission's function and duties, which may be addressed by any member of the Commission and/or by any person in attendance.

5. **Add these words to the end of what is now Section 10**: Willful or deliberate violation of the Asheville Civil Service Law or Civil Service Rules by any person shall constitute a misdemeanor punishable by fines not to exceed the sum of $500.00. Any City employee or any City official who threatens or intimidates other employees from exercising their rights under the Civil Service Law or Civil Service Rules shall be subject to discipline by the City, including dismissal of employment with the City.

6. **Add to the end of Section 2**: No uniform employees of the City of Asheville shall be prohibited, directed or discouraged in any manner by a supervisor from wearing his/her uniform while in attendance at any Commission meeting.

7. If any section, subsection, subdivision, sentence, clause or phrase of this act shall for any reason be held to be invalid or unconstitutional, such decision shall not affect the validity of the remaining portion if this act.

8. All laws, rules or clauses in conflict with the provisions of this Act are hereby superseded and/or repealed.

9. These amendments shall become affective upon Ratification."

Councilman Mumpower, liaison to the Civil Service Board, felt this is not the appropriate forum to tackle this comprehensive undertaking. With us being currently involved in litigation, he didn't feel this was the ideal time for us to initiate this undertaking. It would seem that the model that was used in the past to modify our Civil Service Law would be appropriate today. That model included City staff, legal advisors, members of the Civil Service Board, employee representatives and others that did the brunt work to create a recommendation for the Council.

In response to Councilman Mumpower, City Attorney Oast said the last time the Civil Service Law was amended was in 1999 and when that happened there were employee

representatives, management representatives, member of local delegation, and perhaps a member of Council. It was a task force that reviewed and suggested some changes to Civil Service Law. There was a lot of give and take and we went to Raleigh to talk with the legislatures too. The outcome was the result of a lot of negotiations, but the Law is better as a result of it. What they were dealing with was a Law that had last been amended in 1977 and before that 1953. We updated a lot of it and the process went well.

In response to Councilman Mumpower, City Manager Jackson said that Assistant City Manager Richardson prepared a memorandum with the recommendation of establishing a City Council Blue Ribbon Committee Proposal: Study of the Asheville Civil Service Board: Analysis on Performance Measurement and Cost Control. That would be his recommendation in terms of a comprehensive review of the statute.

Mayor Bellamy's goal is that these revisions be negotiated and if that happens we may not need legislative changes. She felt the Civil Service Board was open to negotiations with Council for Board changes and/or legislative changes.

Councilman Mumpower felt the City should wait until the outcome of the legal entanglement regarding the 5th member to the Civil Service Board. He spoke strongly against any action today but would support the model for a comprehensive review of the Civil Service Law as recommended by City Manager Jackson. If we move forward with this, he felt it was fair to say our legal representation and management might have some issues where improvements might be made; however, he feels that a committee could target the potential modifications of the ordinance.

Councilman Russell agreed with Councilman Mumpower in supporting the City Manager's recommendation of a comprehensive review of the statute by a City Council Blue Ribbon Committee.

City Manager Jackson said that in order for the City to be an employer of choice, we need to have an open and inclusive process to review the proposed changes. We have no predetermined idea what the next step might be for this organization, but are open to any ideas brought forward by the employees as well as the Civil Service Board. He said he didn't believe the 9 proposed changes outlined by Mayor Bellamy was a recommendation of the Board, but just of certain members on that Board.

Mr. Sidney Bach, member of the Civil Service Board since October of 2007, said that in 1988 and 1999 attempts were made by the previous City Manager, in concert with the Office of the City Attorney, to abolish the Civil Service Law. That was met with opposition in the state legislature by interested parties. Then another maneuver was orchestrated. He said the state laws say a "Civil Service Board shall have the powers and shall perform the duties specified in this Act and the City Manager shall provide the operational needs of the Civil Service Board in assigning a budget." More importantly, in his view, the state law has been totally stymied from actions of the City staff. The state law says "the Civil Service Board shall make rules for promoting efficiency in the classified civil service and the Council shall act upon such proposed rules and amendments when approved by the majority vote of the Council. The Council may, before approving the rules, amend the rules and amendments." The Civil Service Board's function is to propose to Council Civil Service rules for the efficiency of operating the classified personnel. Then it's up to Council to accept, reject or modify. These rules apply to standardization, classification of positions and employment with the City, grievance hearings, part-time employment, etc. After the failure to abolish Civil Service in 1999, the Civil Service Board adopted rules of procedure on November 13, 2003, and adopted by City Council on January 11, 2005. Those rules are adopted in accordance with the Civil Service Law and shall govern proceedings held before the Board. What City staff has used to justify for abolishing all the rules is at the end of the rules of procedure where it says all other rules and regulations approved by the Asheville City Council as proposed by the Civil Service Board are hereby

repealed. The rules start off saying that they only govern the rules before the Board, but City staff uses that language about abolishing all other rules, which means all other procedural rules, to say the City administration, through the Human Resources Department, can come up with new rules. He said the Civil Service Board has held only two meetings this year to perform their statutory duties. The law requires the Board to have meetings every month and only the Secretary can call the regular meeting but she's in Human Resources and she's at the beck and call of the City Manager. So, if the City Manager tells her to do or not do something, she has to listen. Special meetings can be called by the Chair of the Board or by the Secretary. He is trying to make changes to the legislation so they can have regular monthly meetings and do the business of the board. He wants to be fair to the City and the employees. He said they are stymied and broken.

Mr. John Miall, Chair of the Civil Service Board, clarified that there were actually 4 or 5 meetings after he was appointed Chair in November of 2007 that the two employee-elected members did not appear for. There have also been two meetings that the two employee-elected members did attend but they walked out when votes were trying to be held before the Board. The concept that the Board is not trying to perform its duties is not correct. He said that he has no interest at stake here, nor an agenda at play, other than to serve as your appointed Chair to this Board. Whatever actions Council may take, or opt not to take, it is simply his desire to have a system that allows process to govern what we do. Nothing else. He is an amateur student of history. He believes life's best lessons to guide us can be found in where we have been. Stated succinctly, "We have to know where we have been in order to see where we are going." The concept of municipal civil service laws grew out of the 1950's when there was a genuine and real need to remove politics from the business of hiring, promoting, and firing public workers. Over the intervening years the Congress, our legislature and the courts have created such a huge body of law affecting individual rights and means of redress that the original intent of Civil Service has long been negated. We have more rights afforded and guaranteed us under the laws of this nation and state than Civil Service ever intended. Asheville is the only city remaining in the state of North Carolina besides the City of Raleigh with a civil service system for the majority of its employees. Of the other 4 cities so constrained, New Bern's law pertains only to police; Charlotte and Statesville's law pertains only to police and fire personnel; and the City of Wilmington's law pertains only to some police and fire, and not all of them. The present Civil Service Law serves only one genuine need of employees at this time, and that is the grievance procedure added by the legislature in the early 1980's at the request of the City. Over the past 20 years the City has made every good faith effort to live with, support, and at times to do away with the Civil Service Law. The City has worked with its legislative delegations in the past, and without them at times to effect desired changes. Nothing has worked well. Sadly, over the past 50 years the law has been abused for all manner of personal interests and purposes. Promotional testing in the early 1980's resulted in a major scandal when it was found that some employees were paying for copies of answers to promotional tests. In more recent years different administrations have sought strategically to de-emphasize the system and relegate it to virtual obscurity. But, such is the nature of systems created by imperfect humans. None of these misuses have resulted in a better, fairer system of employment. And today, we stand before you to consider yet another of those many changes in the process. He asked the members of City Council to consider the following facts before acting on any designed change to the current system: (1) What is wrong and needs to be fixed? (2) Who are the people here advocating change? Do they represent a cross-section of our community whose interests are clearly linked to better governance and seek change based on best practices and proven models of reform? (3) Are the taxpayers served by these changes? and (4) Do these changes assure the City is served by the best educated, skilled, and capable people in the workforce? In summary, he asked the Council to take a long view of this issue. Were there problems a year ago that were bought to your attention that now require exactly this solution, or is this a solution looking for a problem? If you really want to seriously reexamine this, start with a blank slate and ask yourselves or a task force to create what we really need for the 21st century. Odds are the recommendations would not look anything like what either exists today or would become if this proposal is enacted. Don't allow the city to slide backward by fifty years or more. And lastly, he said that in his 30 years of service to this wonderful organization and the people it represents he has never seen better leadership from a

City Manager and Human Resource Director than the combination presently serving the City of Asheville. It would seem to him that Council has the requisite expertise and leadership currently on your payroll to deal with this matter and do not need to waste the time hearing from the likes of him or others seeking changes for no apparent reason.

When Councilman Mumpower asked if there has been any pattern of difficulty or failure to uphold processes established in 1999, City Attorney Oast said that he was not aware of any.

Councilman Mumpower felt it was obvious that we have an internal problem in this Board and he feels it's inappropriate for City Council to become involved in that. He again suggested an action committee be formed to fairly review the statute. But, to do that before we get the legal issues resolved regarding appointment of the fifth member and before this Board makes some effort to internally solve this discord and conflict, he believed is premature. In summary, he encouraged (1) improvement in the relationship amongst the Civil Service Board itself; and (2) resolution of the legal concerns; and (2) then proceed with the creation of a committee as recommended by the City Manager. He does not believe there is any demonstrated urgency for action. He also pointed out that the 9 proposed changes are not brought to Council by the majority of the Board and it is not appropriate for Council to engage with the Board on them.

Councilman Newman felt it would be a good idea for stakeholders to meet with a goal of finding common ground. The outcome might be several recommendations, some of which the Board can implement itself, some might have to come to Council and some may have to go to the legislature. His only concern was the proposed appointment of community business leaders in that they are not really stakeholders in this process.

In response to Councilman Newman, City Attorney Oast said that out of the 9 proposed changes outlined above, there are some things that the Board can, by rule, do for itself, e.g., recording of meetings.

Mayor Bellamy said that since there is concern about the make-up of the Blue Ribbon Committee, she suggested the Boards & Commissions Committee look at that issue and bring it back to Council for their consideration.

When Councilman Mumpower asked if the Blue Ribbon Committee was to be established before the legal issue is resolved, City Attorney Oast said that he didn't believe a hearing date for a motion on summary judgment, which is the next procedural step, has been set yet. It would likely be after the end of the year before that is resolved, if resolved with a summary judgment.

Mayor Bellamy suggested a parallel track of the Blue Ribbon Committee and the legal issue.

Vice-Mayor Davis felt was comfortable with the make-up of the Blue Ribbon Committee as proposed by Assistant City Manager Richardson with Human Resources people from the private and public sector. He did find it difficult to have a Board that should be an advocate for the City and its employees institute a lawsuit against us.

When Mayor Bellamy asked if there was consensus of Council for a parallel track of the legal issue proceeding and having the Boards & Commissions Committee look at the make-up of the Blue Ribbon Committee to evaluate the efficiency and effectiveness of the Civil Service, City Attorney Oast said Council must proceed carefully. There is a division on the Board and it's fair to say they don't speak with one voice. The litigation is about the seating a 5th member. But the issues they raise here are not related to the lawsuit and he didn't think they would necessarily interfere with each other. If we can get around the internal difficulties on the Board, there is a possibility we can work on these.

Councilman Russell preferred to wait until the lawsuit litigation is resolved before establishing a Blue Ribbon Committee.

Vice-Mayor Davis understands the frustrations of the Board. He too would support waiting until the lawsuit litigation is resolved prior to establishing a Blue Ribbon Committee as suggested by the City Manager.

Mayor Bellamy announced that three members of Council prefer to wait until the lawsuit litigation is concluded prior to establishing a Blue Ribbon Committee is established, and three members of Council prefer a parallel track of the Blue Ribbon Committee and the legal issue. Therefore, it is the consensus of Council to appoint a Blue Ribbon Committee, but the question is when.

Mayor Bellamy requested the current Civil Service Board go through mediation because this is not healthy for our City to have a Board operating like this. If each Board member does not desire to go to mediation, she asked City Attorney Oast what other alternatives are available to Council. City Attorney Oast said that he would investigate what would be required in order for the mediator to take action.

Mayor Bellamy explained that the Civil Service Board potentially will begin to hear grievances impacting the lives of the employees of the City of Asheville. Do we want our employees have to deal with people who won't even talk with each other to have an effective meeting? The bigger issue is the right of our employees to appeal to a body that is ready to deal with their issues, not the issues amongst the Board members.

Councilman Mumpower said that in fairness to the Board, in the past two meetings there has been some efforts on the Board to be more civil and more cooperative. There is reason to believe that either through their own efforts, or through mediation, they can make progress to the point of serving their role more effectively.

Mr. Miall said that speaking for himself, he would be glad to participate in any process that will lead to a better functioning Board. He pointed out that the rules say that the Civil Service Board will make recommendations to the Council about rule changes. These 9 proposed Civil Service changes outlined above leap-frogged right to the Council. Not one of these rules has been brought before the Board for action. What is needed is to follow process.

Mr. Bach said that we are talking about changes in legislation that would make the Board function properly as the statute requires. In the spirit of civility, Mr. Miall and he met and reached an understanding as to what we thought would work to resolve the litigation. Unfortunately Mr. Miall came back to him and said he was sorry, but it has not been approved by Councilman Mumpower and staff.

When Mayor Bellamy asked Mr. Bach if he would be willing to attend mediation, he said he would be happy to participate if a meeting is called.

Ms. Virginia Robinson, member of the Civil Service Board, said that she feels comfortable in moving forward to hear issues and follow through to the best of her judgment. She said that if mediation is needed, that would be fine. She wanted the issues to be looked at fairly and open mindedly, but she didn't feel like that is a factor that will happen.

Councilman Mumpower clarified that he has no authority over the Civil Service Board. He is only the City Council liaison. At no point has he been in any position to tell anyone to do anything, and that includes the Board, the Chair, the staff or City Council.

Mayor Bellamy said that in order to be transparent, had not she been in Raleigh lobbying on transportation, City Council wouldn't have known about this because Council was not engaged

at any level. There are some issues about following procedures. This is the first time that City Council as a whole has seen or addressed the wording on these proposed Civil Service changes. Her goal is how do we get past where we are so the Board can work together and have regular monthly meetings. This is not about the Board members, it's about the process and how do we make it a good process for our employees going forward.

At 5:06 p.m., Mayor Bellamy announced a short recess to allow City Attorney Oast to talk with Assistant City Attorney McGlohon who is the attorney who is familiar with the lawsuit, prior to making a decision regarding mediation.

City Attorney Oast said that the status of the litigation is such that we don't know when it will get resolved. He thought it may be about six months, but there is no way to put a particular date on it.

When Mayor Bellamy asked about mediation, City Attorney Oast asked Ms. McGlohon if this matter had been referred for mandatory mediation. It has not been. The only issue that can be mediated in that context is the issue of the litigation, which is the appointment of the fifth member. However, he understands that the Mayor Bellamy is requesting mediation with a facilitator that can help the Board get to a point that they can conduct its business. He will look into that and report back to Council.

Mayor Bellamy said that she will write a letter to Representative Goforth to let him know what Council is doing on this matter. She will include in that letter the date that Council met on the issue and that they will seek mediation for the Civil Service Board. She would also like to point out that the Council will establish a Blue Ribbon Committee to analyze the efficiency and effectiveness of the Civil Service Board but from the discussion today that it is still an outstanding issue.

Councilman Mumpower suggested we advise Representative Goforth that after we establish a functional relationship of the existing Civil Service Board and after the lawsuit is resolved that the Blue Ribbon Committee will be appointed to discuss the proposed civil service changes.

In response to Councilman Newman, Mr. Miall said that there is a grievance that has recently been filed that will require the attention of the Civil Service Board. A meeting will be scheduled.

It was the consensus of Council to instruct the City Attorney to provide Council with information on mediation/facilitator for the Board to work together.

Mayor Bellamy said she felt there was enough support for a Blue Ribbon Committee to be established. The outstanding issue is when it would be established (with the Boards & Commissions Committee looking at the make-up of such a Committee) - on a parallel track with the lawsuit or after the lawsuit is resolved.

FEE IN LIEU OF – HOUSING TRUST FUND

Community Development Director Vann McNeill said that recent downtown development projects have been submitted to the City that have resulted in project developers voluntarily offering to pay fees in lieu of providing affordable housing units to ensure those projects meet City 2008-09 Strategic Plan goals. The Council's Housing and Community Development (HCD) Committee and the Affordable Housing Working Group are developing recommendations for the use of any such funds received by the City.

On June 24, 2008, City Council received the 2008 Affordable Housing Plan (the Plan) as presented by the Mayor's Affordable Housing Task Force. In support of the Plan, City Council asked

the HCD Committee to continue to develop the Plan's recommendations, several of which propose additional policies related to the City's Housing Trust Fund. To assist with this task an informal group of committed former task force members (now named the Affordable Housing Working Group (Working Group)) continues to work with the HCD Committee on recommendations for implementation of the Plan.

In the context of that work, during the September 15, 2008, HCD Committee meeting, committee members discussed the issue of the City accepting fees in lieu of providing affordable housing units from downtown development projects. The loss of affordable housing units when a fee in lieu is accepted was of great concern to the HCD Committee members, and it was felt that any fees offered by these projects should be paid to the City's Housing Trust Fund for the construction of more affordable housing. The HCD Committee requested that the Working Group also consider this issue and discuss options and make recommendations on the City's accepting fees in lieu of providing affordable units by project developers.

The Working Group met on October 7, 2008, and discussed this issue at length. They developed four recommendations for discussion by the HCD Committee at the October 20, 2008, committee meeting in prelude to the Council Worksession discussion on October 21. Those recommendations are provided below.

The Working Group recommendations being evaluated by the HCD Committee are as follows:

1. The City should accept fees in lieu of producing affordable units; however, this was not the Working Group's preferred option. The Working Group's desire was to see each project provide the affordable units within the project itself so as to promote the goal of mixed-income developments throughout the city, including developments proposed for downtown, and all projects requesting Conditional Use Permit and Conditional Zoning designations;

2. All fees accepted from project developers should be placed in the City's existing Housing Trust Fund for the production of affordable units. The Working Group also expressed concern that if the City accepts these fees what implications would that have for future general fund allocations to the Housing Trust Fund? The Working Group does not support a reduction in the annual allocation and fees in lieu should not been viewed as a "substitute" for the annual allocation;

3. Fees in lieu should be used according to the current Housing Trust Fund guidelines to provide loans for the production of affordable units; and

4. The current practice of annually providing seven to ten percent of the funds available in the Housing Trust Fund for program administration should be continued.

Again, the HCD Committee recommendations are being determined on October 20, but the following summarize the staff views on the benefits and concerns related to the recommendations of the Working Group:

Benefits:

- Acceptance of a fee in lieu increases the funding available in the Housing Trust Fund for the production of affordable units in the City and ensures these funds follow the program's established guidelines.
- Placing these fees in the Housing Trust Fund is consistent with City's policy and practice, and furthers the affordable housing goals of the City's 2008-09 Strategic Plan, the recommendations of the 2008 Affordable Housing Plan, and the goals and objectives of the City's 2005-10 Consolidated Strategic Plan for Housing and Community Development.

- Placing these fees in the Housing Trust Fund continues the structured, objective approach currently in place and continues this practice for accepting these fees from future development projects.

Concerns:

- Accepting a fee in lieu, instead of providing the affordable units within the proposed development, does not further the goal of providing mixed-income housing throughout the City.
- Current and future economic trends would seem to indicate that a consistent fee in lieu revenue stream from projects is unlikely, and these fees should not be seen as a dependable source of revenue for the City's Housing Trust Fund.

Regarding the fiscal impact, potential exists to increase the available Housing Trust Funds for affordable housing projects.

This staff report gives background on the issues surrounding the questions raised by the potential of the City accepting fees in lieu of providing affordable housing units in proposed development. The HCD Committee, the Affordable Housing Working Group, and City staff are presenting the City Council options for how to address this potential. The staff, however, believes that even if they are accepted, this would be only a partial policy.

If the City adopts a formal policy regarding the acceptance of fees in lieu, the important and difficult remaining question will be how to objectively calculate what fees will be contributed by future projects. A preliminary review including research into other communities, has found that there are many ways to arrive at such a fee. If a "fee in lieu use policy" is adopted, the staff recommends work to begin on a formal fee policy through a coordinated approach with the HCD Committee, the City Attorney, the Planning staff, and the Affordable Housing Working Group. The recommendations of that group would be presented to City Council in the near future for their consideration.

The HCD Committee concurs with the Affordable Housing Working Group's recommendations concerning development projects when a developer has voluntarily offered to pay fees in lieu of providing affordable housing units as one available option to demonstrate support for City adopted goals and plans.

This is a follow-up to the HCD Committee meeting which members met on October 20, 2008. The four (4) recommendations offered by the Affordable Housing Working Group were reviewed by the Committee. Those recommendations were as follows:

1. The Working Group proposed that all CUP and CZ housing development projects include affordable housing units within those projects; however, when infeasible the City could accept fees in lieu of providing these units;

2. Fees should be placed in the City's Housing Trust Fund (HTF) to produce affordable units; but any fees received in lieu should not be considered a "substitute" for the City's annual allocation to the Housing Trust Fund;

3. Fee use should be consistent with HTF policies and provide loans that produce affordable units; and

4. The current practice of annually providing seven to ten percent of the funds available in the HTF for program administration should be continued.

Benefits

- Fees in lieu can increase the Housing Trust Funds available for increasing the affordable housing units in the City.
- Producing these units achieves goals of the City's 2008-09 Strategic Plan, 2005-10 Consolidated Strategic Plan for HUD funds and the 2008 Affordable Housing Plan developed by the Mayor's Affordable Housing Task Force.
- Provides City Council with a framework for accepting fees in lieu that will directly result in the production of affordable housing units.

Concerns:

- If the option is used too consistently for projects downtown, it could result in an inordinate concentration of high-end housing there.
- Fees in lieu cannot be viewed as a predictable source of revenue for the HTF given the current state of the economy.

Potential exists to considerably increase the funds available in the Housing Trust Fund for affordable housing projects over time.

The HCD Committee concurs with the Affordable Housing Working Group's four (4) recommendations and proposes that they be considered a partial policy for addressing fees in lieu proposals that may be considered by City Council prior to the completion of a formal policy.

Planning and Development staff recommends the continued development of a complete policy for City Council review, which will require the creation of an objective, fair and equitable fee schedule, along with other administrative recommendations.

Preliminary review of similar policies in other communities indicates there are a variety of ways to establish such a fee structure. Staff will work closely with the HCD Committee, Affordable Housing Working Group and the City Attorney to develop a complete policy for City Council review in the near future.

Councilman Newman, Chair of the HCD Committee, said that the Committee was supportive of the Affordable Housing Working Group's recommendations. At this time there is no requirement for developers to include affordable housing in their developments. But, obviously in our community development goals and all our community development plans point to affordable housing as a very important need in the community. We have many developers who do include affordable housing in their developments. In some developments we see it's not realistic to include affordable housing in their development, but they recognize it's an important need in the community and they initiate other ideas, e.g., The Ellington suggested earmarking a certain percentage of the real estate transactions of the condominiums in The Ellington be directed to a fund to build affordable housing in downtown. If developers are going to make financial contributions to support affordable housing and if they are pointing to that as part of how their project will be contributing towards meeting the City's community development goals, we believe those funds should be placed into the Affordable Housing Trust Fund. This is an established public process and we know those funds will be accounted for. He asked for Council to support their recommendations as well. This is not a recommendation to make inclusion of affordable housing in future developments. This is only if a developer initiates the idea of affordable housing and if the project is approved, that the funds be allocated to the Affordable Housing Trust Fund.

In response to Councilman Russell, Councilman Newman assumed Council will have this discussion at a formal Council meeting to formally accept the four (4) recommendations offered by the Affordable Housing Working Group.

Councilman Mumpower suggested that the Affordable Housing Working Group's make-up is out of balance and that it's comprised of people who have an affordable housing interest. He would have to speak strongly against this action in that he feels it represents a socialistic

agenda to reach into one group's pocket and put it into another group's pocket. He felt the best way to help affordable housing in the City is by good policies, keeping taxes low and keeping the City safe.

Councilman Mumpower felt that developers are faced with a number of regulations and judging the political mindset of Council, which can be arbitrary at time, the developers are often given the impression that if they meet our expectations (bearer of gifts), they can successfully achieve the developmental process. He speaks strongly against those policies.

Councilman Newman reiterated that there is no requirement proposed for developers to include affordable housing components in their projects.

Councilwoman Jones took issue to Councilman Mumpower's comments in that while on City Council she has made a lot of decisions and none of them were arbitrary.

Councilman Russell felt that if developers wish to contribute to affordable housing, it is their will. He would prefer, however, that those developers be able to designate the funds where they want to because there are many charitable organizations that help the community.

Councilman Newman noted that the Affordable Housing Trust Fund is not the only place those funds could be directed. They are simply saying that if the developer thinks that affordable housing is important and they want the funds to go specifically to affordable housing , then they feel it should go to the Affordable Housing Trust Fund. Regarding the composition of the Affordable Housing Trust Fund, there are representatives from the Community Foundation of WNC (which was the recipient from the first significant development where the developer proposed those funds). Those representatives felt the most effective way to use those resources would for them to be invested in the City's Affordable Housing Trust Fund. That is an already established public process that is accountable.

Councilwoman Jones explained that if a developer thinks affordable housing is a strategic goal that they want to contribute to, through the conditional use process, the way that will happen is to increasing the supply of affordable housing via the Housing Trust Fund. She understands that part of the use of the conditional use process is that the developer gets special allowances to help the project, but the trade-off is there are things they have to help the City with as well. It is intended to facilitate a good project and also to facilitate the City's goals.

Upon inquiry of Councilman Mumpower, City Attorney Oast said that this process grew out of the suggestion from The Ellington project. The law does say with regard to conditional use districts that conditions applicable to these districts may be proposed by the petitioner or by the City or its agencies, but only those conditions mutually approved by the City and the petitioner may be incorporated into the zoning regulation permit requirements. There needs to be some nexus between the impact of the project on the housing community and what would be required to mitigate that impact. What Council is trying to do is to derive at a formula to let them know what is needed to address this particular impact.

WORKSESSION MEETING TIME

Mayor Bellamy said that Council has been starting their worksessions for the last several months at 3:00 p.m. and was following up to see if that time was satisfactory to Council members.

After a brief discussion, it was the consensus of the majority of Council to continue the worksessions at 3:00 p.m. on the third Tuesday of the month.

UNIFIED DEVELOPMENT ORDINANCE APPROVAL REQUIREMENTS

City Manager Jackson asked for Council direction to allow City staff to look at, in light of the financial market conditions, over the next 60-90 days look at our Unified Development Ordinance (UDO) approval requirements and see if we can agree on some relaxing of those non-public safety requirements (sidewalks, landscaping, etc.) What triggered this was a specific redevelopment project that was trying to bring businesses into the former Square D building and was running into our very strict requirements that even non-public safety improvements needed to be bonded or completed in order to get their permanent Certificate of Occupancy. In this particular case we resolved that issue by granting a temporary Certificate of Occupancy which they will look at periodically to determine if the market conditions have changed to allow them to get the bonding necessary to commit to do those non-public safety improvements.

It was the consensus of Council to authorize the City Manager to develop proposals for revised standards in the UDO for requirement thresholds, approval extensions, and financial guarantees for non-public safety related development requirements.

CONSERVATION EASEMENT IN CITY-COUNTY PLAZA AREA UPDATE

City Attorney Oast said that at Council's request, he has been exploring ways in which the use of the City's park lands may be limited to park and recreational uses. Prior to 1982, there was some question as to whether a city could change the use of and sell property it acquired for governmental purposes. In 1982, N.C.G.S. 160A-265 was amended to provide for this. There are several methods for restricting the use of park property; the following list does not include them all, but these are the most conventional:

1. Zoning. Cities can create zoning classifications specific to park land, which limit the use of the property. However, these regulations may be changed in the same manner as any zoning ordinance.

2. Conveyance to City with restrictions on use. Grantors may place restrictions on the use of property conveyed to the City. If this is done, it is important that the instrument of conveyance contain some enforcement language, such as a reversion, to provide a remedy if the restrictions are violated (the absence of such a reversion is an issue in the Parkside case).

3. Dedication. This occurs when public facilities are created, usually as part of a development, and offered to the City for the public use and enjoyment. This is how the City obtains streets and sidewalks in new subdivisions, but it can also be done for park property. Acceptance of dedication usually implies some sort of promise by the government that the dedicated property will remain in use for that purpose, barring a change in circumstances that makes the use inappropriate. Dedication can also occur as a result of lay use for a particular purpose (another issue in the Parkside case). The public has some ability to require that dedicated land be used for its dedicated purpose (although this may have been affected by the 1982 law), and certain procedures are required to change the use.

4. Conservation Easements. Like private individuals, governments may convey conservation easements to organizations whose mission includes the policing and enforcement of the restrictions thereby created. Cities have the ability to make such conveyances pursuant to N.C.G.S. 160A-266. This process, however, assumes that there is an organization willing to accept the easement, which acceptance carries some responsibility. Most such organizations work with large tracts, and the City has conveyed at least one such easement on the North Fork property. Smaller tracts, like most City parks, are more difficult to "place."

At Council's direction, he could explore any of these methods more fully, and make recommendations applicable to all or some of the City's parks.

Mayor Bellamy said that the Buncombe County Commissioners and the Pack Square Conservancy would like to have a conservation easement on the City-County Plaza as well.

There was a brief discussion about whether the City wanted to restrict the use of park property.

It was the consensus of the majority of Council to instruct the City Attorney to start working with Buncombe County and the Pack Square Conservancy on a conservation easement for the City-County Plaza area only.

BOARDS &COMMISSIONS

It was the consensus of Council to instruct the City Clerk to arrange interviews for Jodi Schell, Arthur Allen and Brian Woods for a vacancy on the Civic Center Commission. Regarding County residents on the Civic Center Commission, Mayor Bellamy said that when the Buncombe County Commissioners agree to support the renovation of the Civic Center, we would be happy to have County representation on the Commission.

Regarding the Civil Service Board, it was the consensus of Council to delay interviews for that vacancy.

It was the consensus of Council to instruct the City Clerk to arrange interviews for Susan Barlow, Russell Pierce, Stephanie Pankiewicz, Justin Fletcher, Ellen Bailey, Brian Etheridge and David Borcherding for a vacancy on the Greenway Commission. It was noted that there will be two additional vacancies on the Greenway Commission on December 31, 2008.

At the request of the Downtown Commission, and the recommendation of the Boards & Commissions Committee, it was the consensus of Council to extend the term of Mr. Pat Whalen on the Downtown Commission until the Downtown Master Plan process is complete or April 1, 2009, whichever occurs earlier.

CLOSED SESSION

At 6:30 p.m., Councilman Mumpower moved to go into closed session for the following reason: (1) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of contracts for the acquisition of real property by purchase, option, exchange or lease. The statutory authorization is contained in G.S. 143-318.11(a) (5); and to prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes that information privileged and confidential is N. C. Gen. Stat. sec. 143-318.10 (e). The statutory authorization is contained in G.S. 143-318.11 (a) (1). This motion was seconded by Councilwoman Jones and carried unanimously.

At 6:38 p.m., Councilwoman Jones moved to come out of closed session. This motion was seconded by Councilman Russell and carried unanimously.

ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 6:38 p.m.

Magdalen Burleson
CITY CLERK

Terry M Bellamy
MAYOR

Tuesday – October 28, 2008 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Davis gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING OCTOBER 30, 2008, AS "INSULATE! DAY"

Councilwoman Cape read the proclamation proclaiming October 30, 2008, as "Insulate! Day" in the City of Asheville. She presented the proclamation to Mr. Phillip Ray Gibson, Director of Community Outreach at Warren Wilson College, and others, who briefed City Council on some activities taking place during the day.

B. PROCLAMATION PROCLAIMING NOVEMBER 2008 AS "LONG-TERM CARE AWARENESS MONTH"

Councilman Newman read the proclamation proclaiming November 2008 as "Long-Term Care Awareness Month" in the City of Asheville. He presented the proclamation to Ms. Betty Doll, with Long Term Care Insurance Services, who briefed City Council on some activities taking place during the month.

II. CONSENT AGENDA:

At the request of Councilwoman Cape, Consent Agenda Item "A" was removed from the Consent Agenda for discussion and/or an individual vote.

At the request of Councilman Mumpower, Consent Agenda Items "B", "C", "E","F","G", "I", "K", "L" and "M" were removed from the Consent Agenda for discussion and/or an individual vote.

A. APPROVAL OF THE MINUTES OF THE FORMAL MEETING HELD ON OCTOBER 14, 2008; AND THE WORKSESSION HELD ON OCTOBER 21, 2008

This item was removed from the Consent Agenda for discussion and/or an individual vote.

B. ORDINANCE AMENDING CHAPTER 9 OF THE CITY OF ASHEVILLE CODE OF ORDINANCES TO LEVY A TAX ON GROSS RECEIPTS DERIVED FROM RETAIL SHORT-TERM LEASE OR RENTAL OF HEAVY EQUIPMENT

RESOLUTION LEVYING A TAX ON GROSS RECEIPTS DERIVED FROM RETAIL SHORT-TERM LEASE OR RENTAL OF HEAVY EQUIPMENT

These items were removed from the Consent Agenda for discussion and/or an individual votes.

C. BUDGET AMENDMENT TO TRANSFER FUNDS FROM THE STORMWATER ENTERPRISE FUND TO THE DINGLE CREEK PROJECT FUND TO COVER THE COST OF THE CONTRACT AMENDMENT WITH MCGILL ASSOCIATES FOR A STORMWATER ENGINEERING ANALYSIS OF THE DINGLE CREEK WATERSHED

This item was removed from the Consent Agenda for discussion and/or an individual vote.

D. RESOLUTION NO. 08-207 – RESOLUTION SETTING A PUBLIC HEARING ON DECEMBER 2, 2008, TO CONSIDER PERMANENTLY CLOSING A PORTION OF WALLACK STREET

Summary: The consideration of a resolution of intent to close an unopened portion of Wallack Street and request a public hearing for December 2, 2008, regarding this issue.

N. C. Gen. Stat. sec.160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, property owners Asheville Buncombe-Community Christian Ministry Inc. and Robert and Joan Ledford have requested the City of Asheville to permanently close an unopened portion of Wallack Street.

The Greenway Commission is scheduled to review the closure of the unopened portion of Wallack Street at their meeting on November 13, 2008.

Regarding the Strategic Operating Plan, this closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more effective use of the existing adjacent properties.

Con:

- In consideration of the location of the unopened right-of-way, staff can find no potential challenges regarding the closure of the alley.

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt a resolution setting a public hearing for December 2, 2008, to close an unopened portion of Wallack Street.

RESOLUTION BOOK NO. 31 – PAGE 334

E. RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AGRICULTURAL LEASE WITH GLADHEART FARMS, LLC, FOR THE COMMERCIAL PRODUCTION OF AGRICULTURAL CROPS ON UNUSED PORTIONS OF CITY-OWNED PROPERTY AT AZALEA PARK AT 395 AZALEA ROAD

This item was removed from the Consent Agenda for discussion and/or an individual vote.

F. BUDGET AMENDMENT FROM THE U.S. DEPT. OF JUSTICE TO CREASE A BUDGET FOR THE THIRD YEAR OF THE WEST RIVERSIDE OPERATION WEED AND SEED INITIATIVE

This item was removed from the Consent Agenda for discussion and/or an individual vote.

G. BUDGET AMENDMENT FROM THE N.C. GOVERNOR'S CRIME COMMISSION TO CREATE A BUDGET FOR THE WEST RIVERSIDE GUN VIOLENCE PREVENTION PROJECT IN ASHEVILLE'S WEEK AND SEED TARGETED AREA

This item was removed from the Consent Agenda for discussion and/or an individual vote.

H. RESOLUTION NO. 08-209 – RESOLUTION ACCEPTING EAST SCHENCK CRESCENT, COLUMBINE ROAD, DEARBORN STREET, TOWN SQUARE BOULEVARD AND DAYFLOWER DRIVE AS CITY-MAINTAINED STREETS

Summary: The consideration of a resolution accepting various developer constructed streets as City-maintained streets in the recently annexed area of the City of Asheville known as Town Square East that is described in the Annexation Services Plan dated April 26, 2005.

Ordinance # 7-15-1(e)(4)a requires that streets dedicated for public use by accepted by resolution of the City Council.

- East Schenck Crescent from Schenck Parkway to Columbine Road is a developer constructed street that has an average width of 38 feet, a length of 0.18 mile, and a right-of-way width of 50 feet.
- Columbine Road from Town Square Boulevard to Heathbrook Circle is a developer constructed street that has an average width of 26 to 42 feet, a length of 0.18 mile, and a right-of-way width of 50 feet.
- Dearborn Street from Town Square Boulevard to Leucothoe Lane is a developer constructed street that has an average width of 38 feet, a length of 0.12 mile, and a right-of-way width of 50 feet.
- Town Square Boulevard from Schenck Parkway to Schenck Parkway is a developer constructed street that has an average width of 32 feet, a length of 0.10 mile, and a right-of-way width of 42 to 46 feet.
- Dayflower Drive from Columbine Road to Dearborn Street/White Ash Drive/Olmsted Drive is a developer constructed street that has an average width of 24 feet, a length of 0.24 mile, and a right-of-way width of 45 feet.

Transportation and Engineering Department staff and Public Works Department staff have inspected these streets and recommend their change of ownership from privately-maintained streets to City-maintained streets.

Following City Council's approval of this resolution, the subject streets will be added to the official Powell Bill List.

This action complies with the City Council 2008-09 Strategic Operating Plan within the Sustainable Focus Area by accepting street infra-structure as a part of a voluntary annexation which helps support the healthy growth of the City.

Pros:

- The City of Asheville will receive Powell Bill Funds from the N.C. Dept. of Transportation to maintain the streets *(Total mileage = 0.82 mile)*.
- The streets provide access and connectivity in a residential and non-residential community *(town center)*.

Con:

- Powell Bill Funds will not cover 100% of the total cost to maintain the street.

There will be no initial financial impact to the City, although the responsibility of maintenance will belong to the Public Works Department. The City will receive Powell Bill Funds in the future to help maintain the street. Currently, the Powell Bill Funds equate to $1,886 per mile compared to the City's maintenance cost of $8,200 per mile.

Staff recommends that City Council accept the subject streets as city-maintained streets.

RESOLUTION BOOK NO. 31 – PAGE 336

I. RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT GRANT FUNDS FROM THE DEPT. OF JUSTICE OF COMMUNITY ORIENTED POLICING SERVICES METHAMPHETAMINE PROGRAM GRANT

BUDGET AMEMENT FROM THE DEPT. OF JUSTICE OFFICE OF COMMUNITY ORIENTED POLICING SERVICES TO ASSIST THE POLICE DEPARTMENT WITH THE PURCHASE OF METHAMPHETAMINE LAB INVESTIGATION EQUIPMENT, PROVIDE FOR OFFICER TRAINING AND OFFICER OVERTIME IN METH LAB INVESTIGATIONS

These items were removed from the Consent Agenda for discussion and/or an individual vote.

J. ORDINANCE NO. 3665 – BUDGET AMENDMENT TO ACCEPT A $500 DONATION FROM EMPLOYMENT STAFFING INC. FOR THE PURPOSE OF DISBURSING THIS DONATION TO WESTERN CAROLINA RESCUE MINISTRIES INC.

Summary: The consideration of a budget amendment to accept a five hundred dollar ($500) donation from Employment Staffing, Inc. (ESI) for the purpose of disbursing this donation to Western Carolina Rescue Ministries, Inc. (WCRM).

After discussion at the Tuesday, August 26, 2008, the City Council responded to a request from WCRM asking the City to provide transit passes for some of the agency's homeless clients who had been offered work opportunities at Arvato Digital Services in Weaverville and needed transportation assistance. On Friday, August 29, 2008, ESI donated $500 to the City for this purpose. However, to provide the funds to WCRM an outside agency agreement would be required. In the end, ESI purchased the transit passes for the homeless clients directly from the City Transit office.

Shortly thereafter, City staff requested direction from ESI as to the final use of the $500 donation. Mr. Bobby Walker, CFO of ESI, requested that the City disburse the donation directly to WCRM.

This request supports and implements the City's 2008-09 Strategic Plan goal of affordability by supporting initiatives to end homelessness. This request also supports the City's Continuum of Care and 10-year Plan to End Homelessness through partnering with other agencies that provide services and support to the homeless.

Pro:

- Completes the request by ESI to disburse the $500 donation to Western Carolina Rescue Ministries.

Con: None noted.

Budget amendment is only a technical adjustment to reflect the $500 ESI donation; therefore, it will have no impact on the City's budget. Recognizing the donation is required to then disburse the funds to WCRM.

City staff recommends City Council approve a budget amendment to accept a five hundred dollar ($500) donation from Employment Staffing, Inc. (ESI) for the purpose of disbursing the funds to Western Carolina Rescue Ministries, Inc.

ORDINANCE BOOK NO. 25 – PAGE 67

K. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE RURAL ECONOMIC DEVELOPMENT CENTER FOR P.E.G. SUPPORT FUNDS FOR A PASS-THROUGH GRANT TO URTV, INC.

BUDGET AMENDMENT TO ACCEPT A GRANT FOR P.E.G SUPPORT FUNDS FROM THE RURAL ECONOMIC DEVELOPMENT CENTER AND FACILITATE A PASS-THROUGH GRANT TO URTV, INC.

These items were removed from the Consent Agenda for discussion and/or an individual vote.

L. BUDGET AMENDMENT FROM A COMMUNITY DEVELOPMENT BLOCK GRANT AND AVAILABLE TRAFFIC CALMING FUNDS FOR THE BURTON STREET TRAFFIC CALMING PROJECT

This item was removed from the Consent Agenda for discussion and/or an individual vote.

M. RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AN AMENDED MEMORANDUM OF UNDERSTANDING FOR THE FRENCH BROAD RIVER METROPOLITAN PLANNING ORGANIZATION

This item was removed from the Consent Agenda for discussion and/or an individual vote.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Councilman Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Russell and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

A. APPROVAL OF THE MINUTES OF THE FORMAL MEETING HELD ON OCTOBER 14, 2008; AND THE WORKSESSION HELD ON OCTOBER 21, 2008

Upon inquiry of Councilwoman Cape, City Attorney Oast said that Councilwoman Cape could abstain from voting on the October 14 and October 21 minutes since she was not in attendance of either meeting.

Councilman Newman moved for the adoption of the October 14 and October 21, 2008, minutes. This motion was seconded by Councilman Mumpower and carried unanimously (with Councilwoman Cape abstaining from voting).

B. ORDINANCE NO. 3660 – ORDINANCE AMENDING CHAPTER 9 OF THE CITY OF ASHEVILLE CODE OF ORDINANCES TO LEVY A TAX ON GROSS RECEIPTS DERIVED FROM RETAIL SHORT-TERM LEASE OR RENTAL OF HEAVY EQUIPMENT

RESOLUTION NO. 08-206 – RESOLUTION IMPOSING A TAX ON GROSS RECEIPTS FROM THE RETAIL SHORT-TERM LEASE OR RENTAL OF HEAVY EQUIPMENT

Summary: The consideration of (1) an ordinance amending Chapter 9 of the Code of Ordinances to levy a tax on gross receipts derived from retail short-term lease or rental of heavy equipment; and (2) a resolution imposing a tax on gross receipts from the retail short-term lease or rental of heavy equipment.

Senate Bill 1852 entitled "An Act to Resolve Problems with Applying Property Tax to Heavy Equipment Rented on a Short-Term Basis by Replacing the Property Tax on this Equipment with a Tax on the Gross Receipts from Renting the Equipment" (the "Act") was signed into law on August 2 and has been designated as Session Law 2008-144. Prior to the enactment of this legislation, municipalities had the authority to levy ad valorem property taxes on heavy equipment. The Act repeals that authority with regard to heavy equipment, now designating these items of heavy equipment as property classified and excluded from the tax base.

The Act does, however, provide a mechanism to replace the ad valorem property tax previously levied on this equipment. The Act authorizes a municipality to levy a gross receipts tax on the gross receipts from the short-term lease or rental of heavy equipment at retail. Under the terms of the statute, the tax is eight tenths (0.8%) percent. This gross receipts tax is in addition to the privilege taxes authorized by G.S. § 160A-211 and any other gross receipts tax that may be applicable in a municipality.

The Act states that the new gross receipts tax may not become effective before January 1, 2009. However, in order to begin collecting the gross receipts tax on January 1, 2009, municipalities must adopt a resolution imposing the tax prior to the end of October 2008. Staff is recommending that Council adopt this resolution and ordinance in order to ensure that the City of Asheville begin receiving this gross receipts revenue on January 1, 2009.

Pro:
- Offsets the loss of property tax revenue on heavy equipment.

Con:
- None noted.

According to the Buncombe County Tax Assessor, the City of Asheville previously collected approximately $56,000 in property tax revenue from heavy equipment business owners. Adoption of

this resolution will replace this lost property tax revenue with revenue from a gross receipts tax. Thus, there is no fiscal impact associated with this resolution.

City staff recommends City Council adopt (1) an ordinance amending Chapter 9 of the Code of Ordinances to levy a tax on gross receipts derived from retail short-term lease or rental of heavy equipment; and (2) a resolution imposing a tax on gross receipts from the retail short-term lease or rental of heavy equipment.

Councilman Mumpower felt this was not the time to levy any taxes on any business, especially heavy equipment companies.

When Mayor Bellamy asked for a motion on these two items, none was received and thus the ordinance and resolution failed due to lack of a motion.

Councilman Newman then asked for these items to be revisited.

Budget Director Tony McDowell said that this is basically shifting the tax burden from the owners of the equipment to the users of the equipment.

Mr. McDowell confirmed Councilman Newman's statement that if Council does not take action on these items, there will be a kind of property in the community exempted from taxation of any form.

Councilman Newman moved for the adoption of Ordinance No. 3660. This motion was seconded by Councilwoman Cape and carried on a 4-3 vote, with Mayor Bellamy, Vice-Mayor Davis and Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 55

Councilwoman Jones moved for the adoption of Resolution No. 08-206. This motion was seconded by Councilman Newman and carried on a 4-3 vote, with Mayor Bellamy, Vice-Mayor Davis and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 333

C. ORDINANCE NO. 3661 – BUDGET AMENDMENT TO TRANSFER FUNDS FROM THE STORMWATER ENTERPRISE FUND TO THE DINGLE CREEK PROJECT FUND TO COVER THE COST OF THE CONTRACT AMENDMENT WITH MCGILL ASSOCIATES FOR A STORMWATER ENGINEERING ANALYSIS OF THE DINGLE CREEK WATERSHED

Summary: The consideration of a budget amendment, in the amount of $21,000, to transfer funds from the Stormwater Enterprise Fund to the Dingle Creek project fund to cover the cost of the contract amendment with McGill Associates for a stormwater engineering analysis of the Dingle Creek Watershed.

On August 26, 2008, City Council adopted resolution authorizing the City Manager to execute an agreement with McGill Associates for the Dingle Creek Stormwater Engineering Analysis in the amount of $21,000 for additional survey work and application of a Clean Water Management Trust Fund grant.

Money for this project is budgeted in the current year fiscal budget in the Stormwater Utility Enterprise Fund and this budget amendment is necessary in order to transfer $21,000 from the Stormwater Enterprise Utility to the Dingle Creek project.

This action complies with the Dingle Creek Watershed Master Plan in that the engineering analysis conducted is necessary in order to apply and obtain the Clean Water Management Trust Fund Grant in which will be used to implement a portion of the watershed master plan.

Pros:

- Implement a portion of the watershed master plan through the Clean Water Management Trust Fund Grant
- Improve water quality to the area

Con:

- None

Money from this project is budgeted in the current year fiscal budget in the Stormwater Utility Enterprise Fund.

Staff recommends City Council adopt the budget amendment, in the amount of $21,000, to transfer funds from the Stormwater Enterprise Fund to the Dingle Creek Grant fund to cover the cost of the contract amendment with McGill Associates for a stormwater engineering analysis of the Dingle Creek Watershed.

Councilman Mumpower felt that due to the economic climate, the timing of this is less than ideal and we continue to spend dramatic dollars on planning.

Councilwoman Jones moved for the adoption of Ordinance No. 3661. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 59

E. RESOLUTION NO. 08-208 – RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AGRICULTURAL LEASE WITH GLADHEART FARMS, LLC, FOR THE COMMERCIAL PRODUCTION OF AGRICULTURAL CROPS ON UNUSED PORTIONS OF CITY-OWNED PROPERTY AT AZALEA PARK AT 395 AZALEA ROAD

Summary: The consideration of a potential agricultural lease with Gladheart Farms, LLC, a locally based certified organic farm, for 11 +/- acres of land for commercial agricultural production at Azalea Park.

Prior to the City's acquisition of the Azalea Park, the land was used as an agricultural farm. Now, the former farmland has been converted to a state-of the-art soccer and park facility, however there is still potential for unused lands within the park to be utilized in farm production. Gladheart Farms, LLC is proposing to use 11+/- acres of Azalea Park for certified organic vegetable, fruit and hay production. Gladheart has offered to enter into a three-year lease with option to renew for one additional three year term at a rent of $1,500 per year, with an annual escalation of 4%. The rental rate was generated through input provided by area farmers, the NC Cooperative Extension Service, and the National Park Service, a governmental agency that also administers agricultural leases on public lands. In that 5 acres of the property will require extensive clearing of overgrowth of native and invasive plant species, such as bamboo, tree of heaven and privet, Gladheart proposes to perform the clearing in lieu of paying the first two years' rent.

Gladheart sells only within the wholesale market, therefore no retail or U-pick operations would exist on the City Park property. The proposed lease will respect all stream buffers, conservation easements, wetlands and proposed greenway paths that exist at Azalea Park. Gladheart will maintain all necessary liability insurance for the property as well as limit access to

authorized personnel and representatives of Gladheart. Only USDA organically certified fertilizers, pesticides and herbicides will be permitted at the property and annual soil and water quality reports will be provided to the City. The proposed agricultural use will have no impact on the recreational use of the Azalea Park or the soccer facility. The Parks & Recreation Advisory Board reviewed and approved this proposed agricultural lease on October 13, 2008.

This complies with the Strategic Operating Plan in that it promotes sound land management per the Parks and Recreation Master Plan.

Pros:

- Increased income to dedicate to the Parks Department Land Banking fund.
- Clearing of overgrowth is compatible with the future uses of Azalea Park.

Con:

- There is no negative impact.

The fiscal impact will be $1,500 per year beginning in November 2010, with 4% annual escalations thereafter.

The Economic Development staff recommends adoption of this resolution.

In response to Councilman Mumpower, Real Estate Manager Nikki Gunter confirmed the rent is appropriate for the use of City property.

Councilman Mumpower moved for the adoption of Resolution No. 08-208. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 31 – PAGE 335

F. ORDINANCE NO. 3662 – BUDGET AMENDMENT FROM THE U.S. DEPT. OF JUSTICE TO INCREASE A BUDGET FOR THE THIRD YEAR OF THE WEST RIVERSIDE OPERATION WEED AND SEED INITIATIVE

Summary: The consideration of a budget amendment, in the amount of $150,000, for a grant from the U.S. Department of Justice to create a budget for the third year of the West Riverside Operation Weed and Seed initiative

In October 2004, elected officials, city staff and Asheville citizens mobilized to develop comprehensive strategies to address issues of law enforcement, neighborhood restoration, and prevention/intervention/treatment programs and activities in the West Riverside area of Asheville as part of a Weed and Seed initiative. The strategy was introduced to the community via a series of public meetings to determine the concerns of residents of the target area, and was received favorably with the understanding that residents would be integrally involved in the planning and implementation of the initiative.

An application was submitted in October 2005 to the U.S. Department of Justice for official recognition as an official Weed & Seed site. In July 2006, the U.S. Department of Justice announced the designation of Asheville as an "Officially Recognized" site for the federal Weed and Seed initiative aimed at reducing crime and improving quality of life. Official recognition made the City of Asheville eligible to apply for Weed & Seed funds once a year over a five year period. The first funding application was approved and awarded in August 2006.

In July 2008, Acting Assistant Attorney General, Jeffrey L. Sedgwick announced the City of Asheville's application for third year funding as a continuing site was approved in the amount of $150,000. 50% of the funds will be used to support law enforcement and community police programs; and 50% will be used to support neighborhood initiatives such as youth services,

parenting programs, health and nutrition programs, vocational programs, neighborhood clean ups, housing services, and the salary of the Weed & Seed Site Coordinator. No additional City funding will be required to support this third-year grant.

The West Riverside Operation Weed and Seed Steering Committee, residents and several community based resource agencies such as the Housing Authority, Asheville City Schools, Children First, OnTrack Financial Education and Counseling, Quality Forward and others continue to collaborate to improve quality of life for the residents of the West Riverside area and Asheville.

This action complies with the City Council Strategic Operating Plan in that it supports small business development in the Affordable Focus Area. It also complies with the following goals in the Safe Focus Area: 1) expand community policing initiatives, 2) reaffirm commitment to eliminate open air drug market in Asheville, 3) partner with intergovernmental agencies including the judicial system to comprehensively address drug-related crime, and 4) support recreation and employment alternatives for youth at risk of gang exposure. Finally, it complies with the Sustainable Focus Area in that it expands partnerships with UNCA, AB Tech and other institutions to achieve goals in health and wellness, workforce development, and economic development.

Pros:

- Significantly reduce violent crime and drug activity in an area of Asheville that has high crime activity.
- Provide a comprehensive crime prevention plan to address law enforcement, neighborhood restoration and prevention/intervention/treatment programs for the residents of the target area.
- Mobilize community residents to collectively improve the conditions in the target area.
- Provide resources for residents as a means of personal growth and development.
- Multi-agency collaboration to address the social, educational, economic and cultural issues in the target area.
- Leverage resources to sustain the program and replicate the strategies in other problem areas in the city.

Con:

- Some resistance to change by the residents who live in the target area.

The fiscal impact is grant revenue of $150,000 to implement the comprehensive Weed & Seed strategy which funds police overtime, police equipment, a coordinator position, and community service contracts among other things at no additional cost to the City. The effort will sustain itself after the fifth year of implementation when Weed & Seed funding is no longer available.

City staff recommends City Council adopt a budget amendment authorizing the City Manager to establish a budget in the amount of $150,000 for the third year of the West Riverside Operation Weed and Seed initiative.

Councilman Mumpower had no problem with the Weed and Seed Initiative other than it is a federal initiative to fix local problems. He was concerned that we have a $11 Trillion national debt and he could not support the City accepting a federal grant of borrowed money from foreign counties that our children and grandchildren will have to repay.

Mayor Bellamy thanked the people who are helping to lead the Weed and Seed, which include people from the non-profit sector as well as the residents of the impacted neighborhoods. She also thanked the police officers who are working additional time in these particular neighborhoods because we are seeing, through collaboration, a decrease in crime in these areas.

Councilwoman Cape moved for the adoption of Ordinance No. 3662. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 61

G. ORDINANCE NO. 3663 – BUDGET AMENDMENT FROM THE N.C. GOVERNOR'S CRIME COMMISSION TO CREATE A BUDGET FOR THE WEST RIVERSIDE GUN VIOLENCE PREVENTION PROJECT IN ASHEVILLE'S WEED AND SEED TARGETED AREA

Summary: The consideration of a budget amendment in the amount of $15,000 for a grant from the N.C. Governor's Crime Commission to create a budget for the West Riverside Gun Violence Prevention Project in Asheville's Weed & Seed targeted area.

In October 2004, elected officials, city staff and Asheville citizens mobilized to develop comprehensive strategies to address issues of law enforcement, neighborhood restoration, and prevention/intervention/treatment programs and activities in the West Riverside area of Asheville as part of a Weed and Seed initiative. The program was introduced to the community via a series of public meetings to determine the concerns of residents of the target area, and was received favorably with the understanding that residents would be integrally involved in the planning and implementation of the initiative.

In July 2006, the U.S. Department of Justice announced the designation of Asheville as an "Officially Recognized" site for the federal Weed and Seed initiative aimed at reducing crime and improving quality of life. Weed & Seed sites are required to leverage additional funds to carry out their respective goals and objectives. This grant award will address the community driven Weed and Seed goals of: 1) reducing crime and improving public safety, 2) enhancing the relationship between the community and law enforcement, 3) providing accessible programs for youth, and 4) increasing parent involvement in education and after-school activities.

An amount of $10,010 will be used for Asheville Police officer investigative overtime and FICA in the Weed and Seed area with a concentration on crimes related to gun violence and gang activity. The project also provides a prevention element in which gang detectives will teach the "Gang Resistance Education and Training Families" (GREAT) curriculum in the Weed and Seed area. This will enhance the GREAT curriculum currently being taught at Randolph Learning Center. The GREAT curriculum is also being taught at Asheville Middle School as classes become available. An amount of $4990 will used for gang suppression unit detective supplies and equipment. No additional City funding will be required to support this grant.

This action complies with the City Council Strategic Operating Plan in that it supports the following goals in the Safe Focus Area: 1) Expand community policing initiatives, 2) reaffirm commitment to eliminate open air drug market in Asheville, and 3) support recreation and employment alternatives for youth at risk of gang exposure.

Pros:

- Reduce gun crimes and gang activity in an area of Asheville that has high crime activity.
- Enhance the Weed and Seed strategy of providing a comprehensive crime prevention plan to address law enforcement, neighborhood restoration and prevention/intervention/treatment programs for residents of the target area.
- Mobilize community residents to take an active role in gun violence and gang prevention.
- Provide resources for residents as a means of personal growth and development.
- Multi-agency collaboration to address gun violence and gang prevention in the targeted area.
- Leverage resources to sustain the GREAT Families program which can be replicated in other areas of the city.

Con:

- Some resistance to change by the residents who live in the target area.

The fiscal impact is grant revenue of $15,000 for new equipment for Gang Suppression Officers and the facilitation of Gang Resistance Education and Training Families program at no additional cost to the City.

City staff recommends City Council adopt a budget amendment authorizing the City Manager to establish a budget in the amount of $15,000 for the Project Safe Neighborhoods Gun Violence Prevention Project for the Weed & Seed area.

Councilman Mumpower felt the state should be investing their resources into addressing our court systems.

Councilwoman Jones moved for the adoption of Ordinance No. 3663. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 63

I. RESOLUTION NO. 08-210 – RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT GRANT FUNDS FROM THE DEPT. OF JUSTICE OF COMMUNITY ORIENTED POLICING SERVICES METHAMPHETAMINE PROGRAM GRANT

ORDINANCE NO. 3664 – BUDGET AMEMENT FROM THE DEPT. OF JUSTICE OFFICE OF COMMUNITY ORIENTED POLICING SERVICES TO ASSIST THE POLICE DEPARTMENT WITH THE PURCHASE OF METHAMPHETAMINE LAB INVESTIGATION EQUIPMENT, PROVIDE FOR OFFICER TRAINING AND OFFICER OVERTIME IN METH LAB INVESTIGATIONS

Summary: The consideration of a resolution authorizing the City Manager to accept grant funds under Department of Justice Office of Community Oriented Policing Services Methamphetamine Program Grant; and the associated budget amendment in the amount of $93,530.

The City of Asheville has been awarded a grant from Department of Justice Office of Community Oriented Policing Services for the Methamphetamine Program in the amount of $93,530 with no local match. The purpose of the grant program is to fund Methamphetamine projects, allowed under the grant program designed to train officers in proper handling and evidence collection, train the public on cues to meth lab operation, to pay for officer overtime for investigation of suspected methamphetamine sales, and provide needed equipment for proper response to meth labs.

This action complies with Asheville City Council Goals and Vision Priority Area: Community Building- Development strategies for youth and educational programs; and Priority Area: Economic Development- Continue commitment to public safety and drug enforcement priorities.

Pros:

- Will provide the public with needed information on how to spot possible meth lab operation which will enhance public safety.
- Proper officer training will aid in reduction of injure to officers responding to possible meth labs.
- Will provide special concentrated investigations into methamphetamine sales

- The equipment will increase officer safety in response to possible meth labs.

Cons:

- The City Of Asheville and the Asheville Police Department would be required to maintain the upkeep of the equipment purchased
- Provide overtime pay for officer's investigation illegal meth activities once the grant funds were depleted.

There is no fiscal impact associated with this grant, as it is non-matching.

City staff recommends City Council adopt (1) the resolution authorizing the City Manager to enter into an agreement with Department of Justice Office of Community Oriented Policing Services Methamphetamine Program Grant for grant monies in the amount of $93,530; and (2) the budget amendment in the amount of $93,530.

Councilman Mumpower felt we should not be accepting money from the federal government with their trillion dollar deficit, and that we should fund our own police and services.

Councilwoman Cape stated that the federal government gets its money from local people and this is coming back to help us with an issue that causes a lot of problems in our community.

Mayor Bellamy said that the City is following the correct process by writing grants and competing against cities across our nation. Since the federal government has said they would no longer earmark monies, we must compete for those funds via grant applications.

Councilwoman Cape moved for the adoption of Resolution No. 08-210. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 342

Councilwoman Cape moved for the adoption of Ordinance No. 3664. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 65

K. RESOLUTION NO. 08-211 – RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE RURAL ECONOMIC DEVELOPMENT CENTER FOR P.E.G. SUPPORT FUNDS FOR A PASS-THROUGH GRANT TO URTV, INC.

ORDINANCE NO. 3666 – BUDGET AMENDMENT TO ACCEPT A GRANT FOR P.E.G SUPPORT FUNDS FROM THE RURAL ECONOMIC DEVELOPMENT CENTER AND FACILITATE A PASS-THROUGH GRANT TO URTV, INC.

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the North Carolina Rural Economic Development Center to provide funds for expansions and improvements to the Public Access Media Center; and the associated budget amendment, in the amount of $24,960, to accept a grant for P.E.G. support funds from the Rural Economic Development Center and facilitate a pass-through to URTV, Inc.

The State of North Carolina has made funds available through a grant from the E-NC Authority, grant number: 2008-101-80315-102, to implement improvements to the public access media center managed by URTV, Inc. under a management agreement with the City of Asheville.

The purpose of this grant is to continue activities of the Public Access Media Center and provide needed capital expenditure improvements.

The City of Asheville submitted this grant on behalf of URTV, Inc. under the terms of the NC State Video Franchise Law which allows for the award of a grant up to $25,000 for P.E.G. channel operations. This is a matching grant with P.E.G. funding already allocated by the city to URTV, Inc. in the city's 2007/2008 adopted budget.

This action complies with the City Council Strategic Operating Plan in that it keeps costs for services to the public as low as possible.

Pros:
- Provides for expansion of media center technical capabilities by URTV, Inc.
- Improves cost effectiveness and support of public access media center activities conducted through the management agreement with URTV, Inc.
- Grant provides additional funding designated for public access television from a source other than the City of Asheville.

Con:
- None noted

There is no fiscal impact associated with this grant as it is a matching grant that matches funding previously provided to URTV, Inc. This action simply seeks City Council approval of the budget amendment needed to pass through the grant funds.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into an agreement with the North Carolina Rural Economic Development Center to provide funds for expansions and improvements to the Public Access Media Center; and the associated budget amendment, in the amount of $24,960, to accept a grant for P.E.G. support funds from the Rural Economic Development Center and facilitate a pass-through to URTV, Inc.

Councilman Mumpower felt that the state should spend their monies on our dysfunctional court system and not on a public access station.

Councilman Newman moved for the adoption of Resolution No. 08-211. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 343

Councilman Newman moved for the adoption of Ordinance No. 3666. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 - PAGE 69

L. ORDINANCE NO. 3667 – BUDGET AMENDMENT FROM A COMMUNITY DEVELOPMENT BLOCK GRANT AND AVAILABLE TRAFFIC CALMING FUNDS FOR THE BURTON STREET TRAFFIC CALMING PROJECT

Summary: The consideration of a budget ordinance, in the amount of $16,850, to set up the project budget for the Burton Street Traffic Calming Project.

This project includes the installation of five 14-foot asphalt speed humps along Burton Street from US 19-23 (Haywood Road) to Florida Avenue.

The Transportation & Engineering Department received and publicly opened bids on Friday, October 10, 2008, at 2:00 p.m. Two bids were received and opened, one from JLS Company, LLC for a total bid amount of $26,800 and the other one from Asphalt Unlimited of Asheville, Inc. for a total bid amount of $18,470. After a thorough review of the bid documents by the Transportation & Engineering Department, Asphalt Unlimited of Asheville, Inc., was found to be the lowest responsible bidder with a total bid of $18,470. All contract work was solicited in accordance with Federal guidelines including the Davis-Bacon wage requirements since Federal Funds are involved. At a pre-construction meeting that was held on Wednesday, October 15, 2008, it was agreed by the City of Asheville and the contractor that the signing items would be deleted from the contract thereby reducing the total bid to $16,850. The Public Works Department will install the appropriate signs at a potential savings of about $1,400.

The total anticipated cost to complete the project is $20,825 and is itemized as follows:

Design	$3,975
Traffic Calming Devices Construction	$16,850
Total =	$20,825

The project will be financed with monies received from a Community Development Block Grant (CDBG) in the amount of $15,000 that was approved during April 2007 and $1,850 from the traffic calming account. The $3,975 in funding for the design work came from the Fiscal Year 2007-08 Traffic Engineering operating budget.

Asphalt Unlimited of Asheville, Inc. has demonstrated in a satisfactory manner that it has satisfied all of the requirements as stated in the contract documents including evidence that it will adhere to the requirements of the City of Asheville's "DRUG FREE WORKPLACE".

Asphalt Unlimited of Asheville, Inc., a minority owned company, has submitted a responsive bid according to Minority Business compliance guidelines for the City of Asheville.

The construction time period for the project is identified as not more than 15 calendar days from the written notice to proceed as stated in the contract documents. The work to be performed shall commence from the written notice to proceed as stated in the contract documents. Depending on weather conditions, the contractor anticipates completing all work within five calendar days during the timeframe between November 3, 2008, and November 18, 2008.

This action complies with the City Council 2008-09 Strategic Operating Plan within the Green Focus Area by supporting traffic calming as a means to reduce vehicular speed and "cut-through" traffic to provide a better quality of life for the Burton Street community.

Pros:

- The subject project will satisfy the wishes of the Burton Street community as indicated in the verified 60% petitions.
- The revised bid amount of $16,850 for the construction of the Burton Street Traffic Calming Project is equitable, as compared to the engineer's estimate of $15,500, considering current economic conditions.

Con:

- The only foreseeable disadvantage of constructing the subject project is that up to 40% of the affected community members might be opposed to the recommended traffic calming devices/measures.

The total financial impact for the subject project is $20,825 including $15,000 from a CDBG grant, $1,850 from the traffic calming account, and $3,975 from the Fiscal Year 2007-08 Traffic Engineering operating budget.

Staff recommends that City Council adopt a budget amendment, in the amount of $16,850, to set up the project budget for the Burton Street Traffic Calming Project.

Councilman Mumpower felt that due to the economy we should conserve our resources and not spend it on non-essential things.

Councilwoman Cape moved for the adoption of Ordinance No. 3667. This motion was seconded by Councilwoman Jones and carried on a 5-2 vote, with Councilman Mumpower and Councilman Russell voting "no."

ORDINANCE BOOK NO. 25 – PAGE 71

M. RESOLUTION NO. 08-212 – RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AN AMENDED MEMORANDUM OF UNDERSTANDING FOR THE FRENCH BROAD RIVER METROPOLITAN PLANNING ORGANIZATION

Summary: The consideration of a resolution authorizing the Mayor to sign an amended Memorandum of Understanding (MOU) for the French Broad River Metropolitan Planning Organization.

The French Broad River Metropolitan Planning Organization is in the process of revising its Memorandum of Understanding. A new MOU is required to reflect the change in Lead Planning Agency (LPA) from the City of Asheville to Land-of-Sky Regional Council. NCDOT has also requested several other minor changes to the MOU, in part to bring it into compliance with the Open Meetings Law.

The change in Lead Planning Agency is based on a resolution of the Transportation Advisory Committee adopted in March 2008.

This action does not directly tie to the City Council Strategic Operating Plan, but it is a necessary action based on the changes in the structure of the Metropolitan Planning Organization.

Pros:

- Demonstrates continued cooperation by the City of Asheville in regional transportation planning.

Con:

- None noted.

Transferring the planning responsibilities to the Land of Sky Regional Council reduces unrecovered overhead costs for the City of Asheville.

City staff recommends City Council authorize the Mayor to sign a resolution adopting the amended Memorandum of Understanding.

Councilman Mumpower felt there is some merit to this action at some level; however, he was concerned that we support a large bureaucracy in the Land-of-Sky Regional Council.

Councilwoman Jones and Vice-Mayor Davis were very supportive of this action. This is a perfect example of Asheville being regionally geared.

Councilwoman Jones moved for the adoption of Resolution No. 08-212. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 344

III. PRESENTATIONS & REPORTS:

A. FUEL UPDATE

City Manager Jackson briefed Council on the fuel conservation measures in that the fuel supplies have stabilized and we have more than adequate reserves. We are shifting from short-term conservation to long-term planning.

Mayor Bellamy said there are continuing community meetings with municipalities in our county and other service providers to address the fuel issue as well.

Councilwoman Cape noted that the biggest energy peak is in the mornings. As we face the possibility of fuel oil shortages, she urged the community to consciously thing about conservation and turn down their thermostats, don't turn on extra appliances, etc.

B. ORDINANCE NO. 3668 – BUDGET AMENDMENT TO ACCEPT SPONSORSHIP FROM THE GROVE PARK INN FOR THREE FIREWORKS SHOWS IN DECEMBER 2008

Mayor Bellamy was pleased to announce an initiative with the Grove Park Inn, the Chamber of Commerce, the Buncombe County Tourism Development Authority, the Asheville Citizen-Times and hopefully the City of Asheville to look at ways to increase ways to attract people to our downtown during the month of December. The initiative is called "21 Days of Holiday Sizzle." The Grove Park Inn has offered to donate $40,000 to the City of Asheville for fireworks on December 6, 13 and 20, 2008, with each night being called "Seasonal Sizzle at Seven."

Mr. Ron Warren, the Grove Park Inn's Executive Director of Operations, was pleased to offer the City of Asheville a $40,000 gift to fund the downtown fireworks display at 7:00 p.m. on December 6, 13 and 20, 2008. The purpose of the display is to add more excitement to downtown during the upcoming holiday season. We have a unique variety of independent restaurants and shops and we hope that the fireworks will draw residents and visitors downtown to visit these shops and visit these restaurants, as we have a lot of people employed downtown. If Council chooses to accept this gift, they are ready to move forward in marketing these events, while working with City staff.

Mr. Kevin Schwartz, the Grove Park Inn's Assistant Director of Food & Beverage and board member of the Independent Restaurants Association (AIR), felt that engaging the community into action during these challenging times is the best course of action. The AIR is working on "Experience the Sizzle" in the restaurants. He explained some of the promotions they are working on to tie into the overall Seasonal Sizzle campaign. He felt this will be a well organized promotion to stimulate both the Asheville economy and the confidence of the Asheville community. He reminded Council that when you dine in local independent restaurants, a large amount of that stays within the community.

Mayor Bellamy explained that the request to Council is to oversee the fireworks portion. The location is the Public Works Department parking lot with the City in charge of that portion.

Councilwoman Cape suggested having a canned drive promotion be folded into this initiative, or some component where people are bringing into the community that which we can give back outward. Mr. Schwartz felt this is a great idea which he will pass along to the AIR.

In response to Vice-Mayor Davis inquiry about fireworks for Light Up Your Holidays, Ms. Diane Ruggiero explained that that was an event produced by an outside organization. The City produced the Downtown Countdown and First Night, which happened on New Year's Eve, which we are currently seeking a sponsor.

Mayor Bellamy said that this is not just about tourism, but about our local economy and making sure that the people who work in our community remain employed.

After a brief discussion about the next step, City Attorney Oast said that a budget amendment can be done at anytime.

Councilman Mumpower supported the concept; however, if there are City dollars involved for police, fire, traffic management, etc. he suggested they be raised by outside sources. Because we have established procedure in place for co-sponsorship of events, he could not support any motion that did not include language along the lines that the taxpayers will not incur any costs associated with this event.

City Manager Jackson said that his plan of action is to pursue three shows at an estimated cost of $35,000 and some to be left in reserve to offset police and fire overtime, if necessary.

The following individuals spoke in support of the City accepting the $40,000 gift from the Grove Park Inn for this initiative:

Joint President of the AIR
Mr. James Sheeler, west Asheville resident
Mr. Isaac Coleman
Ms. Raya June, Executive Director of AIR

Councilwoman Cape moved for the adoption of Ordinance No. 3668. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 - PAGE 73

C. CAPITAL IMPROVEMENT PLAN PLANNING PROCESS UPDATE

Chief Financial Officer Ben Durant said that the purpose of this presentation is to provide Council with an overview the City's existing and future debt capacity as it relates to a potential General Obligation Bond Issue.

During deliberations on the Fiscal Year (FY) 2008-09 Annual Operating Budget, City Council requested that staff evaluate the financial feasibility of issuing General Obligation Bonds to support an expanded capital improvement program for critical infrastructure and basic services. Staff was directed to report back to Council in the September/October timeframe to coincide with presentation of the First Quarterly Financial Report for FY 2008-09.

To assist with the feasibility study, staff engaged the services of Davenport & Company, a financial advisor that specializes in capital planning and local government finance. As part of the feasibility study, Davenport produced the following deliverables:

- A series of Peer Group Comparisons and benchmarks on the City's current and future financial position
- A detailed analysis of the City's Existing Debt Profile

- A series of key financial ratios indicating the City's existing debt profile and Future Debt Capacity
- An initial perspective on "Debt Affordability"
- Measurements of the impact of potential future borrowings to position the City to develop Financial Policies and Guidelines.

Mr. Bob High, First Vice-President/Head of North Carolina Group of Davenport & Company, LLC, reviewed the following aforementioned deliverables from the feasibility study:

He explained the goals and objectives being (1) develop a series of meaningful Peer Group Comparables and benchmarks with which to gain a perspective on the City's current and future financial position; (2) present a Detailed Analysis of the City's Existing Debt Profile; (3) apply the comparatives and benchmarks to a Series of Key Financial Ratios so as to Better Understand the City's Existing Debt Profile and Future Debt Capacity; (4) provide the City staff and Council with an initial perspective on "Affordability" of Potential Funding and obtain detail on the City's Capital Improvement Program such that we may measure the impact of specific projects (i.e. Debt Affordability); (5) use a number of Key Financial Ratios to measure the impact of Potential Future Borrowings and position the City to set/amend parameters in the form of Financial Policies and Guidelines; and (6) identify All Capital Improvement Projects and work towards establishing a Responsible Comprehensive Plan of Finance which produces minimum impact on the constituency while maintaining a healthy financial position.

Using charts he showed the market overview and regarding peer group comparisons he showed tax rates, assessed value, a 5-year assessed value growth, total general fund balance vs. revenue, debt per capita, debt vs. assessed value, and debt service vs. expenditures.

Using charts he explained the General Fund revenues, General Fund expenditures; General Fund revenues vs. expenditures; General Fund balance; and General Fund balance as of % of General Fund expenditures.

Using charts he explained the existing debt service, decline in debt service, payout ratio, debt per capita, debt vs. assessed value, and debt service vs. expenditures.

Mr. Mitch Brigulio, Associate Vice President of Davenport & Company then explained the following cases with charts to illustrate: (1) Case 1: maximize debt vs. assessed value – limit of 1.3% debt vs. assessed value – results (a) $169 Million of debt issued 2010-2016; (b) debt services increases from $4.9 Million to $16.9 Million in 2016; and (c) equivalent real estate tax impact of 11.6 pennies; (2) Case 2: maximize debt service vs. expenditures – limit debt service vs. expenditures at 10% - results (1) $128 Million of debt issued 2010 – 2016; (b) debt service increases from $4.9 Million in 2009 to $13.3 Million in 2016; and (c) equivalent real estate tax impact of 8.1 pennies; (3) Case 3: maximize debt without an equivalent tax impact (no structuring) – use decline in existing debt service to layer in new debt without an equivalent tax impact – results (a) $34.6 Million of debt issued 2010 – 2016; (b) no increase in debt service from 2009-2016; and (c) no equivalent tax impact; (4) Case 4: maximize debt without an equivalent tax impact (structured) – (a) interest only for one year, maximized 4:1 backfilling of principal (b) maintain payout ratio of at least 55% - results (a) $28.6 Million debt issued 2010-2016; (b) no increase in debt service from 2009-2016; and (c) no equivalent tax impact; (5) Case 5: additional $1,000,000 in revenue available for debt service – an additional $1,000,000 per year is available to pay debt service – results (a) $46.3 Million of debt issued 2010-2016; (b) debt service increases from $4.9 Million in 2009 to $5.9 Million in 2016; and (c) no equivalent tax impact; and (6) Case 6: $75,000,000 debt issued from FY 2010 – FY 2015 - $75,000,00 issued over 6-year Capital Improvement Plan – results (a) $75.0 Million of debt issued 2010-2016; (b) debt service increases from $4.9 Million in 2009 in 2016; and (c) equivalent real estate tax impact of 3.7 pennies.

He then explained the debt capacity/debt affordability summary of results as follows (1) Asheville can issue approximately $34 Million over the next five Fiscal Years without any equivalent tax impact; (2) Asheville can issue approximately $46 Million over the same period without an equivalent tax impact if $1 Million is dedicated to debt service vs. pay-go funding; and (3) A $75 Million borrowing program over the same period would require an equivalent tax impact of approximately 3.7 pennies.

Mr. Durant said that this study complies with Council's direction to initiate policy discussions regarding a potential General Obligation Bond issue to support critical infrastructure and services.

City staff recommends that City Council provide further direction to the City Manager to regarding issuance of General Obligation Bonds and development of an expanded Capital Improvement Plan.

Throughout discussion of Council members voicing their stance on this issue, Mr. High responded to various questions/comments from Council, some being, but are not limited to: what is an estimate of interest rates on debt; is Asheville too conservative; and how does a General Obligation Bond stack up against what people are choosing to invest in.

Mayor Bellamy said that this presentation was an overview the City's existing and future debt capacity as it relates to a potential General Obligation Bond issue. She didn't think there is any desire on behalf of Council to issue General Obligation bonds at this time, but we do need to plan for the future. It would be her goal that the underlying reason for any debt would be for quality of life for the individuals who live in our community. She would support looking at our community centers and other places within the community that need an infusion of renovations and improvements.

City Manager Jackson said that staff did an extensive inventory of the deferred maintenance, the current demands we are hearing from the community, and some long range planning for City facilities. At this point there are two questions. One is timing – is this the time to go to the next step. The second step is to seek community prioritization of that inventory. He recommended Council take this under advisement and look at it at the Council retreat or in a future worksession. But before we raise expectations and start seeking community input, he felt it is important to determine what really is affordable and then let's prioritize to that level.

City Manager Jackson said that what staff does with each project is to ask for fiscal impact, focusing largely on what is the operating impact. However, we will try to do some benchmarking on the secondary and economic impacts of public construction projects and provide information to Council.

In response to Mayor Bellamy's request that there be a component that we hire locally, City Attorney Oast said that we have a local vendor encouragement program that is administered by the City's Office of Economic Development.

At 7:15 p.m., Mayor Bellamy announced a short recess.

D. HOMELESS INITIATIVE ANNUAL UPDATE

Ms. Amy Sawyer, Homeless Coordinator, updated City Council on the implementation of the 10-year Plan to End Homelessness.

In November 2007, the City of Asheville, in partnership with Buncombe County, became the lead agency for the implementation of the 10-Year Plan to End Homelessness. The Plan is in its 3rd year of implementation through the efforts of the Homeless Initiative project, which supports

the City's goal of providing sufficient, safe, and affordable housing opportunities for all citizens. The Homeless Initiative Coordinator manages and tracks the progress of the initiative and is a member of the Planning and Development Department.

The Homeless Initiative also develops resources, promulgates policy, manages initiatives, and works with community agencies to develop and sustain programs that provide shelter, rent assistance, temporary housing, and services targeted to ending homelessness in Asheville and Buncombe County. There are 4 areas of focus for the Homeless Initiative:

Coordination of homeless and mainstream resources:

The Homeless Coalition, a core group of local service providers, along with other key community planning groups, meets regularly to evaluate and address community gaps in the areas of emergency services, housing, health, and substance abuse. The Coalition also collaborates with the Homeless Initiative, offering historical perspective, expertise and the Coalition's strong partnerships.

The Co-chairs of the Homeless Coalition are also members of the Homeless Initiative Advisory group, a group of volunteers from the non-profit, faith, and business sectors. The Advisory Group oversees the implementation of the 10-Year Plan by sharing, applying, and tracking groundbreaking strategies that make a permanent and measurable difference in the effects of homelessness on our community.

As a result of the extensive community networking among all partners, the third annual Project Connect, for anyone in the City or County experiencing homelessness, in tandem with the VA Stand Down for veterans experiencing homelessness, took place on September 12, 2008.

In summary, the coordination of resources include (1) Homeless Coalition (experienced service providers collaborate and act on solutions); (2) Homeless Advisory Group (volunteer leadership group oversees 10 Year Plan process); (3) other community groups (open communication and shared interests); and (4) Project Connect and VA Stand Down (exemplifies community commitment and partnerships).

Data Collection

The community needs the ability to collect homeless data to understand what has occurred in the past, what the current gaps and strengths of the homeless system are, and to document whether interventions are successful. The need for valid data has led to increased focus on cross systems data collection.

Data collection techniques include:

The Point in Time count, initiated by the Homeless Coalition, which continues to provide our community with a "snapshot" of how many people are homeless on the night of the count. The most recent count was on August 27th, 2008. 592 people experiencing homelessness were documented, which is a 17% increase from the January, 2008 count. Of that group, 148 were experiencing chronic homelessness, an 8% reduction from January's count.

Homeless Information Management System (HMIS), will provide our community with a more dynamic and valid way to evaluate the needs and services provided to people experiencing homelessness. While the number of agencies using the system is growing, there is not yet enough data to draw conclusive results on successes and gaps in our service system from HMIS alone. The ultimate goal is to have all homeless service providers participate in the consolidation of data through the HMIS system.

Review of existing data from the jail system, the mental health system, veterans' services system, and the health system.

Housing First outcomes are currently being evaluated by the University of North Carolina, Chapel Hill Jordan Institute. Housing First allows tenants to access affordable housing and the supportive services necessary to maintain that housing.

In summary, data collection techniques include (1) point in time count (a) "snapshot" of homeless population; (2) review of existing data sets; (3) HMIS (a) can provide up-to-date detailed, consistent information; (b) will produce reports for federal, state and local funders; and (c) HMIS used at Project Connect; and (4) Housing First Research at UNC-Chapel Hill (a) reviewed history of service use two years prior to entering supportive, permanent housing and two years afterwards; and (b) research completed, evaluation underway.

Funds Management & Development

Homeless funding from federal, state, and local governments support projects that provide outcomes based on 10-Year Plans. Working with these funders allows the Homeless Initiative to develop and support local programs that meet community needs and the needs of people experiencing homelessness. Examples of such funding are: Continuum of Care funding, State Housing Support Trust funding, VA Grant and Per Diem for Homeless Veterans, Homeless Veterans Reintegration Program, Veterans Workforce Investment Program, CDBG funded homeless programs, and HOME funded rent assistance housing programs.

The Homeless Initiative works with other local funding sources building awareness of homeless issues. For example, the Asheville Downtown Association's Foundation (Spare Change for Real Change), the Community Foundation of Western North Carolina, and the United Way have worked with the Homeless Initiative.

In summary, regarding funds management and development (1) federal (a) continuum of care; (b) Community Development Block Grant homeless services; (c) HOME rental assistance; and (d) Veterans funds; (2) State (a) Housing Support Team grant; and (b) 10-Year Plan Technical Assistance grant; (3) Local – City and County; and (4) foundation funding and local donations.

Increasing Housing and Services Resources to Move People out of Homelessness

Buncombe County continues to work on a crisis-response plan, including a crisis assessment center. The Neil Dobbins center is now open for mental health and substance abuse crisis intervention services, and there are two wet shelter beds each for men and women. The City provided $86,000 in 2006 CDBG funds to support the County's renovation of the facility. Law Enforcement officers in Asheville and Buncombe County have been trained in how to use these resources through Crisis Intervention Training (CIT). Buncombe County has contracted to provide "wet shelter beds" with ABCCM's Women and Children's Shelter (2) and the Western Carolina Rescue Mission (4).

The Western Highlands LME has hired a housing specialist to coordinate housing resources within their eight county catchment area for mental heath, developmentally disabled, and substance abuse populations.

The Housing Authority of the City of Asheville has changed priorities for public housing to focus on just two categories: people experiencing chronic homelessness who are also receiving case management services, and domestic violence survivors living in a shelter, allowing people who are identified as the most vulnerable in the 10-Year Plan to obtain housing.

Western North Carolina Community Health Services received 16 Section 8 housing choice vouchers to provide supportive housing services through the Housing Opportunities For persons With HIV/AIDS (HOPWA) program.

The VA received 35 Section 8 housing choice vouchers and funding for one staff position that provides supportive housing services through the Veterans Administration Supportive Housing (VASH) program.

As part of the Department of Housing and Urban Development Continuum of Care funding, Homeward Bound received $44,768 in bonus funding for the community to be used for tenant based rental assistance over two years.

ABCCM received a national grant from the VA and Federal Home Loan Bank. A motel facility was obtained in 2007. In May 2008 the 200-bed facility opened and includes emergency beds, 100 transitional beds, and 40 permanent supportive housing SRO rooms. Veterans Based on successful performance, the ABCCM Veteran's Restoration Quarters (VRQ) was named "Best Practice of the Year" on August 5, 2008 by Department of Labor and VA Homeless Providers. The American Legion Post 526 meets at the VRQ, and is run by formerly homeless veterans for our homeless vets.

The SSI/SSDI Outreach Access and Recovery (SOAR) Project, received seed money from Buncombe County. This project will build community capacity to complete successful applications in a coordinated fashion through caseworker and clinician training, building relationships with records departments, and communicating with the Social Security Administration offices in order to help people access social security benefits in a reasonable amount of time.

In summary, (1) collaborative problem solving is needed to ensure success of the 10-Year plan; (2) data about interventions and programs is vital to understand where and how to invest energy and resources; and (3) investment is needed to further 10-Year Plan goals. The Homeless Initiative Advisory group will identify which priorities to focus on for the coming year.

The Homeless Initiative implements the City's 2008-09 Strategic Plan goal of affordability by supporting initiatives that will end homelessness, the Continuum of Care Plan and the 10-year Plan.

City staff recommends that City Council accept this annual update report on progress to date on the implementation of the 10-year Plan to End Homelessness.

Mayor Bellamy was pleased to report that as of the publication of this report, there are currently a total of 197 emergency shelter beds, 344 transitional beds, and 214 people in permanent, supportive housing. Eighty-five percent (85%) of the people who experienced chronic homelessness that moved into the City's initial 33 Housing First units built in Asheville have remained housed, which serves as a model for housing people who have experienced chronic homelessness and is further being evaluated by the UNC School of Social Work.

Vice-Mayor Davis explained that the City Attorney is working on a formal City-County Homeless Initiative Advisory Committee.

At the request of Vice-Mayor Davis, Ms. Sawyer explained how the HMIS will provide our community with a more dynamic and valid way to evaluate the needs and services provided to people experiencing homelessness. As agencies sign new contracts, those agencies are using the HMIS and we are developing a consolidation of data to provide Council.

Mayor Bellamy reiterated that the most recent count on August 27, 2008, was 592 people experiencing homelessness, which is a 17% increase from the January, 2008 count. Of that

group, 148 were experiencing chronic homelessness, an 8% reduction from January's count. She noted that we are on target to end chronic homelessness with the 10-Year Plan. She asked if there was any way we can document where those 17% of homeless people are coming from, e.g., people who are not from Asheville, people who have no families ties, or people who are choosing to be homeless in Asheville. In response, Ms. Sawyer said that HMIS documents the last address of people, but in talking with service providers, she has also heard that family homelessness is increasing dramatically and people who have housing are needing transportation to work or food.

When Mayor Bellamy asked how we can focus on making sure we can address the populations where families are having hard times, etc., but still identify ones that are coming here by choice to be homeless. Ms. Sawyer said there are different ways of supporting people, depending on their characteristics. We know certain housing interventions for veterans that may not be as successful for families. What we are doing is looking at the population and providing supports that directly meet their needs based on best practices.

When Mayor Bellamy offered the City's support in helping Ms. Sawyer get the agencies to enter data for the HMIS, Ms. Sawyer said that she is educating agencies on how to run the system and how the system will be a benefit for everyone.

On behalf of City Council, Mayor Bellamy thanked Ms. Sawyer for her efforts. She then said that Ms. Sawyer will be reporting back to Council again in six months. She noted the Homeless Initiative Advisory Committee will have appointments from the City and County. She also said that the recently formed Task Force, looking at some of those issues identified by the Buncombe County Tourism Development Authority, will probably have some good ideas as well that could be used going forward.

E. URTV PRESENTATION

Ms. Pat Garlinghouse, Executive Director of URTV Inc. provided Council with the URTV's Q1'09 Operations Report for the months of July, August and September 2008. She explained what public access does, how it is really committed to media, and how in some places it's the area's only media center. She explained that URTV is unique in WNC! In two short years we've achieved proven success. Webcasting and Video-On-Demand (VOD) are up and running. The website has a new look and we welcome any and all suggestions. For those who would rather watch programming on their own schedules, VOD is your choice. Otherwise, you may watch real-time URTV on your computers.

Since the name Public Access, the 'P' in PEG, has long since been abandoned, URTV can now begin its campaign as a community Media Center, which it is. For the most part, public access throughout the country stopped using the old name as far back as the early 90s. Because in the 90s public access became community media by offering services as assistance with information technology needs, everything from consulting to web design; radio and television announcements and interviews, depending on the technology available; television production classes, everything from digital camera and editing to studio and radio production; training for NPO staff in computerized technology; involvement of youth and seniors, who may not be as familiar with digital technology as the mainstream, in beginning production or TV spots; and of course, media literacy classes in the schools, that replaces some of the skill sets that schools find themselves unable to offer. Using television, Internet and radio, community media centers are able to craft a customized fit for all NPO's media service needs. How URTV fits into this design will be discussed and demonstrated over the ensuing months.

Operation and membership (users) of URTV remains stable. The population of Asheville and Buncombe County can sustain an average of 300+ participating members. In the first quarter of 2009 earned income totals = $7,000. Money Market total is $101,294. ($50,000 will need to be withdrawn for Fiscal Year 2009 and again $50,000 for Fiscal Year 2010.) The annual budget for

Fiscal Year 2009 is $248,391. (This includes $45,000/yr. rent and $136,273 personnel services for 3.5 full-time employees).

There are 300+ members; $5:$1 (For every $1 invested, $5 actually received); and 1 commercial violation suspension on air.

In response to Mayor Bellamy's request, City Attorney Oast said that he would provide Council with information on (1) when our contract expires with Charter Communications; (2) when we can begin re-negotiating; and (3) how can we entertain other contracts and how that will impact the funding for URTV.

On behalf of City Council, Mayor Bellamy thanked Ms. Garlinghouse for her informative presentation.

F. DOWNTOWN MASTER PLANNING PROCESS UPDATE

Ms. Sasha Vrtunski, Project Manager, said that the Downtown Master Plan process has been lengthened to work on specific issues and look for areas of compromise, so that the overall process is successful. Staff expects the master plan to come to City Council in early 2009.

The Asheville City Council approved funding for the Downtown Master Plan in 2007. The Selection process began in late summer 2007 and Goody Clancy was selected as the consultant team in February. The consultant team began work in late March and their first visit in April, 2008. There have been a series of public meetings beginning in May, with the last one in September. The citizen participation and interest in this process has been very high.

As a part of this process, there is an Advisory Committee made up of 30 citizens representing a wide variety of interests in the downtown. This committee is a sounding board for the consultants to make sure all the voices are heard in the process and that the public process is a quality one. The Advisory Committee met on September 8 and reviewed a very early draft of the plan, and unanimously felt that a public meeting to review it would be premature, and could undermine the success of the plan's adoption and implementation. They decided that they would like to spend some time to see if gaps can be closed

Currently, we have a sub-group of the Advisory Committee that is meeting with a local mediator/facilitator. The group is working on finding the "middle way" for certain development issues that takes into account the needs of developers and the community. So far, the group has had productive meetings. This smaller group will report back to the Advisory Committee, and the consultants. Ultimately, the recommendations will go to the consultant team, who will decide on the content of the draft plan. The goal is to finish this process by mid-November, and begin the process of reviewing it with the public and involved city boards.

Because of the Thanksgiving holiday, and the need to publicize the next public meeting, it will not be until early December or January that a public meeting could be held to review the draft plan. Clearly, this is not as fast a process as Council and the larger community expected, but perhaps staff and the consultant team were too ambitious in terms of finishing a plan that will address several contentious and complicated issues. After the public meeting and a comment period, the final draft would come before City Council for consideration.

On behalf of City Council, Mayor Bellamy thanked Ms. Vrtunski for her update.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE MASTER PLAN AND REZONING FOR THE PROJECT IDENTIFIED AS HORIZONS, LOCATED AT 136, 176 AND 180 MERRIMON AVENUE AND 17 AND 23 ELOISE STREET FROM

HIGHWAY BUSINESS DISTRICT, COMMUNITY BUSINESS I DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO URBAN VILLAGE DISTRICT FOR A MIXED USE DEVELOPMENT

Mayor Bellamy said that this public hearing was continued from January 15, 2008, at the applicant's request in order to work with the neighborhood, especially since a valid protest petition was submitted, which remains in effect. Then again on July 15, 2008, the public hearing was continued to October 28, 2008, at the applicant's request in that it became necessary, due to the recent economic conditions, for the ownership group to try to secure financing and/or additional partners to help with the project economics.

Urban Planner Julia Cogburn said that this is consideration of a request for a twelve (12) month additional continuance of the public hearing on the rezoning petition for the Horizons Urban Village Project.

On October 15, 2008, a letter was received from Mary Kocot from LandDesign which reads "The ownership group (Mr. Foster Shriner, Mr. Chris Peterson and Mr. Cam Pace) of the proposed "Horizons" Urban Village project have asked me to formally request an additional twelve (12) month extension on the Urban Village Rezoning currently in progress. It is and has always been the desire of the partnership group to create a wonderful project on the Merrimon Avenue site as a gateway point to the City. The continued economic slowdown is hampering their efforts on securing financing and investors for the project. We are hopeful that this additional time will allow the economic market to improve and the project to move forward for approval."

In November of 2007, the Asheville Planning and Zoning Commission reviewed a rezoning petition for the Horizons Urban Village project located on an 8.54 acre site on Merrimon Avenue. The Commission voted to recommend the rezoning (7-0) and the conceptual site plan (5-2) presented by the developers/property owners of the project, and the matter was scheduled to be heard by Asheville City Council in January of this year. At that time, the developers requested a six (6) month continuance in order to review the site design particularly as it related to the height of some of the buildings. Building height was a major issue for the adjoining neighbors of this project. In June of this year, the property owners requested an additional three (3) month continuance primarily due to economic conditions.

The property owners are now requesting an additional twelve (12) month continuance due to the continuing economic slowdown. The ownership group is exploring financing, partnerships, and investors with hopes of proceeding with an urban village project. Some of the original development partners are no longer with the project.

Pro:

- Allows the property owners additional time to work on the details of an urban village project for this property.

Con:

- Gives extensive continuation to a project that was first submitted to the City of Asheville in June of 2007.

Although the extent of this continuance is contrary to past practice, staff is supportive of the request to continue the public hearing until October 27, 2009. We recognize that current economic conditions are impacting development here in Asheville as in other parts of the country. The Asheville City Development Plan 2025 promotes this area as an urban village and staff would like to see such a project on this site which is currently zoned Highway Business. The property is in an important gateway to the Central Business District and its development will be significant to the Merrimon Corridor as well.

In response to Councilman Mumpower, City Attorney Oast said that Council does not have a formal policy regarding continuances.

With the understanding that continuance requests will be determined on a case by case basis, Councilman Mumpower moved to continue this public hearing until October 27, 2009. This motion was seconded by Councilman Russell.

Ms. Cogburn responded to various questions/comments from Council, some being, but are not limited to: since there is a "for sale" sign on the property, how will that affect this project; how will new regulations be addressed between the time the application was applied for and the ultimate public hearing; why don't the applicants withdraw the application and re-submit when the economic condition improves; and if the property is sold, what uses will be permitted.

The motion made by Councilman Mumpower and seconded by Councilman Russell carried on a 6-1 vote, with Councilwoman Jones voting "no."

B. PUBLIC HEARING TO CONSIDER THE ADOPTION OF AN ORDINANCE DESIGNATING THE PROPERTY KNOWN AS THE LEGAL BUILDING, LOCATED AT 10-14 SOUTH PACK SQUARE, AS A LOCAL HISTORIC LANDMARK

Mayor Bellamy said that on October 10, 2008, Stacy Merten, Director of the Historic Resources Commission, received the following letter from Gerald Green, Principal of GreenPlan: "I am providing this letter as a follow up to our telephone conversation this morning in which we discussed the request for historic property designation for the Jackson, Westall, and Commerce Buildings. This request is scheduled to be heard by the Asheville City Council at their October 28, 2008, meeting. The Historic Resources Commission provided a unanimous recommendation for approval of the requested designation. Upon consideration of the current economic condition we have decided that this is not the appropriate time to pursue this designation. With the designation comes a 50% reduction in the property taxes for the buildings. While we agree with the Historic Resources Commission that the buildings are worthy of the designation, we want to contribute fully to the City of Asheville's revenues during this difficult time. Therefore, we are withdrawing the request. We likely will pursue the designation when the economy improves, hopefully in the near future. My understanding based on our conversation this morning is that another review of the request by the Historic Resources Commission will not be required provided we pursue the designation within a year or so. Please let me know if this is incorrect."

C. PUBLIC HEARING TO CONSIDER THE ADOPTION OF AN ORDINANCE DESIGNATING THE PROPERTY KNOWN AS THE JACKSON-WESTALL BUILDING, LOCATED AT 20-22 SOUTH PACK SQUARE, AS A LOCAL HISTORIC LANDMARK

Mayor Bellamy said that on October 10, 2008, Stacy Merten, Director of the Historic Resources Commission, received the following letter from Gerald Green, Principal of GreenPlan: "I am providing this letter as a follow up to our telephone conversation this morning in which we discussed the request for historic property designation for the Jackson, Westall, and Commerce Buildings. This request is scheduled to be heard by the Asheville City Council at their October 28, 2008, meeting. The Historic Resources Commission provided a unanimous recommendation for approval of the requested designation. Upon consideration of the current economic condition we have decided that this is not the appropriate time to pursue this designation. With the designation comes a 50% reduction in the property taxes for the buildings. While we agree with the Historic Resources Commission that the buildings are worthy of the designation, we want to contribute fully to the City of Asheville's revenues during this difficult time. Therefore, we are withdrawing the request. We likely will pursue the designation when the economy improves, hopefully in the near future. My understanding based on our conversation this morning is that another review of the request by the Historic Resources Commission will not be required provided we pursue the designation within a year or so. Please let me know if this is incorrect."

D. PUBLIC HEARING TO CONSIDER THE VOLUNTARY ANNEXATION OF TWO LOTS LOCATED ON CROWELL ROAD AND FARM STREET

ORDINANCE NO. 3669 – ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE TWO LOTS LOCATED ON CROWELL ROAD AND FARM STREET

Mayor Bellamy opened the public hearing at 8:13 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance for the voluntary annexation of two lots located on Crowell Road and Farm Street. This public hearing was advertised on October 17, 2008.

Crowell Park Apartments, LLC has petitioned the City for the annexation of two parcels located at Crowell Road and Farm Street (PINs 9617.08-79-9568 and 9617.08-89-2443) containing approximately 3.53 acres.

The property is located approximately a quarter of a mile (driving distance) from Smoky Park Highway. The property is contiguous at one point (63 feet in width) to the City of Asheville's primary corporate limits and is, therefore, subject to the standards for annexation of contiguous areas contained in N. C. Gen. Stat. sec. 160A-31. The parcel and the petition meet all applicable requirements of the State of North Carolina.

The property contains the Crowell Park Apartments, comprised of 63 affordable dwelling units. A tax valuation has not yet been placed on this development as it has only recently been completed. Before development, the land had a tax appraisal of $372,900.00.

Pursuant to N. C. Gen. Stat. sec. 160A-31 a public hearing must be held prior to adopting any ordinance for voluntary annexation. If City Council decides to proceed with this request, it is proposed that the annexation become effective on December 31, 2008.

This action complies with the Strategic Operating Plan in that it complies with the Council goal of working to enable voluntary annexation to support healthy growth of the City.

Pro:

- Complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas and meeting the goal of continued use of the urban development tool of annexation in providing for the orderly growth of the City.

Con:

- Marginal increase in service costs.

The fiscal impact of this annexation cannot be accurately assessed as the County Tax Office has yet to place a value on the newly developed land.

Information from the Fire Department indicates costs would include a $100.00 debt service payment to the Enka Fire Department and emergency responses. The Department indicates that these expenses would be negligible.

The Police Department indicates that this annexation should not have a significant impact on the operation.

City staff recommends City Council adopt the ordinance annexing the property set forth in the petition.

Ms. Cindy Weeks, representing Mountain Housing Opportunities (MHO) (developer of Crowell Park Apartments), said that this apartment complex was developed with housing tax credits. The reason they are voluntarily annexing is because of the cooperation they have received from the City with loans and pass-through home funds for this project. MHO pays full property taxes. They believe this project will be appraised for $4.4 Million and based on past assessments received from the County would increase their taxes by $18,522, but they will be getting police and fire protection.

Mayor Bellamy closed the public hearing at 8:15 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Davis moved for the adoption of Ordinance No. 3669. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 25 - PAGE 75

V. UNFINISHED BUSINESS:

Minority Business Coordinator Brenda Mills said that City Council requested living wage policy recommendations from staff in consideration of adoption for contracting with the City of Asheville

Analysis of research on the living wage includes the following information:

1. Contracting statutes for the State of North Carolina as it pertains to award of contracts.

Review of Statutes: Statutory bidding requirements apply to the following types of contracts: (1) contracts for the purchase of apparatus, supplies, materials, or equipment and (2) contracts for construction or repair work. These genera1l statutes provide instructions on the award of these particular contracts (GS 143-128 and GS 143-129 and GS 143-131) which specifically states that "contracts shall be awarded to the lowest responsible, responsive bidder, taking into consideration quality, performance, the time specified in the bids for performance of the contract." These areas of contracting are not subject to the living wage as part of the basis for award as they have defined award criteria.

Contracting for professional services has general statutes which govern the award of these contracts such as architectural and engineering services. Because the living wage is targeted to jobs that are low skill and non-trade which tend to be paid below living wage rates (current rates are explained in #3), professional service contracting does not necessitate and cannot be subject to a living wage.

The other area of contacting is for general services which includes but is not limited to grounds maintenance, commercial cleaning services, trash collection, catering, etc. While service contacting is discussed in the general statutes, there are no specific criteria for award only that price is not the only consideration. Service contracts take into account ability to perform based on the specific qualification and experience criteria for the services needed. This type of contracting has been the area where the living wage has been systematically applied keeping in mind that public bidding has to be fair, the unit of government has to be willing to the increase in expenditures on this contracts in order to keep the bidding process fair to all interested vendors.

2. Living wage policies of other municipalities and counties and details of those

policies.

Review of Other Polices: Currently, the City of Durham (2006) and Durham County (2004) have living wage policies which they apply to general service contracting. They have one wage rate which is reviewed by the respective governing bodies every two years for inflation and cost of living increases.

Durham County is the only entity that monitors contracts for the living wage through their purchasing division staff. The City of Durham does not directly monitor their contracts. Both agree that the change significantly increased their expenditures for general service contracting.

3. Current City contracts that would be subject to a living wage policy and the status of the hourly wage paid on these contracts.

Analysis of Current Service Contracting: City staff looked at the current service contracting in the following areas: mail management, janitorial services, waste services, cemetery services and mowing services. For mail management, waste services and cemetery services, there is a living wage ($10.86 per hour with benefits or $11.35 without benefits) being paid on the contracts for the City of Asheville. The remaining contracts for janitorial and mowing do not pay the current living wage rate. The mowing service contract does pay in the range of $9.00 to $10.00 an hour and with janitorial, the rate is $7.00 to $8.00 an hour. For janitorial contracts in particular, these jobs are contracted labor. The majority of these employees work full-time jobs.

4. Implementation of a living wage policy to the City's contracting process.

Program Considerations: The implementation of a proposed living wage policy on general service contracting would increase the cost of contracting expenditures for the City. The City would agree to pay the additional cost of vendors who pay a living wage (see #3 for living wage explanation) when contracting. The approval of a policy would include the following:

A. Consider the living wage provisions for general service contracts above a certain threshold. Currently, the State of North Carolina requires bidding requirements at $30,000 and above for contracting.

B. Appointment of staff for monitoring of general service contracts with living wage provisions for compliance. It would be feasible for the first year to consider monitoring all of them. There would need to be requirements by contractors to provide documentation duly notarized to City staff during specified intervals for the duration of the contacts.

C. City Council would consider cost of living and inflation for review of a living wage rate annually or more as council deems necessary. Setting one rate has been the norm for other local units of governments. City Council would be provided annual update information on general service contracting by staff.

D. All vendors would be advised about the living wage provision through marketing efforts. These would include the city's access channel, website, contracting documents with special emphasis to notify interested bidders on new provisions with an affidavit of the successful contractor to provide payroll and other required paperwork to the City for review as set out in the documents, modification of the current vendor application to include the living wage provision and contact current general service contract owners of the change and the expectation for future contracting with the city.

E. In order to keep general service contracting fair, the City of Asheville would have to bear the increase cost of the living wage provision. This would keep contracting with the City fair to all businesses in the bidding process and award

would not be determined beyond other requirements, on the ability to pay a living wage to employees.

F. Exceptions to the proposed living wage policy would be sole source contracts, emergencies, projects that run over budgeted costs, energy savings, information technology, contracting with other governmental agencies and contracting with non-profit agencies.

Pros:

- Steps toward increasing pay to lower wage or non-trade employees in the general service contracting area for the City of Asheville.
- Encouragement on the business community to work towards paying a living wage.

Cons:

- Limitations by North Carolina bidding laws to the general services area of contracting
- Increase to service contracting dollars to be absorbed by the City of Asheville
- Living wage is not a permanent wage change for employees of businesses who work under contracts that expire.

The exact increase in dollars is not known at this time. It would be necessary to review current contracts to look at the impact of a living wage if applied to what the City is currently expending for general service contracts.

City staff is prepared to follow City Council's policy direction on this matter as outlined above.

After a brief discussion, it was the consensus of the majority of Council to refer this matter to the Finance Committee in order to (1) look more into the estimated fiscal impact to the City; (2) the best estimates for the different policies and how they would look financially; (3) the administrative cost to the City in terms of staffing to monitor a policy; and (4) what the administrative costs would be to the contractors. Councilman Mumpower suggested stakeholder input be sought with perhaps an economist from UNC-Asheville.

Mayor Bellamy said that there would be no public comment at this time as it has been referred to the City Council's Finance Committee. Public comment will be allowed at that meeting which is on November 11 at 3:00 p.m. in Room 209 of the City Hall Building. At such time when the matter is before City Council for a formal vote, public comment will be taken then.

VI. NEW BUSINESS:

A. RESOLUTION NO. 08-213 - RESOLUTION AUTHORIZING EXECUTION OF DOWNTOWN DEVELOPMENT AGREEMENT

RESOLUTION BOOK NO. 08-214 - RESOLUTION DECLARING THE INTENT OF THE CITY OF ASHEVILLE TO REIMBURSE ITSELF FROM THE PROCEEDS FOR CERTAIN OBLIGATIONS TO BE EXECUTED AND DELIVERED IN THE YEAR 2008 FOR CAPITAL EXPENSES INCURRED

RESOLUTION NO. 08-215 - RESOLUTION AUTHORIZING THE CITY MANAGER TO AMEND THE CONTRACT WITH KIMLEY-HORN TO SERVE AS THE OWNER'S REPRSENTATIVE IN THE DESIGN AND CONSTRUCTION OF A PARKING GARAGE LOCATED AT 51 BILTMORE AVENUE

Director of Transportation and Engineering Cathy Ball gave a broad overview of the following items in order to move forward with a public private partnership to construct a parking garage on 51 Biltmore Avenue. Staff is requesting the following actions:

- Adoption of a resolution authorizing the City to enter into the Downtown Development Agreement;
- Adoption of a reimbursement resolution to allow certain expenses to be paid from proceeds of financing; and
- Adoption of a resolution authorizing an amendment to the City's contract with Kimley-Horn engineers to act as the City's representative during design and construction.

The City of Asheville currently provides public parking in Downtown Asheville as an economic development incentive for businesses, and as a public convenience for citizens and visitors. The City currently operates a parking system that consists of three parking garages, several surface parking lots and on-street parking. A parking study prepared by Kimley-Horn and Associates this year evaluated the demand for parking versus the supply in the Central Business District. The study determined that the south Biltmore Avenue area had a current peak deficit of parking in the amount of 622 and a normal deficit of 476 parking spaces. It was the only area of downtown shown by the study to have both current day and evening/weekend deficits and projected future day and evening/weekend deficits. The proposed location of the garage is a private surface parking lot with approximately one hundred parking spaces.

Project Description - The project is a mixed-use building that includes: a Starwood Aloft Hotel; sub-leased retail spaces along Biltmore Avenue; a City owned parking garage (431 spaces); and potential second phase along Biltmore Avenue and Lexington Avenue to include workforce housing units. The second phase portion of the project will come back through the review process including the Downtown Commission. Creating a public/private partnership to develop a parking garage in this location was one of the specific goals in the City's 2006 Downtown Parking Action Plan. This site is also identified in the City Development Plan 2025 and Center City Plan as both a potential parking garage site and as a possible location for a catalytic development because of its important location and size. Catalytic developments are projects that because of their size, location or programming have the potential to stimulate additional investment or provide missing uses that are critical to maximizing downtown vitality.

The initial concept for the building was nine levels above grade on the Biltmore Avenue site and four levels under ground. The Downtown Commission was concerned about the height of the building, parking spaces fronting on Biltmore Avenue and the lack of retail space on Biltmore Avenue. The design team addressed Downtown Commission concerns and moved the lobby to the second level and created a balcony and expanded the footprint of the building to the Hot Dog King site. The Downtown Commission has approved the project.

The current proposed parking garage will have 431 spaces. The garage has access points from three streets: one-way in from Biltmore Avenue and Aston Street, and two-way movement at Lexington Avenue. Several garage levels are below grade with the design taking advantage of the natural terrain across the site to eventually meet Aston Street and Biltmore Avenue at grade. The retail spaces and hotel line and top the garage along Biltmore Avenue and the hotel tops the garage along Aston Street. Along Aston Street the garage fronts directly at the street and provides a driveway into the garage. Public restrooms are provided in the garage with direct access from Aston. Because of the presence of the garage on the sidewalk edge, a space for public art will be provided to soften the façade and create pedestrian interest.

The building is seven stories along Biltmore Avenue and measures about 95 feet to the top of the roof structure. Ground level retail space along Biltmore Avenue will total about 4,800 square feet which will likely be subdivided and leased depending on demand. The hotel use occupies the second floor and above as measured from Biltmore Avenue and has 145 guest rooms. A balcony space for the hotel is located on the second level of the building and will, along with the retail below, serve to activate the street. A hotel amenity deck is provided at the top of the garage level.

Phase Two areas of this project are made up of a long narrow area lining the garage along Lexington Avenue and a smaller area south of and adjacent to the retail spaces on Biltmore Avenue. Public Interest Projects (PIP) will hold these properties and develop plans for them at a later date.

Project Cost - The cost associated with building a parking garage includes property acquisition, design and hard construction.

When PIP, the owner of the property at 51 Biltmore Avenue, approached the City with a public/private partnership, they did not want to sell the property but rather proposed to lease it to the City. Following the financial analysis, the City determined that it saved the City approximately $1 million dollars over the projected life of the deck to purchase the property rather than lease, and PIP agreed to sell the property. The price agreed upon for the garage site was $3,110,000.

During the course of the last year, staff determined that the addition of the Hot Dog King property adjacent to 51 Biltmore Avenue, might save the City significant construction costs. Our parking consultant, Kimley Horn Associates, evaluated the potential to expand the footprint of the garage to the Hot Dog King property. Preliminary cost estimates indicate that the City would save $5,200 per parking space or $2,272,400 by utilizing the Hot Dog King property. In light of the potential savings to the City, PIP sought and obtained a contract for the Hot Dog King property in the amount of $1,450,000. Although this is higher than the appraised value, the net construction cost savings after purchasing the Hot Dog King property is approximately $800,000.

Kimley-Horn has developed an opinion of probable cost for the parking garage on the expanded footprint of $1,800 for design and $26,200 for hard construction. The total estimated cost for design and hard construction of the 431 car parking garage is estimated at $12,236,000.

PIP has agreed to sell a portion of the property at 51 Biltmore Avenue and the Hot Dog King Property for $4.56 million dollars. This sale would include all cross easements and air-rights necessary to build the project as currently designed. Additionally, the City would have staging rights for the project on PIP's remaining property along Lexington, as well as the "right of first offer" for the property owned by PIP at 85 South Lexington Avenue, adjacent to the site, to allow for possible efficient expansion of the garage.

Easements and Air-rights - In efforts to facilitate a good urban design of the project to include mixed-uses, there are a number of easements and air-rights required for the project. The project fits together like a three dimensional puzzle. The lowest level of the parking garage fronts under the hotel on Biltmore Avenue, requiring subjacent rights. Some of the hotel will be constructed over the parking garage along Aston Street, requiring air-rights. PIP will retain air-rights over the parking garage on the Hot Dog King property for a future residential development. Discussions among legal counsel for the parties have indicated that a condominium form of ownership, together with condominium agreements, may be the best legal structure for this Project. The legal effect of the condominium would be the same as the other more conventional instruments that are described in the Agreement, but would be easier to administer. The Downtown Development Agreement allows for this form of ownership as well.

Project Terms - As part of the Project, MHG and PIP will receive certain considerations for parking in the form of reserved spaces or reduced rates. The term of the parking arrangement is proposed for sixty years. McKibbon Hotel Group, MHG, has requested a maximum of 35 monthly 24/7 reserved parking spaces on the Biltmore Avenue level. They have requested an additional 115 evening/weekend parking spaces.

Because the number of spaces anticipated to be used by PIP and MHG will require that a proportionate amount of the financing for the deck to be provided at a taxable rate, the costs associated with those spaces are higher. Accordingly, the rate that the City will charge for those

spaces will be higher than for restricted spaces. In order to cover this additional expense, the City will charge about $39 per month more for each "taxable" space.

MHG and PIP have requested that this taxable monthly space premium be waived if private sector involvement in the construction phase of the Project generates further savings for the City. Staff would agree with this provided that hard construction cost t is reduced by at least $1,000 per space. MHG may be able to reduce the construction cost through economies of scale by building the hotel and parking garage at the same time. With this in mind, the City and MHG propose to enter into an agreement whereby MHG will manage the design and construction of the hotel and the deck. The Downtown Development Agreement statute specifically contemplates such an arrangement, and further provides that projects constructed in this way are not subject to public bidding or contracting procedures.

PIP has requested that the City adopt a rate structure that provides favorable rates for downtown workforce housing in return for PIP giving up their dedicated or taxable spaces. PIP included a stipulation in the parking agreement with the City and PIP that would allow them to get 50 spaces if the City did not allow a special rate intended for workforce housing. The Agreement requires PIP and the City to commit to a definite number of spaces prior to the City seeking approval of its financing, so that the taxable impact of those spaces will be known in advance.

Public Input and Approvals - This project is consistent with the current draft recommendations of the Downtown Master Plan, City Council's Downtown Parking Plan, Council's Strategic Goals and the 2025 Plan.

The Downtown Commission approved the design of the project on September 12, 2008. The Technical Review Committee of the City of Asheville approved the project with conditions at its September 15, 2008 meeting. Planning and Zoning Commission unanimously recommended approval of the conditional zoning for the project on October 1, 2008. The City Council adopted the conditional zoning on October 14, 2008.

A community meeting was held on August 19, 2008. Approximately 40 people attended the meeting.

City Attorney Oast broadly reviewed the following agreements with Council:

Downtown Development Agreement - The approval of the Downtown Development Agreement is the first action that staff is requesting on this project. This allows the City to move forward in finalizing the other documents. The significant financial commitment at this stage of the agreement is to spend approximately $500,000 on preliminary and final design costs that can be reimbursed if we move forward by issuing Certificates of Participation (COPs) to build the parking garage. The MHG will own the fee interest in the property that fronts on Biltmore Avenue and the City will own the fee interest in the property that is right behind that. PIP will continue to own the strip along Lexington Avenue. This approval will encompass approval of the Construction Management Agreement. Both the City and MHG retain the right to terminate, prior to property acquisition, if, among other things, either actual construction costs or financing terms are not satisfactory. In recognition of the unsettled current financial markets and to protect the investment in design costs, PIP has agreed to allow the option of two (2) six month contract extensions, if needed.

Reimbursement Resolution - The second item staff is requesting approval for is a reimbursement resolution that would allow proceeds from the sale of COPs to be used to reimburse the parking enterprise fund for expenses incurred within 60 days preceding the date of this resolution.

We anticipate issuing COPs in six to eight months. This resolution would allow money for final design drawings as well as owner's representative expenses to be reimbursed from money we receive from COPs proceeds.

Contract with Kimley-Horn for Owner's Representative during Design and Construction - The third item for Council's consideration is a resolution authorizing the City Manager to amend the contract with Kimley-Horn in an amount of $215,000 to serve as the owner's representative for the design and construction of a parking garage at 51 Biltmore Avenue. Additionally, staff requests authorization for the City Manager to execute amendments to this contract up to 10% of the total contract amount.

On July 3, 2008, the City entered into a contract with Kimley-Horn to provide cost estimates and design criteria for a proposed parking garage located at 51 Biltmore Avenue. The amount of this contract was $42,000. The original scope of work consisted of the following: (1) providing probable cost estimates for the proposed garage; (2) developing design criteria; and (3) serving as owner's representative during the design and construction of the project.

At that time, we elected to move forward on the first and second phase of the scope, pending the feasibility of next phase. We are requesting approval to move forward with the third and fourth phase of the work. The amount of this change is $215,000 for a total contract amount of $257,000.

Next Steps - Following approval of the Downtown Development Agreement, reimbursement resolution, and contract amendment with Kimley-Horn, the project team will move forward with final design and construction drawings. We anticipate this process will take four to six months. Following completion of the final drawings, the project will be bid. If the bids are within the project budget, we will move forward in the acquisition of the property and construction of the parking garage.

The construction is estimated to take twelve to fifteen months. The garage should be completed by January 2011.

Pros:

- Generates 431 public parking spaces, shown by the City's Parking Study to be needed in this area of downtown, while at the same time increasing the tax base significantly over existing uses, and generating additional hotel tax revenue. The Project is anticipated to create over 400 jobs during the construction phase, and over 100 permanent jobs.
- Project should allow the development of workforce housing more feasibly due to reduced capital requirements for constructing private parking, which in turn supports lower priced housing units.
- Capitalizes on the opportunity to work with a mixed use developer willing to partner with the City and make private property available for public use.
- Provides a catalyst for additional private sector investment, tax base increase, and job creation in the surrounding area, in the same manner as the existing Haywood/Wall Street area garages have encouraged development in that area.
- Public parking helps sustain existing investments and future growth of retail and office uses in the area.
- Public parking is critical for downtown office job expansion.
- Project's positive economic impact.
- Facilitates density and sustainable development in downtown area.

Cons:

- Public-private partnerships tend to be complicated and require additional coordination between the City and the private sector than traditional stand-alone projects.

- Specific performance guarantees must be made by the City to third parties. Corresponding grantees are required of the developer to the City regarding the quality and sustainability of the mixed use components.
- The cost of the land is higher than the appraised value. Originally the owner did not want to sell the property but rather lease the property to the City for sixty years. After the City determined that it was a better financial decision for the City to purchase the property, the owner agreed to sell but with the restriction that they recoup the capital gains taxes.

Approval of the requests above will cost approximately $700,000. This total includes $500,000 for preliminary and final design plans and $200,000 for owner's representative services. If the City issues bonds for the project, this money will be reimbursed to the parking enterprise fund.

The pro forma for this project indicates that the annual operating deficit for the first year to be approximately $650,000. This amount will be reduced every year until the debt service (loan) is paid. After the debt service is paid, the revenues for the parking garage will exceed the expenditures. All of the operating deficit will be paid from the parking enterprise fund.

Staff recommends that City Council approve the following items in order to move forward with a public private partnership to construct a parking garage on 51 Biltmore Avenue:

- Downtown Development Agreement;
- Reimbursement Resolution; and
- Amendment to contract with Kimley-Horn for owner's representative during design and construction.

Mr. Stephen Schemmel, Managing Director, Municipal Products Groups for Wachovia Securities, spoke to Council about the issuance of Certificates of Participation as a method of financing and what that might mean to the City in terms of this particular project.

Ms. Ball said that public parking as a utility (1) encourages economic development (a) retail, (b) office; and (c) entertainment; (2) increases density; and (3) supports less expensive housing.

The current parking proposal for the public includes (1) 431 parking spaces; (2) public restrooms; (3) City owns and operates parking garage; and (4) bike lockers. For the private section (no public funds will be spent on private development), (1) 145 hotel room; (2) ground floor retail on Biltmore Avenue; and (3) future workforce housing linear on Lexington Avenue.

She showed an approved design. Then she explained the action to date from the different commission and committee reviews.

She explained the probable costs include (1) design (soft) ($1,800 per space for 431 spaces) = $775,800; (2) hard construction ($26,200 per space for 431 per parking space) = $11,292,200; (3) land/air rights/subjacent easements - $4,560,000; and (4) bond issuance = $300,000. Total is $16,928,000. In this year's budget this project is budgeted at $18.5 Million.

Economic Development Director Sam Powers said that the City is approaching this from a public parking standpoint, not an economic development project standpoint. There are, however, economic development benefits as a result of this project: (1) construction phase (a) 405 jobs; (b) $15.3 Million of income; and (c) $4.3 Million additional tax revenue - $2.9 Million Federal collections and $1.4 Million State/Local collections; and (2) on-going operations (a) 118 jobs; (b) $3.2 Million of income; and (c) $1.6 Million additional tax revenue - $795,000 Federal collections; and $860,000 State/Local collections.

Fiscal benefits include (1) property taxes (a) City - $94,500; (b) School - $33,750; and (c) County - $118,125; (2) sales taxes to State - $368,736 (distribution to Asheville is $13,500); and (3) hotel occupancy tax - $200,250.

Mr. Matt Taylor, with Real Estate Research Consultants, reviewed the pro forma assumptions which they performed two scenarios each with (a) 431 spaces; (b) 25 year term; (c) 5% tax exempt rate for 281 spaces; and (d) 7% taxable rate for 150 spaces. Scenario A Current City Estimate for construction is $28,000 and contingency of $3,800 per space – estimate of $31,800 per space. Scenario B of MHG construction savings for construction is $26,000 and contingency of $1,000 – estimate of $27,000 per space.

He then reviewed the rate structure for MHG (1) 35 guaranteed 24/7 spaces - $140 per month; (2) 35 evening and weekend rate (4:30 p.m. to 10:00 a.m.) - $96 per month*; and (3) 80 evening and weekend rate (7:00 p.m. to 10:00 a.m.) - $86 per month*. *Increases – every year but not to exceed 10% over 3 years; (2) incentive for reduction in construction costs; and (3) PIP waives taxable parking spaces provided the City adopts parking rate structure incentivizing workforce housing.

The rate structure for the proposed public rates include (1) monthly guarantee 24/7 spaces - $120 per month; (2) monthly daytime guaranteed 6 a.m. to 6 p.m. - $100 per month; (3) monthly non-guaranteed 24/7 (residential only - $80 per month). These are to be approved as part of the budget process.

He then reviewed in detail the pro forma output for the two scenarios. Under Scenario A Current City Estimate – Year 1 Debt Service is $1,366,800; Year 1 Cash Flow is ($767,000); and total positive cash flow over 50 years is $23,179,100. There will be a positive cash flow in Year 26. Under Scenario B MHG construction savings – Year 1 debt service is $1,209,300; Year 1 cash flow ($644,500); and total positive cash flow over 50 years is $24,432,300. There will be a positive cash flow in Year 26. Therefore, Scenario B delivers 1.25 Million additional cash flow to the City.

Ms. Ball said that regarding approval of the Downtown Development Agreement (1) City commits to preliminary/final design cost; (2) establishes contractual relationship between City/MHG/PIP to include: (a) real estate purchase; (b) easements/air rights/subjacent rights; and (c) construction management terms; and (3) City/MHG can terminate Downtown Development Agreement prior to issuing bonds or closing on property.

With approval of reimbursement resolution, the City can reimburse costs from the sale of bonds for costs incurred within past 60 days.

With approval of owner's representative contract, (1) there is an owner's representative for the design and construction of parking garage; and (2) a termination clause.

Next steps – (1) due diligence; (2) final design documents; (3) bid project; (4) issue bonds (requires Council action); (5) close on real estate; and (6) construction.

Value engineering (1) $1 Million savings to City (land purchase vs. land lease); and (2) $943,000 savings (purchase HDK vs. excavation).

A cost comparison for 51 Biltmore Avenue property is (1) nine levels above grade; (2) four levels below grade; (3) construction cost (a) hard construction $31,400; (b) design $2,120; (c) total of $33,520; and (d) 431 spaces; and (2) land is $3.11 Million. Total is $17.56 Million.

Cost comparison for 51 Biltmore Avenue + Hot Dog King property (1) seven levels above grade; (2) two levels below grade; (3) construction cost (a) hard construction $26,200; (b) design

$1,800; (c) total of $28,000; and (d) 431 spaces; and (2) land is $3.56 Million (additional $1.45 Million). Total is $16.63 Million. The total project savings is over $943,000.

Mr. W. Louis Bissette, Jr., attorney representing MHG, said this does meet a number of downtown needs. He spoke about the economic impact of providing jobs. He hoped City Council would approve the agreements and continue this process. He understood that financing is an issue for the City and it is for MHG as well. There are a lot of uncertainties; however, the documents will allow this design process to go forward while giving all the participants a further opportunity next spring to review the economic and credit climates before giving final approval to this project. He recalled when the Wall Street and Rankin Avenue Parking Decks were built and he hoped Council would continue this development process as it will reap many benefits for the City over the next 20 years.

Mr. Wes Townson, representing MHG, felt this was an excellent public/private partnership in which many compromises were made to get to this point. He felt this project will be considered one of those projects around the south as a model for public/private cooperation and MHG is proud to be a part of it. He felt this is the time to be under construction because when this project opens in the later part of 2010 the economy will be on an upswing.

Mr. Pat Whalen, President of PIP, said that the City hasn't built a parking garage downtown in the past 20 years. He acknowledged the serious shortage of parking in this area and noted that PIP has been filling some of that gap for the last 10 years. They wanted this to be a public/private use than a private use alone and he urged Council to approve these documents.

Mr. Tom Tveidt, at the Asheville Metro Business Research Center, gave a brief analysis Asheville's economy.

Throughout discussion, Ms. Ball, Mr. Tveidt, Mr. Schemmel, City Attorney Oast and Parking Services Manager Harry Brown responded to various questions/comments from Council, some being, but are not limited to: how is the outlook for construction jobs in Asheville in the next 18-24 months; if COPs are issued, how is it viewed in the market place of being paid back; what is the projected revenue source to repay the debt; would our overall debt capacity be impacted if we repay the debt back from the Enterprise Fund; is there some financial product available, like a performance bond, to require the hotel component part of the project to be completed if MHG walks off the job; why was the Local Government Commission established; how will we ensure that we don't have a lot of cost over-runs if we contract with an owner's representative; limiting construction traffic on Biltmore Avenue; how much have we set aside for this type of initiative in the Parking Enterprise Fund; update on the revenue from the Parking Enterprise Fund; and of the two scenarios presented, which would staff support.

Councilman Mumpower supported parking as a City responsibility, especially in places where users pay most of their costs through an Enterprise Fund. However, his concern is that we are going to obligate the City approximately $17 Million, and until the economy clears he felt it would be a mistake on Council's part. He also voiced concern that the number of jobs anticipated for this project will not be for American or citizens.

Councilwoman Cape felt that one of the worst things that can happen is people get so fearful that they quit participating in creating a future. The City will be using the proceeds from our parking decks that we paid off to re-invest in another sound investment that has proven to help downtown. We are not borrowing money at this time, but moving forward to see if this is a viable project. This is just the next step, with time to watch the market and recovery.

Upon inquiry of Mayor Bellamy, Mr. Schemmel said that the Local Government Commission is a state mandated financial advisor to local governments and they are very conservation. Any bond issuance has to be approved by them. They would not approve moving forward if they didn't believe it was appropriate.

Mayor Bellamy confirmed that with the issuance of COPs, the security on the debt is the land and the facility for which the money is being borrowed.

Upon inquiry of Mayor Bellamy, City Manager Jackson said that staff will provide Council with more detail on how the owner's representative will perform their duties.

When Mayor Bellamy asked that a commitment be placed in the Downtown Development Agreement to hire locally, City Attorney Oast said that in the Downtown Development Agreement there is a commitment to work with the City's Minority Business Program Coordinator for minority and local vendors.

In response to Mayor Bellamy, Ms. Ball said that one of the recommendations from the draft Downtown Master Plan is to begin enforcement of parking until 10:00 p.m. – Monday through Saturday and enforce parking on Sundays. She said that staff would need City Council approval prior to making that change.

Mr. John Mark Stroud, property owner on Biltmore Avenue, presented City Council with a petition of support from 21 business owners on Biltmore Avenue, who support the new public parking deck on Biltmore Avenue.

The following individuals spoke in support of the parking deck on Biltmore Avenue and requested Council consider a policy prohibiting chain stores in downtown in order to keep the uniqueness of that area:

Ms. Raya June, Executive Director of Asheville Independent Restaurants Association (AI)
Joint President of AIR
Co-Owner of Fiore's
Mr. Kevin Schwartz, Board member of the AIR

In response to Councilwoman Cape regarding prohibiting chain stores out of downtown, City Attorney Oast said that there is a formula ordinance that some cities have adopted, but they have been challenged. He will continue to keep abreast of that issue and let Council know of any changes.

City Attorney Oast noted that with regard to this project, a statement was made at the conditional zoning of this project that the size of the retail units in this structure are such that they would not encourage chain stores, because it does not meet their size requirements.

Mayor Bellamy said that the AIR will be meeting with local developers, builders and owners to educated them on AIR; how AIR contributes to our community, and the impact of chains in the downtown area.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 08-213. This motion was seconded by Councilman Russell and carried on a 6-1 vote, with Councilman Mumpower voting "no".

RESOLUTION NO. 08-213 - RESOLUTION BOOK NO. 31 – PAGE 345

Councilman Newman moved for the adoption of Resolution No. 08-214. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no".

RESOLUTION NO. 08-214- RESOLUTION BOOK NO. 31 – PAGE 346

Vice-Mayor Davis moved for the adoption of Resolution No. 08-215. This motion was seconded by Councilwoman Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no".

RESOLUTION NO. 08-215 - RESOLUTION BOOK NO. 31 – PAGE 348

B. RESOLUTION NO. 08-216 – RESOLUTION SUPPORTING THE PROPOSED IMPROVEMENTS TO VICTORIA ROAD IN THE IMMEDIATE AREA OF MISSION HEALTH SYSTEM AS A PART OF THE HOSPITAL'S OVERALL MASTER PLAN

Assistant Director of Transportation and Engineering Ken Putnam said that this is the consideration to approve a resolution supporting the proposed improvements to Victoria Road in the immediate area of Mission Health System as a part of the hospital's overall master plan.

Mission Health System is actively pursuing their overall master plan and it includes certain street improvements to Victoria Road in the immediate area of the main campus area. The existing section of Victoria Road that connects with SR 3214 (Biltmore Avenue) will be widened to a multi-lane facility and a new multi-lane connection to US 25 (McDowell Street) will be constructed. Victoria Road will be relocated to create a new cross type intersection that will be signalized. This section of Victoria Road will also be a multi-lane facility transitioning back to a two-lane road at the existing tunnel over US 25 (McDowell Street). A traffic signal will also be installed at the new intersection with US 25 (McDowell Street). The proposed roundabout will be part of the hospital's new main entrance and it will be privately-maintained.

It should be noted that when the subject improvements are completed, a new name should be given to the section of street between SR 3214 (Biltmore Avenue) and US 25 (McDowell Street). Victoria Road would then begin at the newly created intersection.

Mission Health System contacted the North Carolina Department of Transportation (NCDOT) to see if they would provide part of the needed funding for the proposed street improvements. Since the completion of the hospital's overall master plan will probably create new job opportunities, the NCDOT is considering approving up to $500,000 towards the proposed street improvements. This funding does ***not*** impact funding in the current Transportation Improvement Program (TIP).

Buncombe County will consider a similar resolution at their November 4, 2008, Board of Commissioners meeting.

This action complies with the City Council 2008-09 Strategic Operating Plan within the Sustainable Focus Area by improving existing and creating new street infra-structure in order to enhance traffic flow and safety.

Pros:

- Traffic flow and safety in the immediate surrounding area of the hospital including A-B Tech should be enhanced.
- Once completed, the new street connection will become a city-maintained street that will increase the overall total of city-maintained streets, which should result in an increase of Powell Bill Funds.

Con:

- Powell Bill Funds will ***not*** cover 100% of the cost to maintain the new street connection.

There is no initial anticipated financial impact to the City of Asheville. The City of Asheville will be responsible to maintain the street infra-structure including the new street connection and the new traffic signal at the intersection with Victoria Road.

Staff recommends that City Council approve a resolution supporting the proposed improvements to Victoria Road as a part of Mission Health System's overall master plan.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman asked what NCDOT pool of funds this would be coming from if it is not affecting the current TIP. Mr. Putnam said that this is the money that the local NCDOT board member controls. These funds will be coming from the NCDOT's Public Access Road infrastructure money and Economic Development funds where a project will generate new jobs.

When Councilman Newman asked how much money does the local NCDOT board member have at their sole discretion, Mr. Putnam said that when he worked for NCDOT, the member used to control about $1 Million a year. For this project, the total amount is $500,000.

Councilman Newman was concerned that there are a lot of different small transportation projects that our community needs and our area of the state gets a certain amount of transportation funds. We work very hard to get NCDOT support. He felt that funding could go to a variety of different projects, not just in Asheville, but our part of the state. He wondered if the funding controlled by the local board member can go to a variety of different kind of transportation projects in the City, then he would like to have the ability to see how that project stacks up against other types of project that could be funded with those same dollars. We have been working on a Priority Needs List with the Metropolitan Planning Organization and felt we should not be looking at the projects on an individual basis because we have limited dollars. If the funding is unique enough to be only used for this project and no other in Asheville, then that's not a problem. This feels like an isolated decision for him and he wanted us to review this in a more systematic way in the future.

Mayor Bellamy said that she and Vice-Mayor Davis met with the Chair of the Buncombe County Commissioners and a member of the Commissioners about land use planning and transportation needs. Outside of the I-26 Connector and the TIP our region isn't asking for any other long-range transportation planning funding. Whereas, other cities have already put in place what they want their transportation system to look like for 20 years. We need to plan. We need to work with the County to actively collaborate on our future transportation needs. In addition to this funding, Representative Goforth is going to the Speaker for $250,000 for this initiative. There are pools of money that we didn't know existed. We need to identify those pools and see how they can benefit the greater community. She was glad about this new connector street; however, we do have other transportation needs that she would like to be able to tap into for the greater community. She asked City Clerk Burleson to place this as a tickler item on the Council's calendar.

In response to Councilman Newman, Mr. Putnam said that projects like this do not presently go before the Metropolitan Planning Organization body.

At the request of Councilman Newman, Mr. Putnam said that he would be happy to look at other funding opportunities available to the City.

Councilman Russell spoke in support of this project in that Mission Hospitals is the number one employer in Asheville and this new connector will be a critical part of our community and it will serve our area.

Councilman Mumpower felt we are basically approving a resolution saying it's okay to sidestep the planning process and he could not support the action.

A representative from Mission Hospitals clarified the planning process. They have been working with the City's Planning & Engineering Departments and have gone through the City's Technical Review Committee. The total project budget is $10.3 Million. Mission Hospitals is willing to invest in infrastructure and donate its property to widen the road. Mission Hospitals have been transparent through the entire process.

Councilwoman Jones moved for the adoption of Resolution No. 08-216. This motion was seconded by Councilman Russell and carried on a 6-1 vote, with Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 31 – PAGE 349

C. RESOLUTION NO. 08-217 – RESOLUTION APPOINTING A MEMBER TO THE CITIZENS-POLICE ADVISORY COMMITTEE

Vice-Mayor Davis said that the term of Davidson Jones (east representative) expired on June 30, 2008.

At the September 16, 2008, worksession, it was the consensus of Council to interview Kyle Ann Ross, Brock Moore and Ronald Maynard. Due to the fuel conservation measures, Mr. Maynard was unable to attend the interview date and another date was set up for the interview.

After Council spoke highly of the candidates, Kyle Ross received no votes, Brock Moore received one vote and Ronald Maynard received 5 votes. Therefore, Ronald Maynard was appointed as the east representative on the Citizens-Police Advisory Committee to serve a three year term, term to expire June 30, 2011, or until his successor has been appointed.

RESOLUTION BOOK NO. 31 - PAGE 351

D. RESOLUTION NO. 08-218 – RESOLUTION APPOINTING A MEMBER TO THE CIVIC CENTER COMMISSION

Vice-Mayor Davis said Tebbe Davis has resigned from the Civic Center Commission, thus leaving an unexpired term until June 30, 2009.

At the October 21, 2008, worksession, it was the consensus of Council to interview Jodi Shell, Arthur Allen and Brian Woods. Mr. Allen was unable to attend the interview.

After Council spoke highly of the candidates, Jodi Shell received no votes, Arthur Allen received no votes and Brian Woods received six votes. Therefore, Brian Woods was appointed as a member of the Civic Center Commission to fill the unexpired term of Mr. Davis, term to expire June 30, 2009, or until his successor has been appointed.

RESOLUTION BOOK NO. 31 - PAGE 352

E. RESOLUTION NO. 08-219 – RESOLUTION APPOINTING A MEMBER TO THE GREENWAY COMMISSION

Vice-Mayor Davis said Christopher Gilbert has resigned from the Greenway Commission, thus leaving an unexpired term until December 31, 2010.

At the October 21, 2008, worksession, it was the consensus of Council to interview Susan Barlow, Russell Pierce, Stephanie Pankiewicz, Justin Fletcher, Ellen Bailey, Brian

Etheridge and David Borcherding. Ms. Bailey and Mr. Etheridge are not interested in the vacancy at this time.

After Council spoke highly of the candidates, Susan Barlow received 4 votes, Russell Pierce received 7 votes, Stephanie Pankiewicz received 7 votes, Justin Fletcher received no votes and David Borcherding received 3 votes. Therefore, Russell Pierce was appointed as a member of the Greenway Commission to fill the unexpired term of Mr. Gilbert, term to expire December 31, 2010, or until his successor has been appointed.

In addition, due to the terms of David Tuch and Linda Giltz expiring on December 31, 2008, it was the consensus of Council to appoint Susan Barlow and Stephanie Pankiewicz to each serve a three-year term respectively, terms beginning January 1, 2009, and expiring on December 31, 2001, or until their successors have been appointed.

RESOLUTION BOOK NO. 31 - PAGE 353

VII. OTHER BUSINESS:

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Asheville Police Department Dignitary Protection

Councilman Mumpower requested a brief report from Police Chief Hogan regarding the Gov. Sarah Palin event at the Asheville Civic Center on October 26, 2008.

Mayor Bellamy said that regarding all rallies, staff has looked at what best practices they can use in the future and what requirements need to be put in place prior to the event.

City Manager Jackson said there were six presidential campaign events that the City was directly involved; and two non-public presidential campaign visits. Chief Hogan will go over how the City was called into these events and how the Gov. Palin event on Sunday relates to prior requests.

Police Chief Hogan explained that the Asheville Police Department (APD) provides mutual aid to Secret Service agendas for dignitary protection.

Statistics regarding the Sarah Palin event include (1) Asheville Civic Center – Saturday, October 26, 2008; (2) met with US Secret Service on Friday, October 24, 2008; (3) 34 officers assigned to event venue (5 from Buncombe County Sheriff's Office); (4) 21 officers assigned to motorcade: (5) 28 officers held over from regular day shift as safeguard for potential problems; (6) roll call at 3 p.m.; (7) on-site at 3:30 p.m. – 10:00 p.m.; (8) primary responsibility is mutual aid to U.S. Secret Service for dignitary protection; (9) 7 officers assigned to foot patrol outside of venue; (10) additional officers that moved between inside and outside as needed; (11) projected crowd of 8,000; (12) actual crowd of 10,000 plus; (13) large protest crowed in close proximity, due to venue; and (14) no fights; two cases of exhaustion; safe event for protectee.

Statistics regarding the Barack Obama event include (1) Asheville High School football field – October 5, 2008; (2) met with U.S. Secret Service on Tuesday, September 23, 2008; (3) 43 officers assigned to event venue (17 from Buncombe County Sheriff's Office); (4) 10 officers assigned to motorcade; (5) roll call at 9:15 a.m.; (6) on-site at 10:00 a.m. – 4:30 p.m.; (7) primary responsibility is mutual aid to U.S. Secret Service for dignitary protection; (8) 5 officers assigned to patrol outside of venue; (9) projected crowd of 15,000; (10) actual crowd of 22,000 plus inside – 6,000 outside; (11) small protect crowd in front of school; (12) no fights; (13) 4 attendees suffered from heat exhaustion; and (14) safe event for protectee.

Statistics regarding the Michelle Obama event include (1) UNC-Asheville – May 2, 2008; met with U.S. Secret Service on Thursday, April 24, 2008; (3) 13 officers assigned to event venue (2 from Buncombe County Sheriff's Office, UNC-Asheville Police Department assisted also); (4) no officers assigned to motorcade – Highway Patrol provided motorcade; (5) roll call at 3:30 p.m.; (6) on-site at 4:00 p.m. – 9:30 p.m.; (7) primary responsibility is mutual aid to U.S. Secret Service for dignitary protection; and (8) safe event for protectee.

Statistics regarding Hillary Clinton event include (1) Thomas Wolfe Auditorium – April 24, 2008; (2) met with U.S. Secret Service one week prior; (3) 35 officers assigned to event venue; (4) 6 officers assigned to motorcade (in conjunction with the Highway Patrol); (5) roll call at 3:00 p.m.; (6) on-site at 3:30 p.m. – 11:30 p.m.; (7) primary responsibility is mutual aid to U.S. Secret Service for dignitary protection; (8) 2 officers assigned to patrol outside of venue; additional officers used during motorcade arrival; (9) projected crowd of 4,000; (10) actual crowd of 4,000 plus inside – 2,000 outside; (11) small protest crowd in front of venue; (12) crowd control issues related to candidate greeting crowd out front; and (13) no fights; no injuries; safe event for protectee.

Statistics regarding the Bill Clinton event include (1) Asheville High School Gymnasium – March 28, 2008; met with U.S. Secret Service one week prior; (3) 14 officers assigned to event venue; (4) 1 officer assigned to motorcade; (5) roll call at 5:30 p.m.; (6) on-site at 6:00 p.m. – 11:30 p.m.; (7) primary responsibility is mutual aid to U.S. Secret Service for dignitary protection; and (8) safe event for protectee.

Major preliminary conclusions for Gov. Palin visit includes (1) attendance exceeded capacity; (2) inadequate volunteers for crowd support; (3) limited security scanners at entrance due to underestimated crowd size; (4) confrontational personalities with conflicting values in close proximity; (5) Zombie Walk happening at the same time; (6) no fights; no physical confrontations; no injuries; no arrests; (7) additional evaluation needed and further planning for future events; and (8) Secret Service comments from agents throughout the U.S.

Mayor Bellamy apologized to the individuals who had a negative experience in our downtown; however, there were some things that were out of our control, e.g., like the protestors, security scanners at the entrance.

Councilman Mumpower felt this was a learning process for us and perhaps in the future we might be in a position to warn organizers about what they might expect and what they need to provide for to make sure all bases are covered.

In response to Councilman Mumpower, City Manager Jackson said that the Civic Center staff, with the assistance of the Police Department staff and the Fire Marshal, was between the National Republican Party organizers and U.S. Secret Service in terms of staging the event. Their primary concern was inside the Civic Center and that the event was properly managed.

Police Chief Hogan said that as far as the external part of the building, we normally have a large core of volunteers that organize and support the waiting crowd. At this event, all the volunteers were on the inside. The police officers were not capable of answering questions about who would get in. We were watching the crowd very closely. Some people took offense to things said and signs made, but it was all constitutional.

In response to Councilman Mumpower, City Manager Jackson said he didn't believe there was chaos on the inside of the Civic Center. In terms of the dignitary, the U.S. Secret Service had the ability to limit the number of people allowed in. It did not detract from our ability to manage the number in the building.

Councilwoman Cape said that some people were offended by the police officers talking to

Rev. Chiaronmonte but part of community policing is knowing who the community is and who's a problem and who isn't. The Zombie Walk had been planned for a long time. She felt the APD did a good job. Hopefully in the future we can recommend no political rallies in downtown Asheville. She also noted that Gov. Palin arriving 1.5 hours late didn't help the frustration of the crowd as well.

Chief Hogan thanked Capt. Sarah Benson for her excellent work with the U.S. Secret Service and her organization of these events.

Living Wage

When Mr. Steve Agan, representing the Living Wage Committee, asked to speak, Mayor Bellamy said that the Council has sent that issue to the Finance Committee. No public comment was allowed because there was no motion on the floor.

Councilman Newman asked for clarification of the policy in that because there was no public comment allowed during the meeting, shouldn't the public be allowed to comment on it under Informal Discussion and Public Comment. He asked that the policy be clarified that people should be allowed to speak under "Informal Discussion and Public Comment" unless there has been a public comment period earlier in the meeting on that specific issue.

City Attorney Oast said that City Council Rule Section 7 (d) reads "At each 'regular' meeting of the Council, under the 'Informal Discussion and Public Comment' section of the agenda, any group or person wishing to address the Council on any matter not previously considered during the meeting may do so."

When Mayor Bellamy said that she would entertain a motion to waive the rules, Councilman Newman moved to waive the rules and allow Mr. Agan to speak. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

Mr. Agan spoke to Council about the legal issue of what Council has the power to do in terms of regulating contracts.

Copwatch Program

Mr. David Ireland, from the Asheville Copwatch Program, spoke to Council about complaints from citizens alleging harassment and brutality from Asheville police officers. Police Chief Hogan, who was present in the room, said that he would be happy to meet with Mr. Ireland and discuss his concerns.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 11:04 p.m.

Magdalen Bowdoin
CITY CLERK

Jerry W. Bellamy
MAYOR

Tuesday – November 11, 2008 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Question Why Youth Leaders led City Council in the Pledge of Allegiance and explained the purpose of their state-wide program, which is to empower youth as advocates in the community.

INVOCATION

Councilwoman Cape gave the invocation, along with a brief history of Veterans Day.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING NOVEMBER 12, 2008, AS "PREMATURITY AWARENESS DAY"

Mayor Bellamy read the proclamation proclaiming November 12, 2008, as "Prematurity Awareness Day" in the City of Asheville. She presented the proclamation to Ms. Debra Couch, Division Director for the Pisgah Division of March of Dimes, who briefed City Council on some activities taking place during the day. She was also pleased to recognize Ms. Tess McCutcheon, a 6 years old girl who was four months premature, and her sister Kate.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "B" and "C" were removed from the Consent Agenda for discussion and/or individual votes.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON OCTOBER 28, 2008

B. RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AGREEMENT WITH THE DEPARTMENT OF JUSTICE OFFICE PROGRAMS, BUREAU OF JUSTICE ASSISTANCE, FOR THE EDWARD BYRNE MEMORIAL DISCRETIONARY GRANT FOR THE POLICE DEPARTMENT'S APPROPRIATE AND EFFECTIVE FORCE OPTIONS INITIATIVE

BUDGET AMENDMENT FROM THE EDWARD BYRNE MEMORIAL DISCRETIONARY GRANT FOR THE POLICE DEPARTMENT'S APPROPRIATE AND EFFECTIVE FORCE OPTIONS INITIATIVE

These items were removed from the Consent Agenda for discussion and/or individual votes.

C. RESOLUTION AUTHORIZING THE CITY MANAGER TO PURCHASE A GASID RESPONDER RCI SPECTROMETER FOR THE IDENTIFICATION OF

UNKNOWN CHEMICAL GAS, SOLID AND/OR LIQUID FOR HAZARDOUS MATERIAL RESPONSE FROM A "SOLE SOURCE" UTILIZING STATE HOMELAND SECURITY GRANT MONIES

This item was removed from the Consent Agenda for discussion and/or an individual vote.

D. RESOLUTION NO. 08-222 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH THE WACKENHUT CORPORATION TO PROVIDE SECURITY SERVICES IN THE THREE MUNICIPALLY OWNED PARKING GARAGES

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with The Wackenhut Corporation to provide security services in the three municipally owned parking garages.

The City of Asheville owns and operates three municipal parking garages: Civic Center, Rankin Avenue, and Wall Street. These facilities operate around the clock and are utilized by approximately 580,000 parking customers annually. The security and safety of these patrons and City employees are the top priority of the City. Protection of City owned property and privately owned vehicles are also very important.

Security staff consisting of city staff and contract security officers, currently provided by The Wackenhut Corporation, provides unarmed security services in the garages and the small parking facility known as Handy Park on a 24 hour a day basis every day of the year. City employed security guards work primarily during normal business days from 7:00 a.m. to 11:00 p.m. Contract security personnel work the 11:00 p.m. to 7:00 a.m. shift and weekends/holidays.

Security is provided by performing random vehicular and walking patrols thru the garages to include stairwells, elevators, and the exterior perimeter to deter theft, loitering and vandalism in and around the facilities. In addition, security staff assists customers to exit the facility if they have difficulty and also provide escorts at night to anyone requesting the service. The City of Asheville provides the vehicle for patrols.

On August 25, 2008, Parking Services requested proposals from qualified vendors to provide unarmed security patrols in the facilities. The contract is to run for three years. Proposals were received from four security firms ranging from local security firms to international firms with local branches. All are qualified firms that meet the requirements set forth.

Requests were made for two proposals in which each firm would provide security personnel without a vehicle and with a vehicle. This allowed Parking Services to determine which option was most cost effective for the City. It is still more cost effective for Parking Services to provide the patrol vehicle. Proposals ranged from $63,492 to $77,500 per year without vehicle and $74,232 to $91,280 with vehicle. In both scenarios The Wackenhut Corporation submitted the lowest proposal. All proposals, for security services without vehicle, are within the estimated range that is in the Fiscal Year 2008-09 budget.

This action complies with the City Council Strategic Operating Plan in that it improves safety and security of parking patrons in the parking facilities. In addition, having personnel on at all times provides better customer service for the public.

This action complies with the recently adopted Parking Study in that security in the facilities, especially Civic Center Garage, was identified as a concern.

Pros:

- Twenty-four hour security provides a safer environment for staff and patrons,

- Customer service is enhanced by having security available all the time,
- Selecting The Wackenhut Corporation will eliminate any inconvenience to the public as they are already trained and familiar with garage operations.

Con:

- The contract amount is approximately 7% higher than the existing contract signed five years ago.

There is no adverse fiscal impact due to this project. Funds for security services were authorized in the Fiscal Year 2008-09 Operating Budget for Parking Services and are still available.

City staff recommends City Council adopt a resolution authorizing the City Manager to sign a contract with The Wackenhut Corporation to provide unarmed security services in the three municipally owned parking garages.

RESOLUTION BOOK NO. 31 – PAGE 360

E. RESOLUTION NO. 08-223 - RESOLUTION OF INTENT TO CLOSE A PORTION OF FERNWOOD AVENUE AND SETTING A PUBLIC HEARING ON DECEMBER 9, 2008

Summary: The consideration of a resolution of intent to close an unopened portion of Fernwood Avenue and request a public hearing for December 9, 2008, regarding this issue.

N.C. Gen. Stat. sec. 160A -299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, property owners; Myra Hirschberg and Thomas Caldwell, Adam S. Pittman Guy K. Penland, Anita F. Hatcher, Lisa R. Mathis, Kay Susan Bennett, and Robert J and Phyllis Roberson have requested the City of Asheville to permanently close an unopened portion of Fernwood Avenue.

The Greenway Commission is scheduled to review the closure of the unopened portion of Fernwood Avenue at their meeting on November 13, 2008.

This action complies with the Strategic Operating Plan in that the closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more effective use of the existing adjacent properties.

Con:

- In consideration of the location of the unopened right-of-way, staff can find no potential challenges regarding the closure of the alley.

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt a resolution setting a public hearing for December 9, 2008, to close an unopened portion of Fernwood Avenue.

RESOLUTION BOOK NO. 31 – PAGE 361

F. RESOLUTION NO. 08-224 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE THE OPTION TO PURCHASE A PORTION OF PROPERTY LOCATED AT 217 PEACOCK LANE FOR THE CONSTRUCTION OF A NEW WATER PUMPING STATION AS PART OF THE WESTON ROAD REVENUE BOND PROJECT

Summary: The consideration of a resolution authorizing the Mayor and City Council to approve the City Manager to, on behalf of the City of Asheville, execute the option to purchase from Dunbar Apartments, LLC and purchase the parcel in question for $60,000, for an 0.85 acre parcel of property required for the construction of a new water pumping station as part of the Weston Road Revenue Bond Project.

In 2007, the City of Asheville received $40 million in revenue bond funds for water system improvements. As part of the 11 revenue bond projects, there are miscellaneous expenses that could not be planned for until the projects were underway. In addition, the N.C. Dept. of Transportation has not approved work in state right-of-way, which means easements or parcels of property must be purchased from homeowners to complete work on these projects in a timely manner. The land purchase needed for the Weston Road Revenue Bond Project is $60,000 and needs to be approved separately by City Council. There may be additional land purchases in order to complete these projects on schedule and on budget.

A formal appraisal of this property was not performed. Based on the appraised tax value of Dunbar's land, this 0.85 acre is valued at $80,000. We proceeded with pursuing the purchase under the premise that if the property could be obtained for appraised tax value, or less, a formal appraisal would not be required.

This action complies with the Strategic Operating Plan regarding Infrastructure improvements.

Pros:

- This land purchase will expedite the Weston Road Revenue Bond Project, which will help to enhance customer service, water service reliability and fire flow to commercial and residential customers.
- This action has already been budgeted and does not require reallocation of funds from another capital project.

Con:

- Without this land purchase, the Weston Road Revenue Bond Project will not be completed on schedule or on budget.

This land purchase for $60,000 has been budgeted in the existing Weston Road Project and does not need to be reallocated from other capital projects.

City staff recommends the City Manager execute on behalf of the City of Asheville the option to purchase from Dunbar Apartments, LLC for $60,000 for an 0.85 acre parcel of property required for the construction of a new water pumping station as part of the Weston Road Revenue Bond Project.

RESOLUTION BOOK NO. 31 – PAGE 362

G. RESOLUTION NO. 08-225 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CHANGE ORDER INCREASING HICKORY CONSTRUCTION COMPANY'S CONTRACT FOR IMPROVEMENTS AT THE NORTH FORK AND WILLIAM DEBRUHL WATER TREATMENT PLANTS AND TO APPROVE THE PURCHASE OF MATERIALS NEEDED TO COMPLETE THIS PROJECT

ORDINANCE NO. 3671 - BUDGET AMENDMENT REALLOCATING EXISTING FUNDING FROM THE WATER DISTRIBUTION CAPITAL PROJECT

Summary: The consideration of a resolution authorizing the City Manager to sign a change order increasing Hickory Construction Company's contract amount of $6,432,361.43 for the improvements at the North Fork and William DeBruhl (Bee Tree) Water Treatment Plants to $6,869,861.43 and to approve the purchase of materials needed to complete this project at an estimated cost of $172,000; and the associated budget amendment.

The City of Asheville Water Resources Department has an existing contract with Hickory Construction Company to make improvements to the North Fork and William DeBruhl water plants at a cost of $6,432,361.43. This work is necessary to remedy serious defects in the chemical feed systems at both water plants that were discovered during the construction process. These defects were not apparent during the design process for the project and would have been included in the work by the consulting engineering firm. This work is consistent with the other chemical feed improvements that Hickory Construction has performed on the project. During construction, it was discovered that the chemical feed system at North Fork has aged to the point of failure and several dangerous leaks have occurred recently. This system is the primary disinfectant system for the majority of the treated water delivered to the water system customers. If this system fails, it will prevent the North Fork from treating water and the City would have to declare a state of emergency due to the inability to supply treated water to its customers. The department's goal is to install a replacement system as quickly and efficiently as possible via change order to the existing construction contract with Hickory Construction Company. Additional and similar work at William DeBruhl will also be included in the change order. By using the existing contractor on site, Hickory Construction, the City will save approximately $272,500. This additional work will cost approximately $437,500, thereby increasing Hickory Construction Company's contract amount from $6,432,361.43 to $6,869,861.43.

The materials needed to complete this project will be bid out separately by the City's Purchasing Division. Brown and Caldwell Consulting Engineers have estimated the cost of materials to be $172,000. With the $437,500 construction change order and the $172,000 material cost, the estimated cost for the Chemical Feed Replacement is $609,500.

This action applies with the Strategic Operating Plan regarding the improvement of City infrastructure.

Pros:

- This project will ensure North Fork can continue to supply treated water to system customers, provide better safety for employees working around water treatment chemicals, and ensure all federal and state mandated clean water drinking act regulations are met.
- The $172,000 cost of materials is budgeted in the existing North Fork Upgrade Continuation Project and will not need be reallocated from another capital project.

Con:

- Funding for the construction change order increase requires $437,500 to be reallocated from another capital project.

Hickory Construction's contract amount of $6,432,361.43 will increase by $437,500 to $6,869,861.43. These funds are not available within the project budget and will be reallocated from another capital project. The additional materials are an unexpected expense and will cost approximately $172,000. These funds are available in the existing North Fork Upgrade Continuation Project budget and will not be reallocated from another capital project.

City staff recommends City Council (1) authorize the City Manager to sign a change order increasing Hickory Construction Company's contract amount of $6,432,361.43 for the improvements at the North Fork and William DeBruhl (Bee Tree) Water Treatment Plants to $6,869,861.43 and to approve the purchase of materials needed to complete this project at an estimated cost of $172,000; and (2) adopt the associated budget amendment, in the amount of $437,500.

RESOLUTION BOOK NO. 31 – PAGE 363
ORDINANCE BOOK NO. 25 – PAGE 79

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Councilwoman Jones moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Russell and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR DISCUSSION AND/OR INDIVIDUAL VOTES

B. RESOLUTION NO. 08-220 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AGREEMENT WITH THE DEPARTMENT OF JUSTICE OFFICE PROGRAMS, BUREAU OF JUSTICE ASSISTANCE, FOR THE EDWARD BYRNE MEMORIAL DISCRETIONARY GRANT FOR THE POLICE DEPARTMENT'S APPROPRIATE AND EFFECTIVE FORCE OPTIONS INITIATIVE

ORDINANCE NO. 3670 - BUDGET AMENDMENT FROM THE EDWARD BYRNE MEMORIAL DISCRETIONARY GRANT FOR THE POLICE DEPARTMENT'S APPROPRIATE AND EFFECTIVE FORCE OPTIONS INITIATIVE

Summary: The consideration of a resolution authorizing the City Manager to accept grant funds under Department of Justice Office, Office of the Justice Programs, Bureau of Justice Assistance for the Edward Byrne Memorial Discretionary Grant for Asheville Police Department's Appropriate and Effective Force Options Initiative (AEFOI); and the associated budget amendment, in the amount of $201,228.

The City of Asheville has been awarded a grant from Department of Justice Office, Office of the Justice Programs, Bureau of Justice Assistance for the Edward Byrne Memorial Discretionary Grant for Asheville Police Department's Appropriate and Effective Force Options Initiative in the amount of $201,228 with no local match. The purpose of the grant program is to fund Asheville Police Department's effective use of force initiative. APD needs to tailor our training to make it as realistic as possible without putting our officers in danger. Through AEFOI, APD plans to incorporate specialized training in the areas of weapons use and vehicle operation with interactive driver and use of force training simulators. Officers will be able to ***more*** efficiently evaluate and provide what is needed to diffuse situations properly. This will likely reduce injuries to citizens and officer's, as well as provide for better court testimony and reduce departmental liability.

Below is the description of simulator products.

MILO Range PRO System	$62,765
Advanced Emergency Vehicle Operator System	$138,200

Total of Federal grant funds: $200,965

This action complies with City Council's Strategic Operating Plan in the Focus Area: Safe - Asheville will be one of the safest and most secure communities when compared to similar cities.

Pros:

- Will contribute to the abilities and articulation of the necessary application of force in various situations and likely reduce officer involved vehicle accidents.
- By reducing injures to law enforcement as well as the public, this will aid in quality of life issues.
- Will enhance the officer safety mindset needed by APD officers, and allow for continual improvements in officer safety through the implementation of AEFOI.

Con:

- The City Of Asheville and the Asheville Police Department would be required to maintain the upkeep of the equipment, replacing equipment components when needed.

There is no fiscal impact with this grant as there is no match required. The acquisition will enable us to enhance officer training and effectiveness at no additional direct cost.

City staff recommends City Council adopt (1) the resolution authorizing the City Manager to enter into an agreement with Department of Justice Office, Office of the Justice Programs, Bureau of Justice Assistance for the Edward Byrne Memorial Discretionary Grant; and (2) the associated budget amendment, in the amount of $201,228.

Councilman Mumpower spoke against using borrowed money for police functions that we are capable of providing for ourselves.

Councilman Newman moved to approve Resolution No. 08-220. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 354

Councilman Newman moved to approve Ordinance No. 3670. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 77

C. RESOLUTION NO. 08-221 - RESOLUTION AUTHORIZING THE CITY MANAGER TO PURCHASE A GASID RESPONDER RCI SPECTROMETER FOR THE IDENTIFICATION OF UNKNOWN CHEMICAL GAS, SOLID AND/OR LIQUID FOR HAZARDOUS MATERIAL RESPONSE FROM A "SOLE SOURCE" UTILIZING STATE HOMELAND SECURITY GRANT MONIES

Summary: The consideration of a resolution authorizing the City Manager to accept the purchase of a GASID and RespondeR RCI Spectrometer for the identification of unknown chemical gas, solid and/or liquid for hazardous material response from a "Sole Source" utilizing State Homeland Security Grant Money in the purchase amount of $99,455.00.

This grant is from the North Carolina Department of Crime Control and Public Safety, Division of Emergency Management for the procurement of equipment to be used by Hazardous Materials Regional Response Team 6 – Asheville.

The U.S. Department of Homeland Security and the Office of Domestic Preparedness has made funds available through State Homeland Security Grant Number: Fiscal Year (FY) 2007-GE-T7-0048-1016 to implement the State Homeland Security Strategy. The strategy identifies the NC Hazardous Materials Regional Response Teams (RRT) as an integral component of North Carolina's preparation and response to manmade and natural emergencies and disasters. The equipment is to be used in the field to detect and identify unknown and potentially hazardous chemical gases, solids and/or liquids during a hazardous material response

Each of the other six RRT's has procured these specific pieces of equipment from the Sole Source vendor of Smith Detection. Smith Detection is the sole manufacturer and distributor of the GASID and RespondeR RCI. There are no other comparable pieces of equipment that will be able to identify specific hazardous gases, solids and/or liquids with the accuracy and reliability as the GASID and RespondeR RCI.

The equipment consists of a spectrometer that identifies chemical components that lie within the gas sample while the RespondeR RCI (Raman spectrometer) detects chemicals that are held within a solid and/or liquid. Both pieces of equipment include libraries for Nerve and Blister Agents, Common Chemicals, Explosives, Solvents and Forensics.

This equipment provided through this grant will become the property of the Asheville City Government.

This action complies with the Strategic Operating Plan by better equipping the Hazardous Materials Team with upgraded equipment; this grant will assist in making Asheville a safer city, based on appropriate metrics for similarly sized cities.

Pros:

- The Department of Crime Control and Public Safety, Division of Emergency Management, provided funds for the purpose of upgrading Asheville and Western North Carolina's terrorism response capabilities.
- The equipment is state of the art and will better address the risk of terrorist's attacks and hazardous materials incidents.
- All statewide regional response teams will be comparably equipped and interoperability will be realized should an event require the resources of additional teams.
- This equipment is immediately available to Asheville residents and businesses. This level of equipment would most likely not be able to be obtained through the city's general budget process.
- Firefighter and citizen safety will be enhanced.

Con:

- The City of Asheville will be responsible for maintenance and upkeep of the equipment.

Accepting this grant allows the City to enhance services without an increase in capital expenditures.

City staff recommends that City Council accept the purchase of the GASID and RespondeR RCI from a Sole Source utilizing State Homeland Security Grant funds to protect Asheville and Western North Carolina.

Councilman Mumpower moved for the adoption of Resolution No. 08-221. This motion was seconded by Vice-Mayor Davis and carried unanimously.

RESOLUTION BOOK NO. 31 – PAGE 355

III. PRESENTATIONS & REPORTS:

A. FUEL UPDATE

City Manager Gary Jackson said that we continue to work on a higher level of preparedness for fuel supply for our region from an intergovernmental relations perspective.

Assistant City Attorney Jeff Richardson and Fire Chief Greg Grayson are meeting next week with Mr. Joe C. McKinney, Executive Director of the Land-of-Sky Regional Council of Governments, to discuss a regional approach of strategies to address the fuel supply issue for our region.

In addition, city government staff and Buncombe County emergency services staff continue to discuss multiple operational strategies to better copy for city government operations as we work towards the Fiscal Year 2009-10 budget process.

Mayor Bellamy noted that a report would be forthcoming regarding the outcome of the meeting with the Land-of-Sky Regional Council of Governments.

B. TRANSIT COMMISSION REPORT

Ms. Hanna Raskin, Co-Chair of the Asheville Transit Commission, said that Asheville established its board and commission system so "citizens can provide input on the policies that shape their government and their city." But, there is currently no board or commission charged with providing advice pertaining to parking, a major subset of the City's budget. The members of the Transit Commission asked Council to consider rectifying this oversight by placing parking within their Commission's purview.

The nearly three dozen citizen Boards and Commissions advise the City on such diverse matters as housing, crime and public art, issues united by the role they play in citizens' daily lives. Yet surely there is no issue residents and tourists confront as frequently as parking. According to a recent study, more than 12,000 drivers seek a downtown parking spot every weekday. The availability of parking is central to Asheville's growth and economic development.

The link between parking and transit is a natural one, particularly as the City considers programs such as Park-and-Ride. As the City's Transportation and Engineering Department seeks increasingly multimodal solutions to our citizens' transit needs, it makes sense for the City's Board and Commission structure to embrace the same organic approach.

The Transit Commission is already involved with facilitating travel, easing congestion and building a thriving downtown. Rather than invent a new commission -- which would require additional staff hours, member recruitment and training – they propose their purview be expanded to include parking, thereby creating another level of oversight without creating another layer of bureaucracy.

The Transit Commission has voted unanimously in support of this plan, and they hoped the Council sees fit to adopt it.

Vice-Mayor Davis said that when this issue was initially proposed, the Boards & Commissions Committee discussed it and asked for the Director of Transportation and Engineer's thoughts. At that time, the Director did not feel the need to expand the duties of the Transit Commission. As he personally has some difficult in expanding the duties to such an extreme degree without a detailed staff report from the affected Departments. He suggested the matter be referred to the Boards & Commissions Committee for discussion and recommendation.

Councilman Newman, liaison to the Transit Commission, agreed for the need of staff's prospective (transit, parking and other areas) on this proposal. He supported the Boards &

Commissions review of the proposal after staff input. He wondered if the proposal outlined might not go far enough in terms of broadening the scope of the Transit Commission. He thought the Commission was thinking of a Transit Demand Management Commission to look at all the different types of opportunities we have in Asheville to address traffic and transportation related issues.

Mr. Ryan Pickens, Co-Chair of the Transit Commission, said the Commission did discuss the broader scope of the Commission. However, since there is not an oversight board for parking, that was their initial first step. He felt the Commission would support the broader responsibilities described by Councilman Newman, however, if the Commission did expand, they would request the number of seats on the Commission expand as well.

Councilman Mumpower believed in advisory boards and hoped that City Council would solicit the Transit Commission's recommendations in issues regarding the Transit System.

Vice-Mayor Davis agreed with Councilman Newman that staff input consist of not only the transit and parking staff, but the Office of Economic Development, Planning staff and staff that are directly impacted by parking. He also wondered if we could include not only downtown parking, but Biltmore Village parking into this discussion as well.

In response to Councilwoman Jones, Councilman Newman wondered if we have the resources to study this matter now or if we should wait until the Transit Master Plan, which is well underway, is complete. He felt staff's feedback on the merits and timing of this would be helpful.

It was the consensus of Council to refer this matter to the Boards & Commissions Committee with input for appropriate City staff. She noted that when this matter is scheduled before the Boards & Commissions Committee that the co-chairs are made aware of the date and time.

IV. PUBLIC HEARINGS:

A. WITHDRAWAL OF REQUEST FOR A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS HAYWOOD PARK MIXED-USE REDEVELOPMENT PROJECT

Mayor Bellamy said that this public hearing was held on September 23, 2008, and continued to this date.

Mr. W. Louis Bissette Jr., attorney representing the developer (Mr. Tony Fraga), said that after long and careful consideration his client has asked him to relay to Council his reconsideration of his request for a continuance. He decided it would not be in his best interest, or the best interest of the City's and its downtown to pursue the continuance. His client has asked him to advise Council that he is withdrawing his conditional use application. The reasons are as follows: 1) the project cannot be realistically revised to meet the Council's objections as to harmony and scale; (2) 500 underground parking spaces, $3 Million in public benefits, LEED certification and other amenities require substantial density in order to pay for them and especially in downtown situations where that required density also requires height; (3) FIRC cannot substantially reduce the height of either of the two towers thereby reducing the number of units and still be able to deliver a project similar to the one described in their conditional use application to the City; (4) the City's application process has cost them significant time, money and energy. The delay in getting through the process has left them in a very difficult time economically. It appears to them that it could now be at least several years before the economic climate will be right for the development of such a significant project; (5) in order to protect the property they own downtown and the businesses that surround it, they believe that their best course of action is to begin a program to re-lease their existing property and revitalize the existing Haywood Park Hotel. In order to do that, they will have to enter into leases that will preclude the

significant redevelopment of their property for some time in the future; (6) finally, they are working very hard to keep their Enka and Westgate projects moving during this difficult time. The stalemate over the I-26 route is creating serious problems for them at Westgate. The uncertainty over the route selection is making it very difficult for them to market that project; (7) FIRC has a very large investment in the Asheville community and they will continue to work to protect that investment by concentrating their efforts on Westgate, Enka and re-leasing Haywood Park; and (8) with all due respect, the City of Asheville does not give much assistance to developers who are attempting to substantially invest in our City. It is possible that the present economic conditions may soon require the City to review its existing processes to be sure that the playing field is leveled for those who are willing to risk their time, money and energy in downtown Asheville.

Mayor Bellamy said that she had an opportunity to speak with Mr. Fraga about his desire to withdraw his application. She believed Mr. Fraga is a man of integrity, that he would not bribe Council and that he believed the project he proposed would benefit the community as a whole. She hoped that in the future Mr. Fraga would look at re-investing in downtown Asheville.

Councilman Mumpower felt that one of the things the developer was frustrated with was his accusation that he felt the developer was offering the City a $3 Million bribe or the City was extorting the developer for $3 Million. People don't give the City $3 Million for no reason. He spoke with some of the developer's staff and it was their indication that the City's staff and the downtown planning staff both laid a pretty heavy hand on the developer pushing for a contribution of that dramatic nature. The procedures and ordinances adopted by Council has hampered the developer's ability to create a project with a clear sense of what is needed and what will produce a probable outcome. He felt that further deliberation on this issue is needed to look at our procedures and policies regarding unnecessary hurdles for our developers and how the process can be improved.

Mayor Bellamy didn't recall, prior to last week's discussion about a policy to allow a developer to pay into a fund designated for affordable housing, that there was any directive to staff to talk to developers about paying into a fund for a downtown development project. When The Ellington project was brought forward, that was the first time that a developer at that level volunteered to provide money for affordable housing. There have been others before Council who have been asked about providing affordable housing in their projects, but there is no written policy in place requiring developers provide affordable housing or contribute to a fund or entity for affordable housing. She felt it was wrong to state that Mr. Fraga bribed City officials as that speaks to his integrity. When terms like bribery or extortion are used without evidence, it's slander. Mr. Fraga has come to Council twice in the last year with projects good for the community and he has been willing to work with the City on voluntary annexations into the City.

Councilwoman Cape felt that the Downtown Master Plan will provide clarify on what we want in the downtown area.

In response to Councilman Mumpower, City Manager Jackson said that on conditional use permits/zoning staff would, as a general rule, convey to the developer the strategic goals of Council, such as affordable housing, safe community, environmental sustainability, etc. If there are conditional use permits in the last two years that have been adopted by Council and a developer approaches the City with an application and asks how they can get a more probable outcome, staff will point them to prior approved conditional use permits and allow them to draw their own conclusions about how they interpret those decisions.

When Councilman Mumpower said that he was told that the staff's guidance was much more direct, City Manager Jackson said that if Mr. Fraga and Mr. Bissette would make that information available to him, he would be happy to follow-up, as he can deal with the facts if he knows them. Without knowing the specific dialogue, he cannot draw any judgments. As ethical behavior is a core value in his organization, he invited anyone to report to him any breach of

integrity or unethical behavior as there will be an investigation and accountability for that. In addition, Council has already asked that the conditional use permit process be reviewed. That review is in progress and will be routed through the Planning & Zoning Commission and then onto Council in early 2009.

Councilwoman Jones appreciated Mayor Bellamy's comments regarding the integrity of Mr. Fraga. She felt compelled to state that the City's staff are honest, trustworthy and professionals in their jobs.

Mayor Bellamy also noted that the policy discussion of last week regarding a fund for affordable housing if developers wish to contribute has been referred to the Housing & Community Development Committee.

Mr. Bissette said that his client has the highest respect for City staff as they have gone above the line of duty to help get this project completed. There is no question in their minds of any impropriety by City staff members. As he does a lot of these type projects in the City, it is known in the development community that one of Council's goals is affordable housing and there should be a component in the project or a contribution to affordable housing. It is not in the ordinance, but it has grown into the process. In fact, he had one project that the reason why it was voted against was because it did not have an affordable housing component.

B. PUBLIC HEARING TO CONSIDER PERMANENTLY CLOSING A PORTION OF SUMMIT AVENUE

RESOLUTION NO. 08-226 - RESOLUTION TO PERMANENTLY CLOSE A PORTION OF SUMMIT AVENUE

Mayor Bellamy opened the public hearing at 5:40 p.m.

Assistant Public Works Director Richard Grant said that this is the consideration of a resolution to permanently close a portion of Summit Avenue. This public hearing was advertised on October 17, 24, 31 and November 7, 2008.

N. C. Gen. Stat. sec. 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, the adjoining property owners; Victor C. Farmer, Theresa W. Hyler. Leonard C. and Nancy G. Hudgins, and Andrew J. and Kimberly L. Douglas have requested the City of Asheville to permanently close excess right-of-way on Summit Avenue.

The Greenway Commission reviewed the closure of the excess right-of-way on Summit Avenue at its meeting on October 9, 2008, and supports the closure of the excess right-of-way on Summit Avenue.

The closing will be submitted to the retention of two easements (1) Metropolitan Sewage District of Buncombe County, its successors and assigns, of a 20 feet wide permanent easement, for the operation and maintenance of a public sewer line, lying 10 feet on each side of said sewer line located and existing within the portion of Summit Street proposed to be permanently closed; and (2) PSNC Energy of Buncombe County, its successors and assigns, of a 10 feet wide permanent easement for the operation and maintenance of an existing 2-inch steel gas main pipeline, lying 5 feet on each side of said gas line located and existing within the portion of Summit Street that is proposed to be permanently closed.

This action complies with the Strategic Operating Plan in that this closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties.
- The closing on both sides of Summit Avenue will not affect possible future roadway improvements.

Con:

- In consideration of the location of the excess right-of-way, staff can find no potential challenges regarding the closure of the alley.

There will be no fiscal impact related to this closure.

City staff recommends the adoption of the resolution to permanently close excess right of way on Summit Avenue.

Mayor Bellamy closed the public hearing at 5:42 p.m.

When Councilwoman Cape asked that the Bike Plan be looked at as well with closures, Mr. Grant said that happens in the Greenway Commission's review.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Jones moved for the adoption of Resolution No. 08-226. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 35 – PAGE 364

C. PUBLIC HEARING TO CONSIDER REZONING 235 AMBOY ROAD FROM RIVER DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RIVER DISTRICT

ORDINANCE NO. 3672 - ORDINANCE REZONING 235 AMBOY ROAD FROM RIVER DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO RIVER DISTRICT

Mayor Bellamy opened the public hearing at 5:59 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to rezone 235 Amboy Road from River District and RS-8 Residential Single-Family High Density District to River District. This public hearing was advertised on October 31 and November 7, 2008.

The applicant is requesting the rezoning of a parcel (currently split-zoned RS-8 and River) to designate it entirely River District. The area of the entire parcel is 0.67 acres, but the area to be rezoned is 0.38 acres. Much of the parcel is constrained, owing to its narrow shape, stream presence, flood hazard areas, setbacks, and buffer requirements. West of the stream, called Moore Branch, the south side of the parcel is dominated by a derelict building, and the northern portion is mostly vacant, with some outdoor storage.

The owner purchased the property in 2002 with hopes of an adaptive reuse of the building, but the floods of 2004 damaged the building to such an extent that renovation became prohibitively expensive. Potential redevelopment of a new business in the area currently zoned River is limited by the residentially-zoned portion of the property, owing to the River District's

requirement of a 30-foot separation of non-residential uses from residential uses, the prohibition of outdoor storage of materials within 50 feet of a residential district, and the landscape ordinance's standard of a 30-foot buffer against RS-8 zoning.

Though the subject site only has direct frontage on State Street, the stream prevents access from that side of the property. The address of the existing building is an Amboy Road address, and a deteriorating paved driveway crossing the Progress Energy property to the south exists providing a connection to Amboy Road. A plat from 1946 identifies this access as a road called Flat Street, but the current tax maps no longer indicate a separate right-of-way extending all the way to the publicly maintained street. At the time of this writing, however, the agent for the property owner was still looking into the status of the access and through what process improvements on the driveway could be pursued.

The applicant is considering a variety of uses for the property in the short term, but has mentioned interest in a mixed use or loft project when the real estate market emerges from its downturn. Wishing to avoid the delay and expense of developing concept plans that might later change, the applicant elected to pursue a standard rezoning instead of conditional zoning. At the time of the application, staff felt the standard rezoning was fully supportable given the extent of area occupied by the required aquatic buffer for the stream, but subsequent to the application, a draft stormwater/erosion/sedimentation control ordinance was released which might reduce the buffer width for this site (this change will be discussed further below).

Almost the entire parcel is in the current 100-year floodplain, and the proposed new Special Flood Hazard Areas to be adopted next year would place *all* of its area in this classification. Such a designation requires that any development meet special building standards to protect against flood damage. Further, properties zoned River are subject to the design review process by the River District Design Review Committee (RDDRC) outlined in the Unified Development Ordinance (UDO). Accordingly, development of this property in a substandard manner under the proposed rezoning would be difficult if not impossible.

The current stormwater and erosion control ordinance mandates a 30-foot buffer from the top of bank of a named, jurisdictional stream such as Moore Branch. However, the draft ordinance mentioned above proposes a variable buffer width depending on the extent of disturbance and the slope of the land. On this relatively flat parcel, a project with less than 10,000 square feet of disturbance would only require a 15-foot buffer, and 10,000 to 21,999 square feet would require a 20-foot buffer. (More than 22,000 square feet of disturbance would not be (legally) feasible on this site.) This draft ordinance was considered by the Planning and Zoning Commission on October 23, 2008, but no action was taken. The Commission is expected to consider the matter again in December or January, and it could come before City Council in early 2009.

The existing 30-foot buffer requirement leaves a narrow strip along the west side of the area proposed for rezoning which would theoretically be developable, but which would be so thin as to make construction impracticable. With the potential reduction of the buffer, however, that area remains narrow—maybe 50 feet at its widest point—but wide enough to possibly erect structures upon. If a rezoning is approved under this second scenario, non-residential construction might occur across from the RS8 zoning, but it would be separated from the State Street frontage by the stream and two (minimum) 15-foot aquatic buffers flanking the stream. Further, no bridging of the stream or culverting, even for a pedestrian bridge, could occur without significant regulation, including oversight by the Army Corps of Engineers.

If the RS-8 zoning originally applied to this portion of land was intended to encourage single-family development paralleling the homes on the east side of the street, it appears that the presence of the stream may have been neglected, and the current challenges with developing near streams certainly unanticipated. Indeed, given the access issues, and applying the side and rear setbacks for RS-8 (the River district in this case would require no such setbacks), it would

pose a challenge to site even one house on the three-eighths of an acre. Though the River zoning district does not require rear setbacks, it is worth noting that if the access on the west side of the property is determined to be a bona fide street, as is shown in the 1946 plat, the lot could be considered a through lot, and the front setback standard (15 feet) would be applied to the west side as well.

Another relevant development constraint which depends on future decisions is the landscape buffer at the northern boundary of this property. If the Carrier Point conditional zoning application mentioned above is approved, the buffer would only need to be 20 feet instead of 30. The River District standards would still require a 30 foot setback from the residential zoning, but fewer plantings would be required in the event of a multi-family zoning to the north. Though the future aquatic buffer, landscape buffer, and setbacks for this lot can not yet be precisely established, staff feels that the restrictions will be significant enough under any scenario to mitigate potential for incompatible development.

The RS-8 district was created to establish a high density per acre for single-family dwellings where public infrastructure is sufficient to support such development and to stabilize and protect the district's residential character in areas of existing high density single-family development while promoting a suitable environment for single-family living. Among other aims, the River district was established to protect the water resources and to promote economic revitalization throughout the river valleys while providing for an opportunity for enjoyment of the river by a maximum number of citizens, neighbors, and guests.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros

- Proposed zoning district is highly compatible with areas to west and south.
- Would remove presence of split zoning.
- Environmental and zoning constraints limit development options in subject area.
- Minimal potential for residential infill development under current single-family zoning.
- Would encourage development of a derelict site.
- Future development would be subject to River District design review and stringent floodplain standards.

Cons

- Uncertainty about extent of stream buffer protections and how much development might be permitted.
- Would result in a small loss of residentially zoned land.

The proposed rezoning could potentially provide some relief to the property owner for an unusually difficult piece of land with restrictive zoning, and the limited size of the resulting developable area would temper the prospective impact of a more permissive zoning district.

Mr. Dean Pistor, representing the developer, spoke in support of the rezoning and explained why the developer was not seeking conditional zoning. He urged Council to approve the rezoning to in order to avoid additional hardship for his client.

Mayor Bellamy closed the public hearing at 6:07 p.m.

Mr. Esselstyn responded to Vice-Mayor Davis regarding road. He said that there is some potential for housing, but there would be restrictions because pretty much of the property is in the floodplain.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 3672. This motion was seconded by Councilman Newman and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 81

V. UNFINISHED BUSINESS:

A. SECOND AND FINAL READING OF ORDINANCE NO. 3660 – ORDINANCE AMENDING CHAPTER 9 OF THE CITY OF ASHEVILLE CODE OF ORDINANCES TO LEVY A TAX ON GROSS RECEIPTS DERIVED FROM RETAIL SHORT-TERM LEASE OR RENTAL OF HEAVY EQUIPMENT

RESOLUTION NO. 08-206 – RESOLUTION IMPOSING A TAX ON GROSS RECEIPTS FROM THE RETAIL SHORT-TERM LEASE OR RENTAL OF HEAVY EQUIPMENT

City Attorney Oast said that Ordinance No. 3660 was adopted on its first reading on October 28, 2008. Because of the 4-3 vote for approval, the ordinance must be brought back for a second and final reading. In addition, another vote is necessary to adopt Resolution No. 08-206 as well.

Councilman Russell researched this issue and briefly explained that this bill was proposed by the heavy equipment rental industry. They felt this was fair, revenue neutral and simply a better way to track the taxes. If not adopted, it would create one group of businesses that lease equipment that do not have to pay taxes. It would create a tax loophole for just heavy equipment.

In response to Councilman Russell, this would go into effect April 1, 2008.

Councilwoman Jones moved for the adoption of Ordinance No. 3660 on its second and final reading. This motion was seconded by Councilwoman Cape and carried on a 4-3 vote with Mayor Bellamy, Vice-Mayor Davis and Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 55

Councilwoman Cape moved for the adoption of Resolution No. 08-206. This motion was seconded by Councilwoman Jones and carried on a 4-3 vote with Mayor Bellamy, Vice-Mayor Davis and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 333

B. RESOLUTION NO. 08-227 - RESOLUTION ESTABLISHING A CITY AND COUNTY HOMELESS INITIATIVE ADVISORY COMMITTEE

Community Development Director Vann McNeill said that this is the consideration of a resolution to authorize the creation of a joint city of Asheville and Buncombe County Homeless Initiative Advisory Committee (HIAC) to provide oversight and guidance for the implementation of the 10-year Plan to End Homelessness.

The 10-year Plan to End Homelessness (the Plan) was adopted by the City Council and the County Commission in January 2005. To further the Plan recommendations, in July of 2006, decision makers from the public, private, and non-profit sector began to meet as an informal advisory working group to increase collaboration among the many agencies working on

homelessness issues. In November of 2007, the City of Asheville assumed the role of Lead Agency for Plan implementation and selected a Homeless Initiative Coordinator, Amy Sawyer, to track progress, give regular updates on achieving the Plan's goals and facilitate broad community support for the Plan.

To further emphasize the City's commitment to the Plan, the City's Committee on Board's and Commissions met on October 21, 2008, and recommended the creation of an HIAC to further support the goals of the Plan. This HIAC must be created by resolution with a purpose of providing thoughtful and reasoned guidance to City Council and the County Commission on policy issues, programs and funding strategies designed to end homelessness. To support the initiative, the Board of County Commissioners unanimously approved the joint City/County Housing Initiative Advisory Committee at their November 4, 2008, regular meeting.

This request supports and implements the City's 2008-09 Strategic Plan goal of affordability by supporting initiatives to end homelessness, the 2005-10 Consolidated Strategic Plan for HUD funds, and the Continuum of Care Plan and 10-year Plan to End Homelessness.

Pros:

- Represents an important endorsement and evolution in the City's and County's commitment to the 10-year Plan to End Homelessness by creating an advisory committee to focus on the issues of homelessness.
- Carries over and formalizes the existing advisory group, which allows for an uninterrupted continuation of the work on homeless issues by those agencies already collaborating on homeless issues.
- Consistent with the goals identified in the City's 5-year Consolidated Strategic Plan for the expenditure of its federal CDBG and HOME Program funds (over $1.2m committed to projects and services targeted to the homeless over last 2 years).
- Strengthens the partnership between the City, County and the homeless service providers in their commitment to ending homelessness.

Con:

- Creating a joint, formal advisory committee, as an intermediate body, may slow down or delay action. The HIAC will now be required to work through the HCD Committee review process to present policies for consideration by City Council. Reviews and approvals by the County Commissioners may also be required.

The fiscal impact will be incidental expenses associated with administrative work.

City staff recommends City Council approve a resolution authorizing the creation of a joint City of Asheville and Buncombe County Homeless Initiative Advisory Committee to provide oversight, guidance and recommendations for the implementation of the 10-year Plan to End Homelessness.

Mr. Lance Edwards, Chair of the Homeless Initiative Advisory Committee, explained how the group went through a strategic planning progress and they identified the following four key focus areas (1) improve collection, coordination and dissemination of data; (2) homeless and formerly homeless individuals will have greater access to permanent supportive housing, employment, education, health care benefits and support of services; (3) will inform and advise public and private funders to ensure that resources are utilized effectively; and (4) will achieve permanent, supportive housing for all chronically homeless individuals. Regarding focus one, they believe that data is key to this process. He highlighted the Homeless Management Information System (HMIS). HMIS will provide them with the ability to link resources, evaluate trends and measure results of programming throughout the homeless service system. Our community is minimally meeting federal standards for reporting information associated with people using shelter beds. We are not meeting federal standards for reporting data associated

with people using transitional beds. Our community is meeting standards for reporting data for people assessing permanent, supportive housing. While Asheville is currently in compliance with minimal federal standards, an increase of active HMIS is needed in order to meet federal standards that will be more stringent in the future. Complete up-to-date information is needed in order for Asheville and Buncombe County to be able to use HMIS data to evaluate programs and a larger community response. HMIS reports will be available from Ms. Amy Sawyer beginning in December, 2008. He then gave a brief current agency use of the HMIS in our community as follows: (1) we currently have 4 organizations actively using HMIS; (2) we have 4 organizations that have signed on to using HMIS but are not currently active; (3) we have 2 organizations that are in the process of signing a contract to agree to HMIS usage; and (4) we have 8 organizations that are not using HMIS, but in their opinion, should be.. United Way's 211 of WNC is in partnership with HMIS and will share all of their information referral data into the HMIS. We do need agencies to increase their participation because the system is largely voluntary. He asked City Council (and the Buncombe County Commissioners) require agencies that serve the homeless and that receive City (or County) funds be required to actively use HMIS.

Councilman Mumpower explained his concerns of why the 10-Year Plan to End Homelessness lacks in realism in the current economic climate. He felt we need to build in accountability for the person who is receiving the services. He supported the idea of an advisory board, but was concerned with the scope of that board in that it seems to assume a policy role. He did not support the Homeless Initiative Advisory Committee asking Council not support other non-profits unless they participate in HMIS in that he felt it represents a very heavy hand by the Committee.

Mayor Bellamy said that members of Council have been previously furnished with a copy of this resolution and it would not be read.

Councilwoman Jones moved for the adoption of Resolution No. 08-227. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

After a brief discussion of HMIS, Councilwoman Jones moved to require any agencies that serve the homeless and receive City funds (Community Development Block Grant, Outside Agency, HOME, etc.) be required to participate in the HMIS database. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

Mayor Bellamy noted that we are being successful in decreasing the number of chronic homeless. Participation in the HMIS is a way to help individuals and non-profits be more accountable. She noted that Buncombe County is in the process of doing a study of the population of the jail and an issue discussed was how can HMIS assist in providing information to magistrates to decrease the population in the jails by holding people accountable. There is a direct correlation between HMIS and the magistrates.

RESOLUTION BOOK NO. 31 – PAGE 369

C. E-VERIFY ANALYSIS

City Attorney Bob Oast explained the following information on requiring the use of E-Verify by contractors with the City of Asheville.

E-Verify is a federal program that allows employers to check on the work-eligibility status of employees or prospective employees. E-Verify is available to businesses and governmental agencies. Users must register in order to use the system, but it is free.

In order to use the system, the employer must provide certain information about the employee; including the employee's name and social security number. This information is contained on the I-9 "Employment Eligibility" form that each prospective employee fills out. The I-9 form contains an "employer review and verification" that requires an employer (or agent) to examine at least two forms of identification, one of which is required to be a social security card or other government–issued document (some with a requirement for a seal). This form contains much of the same information that is available through E-verify. If an employer uses E-Verify, it must be used for all employees, and it must be used after the offer of employment has been made, and not later than 3 days after the new employee's start date. Other rules and regulations also govern the use of E-Verify. The system could not be used for employees who were not new.

The federal government currently requires all contractors to use E-Verify, and some states (Minnesota, Colorado, Arizona) do as well. Gwinnett County in Georgia is one local government that requires use of E-Verify by its contractors. Our review has disclosed no North Carolina local government whose contracts contain such a requirement. However, most local governments in North Carolina have language in their contracts that requires compliance with all applicable federal, state, and local laws. Asheville's standard contract language contains a specific reference to immigration laws.

There appears to be no legal impediment to requiring the use of E-Verify by businesses that contract with the City. As with any other contractual provision, the City could terminate a contract for failure to comply with such a requirement. However, due to the pre-emptive effect of federal law in the field of immigration, the City could not use E-Verify to investigate the employment eligibility status of a contractor's employees (non-City employees), or direct a contractor not to hire certain employees. Moreover, the City could not impose civil or criminal penalties on employers who hire persons who are not eligible to work in the United States.

He provided Council with a summary of the E-Verify system from the federal government website.

Pros:

- Appears to be easy to use
- Low/no cost for employers to use system

Cons:

- Duplicates information already available from other readily-available sources.
- Extra administrative burden on contractors to use system (I-9 already required).
- Added administrative costs to City to audit compliance.
- E-Verify does not confirm/verify a new hire's identity, E-Verify only confirms that the documents/SSN presented by a new hire to the employer are valid.

This report is for Council's information, and follow-up from a previous discussion. Staff recommends consulting with the business community before implementing this policy.

When Councilman Mumpower questioned if a potential City employee fills out an application and he/she provides false information on a degree, or on his/her criminal background or on his/her experience, does the City have the ability to do a background check. City Attorney Oast said that the City does perform background checks on potential employees. For instance, if he/she states on their resume or application that they have a law degree and is applying for an attorney position, that would be a permissible field of injury.

Councilman Mumpower then questioned if someone was dishonest about their citizenship why couldn't that be checked in some fashion. City Attorney Oast responded that his report to Council was about requiring contractors to use E-verify. In terms of what the Human Resources Department does, they require the completion and submission of an I-9 form and that

requires the production of two forms of identification, one of which is a social security number, but he is not sure of the details of that.

Councilman Mumpower felt the City should be a role model of the reasonable expectation that employers play by the law. This is one small step that we can do to send the message to ask our contractors to use E-verify so we can make sure that people who work for us are legal citizens.

The motion made by Councilman Mumpower requiring the use of E-Verify by contractors with the City of Asheville died for a lack of a second.

When Councilman Mumpower questioned why there was an I-9 system and an E-verify system, City Attorney Oast understood the E-verify system is a quick way of verifying the information on the I-9 form, as it's similar information on file in the federal government database. It doesn't guarantee that the information on file in the database is accurate and that is where some of the problems come in. One of the things it does do for an employer is if you use E-verify, it creates a rebuttable presumption that you're in compliance with the Immigration and Naturalization Laws. He has seen nothing to show that E-verify is more accurate than the use of the I-9 forms.

The motion made by Councilman Mumpower to instruct City staff to further research the differences between the use of an I-9 form and the E-verify system, (including what the City is able to do, what we can do, and why we should do it) died for lack of a second.

Councilwoman Cape explained her reasons for not supporting the E-verify system in that we have the I-9 form, language in our contracts that the City and contractors have to support applicable federal, state and local laws, with specific reference to the immigration laws.

Councilwoman Jones moved that this issue be tabled for six months. This motion was seconded by Vice-Mayor Davis and carried on a 5-2 vote, with Councilman Mumpower and Councilman Russell voting "no."

D. CITY COUNCIL VACANCY

On behalf of City Council, Mayor Bellamy congratulated Councilwoman Jones on winning a seat on the Buncombe County Board of Commissioners. City Council has officially received Councilwoman Jones' resignation from the Asheville City Council effective December 1, 2008. She reiterated the process below, which was approved by City Council on October 14, 2008:

Wednesday, 11-5	-	Any interested person will be given an application form, with a request for a resume to be attached, along with the 5 essay questions - ½ page response each. Deadline for all applications is Wednesday, November 26 at Noon
Wednesday, 11-26	-	Deadline for applications - Noon
Wednesday, 11-26	-	Clerk to verify all candidates of (1) City of Asheville residency; and (2) that they are registered to vote in Buncombe County
Wednesday 11-26	-	Clerk to send to City Council all eligible candidates applications, along with resume and completed essay questions. In addition, a letter will sent to all candidates notifying them that if they are chosen the City Council orientation will be held one day during the week of December 15
Tuesday, 12-2	-	City Council determine (1) how many to interview; (2) who to

FORMAL MTG		interview; (3) length of interviews; (4) date of interviews – December 9 before formal meeting; and (5) time interviews are to begin
Wednesday, 12-3	-	Clerk to contact candidates to arrange Interviews on December 9
Tuesday, 12- 9 FORMAL MTG	-	Interviews in Council Chamber – Interviews to be held prior to meeting **AND** listing on the formal 12-9 agenda – Appointment of new Council member
Friday, 12-12	-	New Council member sworn in with brief reception
One day during week of 12-15	-	New Council member orientation

At the November 25, 2008, meeting, the 2008 City Council Meeting schedule will be amended to include December 2 as a formal meeting; and December 12 as a special meeting to swear in the new Council member.

When Mayor Bellamy asked for any public comment, no one spoke.

In response to Councilman Mumpower, Mayor Bellamy said that the applications, and supporting material, will be posted to the City's website on the afternoon on November 26, 2008, as they will be part of the City Council package of December 2, 2008.

Councilman Mumpower felt the Council has made a strong effort to come up with a fair, transparent and open process to fill the vacancy on Council. This is the first time anyone has developed a process on paper. He felt that after the process is over, it can be reviewed and made a part of Council's rules.

Vice-Mayor Davis said adoption of this process was a unanimous decision of Council and supported this clear and open process.

When Councilwoman Cape asked about formalizing the process, Vice-Mayor Davis said that after the process is complete, it will be critiqued and recommended for adoption as a Council rule.

VI. NEW BUSINESS:

A. REVIEW OF POTENTIAL BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY PRODUCT DEVELOPMENT FUND GRANT APPLICATIONS

Economic Development Director Sam Powers said that this is a review of potential projects for application for funds from the Tourism Product Development Fund.

The Buncombe County Tourism Development Authority's (TDA) Tourism Product Development Fund (TPDF) was created in 2001. It makes funding possible for tourism projects that will increase the number of overnight stays by visitors in Buncombe County lodging properties. The City has no previous direct funding from the TPDF; however, the WNC Soccer Foundation received $400,000 of funding for the City's John B. Lewis Soccer complex in both 2002 and 2004 and completed a pass through to the City. Additionally, the current Partnership on Wayfinding, in which the City participates, received TPDF funding approval in 2008.

He provided Council with a "Frequently Asked Questions" information sheet which outlines the criteria and funding process for the TPDF. The sheet answers many of the questions about the guidelines and eligibility for funding of projects.

In an effort to leverage resources and build on priorities in the City's Strategic Operating Plan, develop partnerships with the TDA, and also meet core funding criteria of the TPDF, staff has developed a summary of possible projects for Council review. In developing the list of potential projects, staff tried to balance developing a list of projects that was too extensive versus missing an opportunity to submit on a worthy project.

He then briefly reviewed the summary of each of the projects, with preliminary information that is available at this time. More detailed preliminary work will be done prior to any projects being selected for an application to the TPDF. In some projects, local funding has been identified; however, some projects do not have sources of funds identified.

Short-term Projects	**Cost**
Civic Center Banquet Hall	$1,500,000
Downtown Improvements	$3,270,000
• Graffiti	$120,000
• Lighting Plan & Improvements	$1,500,000
• Cleanliness/Trash	$250,000
• Phase II Wayfinding Kiosks	$250,000
• Public Safety Enhancements	$400,000
• Downtown Shuttle	$750,000
Outdoor Recreation/Adventure Center	$3,000,000
Overlook Park/View Shed Parks	$3,500,000

Other Suggestions for long term applications (no proposal is defined currently)
- Dykeman Plan Improvements
- Aquatics Center
- Ice Skating
- Sculpture Park

City staff recommends City Council review the project summaries and take the list under advisement prior to the upcoming meeting between City Council and the TDA.

Below are details of the potential projects:

Banquet Hall Renovation

Background:

The Civic Center banquet hall opened nearly thirty-five years ago. Other than new blinds and carpet in the early 1990s, it has essentially remained unchanged. The banquet hall has mechanical, cosmetic, and accessibility problems. It can and should be a showcase facility in downtown Asheville. However, in its current state, it is underutilized, and in fact often loses business due to its condition. It rents for $500/day, which doesn't cover utilities during months it has to be cooled, and in its current condition raising the rental rate cannot be justified. With these renovations, rentals would be more frequent, revenues would increase and expenses would decrease.

Proposal:

The following items would be addressed in a banquet hall complete renovation:

- New HVAC System. Under the current system, the facility's main chiller or boiler must be operating in order to cool/heat the banquet hall. When other areas of the facility are rented, this is not an issue. However, many times the Banquet Hall is rented on its own. In these instances, expenses to cool the room exceed rental revenues.
- New energy efficient windows and blinds. This will result in utility savings as well as address cosmetic and operational problems with the blinds.
- New carpet, portable dance floor, and ceiling. These address cosmetic and safety issues.
- New lighting and sound systems. Dimmable lighting system and permanent sound system to improve appearance and quality.
- Renovation of men's and women's bathrooms. This will address cosmetic and energy efficiency issues.
- Update catering kitchen. Currently a storage area, will update to functional warming kitchen, which allows larger catered functions and meetings.
- Install wireless internet access points and permanent phone lines.
- Purchase new banquet tables, chairs, skirts and other related equipment.
- Update Banquet Hall entry with new windows, blinds, carpet and ceiling.
- Add elevator/escalators to make room to address ADA.

Costs:

Current estimates are placed at $1.5 million. Detailed estimates would be obtained prior to end of year in order to complete proposal for the TDA. This is all capital investment. Operations costs would actually be lower, due to lower utilities costs and additional rent revenues. No operations costs are associated with this project; in fact, savings are expected due to decreased utilities costs and increase rental revenues. No additional personnel are required.

The Civic Center is prepared to cover 10% of total expenses, up to $200,000. The City of Asheville would commit a portion of CIP funds to this project.

For: Graffiti Removal on Private Property

Background:

In March 2007 the Asheville Police Department formed a Graffiti Task Force to combat graffiti with the following actions: 200 inventories of graffiti; 10 search warrants, 50+ surveillance operations and 20 persons charged. In May 2007 the Public Works department formed a crew for the purpose of quickly removing graffiti on public property. Currently, there is no formal program to remove graffiti from private property. Additionally, currently there are no requirements for private property owners to remove graffiti (as quickly as possible) from their properties.

While it is within the City's purview to use public resources for public infrastructure, the City must first pass an ordinance which will: 1) require timely removal of graffiti on private property; and, 2) authorize the use of public resources on private property (specifically for the removal of graffiti). Secondly, knowledgeable, experienced staff will be necessary to work professionally with property owners regarding ordinance enforcement, liability releases; and scheduling/performing work. Lastly, any program must be diligent and consistent to be successful for the long term. The message to 'taggers' must be clear: "Graffiti will not be tolerated in this community".

Proposal:

The Asheville Department of Public Works will put into operation two full-time staff to remove all graffiti from the Central Business District and work with police to identify 'taggers'. This program

is contingent upon adoption of appropriate ordinance(s) which authorizes stuff to remove graffiti from private property.

Costs:

The City currently has the enforcement, equipment and designated staff to remove graffiti on public infrastructure. Additional resources will be necessary if the CBD desires a program addressing graffiti on private property.

Following are estimated costs to remove graffiti from both public and private property (CBD only):

1. Staff: Code Enforcement Officer (salary/fringe benefits) $45,159
   Laborer I (salary/fringe benefits) $30,655
2. Equipment/Supplies:
   - 1 each ½ ton pick-up truck $20,000
   - Trailer/hitch for equipment $ 3,000
   - Removal materials ('tagonator') $15,000
   - Pressure washer/maintenance & repair $ 5,000

   Total Program Start-up costs: **$118,814**
3. Annual Costs: $98,814 (minus equipment costs)

Two new staff is necessary for this program designated for removal from private property.

For: Central Business District (CBD) Master Lighting Plan

Background:

The concept of a comprehensive master plan for purposes of lighting streets, sidewalks, alleyways and properties for the conveyance of vehicular and pedestrian traffic, safety and aesthetics requires a complex, time-consuming study by lighting professionals who will consider some of the following challenges:

- Overall desired result in consideration of safety and aesthetics.
- What type of aesthetic look is desired? HPS (high pressure sodium, yellow glow), MH (metal halide, white glow), lumens on the street, on sidewalks, in alleyways, on private property. Example of HPS is Grove Arcade, MH is College Street corridor (new section) and Pack Plaza when completed.
- What intensity of lighting is desired (aesthetic question) versus allowed (in accordance with local ordinances and national traffic engineering standards (pertaining to lighting streets).
- Fixtures: Determine whether or not to use existing specialty fixture, eclectic design(s), standard lighting, decorative lighting (all with variable hardware and monthly charges).
- Determine where overhead wires or underground burial is to be used. Underground systems in a CBD environment are very costly to install.
- Determine electrical engineering costs for installation of hardware and electrical service.
- Determine monthly costs for maintenance/electricity.
- Determine who will pay additional costs for hardware, installation and monthly charges.

Proposal:

A plan is necessary for three key reasons: 1) Precisely what do the stakeholders in the CBD want from their lighting system, as described above?;
2) What will it cost to implement the plan?; and, 3) Who will pay the one-time and long term costs?

Costs:

The City proposes a partnership with the TDA. The City will develop a comprehensive master plan for the central business district which will cost approximately $40,000; the TDA will fund the lighting and engineering for fixture installation and electrical service routing and costs for hardware, electrical service and monthly maintenance and electrical fees. Preliminary estimate for capital costs is approximately $1,500,000.

Energy costs TBD but could be offset by higher efficiency.

For: Pedestrian Trash Receptacles in the Central Business District (CBD)

Background:

It has been mentioned by business owners, residents and others that there are locations within the central business district which would benefit from the placement of additional trash receptacles. At this time, there are approximately 200 pedestrian receptacles in the CBD which are serviced 7 days per week. Some also have cigarette receptacles attached. The overall condition of the metal receptacles is 'average' due to 15+ years of heavy use and abuse in a public setting.

Proposal:

The Asheville Department of Public Works will install, maintain and empty receptacles purchased for placement in the CBD.

At this time staff will need to collect information regarding the exact number and desired location(s). Such specific information could be attained by a committee made up of concerned stakeholders, TDA and Sanitation Division staff.

Costs:

The current style receptacle cost is $1,000 each (including shipping, installation, lid and liner). While the cost for such an item seems high, robust construction is tantamount to the longevity of infrastructure which suffers constant abuses from vandals and those who seek to destroy things. For example, when the automated collection system was first implemented, staff purchased two heavy duty PVC receptacles designed for dumping by the automated trucks. Within two weeks one was set on fire and burned to the ground and the other was cast into the street and smashed to atoms by traffic. The ubiquitous "pebble-dash" receptacles are also robust and durable; however, their cost is in the range of the current style.

Trash cans: Cost of cans (250 or more @ $1,000 each = $250,000). Existing staff will collect refuse and maintain them.

For: Digital Wayfinding Kiosk(s)

Background:

Wayfinding in Asheville, and the downtown area in particular, is being addressed by the Regional Wayfinding initiative. A second phase to the new Wayfinding system would be an easily accessible method to access multi-modal (walk, bike, bus, car, etc) routing with up-to-date, and locally specific information.

Deploying a set of kiosks to help downtown visitors determine the best route from one address to another address, or from a hotel to a permanent attraction/location, would constitute the basic set of functionality. The larger vision may include the availability of functionality for routing to/from short-term locations, with integration of user mobile telephones. This functionality may answer common questions such as how best to reach a particular performance stage during Bele Chere,

which theater a particular film is playing during the Film Festival, where live music venues and play locations are, and how to best reach that location.

A variety of potential partners exist within Asheville. The Renaissance Computing Institute (RENCI) engagement site at UNCA and the Applied Visualization Lab come to mind with regard to expertise in visual presentation. Meet the Geeks (an IT professional association) may well be a viable partner in identifying further necessary technical expertise.

The City of Asheville has a proven track record in delivering community mapping solutions via the mapAsheville efforts. This is evidenced by recently received awards: *2007 Marvin Collins Award for Innovations in Planning Services & Public Involvement* presented by the North Carolina Chapter of the American Planning Association and the *2008 Excellence in Economic Development Award for New Media* presented by the International Economic Development Council.

The City of Asheville also has a proven track record in collaborating with other agencies for community mapping and analysis efforts; this in evidenced through the successful implementation of the Slope Calculator tool that was developed in partnership with Buncombe County and UNCA/NEMAC/RENCI.

Proposal:

It is suggested that the city fund an initial assessment study to determine feasibility of implementing a digital wayfinding kiosk(s), and other means of digital wayfinding to include internet mapping availability for mobile computing platforms and availability of text-only inquiry/delivery via cell phone. Upon satisfactory completion of the initial assessment study, it is proposed that TDA funds be made available for implementation of the system.

Costs:

Full, long-term costs have yet to be determined. It is recommended that an initial scoping and planning assessment be completed prior to funding of final effort. A conservative estimate for the initial assessment is $17,500 with utilization of an external consultant. Capital costs may range from $250,000 to $300,000. Operating and maintenance costs may be approximately 20% of total costs ($60,000). No additional personnel are scoped in this proposal.

For: Asheville Police Department Enhancement Initiative (APDEI)

Background:

Dramatic increases in visitation to downtown Asheville benefit from enhancements to existing security available to adequately insure public safety and security.

Proposal:

In an effort to preserve and enhance community safety downtown and to further promote downtown as a destination, the Asheville Police Department submits the following safety enhancement efforts:

Closed Circuit Cameras: Placing closed circuit cameras in predetermined, outdoor locations of the downtown area would allow for monitoring criminal activity. This would lead to more successful investigations and higher numbers of arrests for criminal activity. This would likely reduce crimes in the area due to the constant surveillance of targeted areas. Through an analysis of part one crime data and the propensity for reoccurrence of criminal activity, the following areas are good candidates for the camera system:

Triangle Park, Pritchard Park, Aston Park, Bus Terminal, Haywood St. near the Library, N. Lexington Ave, S. Lexington Ave, Pack Square, Biltmore Ave, Biltmore and Aston, Biltmore and Hilliard, Lee Walker, Coxe Ave, any and all parking decks, Asheland Ave, 79 Asheland Ave, Patton Ave/Coxe, Patton Ave. and Church, Church and Aston, Coxe and Southside, N. French Broad / Grove St, S. French Broad Ave, Bartlett and SFB, Bartlett Arms, Battery Park Area, N. Market St, Walnut St, and Broadway and I-240

The locations above are prime candidates; however, utilizing grant funds to target key locations would lead to a safer and more open community.

GEM Cars, Segways, T3 Transport: The use of GEM cars, Segways and T3 Transports allow our officers to get closer to the public while on patrol. It allows them greater mobility, while creating a more approachable officer than a cruiser. Approachability leads to information sharing and enhanced investigations, as well as superior community relations tool. This in turn would reduce criminal activity and create more positive interactions with the general public. All of these vehicles are electric (zero emissions) and aid in the City's movement toward greener initiatives and reducing our carbon footprint.

Costs:

Capital costs for equipment: approximately $400,000.

Most start up costs are included in this price. The only other expense would be that of IT personnel in the assessment and installation of the "software" to manage the security system. Initially current staff could periodically check the system and would be able to review the files to view criminal acts after the fact to identify suspects. If we were to go to full implementation of this additional personnel may be necessary to monitor the surveillance screens installed at APD. On-going operation and maintenance costs: $1000-2000 annually.

Matching Funds: APD could commit to 10% match from forfeiture funds.

For: Downtown Shuttle System

Background:

The City of Asheville has recently completed studying the supply and demand of parking in the Central Business District (CBD) of Asheville. The results of this study indicate that there is a deficit of approximately 700 parking spaces in the CBD. The City would like to address the shortage in addition to the construction of new parking decks, implementing a shuttle service that travels from lots on the fringe of the downtown area to the central business district at a reasonable frequency of service.

Proposal:

Downtown tourists and workers represent a reasonable target market for shuttle system ridership. Examples of those potential users include tourist wishing to go from one end of downtown to another, employees of larger employers and restaurant staff in the downtown area.

It is realized that for the system to be effective, short headways need to be provided in the peak periods. At present, the Asheville Transit system designates much of the CBD as a "Fare Free Zone". However, the buses run on approximate 60 minute headway in the CBD. Estimates of ridership will be developed on assuming 10, 20 and 30 minute headways.

Costs:

Capital costs: Initial estimate of $750,000 for vans, shelters and improvements.

Operating costs: approximately $600,000 funded through Parking Enterprise Fund. The City would like to operate four routes to cover north, south, east and west areas. While we do not know the cost at this time, Chattanooga, Tennessee, has a similar system that supports downtown.

For: Outdoor Recreation and Adventure Center (River Redevelopment)

Background:

The City seeks to increase capital investment and redevelopment of the River District. A catalyst project is sought to spur this redevelopment. The result will create a destination that will increase overnight lodging room counts.

Proposal:

The funding request would support new construction of an Asheville Area Outdoor Recreation and Adventure Center near the Hominy Creek Greenway adjacent or within the City of Asheville's Carrier Park. Two sites have been identified and investigatory real estate considerations are being made (one site is on public land, one site is on private land). The Center would serve as an entry point for visitors seeking access from a myriad of recreational experiences, and would include: bike rentals, service, and instruction; boat rentals, service and instruction; a rock climbing wall, adventure tour services and sales, concierge/ information services for visitors that will help them access unique experiences (via local entrepreneurs) in our region including peregrine falcon watches; native plant hikes; class A trout fishing, and more.

Key Partners, Internal: Parks and Recreation, General Admin/OED, Planning and Development
Key Partners, External: Riverlink, A-B Convention and Visitors Bureau, ClimbMaxx, Southern Waterways

Costs: $3 million (initial estimate based on city-owned land utilization).

For: Beaucatcher Overlook Park

Background:

Creating an overlook park is an idea that has been talked about for years in the Asheville area. In 1920, the City of Asheville established the first city plan for Asheville. John Nolan, an early city planner, authored the plan, which identified the infrastructure needs for the growing city. The Nolan plan delineated a circle of parks surrounding Asheville, and major city parks in every neighborhood. The key component of the park system was an expansive overlook park along Beaucatcher Mountain, and open space connecting it to downtown Asheville and the surrounding neighborhoods.

Asheville and Buncombe County have come a long way from the 1920's. The county's population has been growing and area is thriving. The availability of the Greenberg tract, 30 acres of woodland covering the slope of Beaucatcher Mountain, is serving as a catalyst to revive the Overlook Park vision. The tract, behind McCormick Field, is a green backdrop to the city. The view of the wooded slope is visible from nearly everywhere in downtown Asheville.

The site is perfectly situated to be the centerpiece of a new vision for the area around McCormick Field and Beaucatcher Mountain. The Greenberg tract is surrounded by another 30 acres of city-owned land, including the baseball field, Memorial Stadium, and about 10 acres of vacant land behind them. A developer has bought McCormick Heights public housing project, and is redeveloping this as affordable housing. The Greenberg tract is right below White Fawn Reservoir, also owned by the City. The Asheville Parks & Recreation Master Plan proposed a

"Sister Cities Park" to be located on the site of the reservoir, and that site can be easily connected to the Greenberg tract. The Asheville Greenways Master Plan shows a connector greenway extending from downtown through the Greenberg tract and up to the Beaucatcher Mountain ridgeline, and extending all the way to the I-240 cut. The draft Downtown Master Plan recommends development of public space that will allow for view shed presentation and create new destinations for visitors.

Proposal:

The purchase of the Greenberg tract will allow the department to establish a natural park, within walking distance of downtown Asheville, the surrounding neighborhoods of the White Fawn, East End, and Kenilworth and Mission Hospital, and on a city bus line. It is easily accessible to the residents of Buncombe County and visitors to Asheville. It will become an oasis of green in Buncombe County, offering opportunities for walking, bicycling, picnicking, and quiet experience of nature. The park will add to the offerings of arts and entertainment, dining, shopping, and the unique Western North Carolina culture that attract people from all over the world.

The establishment of the Park will take place in three phases: acquiring the Greenberg tract; further planning of the park's proposed amenities; and the development of the park and surrounding areas.

Costs:

Beaucatcher Overlook Park is intended for passive recreation with minimal development and preserved predominantly as a natural area. When considering park development, the City follows a process of site analysis, engineering and environmental studies to determine feasibility, and public input prior to park design which leads to cost estimate of development. The following may be considered as minimal development based on preliminary cost projections without a comprehensive site analysis and review of all options. Cost will vary and should not be viewed as final cost estimates.

Capital costs for development may include the following at a minimum cost of $3,500,000 (excludes land acquisition).

- Trails
- Overlook(s)
- Picnic area(s)
- Parking area(s)
- Benches, trash receptacles, signage
- Access road and park entrance improvements
- Environmental and biological assessment

Operation and maintenance costs could be expected to be $100,000 annually. Personnel costs TBD.

Mr. Powers reiterated that this list is for information purposes to assist Council with their upcoming meeting with the TDA.

Council members expressed their opinion about the various potential projects, noting that most will move some of Council's goals forward. Councilman Mumpower suggested we might improve our chances for funding if we limit our proposals to 3 and have them well defined with realistic dollars.

Mayor Bellamy's primary focus would be all the downtown improvements, with inclusion of a pressure washer to clean our streets and more downtown plantings. Since the TDA was before Council recently regarding the health of downtown, she felt the downtown improvements would be a good set of projects.

In response to Councilman Newman, Mayor Bellamy suggested we have a meeting in January to talk about the future of the Civic Center and to work with the Buncombe County Commissioners and our state legislators, who have all vowed to work with the City.

VII. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of October 3 – 30, 2008: Jeannot Gamache (Water), Rebecca Robertson (Water), Remo & Carolyn Termini (Water), Remo & Carolyn Termini (Water), Christine Sass (Transit Services), City of Asheville (Parks & Recreation), City of Asheville (Fire); Jeanette Bryson (Sanitation), Patrick Schuette (Traffic Engineering), Walter Koester (Traffic Engineering), Bill Langdon (Water) and AT&T (Water).

The following claims were received by the City of Asheville during the period of October 21 – November 5, 2008: Sara Gresko (Traffic Engineering), Delyn Shepherd (Traffic Engineering), Joe Webster (Traffic Engineering), Elaine Matheson (Traffic Engineering), Tom Harrison (Traffic Engineering), Ted Bussey (Traffic Engineering), Leisel Sullivan (Traffic Engineering), Carolyn Rose (Traffic Engineering), Fran Konchar (Traffic Engineering), Juluis McDowell (Water), James Bassett (Sanitation), Arron Foulkrod (Streets), Jennifer Broderson (Traffic Engineering), Thomas Bass (Traffic Engineering) and Sarah Kate Chason (Traffic Engineering).

These claims have been referred to Asheville Claims Corporation for investigation.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 7:33 p.m.

Magdalen Burleson
CITY CLERK

Terry M Bellamy
MAYOR

Meeting with Henderson County Commissioners and Asheville City Council
November 14, 2008 Minutes

These minutes reflect significant positions expressed by elected boards and/or action steps identified and agreed to.

City Council Members Present: Mayor Terry Bellamy, Vice Mayor Jan Davis, Council Members Holly Jones, Brownie Newman, Robin Cape, Carl Mumpower, and Bill Russell.

County Commissioners Present: Chair Bill Moyer, and Commissioners Young, Willams, and McGrady. Absent: Nester

Mayor Bellamy called the meeting to order at 10:03 a.m.

Mayor Bellamy made opening statements and asked City Attorney Bob Oast to provide an overview of the Mills River Water Agreement (1995). Oast described the agreement regarding water distribution and property near Bent Creek (137 acres) belonging to Henderson County.

Chairman Moyer explained the current agreement as a bone of contention. He made points about putting the agreement behind both entities. He suggested resolving the issue by ending the agreement and allowing Henderson County to buy the Mills River Treatment Plant.

Mayor Bellamy expressed a willingness to sell water to Henderson County per the agreement, but not to sell the facility. Vice Mayor Davis agreed. Council member Jones agreed but acknowledged that she was leaving council. Russell passed due to not having a working knowledge of the matter. Cape asked for more information. Newman stated he is open to looking at the proposal.

Council member Mumpower stated that he would be willing to discuss the regional planning issues between the two boards moving forward, but was not willing to consider giving up Asheville's regional water asset.

Moyer expressed the need to identify ways to do regional planning. Bellamy pointed out that Land of Sky Regional Council is doing regional planning for future water needs.

Commissioner Young stated he wants a regional authority, with equal partners. Commissioner McGrady lobbied to abrogate the agreement and selling Henderson County the Mills River Water Plant. He explained that the current agreement has three parts:

1. Henderson County has two water authority seats; (moot point).
2. Henderson County owns 137 acres at Bent Creek. (worthless to them).

3. Asheville agrees to runs water lines in northern Henderson County. (Hendersonville is now doing this).

He expressed that these are now worthless considerations.

Both boards discussed options for moving forward. Both board agreed that each board would do the following:

- City council appointed three members to meet and discuss the current agreement and report back to Henderson County as to their interest in renegotiating the current agreement. Those appointed members are: Mayor Bellamy, Vice Mayor Davis, and Council Member Newman.
- Henderson County Commissioners will appoint two members of the board to meet and discuss what options they see if the current agreement is renegotiated.
- Both the City of Hendersonville and Buncombe County will get a memorandum that outlines the meeting today and the steps that were outlined as result of the meeting.

Commissioner McGrady motioned to adjourn and the Henderson County Board adjourned the meeting at 11:25 a.m.

Magdalen Burleson
CITY CLERK

Jerry M Bellamy
MAYOR

Tuesday – November 18, 2008 - 3:00 p.m.

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Robin L. Cape

CITIZENS SURVEY REPORT

Assistant City Manager Jeff Richardson explained that the City of Asheville began conducting a comprehensive citizen survey in April 2008 with assistance from the National Citizen Survey. The National Citizen Survey is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality survey methods and comparable results across jurisdictions from throughout the United States.

The purpose of the citizen survey is to evaluate the community's overall satisfaction with city services and opinions on key issues, and to use the results to set performance standards, measure success and identify opportunities to improve. The information gathered from a citizen survey is particularly useful when citizen perceptions are measured regularly over time, allowing government performance and ongoing progress to be tracked according to the citizen perspective. However, the last citizen survey competed by the City of Asheville was conducted in 1997. As a result, this year's results serve as a baseline for better understanding what citizens think about municipal services and communication efforts. These results will be used as a benchmarking tool for City Council and staff to observe trends over time as well as to compare to results in other communities and in future surveys.

The results of Asheville's 2008 survey reflect the opinions of a representative sample of residents regarding the community's quality of life, municipal service delivery, civic participation and key policy issues. A total of 1,200 surveys were distributed to randomly selected households, and the city received an overall response rate of 35 percent with 402 completed surveys. The results presented in the final report are statistically re-weighted to reflect the proper demographic composition of the entire community. The National Citizen Survey customized for Asheville was developed in close cooperation with city staff and in accordance with the key areas indentified in City Council's Strategic Operating Plan.

The total cost for the survey was $16,150.00. Funding for the survey was allocated from the FY 2007-08 city manager's contingency line item. The survey serves as a meaningful guide for future strategic, budget and capital planning.

Staff recommends City Council receive the survey report and to apply it in strategic, budget and capital planning.

Ms. Paula Noble, National Citizen Survey Analyst with the National Research Center, Inc., presented the results of the completed 2008 City of Asheville Citizen Survey.

Ms. Nobel reviewed the following Executive Summary which provides an abbreviated overview of the survey results.

"This report of the City of Asheville survey provides the opinions of a representative sample of residents about community quality of life, service delivery, civic participation, and unique issues of local interest. A periodic sounding of resident opinion offers staff, elected

officials and other stakeholders an opportunity to identify challenges and to plan for and evaluate improvements and to sustain services and amenities for long-term success.

"Most residents experience a good quality of life in the City of Asheville and believe the City is a good place to live. The overall quality of life in the City of Asheville was rated as "excellent" or "good" by 80% of respondents. Most report they plan on staying in the City of Asheville for the next five years.

"A variety of characteristics of the community were evaluated by those participating in the study. The four receiving the most favorable ratings were opportunities to volunteer, opportunities to participate in religious or spiritual events and activities, opportunities to attend cultural activities, and the overall image or reputation of Asheville. The three characteristics receiving the least positive ratings were availability of affordable quality housing, employment opportunities, and the amount of public parking.

"All of the community characteristics rated were able to be compared to the benchmark database. Of the 27 characteristics for which comparisons were available, 12 were above the benchmark comparison, 2 were similar to the benchmark comparison and 13 were below.

"Residents in the City of Asheville were somewhat civically engaged. While only 30% had attended a meeting of local elected public officials or other local public meeting in the previous 12 months, 96% had provided help to a friend or neighbor. A majority had volunteered their time to some group or activity in the City of Asheville.

"In general, survey respondents demonstrated mild trust in local government. Less than half rated the overall direction being taken by the City of Asheville as "good" or "excellent." This was lower than the benchmark. Those residents who had interacted with an employee of the City of Asheville in the previous 12 months gave high marks to those employees. Nearly all rated their overall impression as "excellent" or "good.

"On average, residents gave somewhat favorable ratings to local government services. Many of the City services rated were able to be compared to the benchmark database. Of the 32 services for which comparisons were available, none were above the benchmark comparison, nine were similar to the benchmark comparison and 23 were below.

"A Key Driver Analysis was conducted for the City of Asheville which examined the relationships between ratings of each service and ratings of the City of Asheville's services overall. Those key driver services that correlated most strongly with residents' perceptions above overall City service quality have been identified. By targeting improvements in key services, the City of Asheville can focus on the services that have the greatest likelihood of influencing residents' opinions about overall service quality. Services found to be influential in ratings of overall service quality from the Key Driver Analysis were: Land use, planning and zoning; City parks; street cleaning; and public schools.

"We recommend that key driver services below benchmark comparisons form the center of your focus for improvement including: land use, planning and zoning; City parks; street cleaning; and public schools."

Ms. Nobel provided Council with the National Citizen Survey's background. The survey results can be used to (1) monitor trends in resident opinion; (2) measure government performance; (3) inform budget, land use, strategic planning decisions; and (4) benchmark service ratings.

She then reviewed the results of the overall quality of community; transportation; street lighting; land use and zoning; economic stability; public safety; recreation and wellness; community and civic engagement; civic activity; and Asheville government.

Upon inquiry of Mayor Bellamy, Ms. Noble responded to the following: the process of the survey; the time period of the survey; regarding cultural opportunities, community inclusiveness and civic engagement, did the survey focus only on the City of Asheville or the entire community; and explanation of survey results regarding opportunities under transportation, parks and recreation, public safety and land use, planning and zoning and whether residents are aware of the activities.

In response to Vice-Mayor Davis, Ms. Noble said that since the survey was being taken at the time of the Coleman project in the City-County Plaza area, it could have influenced the rating in the land use, planning and zoning category. She felt that current events can impact the current ratings.

Councilman Newman wondered if in the 32% of the people who responded to the survey who stated they are not currently employed includes retired people. Ms. Noble felt the best statistic for that would be to go to the census results.

City Manager Jackson explained how this survey influences staff's work.

Mayor Bellamy felt the survey results will be discussed at the Council's retreat as well and dovetail Council's agenda and goals. She noted that even though the City is making investments in core services in the community, the survey doesn't reflect that the community recognizes those improvements. We need to get the information out to our residents.

City Manager Jackson said that the communities that use these survey results best take from the short list and focus on those, making sure that the community is aware of the progress. The benefit is when you do a survey at a later time, you are likely to see results improve not only in the target area, but have some halo effect in the other areas.

PARKS, RECREATION & CULTURAL ARTS MASTER PLAN

Director of Parks, Recreation and Cultural Arts Roderick Simmons said that in late 2007, the City of Asheville contracted with GreenPlay, LLC to lead the master plan process for parks, greenways, recreation and cultural arts. GreenPlay, based out of Broomfield, Colorado, operates as a consortium of experts to provide services for parks, recreation, open space and related agencies.

The key steps of the master plan process as conducted by GreenPlay are described below:

- Needs Assessment and Public Involvement
  GreenPlay facilitated seven focus groups, eight stakeholder meetings and nine public meetings, attendance at boards and commission meetings, and a direct mail survey. In all over 1,000 people took part in the public input process.
- Level of Service Analysis
  GreenPlay analyzed parks, recreation, cultural arts, public art, festivals, greenways, and related services via interviews with staff about programs and insight regarding the current practices and experiences of the City in serving its residents and visitors.
- Inventory and Assessment of Existing Assets and Services
  GreenPlay inventoried indoor and outdoor recreation facilities and greenways using existing mapping, staff interviews, and on-site visits to verify amenities and assess the condition of the facilities and surrounding areas.
- Programs and Services Inventory and SWOT Analysis
  GreenPlay measured the current delivery of service using the GRASP® Level of Service Analysis that allows for a target level of service that is both feasible and aligned with the

expressed desires of citizens. The SWOT analysis measured the strength, weakness, opportunities and threats of the organization.

- Recommendation of Goals, Strategies and Action Steps
  GreenPlay identified recommendations into themes with goals, strategies, and action steps for implementation, followed by an action plan for capital and operating improvements including cost, funding source potentials, and timeframe to support the implementation of the plan.

On November 7, 2008, City Council appointed boards reviewed the report. The Recreation Advisory Board and the Public Art Board voted unanimously to recommend the adoption of the master plan to City Council. The Greenway Commission voted unanimously to abstain for now from voting to support the master plan as drafted for the following reasons: 1) The advancement of the Wilma Dykeman Riverway Plan and it's vision for greenways and parks is vital to the community and the draft plan does not sufficiently prioritize project development in that corridor, 2) The total capital spending of 40 million as contemplated by the plan is only reasonable assuming adoption of an ongoing bonding program. The Greenway Commission recommends that council only adopt this master plan with the commitment of adopting a bonding program, and 3) While the Greenway Commission supports the intention to simplify and streamline communications among Council appointed boards and commissions as well as other committees associated with the Parks, Recreation & Cultural Arts Department, the Commission thinks the structure laid out in the plan is unnecessarily complex and hierarchical.

Pros:

- Help meet the recreational needs of Asheville citizens by positioning Asheville to build on the community's park and recreation assets and identify new opportunities.
- Establish a clear direction to guide staff, advisory boards and commissions and elected officials in efforts to enhance Asheville's parks, recreation and cultural arts programs, services and facilities.

Con:

- None

The contract to produce the report cost $120,000. The value of the report will be in how it is applied as a guide for strategic, budget and capital planning discussions.

This report is for City Council's information as part of its review of the Asheville Parks, Recreation, Cultural Arts and Greenways Master Plan.

Ms. Chris Dropinski, Senior Principal with GreenPlay LLC, reviewed the draft report of the Parks, Recreation, Cultural Arts and Greenways Master Plan

Ms. Dropinski reviewed the process as follows: start-up meeting, community input, citizen survey, demographics, inventory/assessment, recommendations/action plans and report/presentations.

She then reviewed the following goals with strategies and detailed action steps (1) maximize the planning process; (2) improve administration effectiveness and transparency; (3) maximize the Land-of-Sky available to the community by using partnerships to take advantage of existing facilities, share new facilities, and provide additional programming and services to the community; (4) create management resources to increase efficiency, continuity, and sustainability in critical focus areas needed in the Department; (5) increase Parks, Recreation and Cultural Arts Department funding; (6) marketing, communications, and creditability; (7) strategically increase recreational programming level of service; (8) assure administrative policies promote effective provision of community festivals and events; (9) analyze festivals/events based on the mission and values established by Council and the Department; (10) develop a rationale for festivals/events produced by the City; (11) enable sustainable funding for permanent and

temporary public art; (12) enhance public confidence for and appreciation of the arts; (13) develop and expand the public art collection; (14) enhance facilitation and resources among arts interests; (15) build public and organizational capacity for the arts; (16) strengthen the organizational structure of public and cultural arts delivery; (17) ensure a continued high level of service in parks; (18) increase level of service for parks; (19) create greenway priorities and identify development timeline; (20) increase the level of service and access for greenways; (21) increase resources for greenways; (22) increase land acquisition efforts for greenways; (23) expedite greenway development; (24) increase connectivity to parks and greenways; (25) integrate public art into parks and greenways; and (26) increase level of service for indoor facilities.

She then presented Council with (1) the 2009-13 initial connectivity vision, capital cost observations and annual operating cost observations; (2) the 2014-18 neighborhood resources vision, capital cost observations and annual operating cost observations; (3) 2019+ future connectivity and neighborhood visions.

The recommendation cost estimates and timelines for the (1) 2009-13 priorities would be Capital Improvement Projects of $20,000,000 + O&M $1,989,000; and (2) 2014-18 priorities would be Capital Improvement Projects of $20,025,000 + O&M $1,270,000. The total 10-Year plan would be $43,284,000.

In response to Mayor Bellamy, City Manager Jackson said that the next step is allowing Council an opportunity to evaluate the plan and then let Council determine their level of support of the Master Plan at a later meeting.

Councilman Newman asked how much more expensive would this Plan be compared to the history of the parks and recreation capital projects. Mr. Roderick said that this would be increasing their level of funding approximately $1 Million a year compared to what they normally get, based upon the economy at the time. He explained that this is only a guide so when money is available and we do have good economic times, we can start with the priorities in the list and bring those before Council during their Capital Improvement Plan process.

In response to Councilman Mumpower, City Manager Jackson said that this plan lends itself to a retreat discussion.

Councilman Mumpower felt that this is a fantasy plan that sidesteps a lot of community priorities, with public safety being on the top of his list. He looked forward to the opportunity to discuss the realism of this plan and the dangers involved in buying into this process.

STATE OF ASHEVILLE'S ECONOMY

Mr. Robert Sipes, Chairman of the Asheville-Buncombe County Economic Development Coalition, used charts to explain the employment growth. He said that as of September 2008, the Asheville metro area is up 1,000 (up 0.6 %) net jobs over last year. This is the 55 consecutive month with record year/year job growth. At 0.6%, Asheville's employment growth matches Greensboro's pace. Overall, the United States is down 0.4%, while statewide growth is flat, and three of the state's metro are currently loosing jobs. Only 40% of all United States metros are currently adding jobs. At 5.2%, Asheville has the lowest unemployment rate among all metros in the state (even lower than Durham if you calculated the rate out a few more decimal points). Compared to the state's 20 largest cities in North Carolina, the City of Asheville has the 5th lowest unemployment rate.

In response to Mayor Bellamy, Mr. Sipes said that in terms of retaining jobs, we want to cultivate and nurture existing businesses and create an environment that makes it conducive to them to maintain current business health or expand their business. Similarly, we have efforts that are focused on workforce development so that we are providing a skilled workforce as a feeder

pool to these companies because the skilled workforce is the backbone of success of local industry here.

In response to Councilman Mumpower, Mr. Sipes said that regarding skilled workforce, we have some strong partnerships with local colleges and university, together with our businesses. Because of the low unemployment we are blessed with and the nature of our local economy, it creates a situation where labor to move into new or different types of endeavors really has to be either imported in or developed on the fly. That is what we've seen in the past and that is one of the key areas we need to make some improvement in.

Councilman Mumpower said that he will bring up at the Council retreat that there may be some room for the City to take some initiative for what is a fairly persistent problem for employers and look for potential solutions.

Vice-Mayor Davis explained how the Asheville-Buncombe County Economic Development Coalition is working toward improving workforce development.

Mayor Bellamy noted that Asheville-Buncombe Technical College is starting a program of how can they better serve the business community by retraining individuals who want to change careers. They are also partnering with Asheville City Schools and Buncombe County Schools. Buncombe County Schools and Asheville City Schools are doing a lot of good things to make sure that students are successful. She also noted the UNC-Asheville's Math Department tutorial program to help trainers help teach math to students. There are a lot of initiatives happening in our community around workforce development that has not happened in the past.

Mayor Bellamy questioned how we can create one point for people to know what jobs are available locally, beyond those available in the newspapers. Mr. Sipes felt we need to do a better job of promoting the job opportunities that are here. A lot of people would be surprised if they saw how much opportunity is in fact here in various types of work. We need to package that in a way that reaches out and grabs people.

Economic Development Director Sam Powers noted that Economic Development Coalition will be holding a homecoming job fair, which will be held over the Christmas holidays. There will be many employers who have jobs at that job fair looking for employees. He said that he will have information on the City's website about that job fair.

In response to Mayor Bellamy, Mr. Powers explained that the City's incentive program is paid based on the company's performance. The incentive is not given until the company performs the conditions outlined in the contract.

At 5:11 p.m., Mayor Bellamy announced a short recess.

QUARTERLY MANAGEMENT REPORT

Strategic Operating Plan

Assistant City Manager Jeff Richardson said that the Asheville City Council identified short and long term goals at the February 2008 strategic planning retreat. He then provided the first quarterly update on the following four focus areas:

1. Affordable
    - Fiscal Year 2007-08 no tax increase
    - Priority Places Interactive GIS Mapping Tool
    - Asheville as Employer of Choice
        - City of Asheville Youth Leadership Academy (EDC/Businesses/City partnership)

- A-B Technical Community College Yes Camp
- 240 Service Hours

- Ratified Economic Development Grant to incent $15 Million expansion: Unison Engine Components
- Ten Year Plan to End Homelessness
  - City/County Homeless Initiative Advisory Committee
  - Non-Profit HMIS Reporting Requirement
- City-owned property Request for Qualifications/Request for Proposals Process: workforce housing

2. Green
- Mobile Clean Air Renewable Energy Award
- Alternative energy exploration: water treatment plants
- Alternative fuel vehicles = 10% city fleet
- Public Works – 4 day work week = 294 ton reduction of carbon emissions
- Asheville Police Department bike patrol unit re-established
- Asheville Police Department usage reduced 20%
- Expanding City education programs:
  - Better Energy Savings Today Program: results include:
    - 10% increase in City departmental recycling
  - Feed Bin and Win Recycling contest
    - 21% increase in community recycling
  - Open Space "Fee in Lieu Program" ($100,000) Future Greenway Acquisition
  - Pilot Study: LED lighting at Civic Center Garage

3. Safe
- City building security enhancements
  - Security cameras at key facilities
  - Generator installation at City Hall and Brown Mountain radio
  - Portable emergency generator for City shelters during emergency weather
  - Civic Center fire alarm system upgrades
- Asheville Police Department Priority One Calls: faster response times
- Implemented "Code Red" Citizen Emergency Notification System
- Implemented Internal Affairs Pro (responsive case analysis)
- Map Asheville Crime Mapper
- Police Officer/Psychiatric Illness Crisis Intervention Training (32 sworn personnel)

4. Sustainability
- Street sweeping
  - Swept 2071 miles of road
  - Collected 209 tons of debris
- Catch basin cleaning
  - 2112 catch basins cleaned
- Stormwater construction
  - 10 projects = $160,736
- Biltmore Village Flood Action Plan Completed
- Brownfield Initiative: $400,000 secured in Brownfield funding ID & mediation
- Bond program feasibility analysis to Council (debt capacity/affordability)
- Wayfinding Program underway
- Tourism Development Authority Project identification

In response to Councilman Mumpower, Mr. Richardson said that he would provide Council with more information on the normal level of catch basin cleaning on a quarterly basis.

In addition, staff provided the following additional information:

A. Economic Development Key Indicator Report

The following charts: (1) employment change by major industry; (2) unemployment rates; (3) monthly home sales – units; (4) monthly home sales – average price; (5) residential building permits – units; (6) residential building permit – value; and (7) City business licenses

B. Police Department Drug & Community Policing Quarterly Report

The first quarter results addressing the drug enforcement statistics and community outreach.

Quarterly Financial Report

Chief Financial Ben Durant reviewed with Council financial information that reflects the City's overall financial position for the fiscal year through September 2008.

Amendments. The General Fund budget presented in this first quarter report reflects the adopted budget of $88,945,552; plus $1,443,395 in prior year encumbrances that rolled over from Fiscal Year (FY) 2007-08; along with three budget amendments approved by Council during the first quarter. The three amendments resulted in an overall increase in the budget of $120,268. The amendments for the energy management plan and the Unison Engine Components economic development grant were funded with an appropriation from fund balance. A summary of the budget amendments is included below.

Adopted Budget		88,945,552
Encumbrances		1,443,395
Amendment	Date Approved	Amount
Bullet-Proof Vest Federal Grant	July 22	23,018
Energy Management Plan*	August 26	50,000
Unison Economic Dev. Incentive*	September 23	47,250
Total Amendments		120,268
9/30/2008 Budget		$90,509,215

* Fund balance appropriations totaling $97,250

Revenues. Through September 30, 2008, the City has collected $9,668,275 in General Fund revenue, which represents approximately 10.9% of the total General Fund revenue budget. Due to the deteriorating economic climate, staff is projecting that both property tax and sales tax revenues will fall short of budget in FY 2008-09. Based on current year-end estimates, staff is estimating that FY 2008-09 revenue will come in under budget by $1,000,000, which equates to 1.1% of the General Fund budget.

Expenditures. General Fund expenditures through September 30, 2008 total $21,146,251 or 23.4% of the budget. Staff has worked during the first quarter to identify

$1,000,000 in budget savings strategies to offset the expected shortfall revenue mentioned above. Staff anticipates that the remaining departmental budgets will be fully spent by year-end.

Fund Balance. Preliminary year-end estimates for FY 2007-08 show an unreserved fund balance of $18,495,003. Based on current year-end revenue and expenditure estimates, which include the $1.0 million in budget savings mentioned above, staff is projecting that unreserved fund balance will decrease by $793,620 in FY 2008-09 to $17,701,383, which will equate to 19.6% of estimated year-end expenditures.

Mr. Durant gave Council the following brief overview (1) first quarter results and current budget trends show a $1.0 million revenue shortfall; (2) short-term "stop-gap" measures have been implemented in the current year to close the gap; (3) the Fiscal Year 2009-10 preliminary budget forecast includes a significant imbalance between revenues and expenditures; and (4) structural budget issues must be addressed.

He then reviewed the current General Fund budget, along with using charts to explain the General Fund revenue highlights, those being (1) economic conditions are impacting major revenues; (2) property tax revenue projected to come in under budget by $500,000; (a) estimating 2.0% tax base growth vs. 10-year average of 3.3%; and (b) official tax base data received in January 2009; (3) sales tax revenue projected to decrease by 1.5% and fall $1.0 million short of budget (a) September sales tax revenue down 19%; (4) Powell Bill revenue is down 9.0% compared to prior year; (5) state utility tax revenue is exceeding budget estimates; (6) licenses and permits; charges for service and investment earnings so far are trending at or slightly above budget; and (7) overall, General Fund revenues are projected to fall short of budget by $1.0 million in the current fiscal year.

He then explained the expenditure reduction strategies: (1) selective hiring program - $250,000 (a) currently holding 17 vacancies including Public Information Officer, Urban Planner I, Fleet Shop Manager, Public Works Analyst, Recreation Leader and Building Safety Secretary Sr.; and (b) no visible service reductions to the public; (2) delay equipment and vehicle purchases until spring - $225,000 (a) approximately $2.0 Million in vehicle and equipment purchases slated for debt financing – police cars, public works equipment and public safety radios; and (b) by delaying purchase until spring 2009, debt service expense is reduced in the current year; (3) divert Civic Center capital project savings - $100,000 (a) $400,000 allocated to the Civic Center in each of the last two fiscal years for capital projects; and (b) the following projects will come in under budget (i) fire alarm upgrade; and (ii) arena seating replacement; and (4) departmental line item reductions - $425,000 (a) reductions in professional services; small equipment; training and travel; and uniforms; (b) continued inflation in the following key areas (i) utilities; (ii) janitorial services; and (iii) construction materials; and (c) operating budgets will likely be fully spent at year end. Total savings would be $1 Million.

Mr. Durant explained the Fiscal Year 2009 current year Fund Balance trends, using charts. We estimate our Fund Balance will decrease from 20.3% to 19.6%.

Mr. Durant answered various questions/comments from Council, some being, but are not limited to: explanation of the $793,620 deletion in Fund Balance; which property were we going to sell to cover payments for the Overlook and Haw Creek Park land purchases; explanation of the contribution and installment payments for Overlook; and how are our funds in the Fund Balance invested and are the proceeds re-invested back in the Fund Balance.

Mr. Durant then reviewed with Council the preliminary Fiscal Year 2009-10 budget forecast. He reviewed the initial General Fund Gap.

The General Fund overlook is (1) economy will continue to slow revenue growth in Fiscal Year 2009-10; (2) property and sales taxes make up 70% of budget (a) property taxes: 2.0% growth; and (b) sales taxes: no growth; and (3) overall revenue growth projection is 1.5%.

The expenditure outlook initial projects include (1) continuation of the current market and merit pay plans; (2) 10% projected increase in the City's health costs; (3) September Consumer Price Index South Region is 5.4%; and (4) no growth in capital expenditures.

Initial budget balancing strategies include (1) suspend market adjustments - $1 Million; (2) reduce merit pay pool - $250,000; (3) evaluate annual subsidy to housing trust fund - $600,000; and (4) re-engineering and restructuring (a) early retirement; and (b) attrition - $500,000.

He reviewed the budget outlook for the revised General Fund gap.

Budget balancing strategies moving forward include (1) the $3.0 Million budget gap reflects a structural imbalance between revenues and expenditures; (2) staff will perform an exhaustive review of the budget (a) challenging every assumption; (b) examining in-depth re-engineering opportunities; and (c) evaluating core vs. strategic service priorities; and (3) will seek additional direction from Council at the January Council retreat regarding service prioritization.

Throughout discussion, Mr. Durant responded to various questions/comments from Council, some being but are not limited to: drop in sales tax revenues; update on the Overlook Park purchase and financing; and update on the Haw Creek Park transaction.

Councilwoman Jones believes that the citizenry understands the economy and will understand why the City has to scale back. She hoped that in determining how to scale back that we look at across the board cuts. She was distressed to see the evaluation of the Affordable Housing Trust Fund was an initial budget balancing strategy, especially when the citizen survey showed that we ranked the poorest in affordable housing. She wondered if we identify the things that people really want (e.g, the Nature Center), they may be willing to invest a little more in them.

Mayor Bellamy said that over the next few months Council will be reviewing the budget in detail and seriously deliberating about the direction for our City. This Council has invested quite a bit in infrastructure, take home vehicles, police substations, land for park development, etc. and has a good track record over the past three years. It's now a time to tighten our belt due to the economy and she also believes that the community will understand. There may be some areas that need to be reduced that she would not have considered before, but at this point it's not about the things that she likes, it's about how do we get through this tough time and move forward.

City Manager Jackson said that he will be providing monthly updates on the sales tax. In addition, we will also look at all the revenue assumptions of how are we compared to market and what is our cost recovery. This is a comprehensive budget process and we are starting early.

Mayor Bellamy explained that there is an initiative to transfer 5,000 miles of roadway to the larger cities across state without additional revenues to pay for that. There will be a resolution on the November 25, 2008, agenda opposing the forced transfer of additional transportation responsibilities to local government.

Traffic Safety Capital Improvement Budget

Assistant Director of Traffic and Engineering Ken Putnam said that this is the consideration to create an annual Traffic Safety Projects Fund that would be used to design and construct various traffic safety related improvements throughout the City of Asheville, excluding traffic calming projects.

Traffic Safety Projects can be defined as traffic-related projects that when completed would improve public safety and/or efficiency to the various transportation users including vehicles, bicycles, pedestrians, and Transit. Typical projects include new traffic signal

installations including pedestrian signals, upgrades to existing traffic signals including pedestrian signals, emergency vehicle pre-emption, new warning flasher installations, upgrades to existing warning flashers, left and right-turn lanes, radii improvements at intersections, bicycle lanes, and pedestrian crossings, and the potential projects would have a total estimated cost of $75,000. Projects with a total estimated cost of less than $25,000 can be funded through the Transportation & Engineering Department's operating budgets. Currently, these types of projects *(total estimated costs equal to or greater than $25,000)* are funded through the Capital Improvement Program. When these types of projects are identified and determined to be needed as a result of a proposed development, the potential improvements are typically funded by private sources. Traffic calming projects would ***not*** be included since there is a separate policy and an account code already established for traffic calming projects.

These projects are typically identified as Traffic Engineering staff responds to various requests from citizens throughout Asheville. Once identified and reviewed in depth, many of these projects would then move into the design and construction stage if funding was available. According to our records, these types of projects have been approved in the past through the Capital Improvement Program including the widening of Yorkshire Street and emergency vehicle pre-emption at the intersection of College Street and Charlotte Street. Privately funded projects that have been constructed in the past include a double left-turn lane along NC 81 Swannanoa River Road at its intersection with US 74-A (South Tunnel Road) and a new traffic signal at the intersection of River Hills Road and the access for Pier One/Dick's Sporting Goods.

During September 2008 action was taken to approve funds from the General Capital Reserve Fund in the amount of $50,000 to install a traffic signal at the intersection of Fairview Road and Third Street in the Oakley community. This project is a good example of the type of project that should be funded through a Traffic Safety Projects Fund. When this project was funded, there were other projects pending including the following projects:

1. Burton Street Traffic Calming – Total estimated cost = $40,000 *(This type of project would **not** be funded by the Traffic Safety Projects Fund)*
2. Charlotte Street Signal Upgrade – Total estimated cost = $60,000
3. Pinchot Drive Pedestrian Enhancements – Total estimated cost = $48,000
4. Fairview Road Signal Upgrades – Total estimated cost = $80,000

Since September 2008, the Burton Street Traffic Calming project has been let to contract and depending on weather conditions, all work should be completed by November 18, 2008. The Charlotte Street and Fairview Road signal upgrades would improve overall traffic efficiency in the immediate areas but considering the current economic climate, both of these projects could continue to be delayed. The Pinchot Drive Pedestrian Enhancements would improve pedestrian safety in the immediate area of William W. Estes Elementary School and T.C. Roberson High School by providing missing sidewalk links and pedestrian signals and crosswalks at the intersection of SR 3503 (Overlook Road) and Springside Road/Pinchot Drive. Since the subject intersection is maintained by the North Carolina Department of Transportation, the proposed work must be coordinated and approved by them. This approval and design work is scheduled to be accomplished during the current fiscal year.

This action complies with the City Council 2008-09 Strategic Operating Plan by protecting the traveling public by making traffic safety related improvements to the existing street infra-structure including intersections.

Pro:

- This action would provide a means to address traffic-related safety issues within a timely manner thereby reducing potential risk to the City.

Cons:

- This action would reduce the total amount of Capital Improvement Program Funds available on an annual basis.

- The total estimated annual cost is $50,000.

The total estimated annual cost is $50,000. Funds would only be spent on an as-needed basis as the various needs are identified. In order to appropriate funding in the current fiscal year, a budget amendment would be necessary. Sufficient funds exist in the General Fund fund balance for this budget amendment.

Staff recommends that City Council approve an annual Traffic Safety Projects Fund and schedule consideration of a budget amendment to design and install priority traffic safety related improvements throughout the City of Asheville.

Councilman Russell supported this fund as public and pedestrian safety is a core City responsibility.

Upon inquiry of Councilman Mumpower, Mr. Putnam said that there are funds in the Capital Reserve Fund for this traffic safety projects fund this fiscal year. Staff would still be reporting to Council on the projects they want to bring forward but this would at least give staff the mechanism to move forward with the design and the construction of it if it was identified mid-stream.

Councilman Newman noted that there are a lot of needs out there and had this been appropriated as part of this fiscal year's budget cycle, the $50,000 would have already been spent with the Fairview Road project.

After a brief discussion regarding funding options, it was the consensus of Council to approve the annual Traffic Safety Projects Fund and to fund the Fund via a budget amendment with a transfer of $50,000 from the Capital Reserve Fund and additional funds from completed capital projects.

Stormwater Enterprise Fund

Director of Traffic and Engineering Cathy Ball said that the purpose of this report is to provide an update to City Council on the status of the Stormwater Enterprise Fund including policy issues.

She reviewed the summary of the Stormwater Enterprise Fund including the total revenues, total expenditures, fund balance and unfunded capital projects in addition to the funding priorities. She then provided detailed information on the expenditures of this fund to include capital, maintenance, permitting and administration.

Staff has completed a stormwater analysis for the Dingle Creek and Upper Ross Creek watersheds. The reports for these analysis priorities capital needs for the stormwater fund. She reviewed a list of stormwater capital projects for the current and 5-year planning period. This list includes projects for the watershed above as well as problems indentified by staff.

Two policy issues have come to our attention. The first is the ability to review the stormwater utility fee. The second is the issue of storm drainage problems on private property. Staff has analyzed both of these questions in some detail.

With regard to the issue of the fee, we have provided an analysis impact as a result of decreasing the stormwater utility fee. We would request that we review this fee as part of the Fiscal Year 2009-10 Budget process.

We have also evaluated several private storm drainage problems and provide a sample of locations and costs to repair these problems. These projects include:

Examples	Estimated Costs
South French Broad	$70,000
Harmony Lane	$75,000
Merrimon Avenue	$1 M+
South Griffin Ave.	$200,000
Waynesville Ave.	$600,000
Reed Street	$250,000
Murdock Ave.	$100,000

The Stormwater Utility Fund complies with the City's Strategic Plan by developing a long-term plan to address the City's aging infrastructure.

Pros:

- Report provides data for Council's evaluation.
- Completion of capital projects will improve City's infrastructure.

Cons:

- Reducing the stormwater utility fee will have an adverse impact on the stormwater services.
- Proposed capital projects will reduce the stormwater fund balance.

Next steps regarding fees include (1) evaluate single family residential fee structure as part of 2010 budget process; (a) information available December 2008; (2) create three residential tiers (a) low, medium, high; and (b) examples Raleigh, Greensboro, Charlotte; and (3) options (a) maintain current rate for lowest tier; (b) generate additional revenue in medium and high tier for Capital Improvement Plan projects; and (c) decrease revenue/services.

Options regarding private drainage include (1) try to identify other funding source for private drainage problems (Community Development Block Grant, Mountain Housing Opportunities, Affordable Housing Fund, etc.); and (2) provide a portion of additional revenue from "tiering" to other funding agencies.

The purpose of this report is to provide an update to City Council on the status of the Stormwater Enterprise Fund including policy issues. No action is required.

In response to Councilman Newman, Ms. Ball said that Mountain Housing Opportunities has some grant money (5-year forgivable loans) in order to take care of some structural problems associated with problems.

Councilman Russell felt there are many examples of private storm drainage problems. He felt it would not be in the City's best interest to begin repairing those problems, but did support identifying other funding sources for those homeowners.

Ms. Ball said that with the funding mechanism in place, staff strongly recommends that the City not take on the private drainage problem as we don't have the funding to address the problems we have. We would be stepping into a business we are not able to do or meet the expectations of the community. There have been other communities that have been extremely aggressive in deciding they are going to take on all the stormwater problems in a certain basin and issue bonds to make those huge improvements.

In response to Councilman Russell, City Attorney Oast said that in general developers cannot divert water onto their neighbor's yard in a way that causes a problem for the neighbor.

Ms. Ball responded to Councilman Newman when he questioned what the 28% legislative compliance meant.

Mayor Bellamy explained why she felt Council's policy on the Stormwater Enterprise Fund should be revenue neutral, and the Fund Balance should be what the Local Government Commission recommends.

In response to Mayor Bellamy's request of a revenue neutral budget direction, Ms. Ball said that in the upcoming budget, one of the options they would come back to Council with is having a revenue neutral fund showing the amount of change, the amount of individual fees based on that, the recommended Local Government Commission Fund Balance, and what that would reduce the Fund to.

There was a brief discussion about the Fund Balance and making the stormwater fees as affordable as possible.

Ms. Ball understood Council's discussion to look at what we have, look at what needs to be done and if there is left-over money we shouldn't be keeping it. She didn't want to set up the expectation, though, that we are going to be able to come back and lower the amount and still meet the capital needs we've identified.

Mayor Bellamy supported a 5-year budget plan for capital and budget so we can actually see and project into the future.

LEGISLATIVE PRIORITIES

Federal

Economic Development Director Sam Powers said that the following is City Council's currently adopted federal funding priorities which were adopted on February 12, 2008:,

- REID CENTER - Extensive renovation to or rebuilding of both interior and exterior and utilities of the W.C. Reid Center for Creative Arts, a 37,000-square foot community center to support a full-service, community based recreation program and multi-disciplinary arts program with an emphasis on providing services to at-risk youth and their families. - Amount requested: $4 to $6 million.

- ENERGY CONSERVATION RETROFITS FOR CITY BUILDINGS - The Building Energy Conservation Retrofits appropriations will allow the City of Asheville to install programmable thermostats, light occupancy sensors, high energy efficient lighting in all 51 city owned buildings after which a holistic social marketing campaign will be conducted to encourage employee behavior change. The retrofits will provide significant cost savings through utilities and decrease the carbon footprint of the city organization, while providing a strong foundation for a social marketing program to effectively create sustainability behavior change. - Amount requested: $749,200.

- TRAFFIC SIGNAL PREEMPTION - A Traffic Signal Preemption System is an electrical device(s) that allow a traffic control signal to respond by giving priority to approaching response vehicles that are outfitted with special equipment. Such systems are designed to increase the safety of the public and responders, reduce emergency response times, and enhance public transit operations. - Amount requested: $495,000.

- REGIONAL PUBLIC SAFETY TRAINING FACILITY - The Regional Public Safety Training facility is a partnership between WNC local governments, state government and AB Tech. The facility will include an emergency vehicle driving pad, burn building, and a rescue tower. The project is a modular project and can be done in phases. - Amount requested: $4 million.

- BUS REPLACEMENT - The project entails the purchasing of fifteen (15) 30-foot hybrid buses to replace 75% of the fleet which are reaching their life-cycle, with more than ten (10) years in operations. This is a multi-year project that intents to replace the fleet in a three year period. The City is recommending buying hybrid buses, or buses using other energy efficient technology, instead of diesel. The use of alternative fuels will help the City to achieve the carbon emission reduction goals adopted by City Council. The project will affect positively the Western North Carolina population that lives in Asheville, Weaverville and Black Mountain and depends on transit to perform the daily activities, providing a more reliable and comfortable service. At the same time will bring benefits to the environment, reducing pollution and improving the quality of life. - Amount requested: $7,875,000 over three (3) years ($2,625,000/year).

In addition, the following is the federal legislative priorities adopted April 8, 2008:

- Senate Bill 1738 "Combating Child Exploitation Act of 2007" to improve the Internet Crimes Against Children Task Force to increase resources for regional computer forensic labs, and investigate and prosecute predators. – Signed into law

- HR 1692 "The Fighting Gangs and Empowering Youth Act of 2007" which contains many things that focus on making sure that our youth have alternatives from gangs as well as increase penalties for gang activity.

- Senate Bill 1745 "Departments of Commerce and Justice, Science, and Related Agencies Appropriations Act, 2008" for support of our Weed and Seed program that is funded under this Act.

- "The Safe, Accountable, Flexible and Efficient Transportation Equity Act of 2003" (1) Sec. 9002 – extension of the highway-related taxes and trust fund; (2) Sec. 9003 – extension of tax benefits for alcohol fuels; (3) Sec. 9004 – private activity bonds for surface transportation infrastructure; and (4) Sec. 9005 – all alcohol fuel taxes transferred to highway trust fund.

- PL 110-140 "The Clean Energy Act of 2007" (HR 6) to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy. – Signed into law

- S. 1675 "Local Community Radio Act of 2007" to implement the recommendations of the Federal Communications Commission report to the Congress regarding low-power FM service.

- S. 234 "Wireless Innovation Act" to make broadband available to unconnected neighborhoods and communities – especially rural and mountainous areas – by exploiting unused frequencies in the broadcast spectrum known as "white spaces."

- Support to fund the expansion of the ERC broadband and fiber optic network in the region for education, medical and emergency service support.

- Lend support to the Land of Sky Regional Council of Government request for funding for a Comprehensive Economic Development Strategy – Regional Growth Management Planning Initiative for Western North Carolina.

- Support funding for energy efficiency and conservation block grants.

- Continued prioritization of the completion of I-26 components through Asheville.
- Accelerated use of Federal resources in local action on Asheville's drug distribution network.
- Enthusiastic Federal enforcement of existing laws affecting illegal immigration in Asheville.

He felt that information may be useful for Council discussions in updating any federal funding or legislative priorities. The 111th Congress convenes on Jan 8th, 2009. Congressional staff usually wishes to receive any funding requests from municipalities in early January to allow time for research and placement.

Of note of existing priorities, the legislation that has adversely affected Asheville Transit funding has finally been amended in favor of the City and other similarly sized systems. The bill allows transit systems serving urbanized areas whose population went from under 200,000 to over 200,000 in population in the 2000 census to use a portion of their (Fiscal Year) 2008 and 2009 urbanized area formula grants for operating costs. Transit systems in these areas can use an amount equal to 50% of the urbanized area formula grants received in Fiscal Year 2002.

Mayor Bellamy felt this was a good starting point for Council, noting that the next time Council sees this will be the opportunity for additions or deletions. She asked Mr. Powers to contact the Chamber of Commerce to request them to delay their meeting with the legislative committee from December 1 until City Council's Retreat on January 9-10, 2009.

State

City Attorney Oast said that that this is the consideration of Asheville City Council's State Legislative Package for 2009

The 2009 Session of the North Carolina General Assembly convenes on January 28, 2009 (both houses). Our legislative delegation includes Senators Martin Nesbitt and Tom Apodaca, and House members Bruce Goforth, Susan Fisher, and Jane Whilden (who succeeds Charles Thomas). This session is a "long" session, so the substantive limitations on the types of bills that may be introduced are broader than for short sessions. Also, the time period for submission of local bills is longer. Although the deadline has not yet been established (this is usually one of the first actions taken), recent history indicates that the deadline is likely to be some time in mid to late March.

The purpose of this report is to advise Council of progress on our requests from 2007-08, provide additional information as to some matters of Statewide concern (and implications at the local level), and suggest some topics for legislative action.

A. Communication with legislators. While the City Council and members of the delegation do not always agree with each other, members of the delegation that I have spoken with have emphasized the need and desirability for better and more frequent communication. One member of the delegation has suggested that Council schedule a meeting to which the local delegation is invited. The 2009 session begins on January 28, and if such a meeting is to occur it will be easier to schedule before the session begins, when the legislators' duties require their presence in Raleigh. A special meeting for this purpose would be appropriate, if Council desires. However, such a meeting could be scheduled at any time, and visits to Raleigh and communication via other means is invited. Council's retreat is now scheduled for January 9-10, which permits a discussion of legislative proposals prior to the convening of the session, and this may present an opportunity for discussions with members of the delegation.

B. Legislative initiatives by other bodies.

1. Chamber of Commerce. The Governmental Affairs Task Force (GATF) of the Asheville Chamber of Commerce consists of representatives from various segments of the community, including business, non-profit, governmental, and education. Many, if not all, Council members receive notice of and regularly attend these meetings. For the past several years, this group has developed a legislative agenda of interest to the area, and this agenda is submitted to the Chamber's Executive Committee and Board of Directors for approval, which usually occurs after the first of the year. This agenda frequently includes matters of interest to the City, and we track it to see when our interests coincide.

2. League of Municipalities. The League of Municipalities is a statewide organization of cities and towns. The League works with members of the General Assembly on matters of interest to municipalities across the State, and on some local matters. The League's legislative agenda was not available as of the date of this Staff Report, but will be provided to you as soon as available. On particular matters (such as the drought management legislation of 2008), the League requests our comments, and asks that we contact our legislators.

   Of particular concern this year are potential changes to the State's annexation laws. A joint committee has been established to review these laws, and the League has requested our assistance and participation. Last week (November 6), I attended a meeting in Raleigh where the topic of discussion was annexation.

3. Other municipalities. Not infrequently, we will become aware of legislation that has been requested by other local governments (usually cities) that may be of use to us. The ability to offer incentives for sustainable building practices is a recent (2007) example of this. Sometimes, our legislators will contact us if they see a bill that they think we would be interested in. However we become aware of these other bills, we bring the issue to Council, and it is usually a simple process to have Asheville added to the legislation.

C. City's 2008 Legislative Agenda. He reviewed the resolution adopted by Council last year regarding the legislative agenda. Because of restrictions on "short session" legislation, our requests for local legislation were limited; other requests consisted primarily of advocacy, with respect to certain general (statewide) legislation.

1. Asheville / Woodfin boundary adjustment. This request was initially submitted in 2007, and has been discussed since before then. Most of the property involved affects either UNC-A or the State of North Carolina, but some of it is privately owned. In 2008, we contacted all affected property owners. Several owners whose property is currently in Woodfin or unincorporated areas objected to any proposal that would incorporate them into Asheville, and there was reluctance to proceed with the adjustment over these objections. We tried to re-configure the proposed boundary to address these concerns, but found no way to do that and address the municipal service delivery issues that prompted the request in the first place. A bill was introduced, and referred to committee, but no further action was taken.

2. Street Gang Prevention. Two related bills were adopted, one strengthening the criminal laws in this regard, and one focusing on local prevention and interaction. Council supported these bills.

3. Cable TV / PEG. Council supported a bill that would have increased the distribution to local governments of the tax on video programming services. This

bill apparently was not adopted in 2008, but a bill that clarifies that this revenue should be distributed to channels that actually produce programming (as opposed to being merely operational) did pass.

4. Smoking in Public Parks. A bill was introduced that would have allowed local governments to ban smoking within 50 feet of a building entrance. It passed the Senate, but failed to pass the House.

5. Criminal Justice System Funding. The State's budget included funding for 31 new assistant district attorneys, and 3 new district court judges, and authorized additional funds for probation and parole staffing. None of the new district court seats is in Buncombe County; we are checking to see if any new ADA positions for Buncombe were authorized.

6. Mental Health. The State's budget included some moderate increases in funding for mental health and other social service programs at the State level.

7. Sexual Predators / Jessica's law. Jessica's law, which restricts the activities of registered sex offenders in proximity to places where children gather (schools, daycare centers, etc.) was adopted. Another law was adopted to broaden the protection of children from sexual predators, specifically in social networking websites.

The above are matters that Council took a position on in 2008. I could not find where action had been taken on other matters in the City's package, such as salvia divinorum, but will continue to look. Other legislation of interest to municipalities was adopted in 2008, and these will be covered in a later memorandum, and possibly at the retreat.

Suggestions for Legislation. Council should begin thinking now about matters for legislative consideration in 2009, with an eye towards adopting a package in January, following your retreat. Suggestions for consideration include:

a. Legislation allowing for a broader range of implementation of local affordable housing programs.

b. Clarifying authority of City to place conditions on sale of certain property.

c. Repeal of Sullivan Acts.

d. Hotel / meal tax or other dedicated funding source for support of Civic Center.

e. Strengthen local authority regarding illegal immigration.

f. Renew request (last proposed in 2005) to facilitate voluntary annexation of properties near the airport (proximity to Fletcher issue).

g. Authorization and funding for "quality of life" enforcement program, similar to other N.C. cities.

h. Address issue of municipal incorporation of rural areas (this may be done in connection with review of annexation law).

i. Provide / clarify authority to regulate vehicle towing from parking lots.

j. Support creation by N.C. Utilities Commission of an organization to design and implement statewide plan for energy efficiency and conservation (NOTE: legislative action may not be needed).

The foregoing summary constitutes a beginning point for Council discussion and direction. There is no requirement for Council to take action before the General Assembly convenes, but action should be taken soon enough as to allow for timely submission to the local delegation.

This matter is before Council for further discussion and/or direction as appropriate. Once the legislative action items have been settled on, a resolution will be prepared, to be supplemented with supporting materials and transmitted to members of the delegation.

Upon inquiry of Councilman Newman, City Attorney Oast said that he would add language about the issue of voluntary annexation for Asheville in general and our support for Asheville having the full voluntary annexation authorities that are granted to other North Carolina cities.

Upon inquiry of Councilman Mumpower, City Attorney Oast said that he would add the following language "support increased and appropriate funding of the State's criminal justice system, including, without limitation: additions to law enforcement, prosecutorial, and judicial personnel; improved facilities, including courts and detention facilities; improved programs for crime prevention and abatement, and post-conviction monitoring."

Mayor Bellamy asked that the City send a letter of appreciation to our representatives in Washington and Raleigh who helped us accomplish some of our legislative goals. She was proud of the gang legislation that did pass from a lot of collaboration between the Metro-Coalition of Mayors and Metro-Coalition of Police Chiefs, along with a lot of help from Senator Martin. She explained the models, noting that she supported the High Point model. This community initiative will be reviewed by the Planning & Economic Development Committee and brought to Council for endorsement.

In response to Mayor Bellamy regarding towing, City Attorney Oast said that he has received copies of ordinances from other cities that might be beneficial to Asheville. He will be bringing that information to the Public Safety Committee in the near future. He felt that some, if not all, of the items we want accomplished might not require special legislation.

Councilman Mumpower suggested clarification of the language "authorization and funding for "quality of life" enforcement program, similar to other N.C. cities."

In response to Councilman Mumpower, City Attorney Oast said that a lot of what Council is asking for doesn't require money from the State.

Mayor Bellamy initiated discussion regarding appointing a subcommittee to begin conversations with our State legislators and County Commissioners regarding the Sullivan Acts, which received the majority consensus support of Council. Councilman Mumpower supported all meetings be held in public view. Councilwoman Jones felt that talking is more important than mandating at what setting that discussion will take place.

Mayor Bellamy said that she can control meetings that Asheville hosts, but cannot control other bodies asking to meet with individuals. After December 1, 2009, she will extend an invitation to our State legislators and the County Commissioners to talk about this issue and then as a group discuss the next steps.

MILLS RIVER WATER AGREEMENT

Mayor Bellamy said that City Council met with the Henderson County Commissioners on November 14, 2008, to discuss the water issues. In summary, Henderson County suggested terminating the water agreement with the City of Asheville and allowing Henderson County to buy the Mills River Treatment Plant. Because both bodies agreed to subcommittees (the City's consisting of Mayor Bellamy, Vice-Mayor Davis and Councilman Newman), she wanted a clear expectation of what Henderson County wants.

Councilman Newman felt that if Henderson County wants to buy the Mills River Treatment Plant, they need to submit a proposal and provide Council with more specifics in order for Asheville to respond.

Regarding the planning model presented at the November 14 meeting, it was the consensus of Council that a planning model be based on need vs. assets.

Councilman Mumpower supported continuing to clarify publicly Asheville's dedication to honor the water agreement with Henderson County. If Henderson County contends that Asheville has failed to uphold the water agreement, he asked that it be clarified.

Mayor Bellamy asked that clarification of the drought issue this summer. There was a misunderstanding in that they thought Asheville was not willing to sell the City of Hendersonville water and they had to impose water conservation measures. She asked that copies of correspondence be made available to Henderson County to show that Asheville was immediately willing to sell water to the City of Hendersonville. The decision to impose water conservation measures by the City of Hendersonville was made outside of any influence of the City of Asheville.

Councilman Mumpower asked for a concentrated effort to include other water resource entities in future regional need analysis and planning.

Mayor Bellamy said she will also bring to the table information from the Land-of-Sky Regional Council on their water analysis and water study.

Councilman Mumpower suggested a policy decision that this Council that any regional water discussions would include other water producing entities.

Councilman Newman suggested discussion with Henderson County of the Bent Creek property on the French Broad River.

In response to Councilman Newman, Interim Water Resources Director Robert Griffin said that it is his understanding that the City of Hendersonville is doing an upgrade on their water treatment plan and it does not increase their capacity. It's an upgrade similar to what Asheville is doing at their plant to bring operations more into a safer and more efficient environment for their utilities as well as how they produce water. They have been given permission for a temporary intake if we go back into a low water volume on Mills River to the French Broad. That does not increase their capacity beyond what they could produce before they were limited by the Mills River and the muscles found in the Mills River. City Manager Jackson said that he will confirm that understanding with the City Manager from Hendersonville. The City of Hendersonville did make a policy decision to forego or suspend plans to build an initial facility when they entered into the agreement with Asheville.

BOARD/COMMISSION APPOINTMENTS

It was the consensus of Council to (1) reappoint Charles Worley as a member and Chair of the ABC Board and (2) interview Mr. Robert Tuck (if a City resident) and Mr. Jim Ellis for a vacancy on the ABC Board. If, however, Mr. Tuck is not a City resident, then City Clerk Burleson was instructed to prepare a resolution reappointing Mr. Worley and appointing Mr. Ellis.

It was the consensus of Council to appoint Mr. Rod Baird as the member of the RiverLink Board of Directors to the River District Design Review Committee (to replace Mr. Richard Hall who is no longer a member of the RiverLink Board of Directors).

In response to Vice-Mayor Davis, it was the opinion of City Attorney Oast that we are on sound legal basis asking for race, sex and age on our board and commission applications, including the City Council applications. What law is out there supports diversity of the community.

MISCELLANEOUS

Mayor Bellamy explained that the 2010 Census is hiring 1,000 people in our region to carry out the Census Program. She explained the importance of having every resident of Asheville counted in that over $300 Billion per year in federal and state funding is allocated to communities and decisions are made on matters of national and local importance based on census data. Census data will also determine how many seats each state will have in the U.S. House of Representatives as well as redistricting of state legislatures, county and city councils, and voting districts. She urged the community to fill out the 2010 Census.

ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 6:50 p.m.

Magdalen Burleson
CITY CLERK

Terry M Bellamy
MAYOR

Tuesday – November 25, 2008 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilwoman Diana Hollis Jones; Councilman R. Carl Mumpower (left meeting at 7:58 p.m.); Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Mumpower gave the invocation.

I. PROCLAMATIONS:

A. RESOLUTION NO. 08-228 – RESOLUTION OF APPRECIATION TO HOLLY JONES

Mayor Bellamy read the resolution thanking Councilwoman Jones for her service to Asheville and presented her with the resolution, a plaque, her name plates and a City pen.

Resolution No. 08-228 was adopted by acclamation.

Councilwoman Jones thanked her family, individual members of Council, Mayor Bellamy, City staff and the citizens of Asheville for allowing her to serve the City of Asheville.

RESOLUTION BOOK NO. 31 - PAGE 373

B. PROCLAMATION PROCLAIMING NOVEMBER, 2008, AT "NATIONAL ADOPTION MONTH"

Mayor Bellamy read the proclamation proclaiming November, 2008, as "National Adoption Month" in the City of Asheville. She presented the proclamation to Ms. Dahlene Morse, Director of Bethany International Adoptions, and Alisha Davis, Community Based Services Supervisor from the Buncombe County Department of Social Services, who briefed City Council on activities that took place and will be taking place during the month.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Item "D" was removed from the Consent Agenda for discussion and/or individual vote.

A. APPROVAL OF THE MINUTES OF THE FORMAL MEETING HELD ON NOVEMBER 11, 2008; THE SPECIAL MEETING HELD ON NOVEMBER 14, 2008; AND THE WORKSESSION HELD ON NOVEMBER 18, 2008

B. RESOLUTION NO. 08-229 – RESOLUTION ADOPTING THE 2009 CITY COUNCIL MEETING SCHEDULE

Upon inquiry of Councilman Newman, City Attorney Oast said that City Council can amend their regular meeting schedule at anytime.

RESOLUTION BOOK NO. 31 – PAGE 374

C. RESOLUTION NO. 08-230 – RESOLUTION APPOINTING A MEMBER TO THE RIVER DISTRICT DESIGN REVIEW COMMITTEE

Summary: Mr. Richard Hall no longer serves as a member of the RiverLink Board of Directors, thus creating a vacancy until September 1, 2010.

Mr. Rod Baird, 33 Grovewood Road, Asheville, N.C., be and is hereby appointed to the River District Design Review Committee, as one of the two members from the RiverLink Board of Directors, to serve the unexpired term of Mr. Hall, term to expire September 1, 2010, or until he is no longer a member of the RiverLink Board of Directors or until his successor has been appointed, whichever occurs first.

RESOLUTION BOOK NO. 31 – 375

D. BUDGET AMENDMENT FROM THE ENVIRONMENTAL PROTECTION AGENCY TO RECEIVE AND ADMINISTER FUNDS FOR THE RIVER DISTRICT BROWNFIELDS GRANT AWARDS

This item was removed from the consent agenda for discussion and/or an individual vote.

E. RESOLUTION NO. 08-231 – RESOLUTION AMENDING THE 2008 CITY COUNCIL MEETING SCHEDULE TO (1) ADD A FORMAL MEETING ON DECEMBER 2, 2008; AND (2) ADD A SPECIAL MEETING ON DECEMBER 12, 2008

RESOLUTION BOOK NO. 31 – PAGE 376

F. RESOLUTION NO. 08-232 – RESOLUTION AFFIRMING THE CITY OF ASHEVILLE'S SUPPORT AND PARTNERSHIP WITH THE 2010 CENSUS

RESOLUTION BOOK NO. 31 – PAGE 377

G. ORDINANCE NO. 3674 – BUDGET AMENDMENT FROM LEASE PURCHASE PROCEEDS TO PURCHASE TWO REPLACEMENT FIRE TRUCKS

RESOLUTION NO. 08-233 – RESOLUTION WAIVING THE FORMAL BID REQUIREMENTS AND AWARD THE BID FOR TWO FIRE TRUCKS USING THE "PIGGY BACK" PROVISION FROM THE AWARD OF BID FROM THE TOWN OF KERNERSVILLE, N.C.

Summary: The consideration of a resolution authorizing the City Manager to waive the formal bid requirements and award the bid for two fire trucks in accordance with North Carolina General Statutes using the "piggy back" provision from the award of bid from the Town of Kernersville, N.C., from March 4, 2008, and approving the associated budget amendment in the amount of $192,756.

In order to reduce costs and maintain current emergency response operations, the Asheville Fire and Rescue Department needs to replace two front line fire trucks. In order to make the most efficient purchase possible, staff recommends that City Council waive formal bidding procedures in accordance with North Carolina General Statutes to purchase two fire trucks from a bid awarded by the Town of Kernersville, North Carolina. In addition, appropriate

budget revision is needed to issue the purchase order. This is an improvement business plan decision for AFR and city government.

The Fiscal Year (FY) 2008-09 budget included $1,100,000 for replacement of one fire truck. Another fire truck was projected to be included in the FY 2009-10 budget as a replacement. Currently, two front line trucks in the fire and rescue fleet are in high need of replacement and costing city government more money than necessary to operate. Newer apparatus is costing us an average of $.815 per mile to operate and emitting very low (2007 regulatory standard) emissions. The two fire trucks that we need to replace are costing us an average of $3.91 per mile and are both over 16 years old, not being very environmentally responsible.

Due to the increasing cost of steel, fire apparatus costs have escalated over the past year. Staff has determined that we can most cost effectively meet our need for replacing two fire trucks by using the "piggy back" provisions of the North Carolina General Statutes.

Staff recommends purchasing two (2) fire trucks now and not including a replacement truck in the FY 2009-10 budget, given the economic situation and budget challenges that we are facing. Fulfilling this request now will reduce the requests for the FY 2009-10 Capital Improvement Plan by $800,000.

The Town of Kernersville, North Carolina, bid a truck that will meet our immediate operational needs. Kernersville awarded their purchase order on March 10, 2008. State statutes allow us to "piggy back" that bid. By doing so, we avoid two cost increases that have occurred since that date. On two fire trucks, these cost increases for the same trucks would cost our tax payers an additional $95,399.99. We also could receive the trucks in July, 2009 as opposed to November, 2009 by using the "piggy back" approach.

North Carolina General Statues require that an advertisement be made of Council's intent to utilize the "piggy back" option and waive the formal bidding process. That ad properly posted November 12, 2008, through November 24, 2008.

In order for the purchase to be made, an additional appropriation of $192,756.00 is necessary in the FY 2008-09 budget. This funding will come from lease-purchase proceeds, so the total cost of the fire truck will be spread out over 5 to 7 years. Annual operating savings in per mile costs are projected to exceed $60,000 with the replacement of these two trucks ($.815 per mile versus $3.91).

This request ties in with the City Council Strategic Operating Plan in the following methods: (1) SAFE: It is necessary to have safe, reliable fire trucks to operate in order to provide critical public safety services to our citizens; (2) GREEN: The replacement fire trucks will meet 2007 or greater emissions standards and be much more environmentally responsible; and (3) SUSTAINABLE: City government will save money on purchasing these fire trucks and save money in operating these new units in day to day operations.

Council's Public Safety Committee reviewed this request on November 11, 2008, at their regularly scheduled meeting and voted to recommend approving the request to the full City Council on November 25, 2008.

Pros:

- This action saves our taxpayers money
- We save significant money on the initial purchase of the fire trucks
- We avoid the price increases that have affected the fire apparatus industry over the last year, saving $95,399.99 for the same equipment
- We are able to place these units into service quickly and begin reducing operating costs
- We are able to save money on the per mile cost to operate the fire trucks

- We dramatically reduce the vehicle emissions by replacing 16 year old trucks
- We provide our firefighters safer, more efficient trucks
- Also, we will not slate any fire truck replacement for FY 09-10 in order to help more effectively manage that upcoming budget, reducing CIP requests by $800,000

Cons:

- There will be a slight increase in debt service costs in FY 09-10
- We will delay a ladder truck replacement until FY 2010-11

There will need to be an appropriation of $192,756 in this year in order to make the purchase. Staff anticipates that based on the expected delivery date of the trucks, no debt service payment will be required in the FY 2008-09 budget. If there are any cost of debt issuance costs in FY 2008-09, they will be absorbed within the existing debt service budget. A full debt service payment will be included in the FY 2009-10 budget.

City staff recommends City Council adopt a resolution authorizing the City Manager to waive the formal bid requirements and award the bid for two fire trucks in accordance with North Carolina General Statutes using the "piggy back" provision from the award of bid from the Town of Kernersville, NC from March 4, 2008 and approving the associated budget amendment in the amount of $192,756.

ORDINANCE BOOK NO. 25 – PAGE 86
RESOLUTION BOOK NO. 31 – PAGE 378

H. RESOLUTION NO. 08-234 – RESOLUTION APPOINTING MEMBERS TO THE ALCOHOLIC BEVERAGE CONTROL BOARD

Mr. Charles R. Worley, 102 Carter Cove Road, Asheville, N.C., be and he is hereby reappointed as a member of the Alcoholic Beverage Control Board, to serve an additional three-year term, term to expire November 13, 2011, or until his successor has been appointed.

Mr. Charles R. Worley, 102 Carter Cove Road, Asheville, N.C., be and he is hereby appointed as Chairman of the Alcoholic Beverage Control Board until his term expires on November 13, 2011, or until City Council appoints a replacement.

Mr. Jim Ellis, 3 Sunset Lane, Asheville, N.C., be and he is hereby appointed as a member of the Alcoholic Beverage Control Board, to serve a three-year term, term to expire November 13, 2011, or until his successor has been appointed.

RESOLUTION BOOK NO. 31 – PAGE 379

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Councilwoman Cape moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Jones and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

D. ORDINANCE NO. 3673 – BUDGET AMENDMENT FROM THE ENVIRONMENTAL PROTECTION AGENCY TO RECEIVE AND ADMINISTER FUNDS FOR THE RIVER DISTRICT BROWNFIELDS GRANT AWARDS

Summary: The consideration of a budget amendment, in the amount of $400,000, from Environmental Protection Agency (EPA), to receive and administer funds for the River District Brownfields grant awards.

On August 14, 2007, Asheville City Council authorized Land of Sky Regional Council (LOSRC) to submit two Brownfields Assessment grant applications to EPA on behalf of the City of Asheville. On April 10, 2008, the City of Asheville was recognized as the recipient of $400,000 in assessment and cleanup funds for hazardous materials sites and petroleum contaminated sites in Asheville's River District. On May 27, 2008, City Council approved a resolution authorizing the City Manager to execute a contract with LOSRC to administer the program funds. Contract runs between July 1st 2008 and ends September 30, 2011. On October 23, 2008, a kick off stakeholder meeting was held at AB-Tech Ferguson Auditorium

The approval of this budget amendment would be in accordance with Council's adopted Fiscal Year 2008-09 Strategic Operating Plan.

Pros:

- City promotes sustainable infill development
- City promotes safety of citizens through potential clean up of hazardous materials in the River District
- City will expand its toolbox of incentives for sustainable development without having to redirect current or direct substantial new resources.
- No new city staff required to administer this three year grant program.

Con:

- Staff has not identified any cons.

The approval of this budget amendment would not negatively impact the City's budget, as the grant award is to be used for all administration/operational costs as well as Environmental Assessment costs.

Staff recommends Council approve the budget amendment, in the amount of $400,000, from Environmental Protection Agency (EPA), to receive and administer funds for the River District Brownfields grant awards.

Councilman Mumpower expressed concern about the City continuing to receive borrowed money under the current circumstances.

Vice-Mayor Davis moved for the adoption of Ordinance No. 3673. This motion was seconded by Councilman Russell and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 84

III. PRESENTATIONS & REPORTS:

A. LISTENING TO OUR TEENS – A PROJECT OF THE ASHEVILLE CITY SCHOOLS FOUNDATION

Ms. Kate Pett, Co-Director of the Asheville City Schools Foundation, and Ms. Jillian Buckley, VISTA volunteer and project coordinator, said that this project is being funded with the generous support of the Community Foundation of Western North Carolina and The Beatty Foundation.

She explained the project as follows: "We will gather in-depth information about how we can engage and support our young teens, ages 11-14 years old, through 150 interviews with

students, families and service providers. We will compile the interview data, and use it to plan for enhanced programs and services that better support the success of our young teens. We will leverage existing resources, and seek new funding sources to implement the plan in the next five years."

These outcomes will be evidence of the success of this project:

- In-depth information collected from a representative sampling (150 individuals) of Asheville teens, families, and service providers
- 5-Year plan for reshaping services and programs in our community for teens
- Improved afterschool and summer programming within two years

Phase I Summary (June, 2008 – October, 2008):

Completed: The formation of a steering committee that is representative of the community and stakeholder groups. The creation of a student interview script by the questions committee. The recruitment of volunteer listeners. A training of over forty volunteers with instruction on how to engage interviewees . Sixty student interviews conducted at Asheville Middle School and Randolph Learning Center.

Phase II (November, 2008 – April, 2009):

- Interviews will be held with families, service providers and student focus groups
- Interviews will be transcribed
- Data will be organized and synthesized

Phase III (May, 2009 –August, 2009):

- Create goals and strategies to reshape programs to respond to collected data
- Prioritize programs and services and develop a five-year plan of implementation
- Advocate for the implementation of the plan by creating new partnerships, seeking additional funding, and leveraging existing resources
- Present findings to community in multiple formats, including presentation of student voices through student-designed presentation

She said why listen? Because (1) increase in crime committed by youth ages 11-14 after school and in the summer; (2) gap in service often identified between the end of school and when parents come home; (3) a need to inform development and enhancement of programs; (4) a previous listening project contributed to the development of academic programs that address the achievement gap; (5) in Winchester, VA, a Listening Project led new youth organizations, nonviolence programs, and effective citizen police programs; and (6) in Pittsburgh, PA, a Listening Project mobilized hundreds of youth and people of color to speak out, register and vote.

She explained the Listening Project process as (1) project development and initial funds secured from the Community Foundation of WNC and the Beatty Foundation; (2) form a steering committee; (3) train listeners; (4) listen to students, families and service providers; (5) create a resource directory of existing after school and summer programs; and (6) plan for change and implement enhanced services over five years.

LTOT organizational goals include (1) learn more about the types of programs, in school and out, that are critical for student success; (2) learn in which ways families want to be engaged to support the success of their students, and barriers to participation; (3) prioritize programs and services and develop a five-year plan of implementing priorities; and (4) work together as a partnership to implement priorities identified by the Listening Project.

Proposed outcomes include (1) in-depth information about the needs, concerns and aspirations impacting youth teens and their families in Asheville today; (2) information about specific factors, programs, experiences in our community that enhance the chances of youth teen success; (3) a document that outlines recommendations for going forward based on real information and proposes community-wide initiatives to serve young people in Asheville; and (4) successful programs and services that respond to the needs of 11-14 year olds in Asheville.

City Council can (1) conduct a family interview; (2) participate in the strategic planning process; and (3) ensure that youth programs funded by the City of Asheville are responsive to the needs of teens and their families.

On behalf of City Council, Mayor Bellamy thanked Ms. Pett and Ms. Buckley for bringing Council's attention to this program.

In response to Mayor Bellamy, Ms. Pett said that if someone would like to participate in this process, they can contact the Asheville City Schools Foundation.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING OF THE PROJECT IDENTIFIED AS THE ALTAMONT AT RIVERBEND VILLAGE, LOCATED AT 152 BLEACHERY BOULEVARD, FROM URBAN VILLAGE DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR THE DEVELOPMENT OF A 261 UNIT APARTMENT COMPLEX AND CLUBHOUSE; AND A REQUEST FOR MODIFICATIONS TO HEIGHT AND SETBACK STANDARDS

ORDINANCE NO. 3675 – ORDINANCE CONDITIONALLY ZONING THE PROJECT IDENTIFIED AS THE ALTAMONT AT RIVERBEND VILLAGE, LOCATED AT 152 BLEACHERY BOULEVARD, FROM URBAN VILLAGE DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR THE DEVELOPMENT OF A 261 UNIT APARTMENT COMPLEX AND CLUBHOUSE; AND A REQUEST FOR MODIFICATIONS TO HEIGHT AND SETBACK STANDARDS

Mayor Bellamy opened the public hearing at 5:41 p.m.

Urban Planner Nathan Pennington said that this is the consideration of an ordinance to conditionally zone property identified as The Altamont at Riverbend Village, located at 152 Bleachery Boulevard, Urban Village District to RM-16 Residential Multi-Family High Density District/Conditional Zoning for the development of a 261 unit apartment complex and clubhouse; and a request for modifications to height and setback standards. This public hearing was advertised on November 14 and 21, 2008.

The applicant seeks the conditional zoning of approximately 15.26 acres currently zoned UV, to RM-16 CZ for a multi-family and townhome residential project with 252 new apartment and 9 existing townhome units. The property is located at 152 Bleachery Boulevard adjacent to the PetSmart store within the City's corporate limits.

If the conditional zoning application is approved, the site would have an overall density of 17.1 dwelling units per acre. The maximum net density in the RM-16 zoning district is one dwelling unit per 2,500 square feet or approximately 17.4 dwelling units per acre. The project is proposed to be built in one phase.

The following list provides a breakdown of the proposed development:

- 9 total buildings (6 apartment buildings, 2 existing buildings containing 9 existing townhome units, an office/clubhouse building and accessory structures including a pool/spa and shade structure)
- 3 – 4 story configurations
- Maximum building height of 43 feet (Modification to 40 foot maximum height being sought for buildings 4 and 5 to allow for floor to floor ceiling heights of 9 feet). All other buildings are proposed to meet maximum height regulation of 40 feet.
- 107 – one bedroom units
- 129 – two bedroom units
- 25 – three bedroom units (inclusive of existing 9 townhome units)

The majority of the site has been previously cleared and graded for an Urban Village development. Nine townhome units were nearly completed along the southern perimeter of the property as a result of the previous development plan approval. In addition, road and other utility infrastructure were completed to varying degrees throughout the project site. The applicant is proposing to utilize and build upon these improvements as part of the submitted design. Over thirty (30) percent of the site has been designated as open space and tree save area and these areas have been evenly interspersed throughout the property.

Two access points to the subject property are provided along River Ridge Connector from Bleachery Boulevard. The access point closest to the Ramada Inn will serve as the primary means of ingress and egress while the Bleachery Boulevard cut will serve as an emergency vehicle access point. In its current configuration, River Ridge Connector curves sharply towards the east in the vicinity of the Ramada Inn hotel. At a future date, the applicant is proposing to re-align this road in lieu of cooperation from the adjacent hotel property owner. This will not only soften a significant curve, but will allow for the re-alignment of buildings 1 and 2 and avoidance of an existing water line and associated easement.

The subject property consists of two lots (main parcel and an adjoining parcel directly behind PetSmart) adjacent to River Ridge Connector and Bleachery Boulevard. If the project is approved a portion of the main parcel will be recombined with the parcel located behind PetSmart and will remain zoned UV. This vacant parcel will be required to be rezoned to CI as a condition of project approval due to the fact that it will be nonconforming the UV lot size requirement.

The applicant is requesting two (2) modifications to the site development standards of the UDO pursuant to Section 7-7-8(c)(6) of the UDO from City Council. The first request is a modification request to the front setback standard. As previously discussed, the applicant is proposing to utilize existing improvements to the site including a portion of the road network, sidewalks and the 9 mostly complete townhome units. While the majority of the site will be developed as multi-family units available for rent, the 9 existing units are proposed to be subdivided and sold as single-family townhome units. The RM-16 zoning district requires a front setback of 15 feet and due to the proximity of the existing road; this will result in a maximum encroachment of up to 6.5 feet by four (4) of the nine (9) units. The second request involves a 3 foot modification to the maximum height of 40 feet to allow for floor to floor ceiling heights of 9 feet. This modification request would accommodate higher interior ceiling heights while having only a minimal impact on the overall height of the structures themselves.

The applicant has agreed to institute the following green building techniques into the construction of the project: "Not only will the project's design and utilized materials reflect the company's commitment to environmentally sensitive methods, but the means by which the project is constructed utilized many environmentally sensitive components. Additionally, the selection of the site itself, an infill site that is a portion of a larger redevelopment of a former industrial site, reflects their commitment to developments that make lesser impacts to the environment, not only in their creation but also in their long-term operation. In the case of this project, future residents will have the benefit of safety and easy pedestrian access to abundant retail amenities as well as immediate access to existing public transit stops. The construction process will include the

"green" practices of job-site recycling (the goal is to recycle 75% of three or more types of material) and labeling of storm inlets. The building envelope will be constructed to maximize insulation opportunities by providing open-framed exterior corners and pre-pouring gypcrete. The contractor will give priority to materials that can be purchased locally. Finger-jointed wood studs and millwork will be utilized where structurally acceptable. The project will pursue certification through the Environmental Protection Agency and Department of Energy's Energy Star program. This program will require the use of low-flow plumbing fixtures, and high efficiency HVAC system components including mastic duct connections, rigid duct trunk lines and programmable thermostats. The concept of the project is to provide high quality, infill housing to working individuals and households that have previously been relegated to more distant suburban locations in Asheville. As such, the proposed rents have been conceived to be affordable to workforce housing (with incomes of between 80% and 120% of the median household income as adjusted for household size bty the U.S. Dept. of Housing and Urban Development. In fact, on that basis, only the partially-complete town homes will have a rent that exceeds that amount which a workforce household can afford. Additionally, the developer will hold out ten one-bedroom units and ten two-bedroom units, collectively 8% of the new units constructed on the site for lease at the maximum rates prescribed by the Housing Trust Fund.

The subject site is surrounded by retail and multi-family uses to the north and east zoned RIVER and RM-16 respectively, by a hotel to the south zoned RB and I-240 and associated ROW to the west which is not zoned.

The RM-16 residential multi-family high density district was created to permit a full range of high density multi-family housing types along with limited institutional public and commercial uses appropriate within high density residential areas. It is intended that this district be located near employment centers, shopping facilities, roads and other urban infrastructure capable of handling the demand generated by high density residential development.

At their September 15, 2008 meeting the Technical Review Committee (TRC) approved this project subject to the conditions in the staff report. At their October 1, 2008, meeting the Planning and Zoning Commission approved this project subject to the conditions outlined in both the Planning & Zoning Commission and TRC staff reports.

Section 7-7-8(d)(2) of the UDO states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   This has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and all other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The proposed use is compatible with the surrounding natural features and topography. The project must comply with all City standards in regards to grading and erosion control. Over five acres of the site will be maintained as open space and tree save areas. The proposed project makes use of a site that was previously slated for residential and commercial development but left largely uncompleted.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
Staff does not expect that the proposed use would have anything more than a minimal impact on neighboring property values.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
The proposed density of 261 dwelling units is consistent with the requirements of the RM-16 zoning district. Further, the current proposal only exceeds the density of the previously approved UV project by 21 units and does not include the commercial element that was initially proposed for the site. Given the proximity of the Ramada Inn Hotel, Wal-Mart shopping center, adjacent apartment complex and available infrastructure in the area staff feels that a multi-family/townhome development of this size and density is appropriate for the area.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
The application of compatible infill growth supports a key goal and objective as described in both ***The Asheville City Development Plan 2025*** *and the* ***City Council Goals and Vision Plan****). The comprehensive plan identifies affordable housing as one of the most pressing problems facing the City of Asheville. However, the developer has made no specific commitment to include designated affordable units into the project as a whole. The goal of sustainability is achieved by high density, infill development and the reuse of existing infrastructure onsite.*

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
The proposed development is located near transportation facilities and other utilities appear adequate. The initial technical review by other technical agencies and utility providers has not revealed any problems for serving the use.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
The proposed project is anticipated to generate 132 vehicles per hour (26 vph ingress and 106 vph egress) during the morning peak hour and 161 vehicles per hour (105 vph ingress and 56 vph egress) during the afternoon peak hour at full build-out conditions (two years). In addition, the proposed project could generate 1,700 vehicles per day during a typical weekday. Since the anticipated traffic for the subject project is less than the previously approved project which was anticipated to generate 206 vehicles per hour (78 vph ingress and 128 vph egress) during the morning peak hour and 513 vehicles per hour (280 vph ingress and 233 vph egress) during the afternoon peak hour, a revised traffic impact study is not required. It is reasonable to conclude that the subject project would have a minimal impact on the surrounding roadway network including the perimeter intersections.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- The proposed development will provide an additional 261 rental units strategically located within proximity to transportation lines, employment centers and services.
- Provides an opportunity for adaptive re-use of an abandoned development site.
- Provides another opportunity to further the City's goal of high density infill development.

Con:

- Conditional rezoning will result in the loss of Urban Village zoning and the opportunity for a mixed use development.

Staff recommends approval of the proposed project and Conditional Zoning request subject to the conditions in the TRC staff report, the standard conditions and the following conditions: (1) A deed restriction must be placed on the designated affordable units limiting any rental increase to no more than 4% per year for the first 10 years and that the units are reserved for qualified households in the form approved by the City Attorney; (2) The applicant must make application for both the lot recombination and rezoning of PIN 9658.19.52.8314 from Urban Village District to Commercial Industrial District before zoning permit issuance; and (3) a plat for the existing townhome units must be submitted for review and approval prior to issuance of any Certificates of Occupancy.

Mr. Chris Eller, representing the developer, explained they will be utilizing an existing abandoned site and bring a workforce housing complex to an area within walking distance of two shopping centers. He explained the need for the two requested modifications. The developer has begun conversations with the owner of the Ramada Inn property regarding the realignment of a road, which will allow them to realign two buildings to salvage the existing infrastructure. They have worked to try to salvage as much of the existing project as possible. He briefly explained the stormwater measures being implemented, supplementing it with best management practices. He felt this will meet the City's goal of high density infill development and urged the Council's approval.

Mr. Russ Davis, President of Terwilliger, Davis and Leadbetter, LLC, (developer), briefed the Council on the history of his company, which develops infill urban multi-family projects. Their mission is to provide housing for workforce families. He recognized that affordable housing and building green is very important in this community. Their project includes both elements. They propose to be certified as an Energy Star project. They will also incorporate, in the products they use and the means by which they construct the project, as many green techniques as they can reasonably include, such as recycling studs, where justified. In addition, they purchase as many products and services as they can locally. They have proposed in their mix 20 units (10 one-bedrooms and 10 two-bedrooms) that they will rent at no higher than the maximum allowed by the Housing Trust Fund.

Mr. Fred English urged Council to support this conditional zoning request.

Mayor Bellamy closed the public hearing at 5:52 p.m.

In response to Councilman Mumpower, Mr. Davis said that when you're an outside developer, you recognize the community's commitment to affordable housing. In addition, his partner is Chairman of the Board for International Habitat for Humanity and they believe that it is part of their responsibility to commit to affordable housing, noting that there was some pressure from the City for this aspect of the project.

Councilwoman Cape encouraged the developer to contact Progress Energy as they are offering new construction incentives.

There was considerable discussion regarding sidewalks. Mr. Eller explained that there are a lot of internal sidewalks, but the street in question is a private drive and not a public street, noting that there is only an approximately 30-foot section on their property.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Based on information provided in the staff report and as stated in the staff recommendation, Councilman Mumpower moved for the adoption of Ordinance No. 3675, with the modification from the 15 feet front setback standard for 4 of the existing 9 units and the modification to the 3-foot modification to the maximum height of 40 feet to allow for floor to floor ceiling heights of 9 feet, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must meet City of Asheville lighting standards and utilize cut-off or full-cutoff fixtures in order to avoid any light trespass and offensive glare; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project shall undergo final review by the TRC prior to issuance of any required permits; (6) A deed restriction must be placed on the designated affordable units limiting any rental increase to no more than 4% per year for the first 10 years and that the units are reserved for qualified households in the form approved by the City Attorney; (7) The applicant must make application for both the lot recombination and rezoning of PIN 9658.19.52.8314 from Urban Village District to Commercial Industrial District before zoning permit issuance; and (8) a plat for the existing townhome units must be submitted for review and approval prior to issuance of any Certificates of Occupancy. This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 88

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO MODIFY STANDARDS FOR OUTDOOR LIGHTING AND RELOCATE FROM THE STANDARDS AND SPECIFICATIONS MANUAL TO THE UNIFIED DEVELOPMENT ORDINANCE

ORDINANCE NO. 3676 – ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO MODIFY STANDARDS FOR OUTDOOR LIGHTING AND RELOCATE FROM THE STANDARDS AND SPECIFICATIONS MANUAL TO THE UNIFIED DEVELOPMENT ORDINANCE

Mayor Bellamy opened the public hearing at 6:08 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of an ordinance to modify standards for outdoor lighting and relocate them from the Standards and Specifications Manual to the Unified Development Ordinance. This public hearing was advertised on November 14 and 21, 2008.

In 2007 the City of Asheville was approached by local representatives of the Dark Skies Association interested in examining the city's outdoor lighting standards to reduce light pollution that was becoming increasingly problematic as a result of growth and development. In addition to this concern, staff had also noted that the existing outdoor lighting standards had been problematic and were confusing to apply and difficult to enforce, resulting in a number of complaints of non-compliant or undesirable lighting conditions throughout Asheville. The interest in examining the existing standards grew as awareness of new technology and practices also became apparent. Volunteers from the community were solicited to participate in a focus group that agreed to meet every other week for approximately 3 months examining the standards, section by section, with additional work conducted via e-mail. The members of the focus group included:

Bob Henderson	Progress Energy
Greg Sterken	Progress Energy
Bernie Arghiere	Dark Skies (Citizen, amateur astronomer)
John Chapelle	Dark Skies (Engineer)

Preston Kendall	Ingle's Markets (Real Estate Project Manager)
Rebecca Manning	Lighting Specialist

In addition to these private citizens, the following City staff also participated in the focus group meetings:

Shannon Tuch	Planning & Development
Gary McDaniel	Planning – Code Enforcement
Shannon Morgan	Planning – Code Enforcement
Alan Dunlap	Asheville Police Department
Richard Grant	Public Works
Ronnie Evans	Building Safety

The existing standards were first adopted as part of the *Standards and Specifications Manual* in 1998; a modest update followed in 2002 and has remained unchanged since that time. The standards were organized by category, which is replicated in the proposed draft with some additions including information regarding applicability, prohibitions and new standards for street lighting. The following is a detailed summary of the changes by category:

1. Removed from the *Standards and Specifications Manual* and added to the *Ordinance* where it will be found and referenced easily.
2. (a) Purpose statement – largely unchanged, rephrased slightly and put in a form more consistent with other sections of the Ordinance.
3. (b) Definitions – largely unchanged, minor modifications to reflect common industry definitions with some new definitions added; some illustrations also added.
4. (c) Light Measurement Technique – unchanged except for calibration of light meter is to occur every 2 years (instead of 1 year).
5. (d) Applicability – added new for clarity but does not create new standards; Previously addressed (somewhat) in the separate non-conformities section and in the city's street lighting policy. Adding this section consolidates the information and helps to identify in what circumstance compliance is required; follows the pattern for other site improvements. Staff is also proposing an alternative (Alternative B) that would reduce the instance where these standards are applied.
6. (e) Replacement of existing lighting fixtures – added new and is specific to lighting. This requires the replacement of a singular fixture with one that is compliant, when not part of a larger lighting system.
7. (f) Exemptions – a minor addition to clarify what types of lighting that will not be regulated.
8. (g) Prohibitions – the Ordinance explicitly states that what is not specifically allowed is therefore prohibited so this addition does not result in additional regulation. This section is added to help communicate what to avoid and to assist with enforcement.
9. (h) General Standards – similar to existing but includes the following changes/additions:
    - Added language requiring top shields for flood lights
    - Allows horizontal variance if side shielded.
    - Added Dusk-to-dawn lights to regulation (common source of complaints)
    - Specifies that wall pack lights must be **full**-cutoff (believe this was the original intent)
    - Added section regarding what to do when faced with glare as a result of topography
10. (i) Street Lighting – added new. Previously, street lighting was not included in the standards but was addressed through policy. Found that resulted in a lot of diversity and inconsistency. Appropriate to have public lighting follow same standards as private development. Due to existing diversity of lighting, this section retains the most flexibility for cut-off and semi-cutoff fixtures, provided other standards can be met.
11. (j) Lighting in Parking lots/Outdoor Areas – moderately changed; removed option for semi-cutoff fixtures but clarified when cut-off fixtures could be considered (decorative,

less than 18'); established recommended minimum lighting levels but restricted the maximum.

- Commission to perform duties of the BoA? This has been removed – all variances will be heard by the BoA, not the Planning & Zoning Commission

12. (k) Lighting for vehicular canopies – unchanged except for requiring full cutoff fixtures when simple "cutoff" fixtures were allowed previously.
    - Introduce policy discussion as to whether an amortization period should be considered for canopies. Staff did not recommend amortization and the Commission did not support this idea. This is not included in the proposed draft.
13. (l) Lighting for outdoor display areas – unchanged except for requiring full cutoff fixtures when basic cutoff fixtures were allowed previously.
14. (m) Lighting for Outdoor Sports Fields/Performance Areas – unchanged except added that shall also meet the standards addressing glare as a result of topography (h)7
15. (n) Covered Parking – unchanged.
16. (o) Lighting of Buildings & Landscaping – this section has been expanded to address common inquiries.
    - Removed "to the extent practicable" and added, "director may waive if proven impractical"
    - Limit intensity of lights directed upward
    - Limits intensity of lights used to light façade and landscaping
    - Adds shields for skylights
17. (p) Signs – unchanged except add language to limit brightness if creates a hazard to motorists and remove "to the extent practicable and whenever possible" (lighting fixtures shall be directed downward rather than upward)
18. (q) Permits – unchanged except added comment that Level III, CZ, and CUP project are evaluated on a case by case basis and could be required to comply to a standard that exceeds the minimums set forth in this ordinance.
19. (r) Nonconformities – expanded to explain ballast failure = fixture failure and also added amortization for dusk to dawn lights. Alternative B would amend this section some to be more lenient.

She then explained that the most significant changes are summarized as follows:

1. **Standards are moved from the *Standards and Specifications Manual* to the *Unified Development Ordinance*** – Staff initially resisted the idea of moving these standards to the UDO; however, an informal poll of design professional and developers appeared to indicate that the UDO was the more commonly referenced document and the document used to understand what site features would need to be brought into compliance as the result of new development.
2. **Street lighting is added** – Previously, street lighting was exempted from regulation which resulted in some moderate to significant light trespass when non-cutoff fixtures were used. Because the City typically takes over the maintenance and cost associated with all street lighting, it was felt that it would be best to include standards in the ordinance so that developers would use fixtures that addressed trespass and require less energy and maintenance. Note: there are a number of exceptions included in these standards to help address the wide variety of fixtures that are currently in place.
3. **Full cut-off and cut-off fixtures required for parking lot/outdoor areas** – This issue was the most heavily discussed issue amongst both the focus group and the Planning & Zoning Commission. While requiring full cut-off fixtures is not particularly problematic with new construction, to bring a non-compliant parking lot into compliance could result in replacement of the system or the addition of new fixtures. Compliance of an existing system would only be required in cases where other extensive site improvements are also required (expansion/renovation over 50% tax value, etc.). Ultimately, it was the consensus of the group that the benefits (controlling trespass, improving quality of light, improving safety) outweighed the cons (costs, limiting fixture choices). Staff is also

providing an alternative where compliance, even when in association with extensive site improvements, would not be required.

4. **Add new standards regulating residential lighting** – Of all lighting related complaints, residential lighting generates the greatest number of the complaints received by code enforcement. Standards requiring replacement of unshielded "dusk-to-dawn" lights within 5 years was easy to achieve through existing Progress Energy leases; other standards would be enforced on a complaint basis.

Applicability of the standards include (1) all new construction (including single-family); (2) complete replacement of existing systems; (3) all new street lighting; (4) expansions exceeding 50% of the pre-expansion floor area*; (5) renovations exceeding 50% of the tax value of the building*; and (5) changes of use to a higher impact*. *Indicates applications exempted under Alternative B.

City Council has recently adopted the following four goals: *sustainable, affordable, green* and *safe*, this report's recommendation most appropriately addresses the goal of *sustainability* by creating standards that are both more current and easier to apply and enforce. Additionally, new LED technology is being developed that will be very easily accommodated and encouraged through the proposed standards which will support the goal of encouraging *green* practices. Lastly, the goal of improved *safety* is also addressed through establishing standards that support better quality light with improved coverage and less glare.

The section of the *Asheville City Development Plan 2025* titled "Quality of Life as an Economic Development Incentive" sets forth several goals designed to balance varied interests to maintain a desirable environment to live, work, and play. A few of the strategies listed include:

- Insure that Asheville's urban planning, zoning, and permitting processes, as created and administered by the City, facilitate sustained and positive development.
- The City's future development will balance economic objectives, social goals, and its natural resources to the benefit of present and future generations.
- Continue to use the implementation team process developed by the Sustainable Economic Development Task Force to regularly review and propose changes to key City documents.

The Planning and Zoning Commission received this draft and introduction from staff at their September 3, 2008, meeting. Due to the technical nature of the ordinance, it was recommended that the Commission take the following month to review the information provided in the staff report and draft ordinance and return to the discussion in October. During this intervening month, staff collected a number of photo examples to share with the Commission at the next meeting and also made deliberate efforts to personally reach out to significant stakeholders in the Community and share this information more directly. All feedback and sharing of information was encouraged in the contact; however, only minor clarifying questions were received with no requests for significant changes. Planning staff directly shared the proposed draft and the summary of changes with the following stakeholders:

- Biltmore Farms
- UNCA
- Asheville City Schools
- Buncombe County Schools
- Mission Hospitals
- Crossland Development, Inc.
- McGill Engineering
- Lewis Real Estate

Specific details of a number of standards were discussed at both meetings; however, the items of greatest interest included understanding the pros and cons of requiring full cut-off features (vs. semi-cutoff, cutoff or non-cutoff), and when to require full compliance. The Commission requested one clarification to when full compliance was required but, otherwise supported the staff recommendation to require full cutoff fixtures for parking lots and outdoor display areas in addition to the other standards (vote was 6:0).

In light of some of the discussion from the Commission meetings, in addition to the general economic discussion occurring amongst the development community at large, staff is also proposing an alternative (Alternative B) for the Council's consideration. This alternative would require only new outdoor lighting in association with new construction, along with the complete replacement of any existing systems, to come into compliance. Unlike the proposed draft, it would exempt all existing systems and conditions, even if there is a proposed renovation or expansion that would normally require full site compliance. This alternative has been generated as a result of staff efforts to examine the UDO and existing standards for options that may provide more freedom to existing property owners/developers to pursue improvements to their properties. Additionally, this option would address the challenges that could be experienced when attempting to bring an existing non-conforming system into compliance.

Pros:

- Consolidates information into one document for easy reference.
- Proposed standards reflect current practices and new technologies; encourages new "green" technologies and practices.
- Reduces potential for land use conflict currently being experienced throughout Asheville.
- Improves the night sky environment.

Cons:

- Will create non-conformities in some situations (however, non-conforming sites will be grandfathered).
- May result in the need for additional fixtures.
- Will reduce luminaire options (although a variety of compliant options exist and the number available is increasing as demand increases).

The City will not be exempt from these standards and will need to replace non-compliant fixtures with compliant ones as the older versions reach their life expectancy; however, this is currently the practice of city departments and would not result in any increased costs.

City staff concurs with the Planning and Zoning Commission and recommends the City Council approve the draft ordinance as proposed. Should the Council, as a policy decision, wish to consider an alternative that affords more relief to existing conditions and developed properties, staff would recommend substituting the language outlined in Alternative B.

Mr. Bernie Arghiere, representing Dark Skies, explained their participation in this ordinance and urged Council to approve the proposed ordinance.

Ms. Rebecca Manning, Lighting Specialist, spoke in support of the proposed ordinance. While Progress Energy provides electricity for lighting, they are not in the fixture business. We should explore expanding the inventory of choices to create a better lighting product for the City and the residents.

Mayor Bellamy closed the public hearing at 6:36 p.m.

Vice-Mayor Davis thanked the members of the focus group for their hard work on this fair ordinance.

From the focus group meetings, Councilwoman Cape learned a lot about glare in terms of public safety and how to light smarter and safer.

Ms. Tuch and Mr. Arghiere responded to various questions/comments from Council, some being, but are not limited to: as part of our overall energy efficiency, has the City's facilities and public spaces been reviewed to see if the lighting is serving useful purposes; has the N.C. Dept. of Transportation been involved in this discussion; has the state adopted a model ordinance and if an when that ordinance is adopted, can our ordinance be amended; is the full cut-off the standard in architectural design or are there a wide variety of fixtures; what does the amount of coverage on the ground depend upon; does Alternate B apply to residential as well; what are the costs to the developer or property owner associated with the recommendations; will these recommendations improve the City's enforcement costs; and does this ordinance help the night sky.

In response to Councilman Mumpower, Ms. Tuch explained Alternative B. Staff feels that it may be more challenging to bring a lighting system into compliance when it doesn't presently comply. With Alternative B, we would have more non-compliant systems out there for a longer period of time. We would allow existing non-compliant systems to remain until such time that they are replaced.

Councilman Mumpower was concerned with the heavy handed government reaching into everyone's lives. He felt that having staff work on a lighting ordinance is a distraction about what the City should be doing to achieve their core services.

Councilwoman Cape explained that government is not just regulatory. We are creating a framework by which other people have access to the same information.

Vice-Mayor Davis felt having the City's public safety people as part of the focus group was a great resource as they explained the ineffectiveness of lighting in the wrong places.

Councilman Russell said that with his experience of the auto insurance industry, intersections not properly lit can be very dangerous with glare. Even though he does not support over regulation, this is a case where public safety benefits are important. .

At Mayor Bellamy's request, Ms. Tuch explained the appeal process said that she would be happy to include language in this ordinance regarding that process.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Jones moved for the adoption of Ordinance No. 3676 including the language from Alternative B. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 94

At 7:01 p.m., Councilman Mumpower moved to go into closed session for the following reason: (1) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of contracts for the acquisition of real property by purchase, option, exchange or lease. The location of the property is 1500 Tunnel Road. The statutory authorization is contained in G.S. 143-318.11(a) (5). This motion was seconded by Vice-Mayor Davis and carried unanimously.

At 7:15 p.m., Councilwoman Jones moved to come out of closed session. This motion was seconded by Councilwoman Cape and carried unanimously.

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO ADOPT NEW STANDARDS FOR SIGNING TO ALLOW (1) SIGNS ON BUSES; (2) DIGITAL MARQUEES; AND (3) LED SIGNS

ORDINANCE NO. 3677 – ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO ADOPT NEW STANDARDS FOR SIGNING TO ALLOW (1) SIGNS ON BUSES; (2) DIGITAL MARQUEES; AND (3) LED SIGNS

Mayor Bellamy opened the public hearing at 7:20 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of an ordinance to adopt new standards for signing to allow (1) signs on buses; (2) digital marquees; and (3) LED signs. This public hearing was advertised on November 14 and 21, 2008.

It is common practice for municipalities to respond to changes in policies, technology, and development practices by creating new development standards to guide appropriate and sustainable development. Recently, the Planning and Development department was contacted by others outside the department interested in developing new standards for new types of signage. The separate requests are summarized as follows:

1. Expand existing standards for marquee signs to allow Light Emitting Diode (LED) (Asheville Civic Center, Diana Wortham Theater, Asheville Art Museum, etc.). Other standards related to marquee signs remain unchanged.
2. Expand existing standards for changeable copy signs to allow Light Emitting Diode (LED) technology (Sign contractors, various property owners, etc.). Other standards related to changeable copy signs remain unchanged.
3. Clarify standards to allow advertisements on city buses. (Asheville Transit)

While all three requests would all involve changes to the current sign code, the nature of the requests is somewhat different and could be separated and considered individually. In the interest of efficiency, they have been bundled together in this report for a single amendment.

Digital Marquee. It is a common industry practice for entertainment venues to utilize a form of changeable copy sign that advertises different acts or events to inform the general public of important dates, shows, times, etc. New digital LED technology has created less labor intensive message changing options that a number of public event facilities have become interested in. At present, Asheville does not have standards regulating digital signs and would have to create such standards in order to allow this new form of signage as well as establish safeguards that would protect the public welfare from hazards or other nuisances. Digital marquee signs located in the Central Business District (CBD) would have to go to the Downtown Commission for review and content would be limited exclusively to advertising current and scheduled events (no advertisements).

Digital Changeable Copy. Similar to marquees, digital changeable copy signs would allow for the same LED technology to be used to change messages electronically. Unlike marquee signs, changeable copy signs are not allowed in the CBD or other "Urban" zoning districts and typically provide non-entertainment related information that may be of interest to the general public.

Advertisements on city buses. Unlike signs on vehicles, advertisements would be designed to inform the general public of a specific product, service or event while signs on vehicles identify a specific business and is used for business purposes. Recently, the Asheville City Council approved a request from the transit manager to allow advertising on city busses as a

supplemental revenue stream. Before transit staff sold any advertisements, it was recommended that an amendment clarifying the difference between signs and advertisements along with any regulating standards that should be considered be adopted. This amendment is designed to support that recent policy change.

The Planning & Zoning Commission reviewed this report and recommendation at their November 5, 2008, meeting where the amendment was supported and recommended for approval. A significant portion of the discussion addressed the recommendation for the static hold time for the image on a marquee sign. In the interest of being conservative, the Commission recommended a 20 second hold time although there was some discussion over whether this was the most appropriate recommendation with at least two members expressing appreciation for the shorter time frame demonstrated by the Pack Square sign.

The portion of this amendment that addresses digital (LED) marquee signs downtown was also shared with the Downtown Commission (DTC) at their November 14, 2008, meeting. The matter of hold time was the primary issue discussed with the DTC as well where some new benchmarking information was shared with the DTC that the Planning & Zoning Commission had been unaware. Ultimately, the DTC disagreed with the Planning & Zoning Commission and recommended a 6 second hold time in order to effectively display multiple messages without inconveniencing passers-by. In light of the new information and discussion by the two Commissions, staff supports the 6 second hold time which is reflected in this draft ordinance.

City Council has recently adopted the following four goals: *sustainable, affordable, green* and *safe*, this report's recommendation most appropriately addresses the goal of *sustainability* by responding to changes in technology and policy.

Pros (LED signs):

- Accommodates new technology and practices and provides new opportunity for a variety of sign users (not limited to commercial property)
- Proposes safeguards to minimize hazards or nuisances

(Advertisements on buses):

- Supports changes in city policy
- Provides revenue to support transit services

Cons (LED signs):

- Introduces a new aesthetic (could also be viewed as a "Pro")
- Has potential for allowing multiple signs along a single view corridor resulting in a cumulative distraction.

(Advertisements on buses):

- Limits opportunity for this form of revenue to the City of Asheville's Transit Department

Regarding fiscal impact, LED signs – none identified. Signs on city buses - will result in additional revenue to the City's transit department to help offset costs for other transit services.

City staff concurs with the Planning & Zoning Commission and the Downtown Commission and recommends approval of the wording amendment as proposed.

Mr. John Ellis, Director of the Diana Wortham Theatre, spoke in support of this ordinance and supported the 6-second hold time.

Mayor Bellamy closed the public hearing at 7:29 p.m.

Due to the complex motion, it was the consensus of Council to divide the motion and vote on each issue separately.

After a brief discussion initiated by Mayor Bellamy regarding signs on buses, Ms. Tuch explained that this change does not affect any changes to the sign ordinance, other than allowing advertising on City buses. A concern surfaces when a large truck (with advertising) is parked off-site for a long time.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Jones moved to amend the Unified Development Ordinance to adopt new standards for signs on buses. This motion was seconded by Vice-Mayor Davis and carried on a 5-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no."

In response to Councilman Newman, City Attorney Oast said that he would investigate whether the sign owners would have a vested right to maintain their signs for a certain length of time.

Councilwoman Jones moved to amend the Unified Development Ordinance to adopt new standards regarding digital marquees. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

Councilwoman Jones moved to amend the Unified Development Ordinance to adopt new standards regarding LED signs. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 109

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. RESOLUTION NO. 08-235 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPROVE CO-SPONSORED EVENTS FROM JANUARY 1 – JUNE 20, 2009, AND FISCAL YEAR 2009-10

Superintendent of Cultural Arts Diane Ruggiero said that this is the consideration of a resolution authorizing the City Manager to approve co-sponsor support of various events.

The City of Asheville co-sponsors events that benefit local non-profit organizations and enhance the community with public events, parades, and festivals.

During the recent Request for Proposals process, 32 organizations applied for co-sponsor support for a total of 148 events from January 1, 2009 – June 30, 2010.

Staff has identified six (6) "Anchor Events": Asheville Drum Circle, Asheville Greek Festival, Asheville Holiday Parade, Downtown After 5, Goombay Festival, and Shindig on the Green. Anchor Events are those events that have a significant economic impact on the City, have become traditions within the community, and/or are unique in the experience they provide. Additionally, staff proposes waiver of fees and permit costs for the 26 non-anchor events.

This does not support a specific goal, objective, or action item with City Council Strategic Operating Plan. This does support the current Parks, Recreation and Cultural Arts 2015 Comprehensive Master Plan by making organizations aware of the value of their support from the City and by providing clear criteria for support.

Pros:

- Generates money for the local economy.
- Provides additional quality cultural programming and diversity.
- Allows fundraising opportunities for charities.
- Expands and enhances special events and festivals in Asheville.

Cons:

- Events put a strain on City resources such as Police, Fire, Sanitation, Park Maintenance, etc.
- Events contribute to decline on infrastructure and equipment provided to the organizers.

Regarding the fiscal impact, $93,518 of in-kind goods and services for the six anchor events between January 1, 2009 and June 30, 2010 which is a cost savings of approximately $217,000 from Fiscal Year 2008/09 plus $28,482 in waived fees and permit costs. Approval of this program also increases the police overtime allocation for targeted enforcement.

Due to the current economic climate throughout the City of Asheville, staff recommends full support of the six (6) anchor events (Asheville Drum Circle, Asheville Greek Festival, Asheville Holiday Parade, Downtown After 5, Goombay Festival, and Shindig on the Green) for a total of $93,518 between January 1, 2009 and June 30, 2010.

Staff further recommends waiving permit costs and other fees for the remaining 26 events for a total of $28,482.00 of waived fees.

Councilwoman Jones moved for the adoption of Resolution No. 08-235 approving full support for six anchor events (Asheville Drum Circle, Asheville Greek Festival, Asheville Holiday Parade, Downtown After 5, Goombay Festival, and Shindig on the Green) for a total of $93,518 between January 1, 2009 and June 30, 2010; and approving waiving permit costs and other fees for the remaining 26 events for a total of $28,482.00 of waived fees. This motion was seconded by Vice-Mayor Davis.

Mayor Bellamy asked for a friendly amendment to take $1,000 out of the Mayor's travel allowance and that it be applied to Memorial and Veteran Day events. Councilwoman Jones and Vice-Mayor Davis accepted the friendly amendment.

When Mayor Bellamy asked for public comment, she received none.

In response to Councilwoman Cape, Ms. Ruggiero said that by only waiving the permits for the 26 remaining events, we will be saving almost $50,000 in overtime police support, almost $20,000 in sanitation, streets and water; and almost $6,000 in fire and rescue support.

In response to Councilwoman Cape, Ms. Ruggiero explained the use of police officers in our co-sponsored events, noting that a lot of factors are taken into consideration when the Police Department determines the amount of officers that need to be present.

Councilman Mumpower felt that there is an absence of fairness in this selective process. He pointed out that this action is distracting us from resolving public safety issues in the City and that is something that only the City can do.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Jones moved for the adoption of Resolution No. 08-235, with the $1,000 Mayor travel allotment being transferred for Memorial and Veterans Day activities. City Manager Jackson said that a budget amendment may be necessary to achieve this amendment and if so,

he would bring it back to Council. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 380

B. DISCUSSION OF TRANSPORTATION OF NUCLEAR WASTE ON FEDERAL INTERSTATE SYSTEM THROUGH ASHEVILLE

At 7:58 p.m., Councilman Mumpower requested to be issued due to illness, with the understanding that Council will not vote on this issue at this meeting. Councilwoman Jones moved to excuse Councilman Mumpower. This motion was seconded by Councilman Newman and carried unanimously.

Councilwoman Cape said that this item came before the City Council Planning & Economic Development Committee. She felt this issue is one that the community is interested in and asked that it be brought before the full Council. Essentially, Asheville sits at a central point of transportation of nuclear waste from the northeast, Midwest and middle north to one of the major processing places in South Carolina. We deal with the complexity of the traffic issues through downtown Asheville all the time and there have been some good attempts by communities to have a voice in what is being transported through the community. Even though these things are not coming through our community now at the degree they can and will, this is a good time to get ahead of the issue and state where this community stands. One accident can keep a community out of that area forever and if that happens in the heart of our downtown, it doesn't fit sustainability. As Chair of the Planning & Economic Development Committee, she supports this item.

Mr. Robbie Sweetser, with Common Sense Nuclear Crossroads, provided Council with the following presentation of an ordinance to prohibit the transportation of high level nuclear waste within the City limits.

He introduced that (1) Asheville is an important crossroads for military and industrial shipments of radioactive material; (2) the number of these shipments is likely to increase with completion of I-26; and (3) the ordinance they propose will allow Asheville to have a say in how the non-military part of this traffic develops in the future.

On the road now is (1) low-level enriched uranium products; (2) medical radiological supplies; (3) low-level radioactive waste and probably a variety of military cargoes including plutonium, tritium, and other nuclear weapons; and (4) while there are also of concern from a safety point of view, they do not emit large quantities of radiation, and the ordinance does not apply to them.

We want to prohibit another type of shipment, something we're not dealing with today: (1) substances labeled by the government as spent nuclear fuel and high level nuclear waste; (2) these are up to a million times more radioactive than new nuclear fuel rods, pure uranium, plutonium, etc.; (3) unshielded exposure to spent fuel or high level waste can be fatal in as little as a few seconds; and (4) thanks to action by the N.C. representative to the Cross-Country Transportation Working Group, we believe that none of this material travels by road or rail through WNC at present.

We need to act because (1) government and corporate interests are pushing construction of new nuclear reactors; (2) but 60,000 tons of spent fuel are sitting at power plant sites – the number is increasing by 2,000 tons per year; (3) before committing to a new round of nuclear plant construction, the financial and utility sectors want to see existing waste move out whether for long-term geologic storage or reprocessing, possibly in South Carolina; (4) the National Academy of Sciences estimates that about 9600 rail and 1100 highway shipments are needed to move the first 70,000 tons to long term storage (a) 18 times more than all prior shipments

combined; (5) the Department of Energy (DOE), looking ahead 38 years, predicts a total of 108,500 shipments; (6) if spent fuel is "reprocessed" into new fuel rods, shipments may increase still further because the highly radioactive leftovers, high level waste, will also require long term storage.

Shipping looks like (1) all spent fuel is to be moved in a proposed new cask, the Transportation, Aging, and Disposal (TAD) canister. Prototypes for safety testing aren't expected to be available for a few years; (2) TAD canister specs show a shipping weight of 250,000 pounds; (3) this is a normal weight for heavy rail cars; and (4) on the highway it's a different story. Legal gross weight for a tractor trailer rig is 80,000 pounds. With special permits, much heavier weights are allowable. The TAD canister and a tractor rig built to haul would weigh some 300,000 pounds.

Such shipments should not come through Asheville (1) weather and terrain were the stated reasons why the Cross-Country Transportation Working Group rejected shipping fuel from research reactors through WNC in the late 1990s (a) those transport trucks carry payload casks of only about 25,000 pounds; and (b) that's 10% the weight of a TAD canister; (2) although severe accidents involving hazardous materials are thankfully rare, they do occur; (3) proponents of spent fuel shipments are correct in stating that there have been no radiation-related fatalities in the United States due to transportation mishaps. Prior to Three-Mile Island they also derided the possibility of a meltdown at a United States commercial nuclear reactor; (4) each spent fuel TAD canister could contain more radioactive products than were scattered by the atomic bomb dropped on Hiroshima; (5) in 2003, the state of Nevada projected that a catastrophic release from a TAD-sized canister in an urban area would severely contaminate a 32-square mile area, eventually kill 4,000-28,000 people, and carry a cleanup cost of $13 Billion; and (6) a tiny fraction of such damage would be devastating to Asheville.

We need to act now because (1) history shows that state wishes are seriously considered in the selection of highway routes for spent fuel. Influence over rail routes is more difficult; and (2) the time to act is now, proactively, before federal and industry plans are set in stone.

Examples of other resolutions and ordinances include Los Angles, Ventura, Santa Barbara and San Luis Obispo Counties, and the City of Santa Barbara, California; Denver, Colorado; St. Louis and Kirkwood, Missouri; Philadelphia, Bucks County, and Falls Township, Pennsylvania; Mt. Ranier, Takoma Park and Greenbelt, Maryland; Decatur, Georgia; Amherst, Massachusetts; Beacon and East Fishkill, New York; Gary, Indiana; and Anson Counties and the town of Wadesboro, North Carolina.

In summary, pass the ordinance because (1) here's an opportunity to decrease the chance that a new class of dangerous cargo will travel through Asheville; and (2) take a proactive position, inform the state delegation of strong local opposition to these shipments.

Councilwoman Cape moved to adopt an ordinance to prohibit the transportation of high level nuclear waste within the City limit. The core of what economically drives people to Asheville is being clean and green. There has been plenty precedent by the N.C. Dept. of Transportation to listen to what the community wants on their roads. We are saying that through the middle of our downtown is not an appropriate route for taking this kind of waste.

Councilwoman Jones noted that prior to adoption of an ordinance, staff is allowed input.

City Attorney Oast said that if Council is interested in pursuing an ordinance like the one proposed, he asked for the opportunity to do more research on the question. Transportation of nuclear waste is a fairly heavy regulated activity at the federal level. There are at least two acts that apply to it - the Atomic Energy Act and the Hazardous Waste Transportation Act of 1975 which says specifically that it preempts local ordinances if the local ordinance cannot be complied with or if the local ordinance is an obstacle to carrying out the act. There are ways, however, to

get the preemption limited as to a local ordinance and that may be something Council is interested in looking into. Since we are talking about the transportation occurring exclusively on federal or state highways, he felt that the State would have some interest in the City's position on this. The cases that he has reviewed, but not fully analyzed, indicate that when localities have adopted ordinances of this nature, they have been invalidated as preempted. At least one court has said that certain exceptional circumstances may allow the U.S. Dept. of Transportation to limit the preemptive effect of the Hazardous Waste Transportation Act of 1975 on local ordinances. That would probably require some involvement from the State. If it is the desire of Council to express the opposition of transportation of nuclear waste through Asheville, he felt a resolution would be a more appropriate way to express Council's concerns. He can look into these issues if Council desires.

Councilwoman Cape reiterated that since the federal and state governments are interested in what the community wishes, this is a manner for communities to express their wishes. This action raises our voice that we want to take care of our people and stand up for no nuclear waste through the center of our downtown.

The motion made by Councilwoman Cape was seconded by Councilwoman Jones.

Councilman Newman felt that since our country has nuclear energy, we need a plan to determine what is the appropriate way to manage that dangerous waste long-term. When that plan is developed, it needs to be executed. If that plan involves transportation of waste to get it to the safest place to be kept long-term, that is what we need to do. The people who are charged with looking at these matters need to develop the safest transportation routes that are in the best interest of our country as a whole. Even though he doesn't want any of that nuclear waste through Asheville or to endanger anyone, if coming through Asheville is the best way to do it, he thinks that is what should be done.

Councilwoman Cape withdrew her motion to adopt an ordinance to prohibit the transportation of high level nuclear waste within the City limits and instead directed the City Attorney to prepare a resolution expressing Council's opposition of transportation of high level nuclear waste within the City limits and that it be brought back to Council in January of 2009.

City Attorney Oast said that in drafting a resolution there are certain federal laws that he can make reference to that would recognize that as a vehicle for local communities to express concerns about these kinds of things. However, after his further research, he may come back to Council with a report saying this is not something Council can do. But, based on his limited research, a resolution may be the appropriate vehicle to express Council's concerns, and could result in authority to adopt a local ordinance that was not preempted.

Councilman Russell said that no one wants nuclear waste through their community. He agreed with Councilman Newman and hoped for new technology coming out in the next decade that can handle the nuclear waste.

Mayor Bellamy noted that because there is no motion on the floor, no public comment would be taken. At such time as a resolution is brought before Council for action, if the majority of Council directs the City Attorney to prepare that document, public comment will be taken at that time.

When Mayor Bellamy asked if there was a majority of Council's support to direct the City Attorney to prepare a resolution, she did not receive that majority support. Therefore, the action died.

Mayor Bellamy said that she would be happy to meet with Mr. Sweetser and write a letter on his behalf to our state legislators expressing concern of these kind of shipments being

transported through our community, so when route are determined, that our voice is heard in terms of the condition and design of the roadways in the western part of the state.

C. RESOLUTION NO. 08-236 - RESOLUTION STRONGLY OPPOSING THE FORCED TRANSFER OF SECONDARY ROAD PROGRAM FUNDING TO THE PRIMARY ROAD PROGRAM OR ANY OTHER CONSTRUCTION, IMPROVEMENT AND MAINTENANCE TO LOCAL GOVERNMENT

As a member of the 21st Century Transportation Committee, Mayor Bellamy said that they are seeing a lot of different recommendations come forward that would transfer different responsibilities to cities across North Carolina. She felt this issue needed to be brought to Council's attention as soon as possible. It is the possible transfer of 5,000 miles of roadway throughout North Carolina which are currently overseen by the N.C. Dept. of Transportation to municipalities. This will be an additional $600,000 per year cost to the City of Asheville, with no clear indication of additional funds that would go with this transfer. She asked for Council's support opposing this forced transfer.

Mayor Bellamy then read the resolution as follows: "WHEREAS, the NC General Assembly passed Senate Bill 1513 during the 2007 session; and WHEREAS, HB 1513 allows counties to "Voluntarily" participate in the costs of transportation projects; and WHEREAS, the 21st Century Transportation Committee and the Transportation Oversight Committee are considering recommending the diversion of all Secondary Road Program funding to the Primary Road Program; and WHEREAS, diverting Secondary Road Program funding will leave no funding to pave and improve secondary roads; WHEREAS, the City of Asheville has estimated that it will cost an additional $600,000 per year in local money to maintain these roads; WHEREAS, City Council wishes to actively educate the North Carolina General Assembly about the long term fiscal implications to cities associated with transitioning the maintenance responsibility of secondary roads to municipalities without appropriate funding; WHEREAS, City Council wishes to partner with other League of Municipalities to support their opposition to this recommendation. Now therefore, be it resolved by the City Council of the City of Asheville that; It strongly opposes the transfer of Secondary Road Program funding to the Primary Road Program or any other program that will reduce funding for secondary road construction, improvement, and maintenance. Be it further resolved that (1) It strongly opposes any efforts by the General Assembly or NCDOT to shift any transportation costs formerly paid by the State to counties; (2) It strongly opposes any efforts by the General Assembly to appropriate directly or indirectly local revenues whether property tax, sales tax, or any other local revenue for State transportation programs or any other State Programs; (3) It strongly urges all municipalities to be fully aware and concerned that any invitation to participate in discussions of transportation needs may lead to an indirect appropriation of local funds; (4) It strongly urges all municipalities to contact the North Carolina League of Municipalities and direct it to oppose any efforts to transfer the funding of any State transportation program to local governments; and (5) That a copy of this resolution be sent to every municipality in the State. Be it finally resolved that copies of this resolution are sent to Buncombe County's representatives in the North Carolina General Assembly."

When Mayor Bellamy asked for public comment, she received none.

Councilman Newman moved for the adoption of Resolution No. 08-236. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 31 – PAGE 383

VII. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of November 6-20, 2008: Monica Nolan (Traffic Engineering), Michael Garcia (Sanitation), John Davis (Transit Services), Donna Roberts (Transit Services), Sharon Jones (Transit Services), Kendryl Rogers (Traffic Engineering), Enterprise (Traffic Engineering) and Tracy Jefferson (Police).

These claims have been referred to Asheville Claims Corporation for investigation.

B. LAWSUITS

The City was served with a Petition on November 12, 2008, which is generally described as follows: Jason Dean Wyatt vs. City of Asheville and Asheville Police Department. This is a special proceedings matter directing the City to release records of a motor vehicle accident on October 27, 2008. The City was not a party in the accident. This matter will be handled in-house.

The City was served with a Complaint on November 13, 2008, which is generally described as follows: City vs. Karl Lynn Halsey Jr. and New Prime, Inc. d/b/a Prime, Inc. This lawsuit involves property damage to the City's digital sign in excess of $10,000. This matter will be handled in-house.

The City was served with a Complaint on October 20, 2008, which is generally described as follows: KRSA, Inc., vs. Board of Adjustment and the City of Asheville. The nature of the proceeding is a Petition for Writ of Certiorari to reverse decision by the Board of Adjustment denying variance for Petitioner to subdivide real property to create an alternative access subdivision, per the City's subdivision standards. This matter will be handled in-house.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

In response to Councilman Russell, City Manager Jackson said that Police Chief Hogan is in the process of providing a report to Council on graffiti enforcement efforts on Merrimon Avenue. Mayor Bellamy asked for parents to help by looking around the house for a lot of spray cans that may be used for graffiti.

Mr. Phillip Gray asked to speak on the nuclear waste issue. Mayor Bellamy advised Mr. Gary that when no Council action taken on an item on the printed agenda, public comment is not allowed. In addition, it was not fair to allow him to speak when those who were in attendance during that portion of the meeting left with that understanding. Because there was no public comment allowed during that portion of the meeting and Mr. Gray waited until this informal discussion portion, Councilman Newman moved to waive the rules and allow Mr. Gray to speak. This motion was seconded by Councilwoman Cape, but failed on a 2-4 vote, with Mayor Bellamy, Vice-Mayor Davis, Councilwoman Cape and Councilman Russell voting "no." Mayor Bellamy said that she would be happy to meet with Mr. Gray after the meeting.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:53 p.m.

Magdalen Pattison
CITY CLERK

Jerry W. Bellamy
MAYOR

Tuesday – December 2, 2008 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilman William A. Russell Jr.; and Vacant Council Seat

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Newman gave the invocation.

I. PROCLAMATIONS:

A. OSOGBO SISTER CITY FROM NIGERIA

Mr. Carroll Hughes, Past President of Asheville Sister Cities Inc., briefed the Council on the six Asheville Sister cities.

Councilwoman Cape then explained the Sister City program and gave a brief report on her visit to Osogbo, Nigeria. She, along with Ms. Valerie Watson-Doost, presented City Council with token gifts for Mayor Bellamy and Council members from the government in Osogbo.

Mayor Bellamy thanked Ms. Watson-Doost for bringing this Sister City to Asheville.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Item "B" was removed from the Consent Agenda for discussion and/or an individual vote.

A. ORDINANCE NO. 3678 - BUDGET AMENDMENT TO ESTABLISH THE TRAFFIC SAFETY PROJECTS FUND

Summary: The consideration of a budget amendment, in the amount of $100,000, to create an annual Traffic Safety Projects Fund that would be used to design and construct various traffic safety related improvements throughout the City of Asheville, excluding traffic calming projects.

Traffic Safety Projects can be defined as traffic-related projects that when completed would improve public safety and/or efficiency to the various transportation users including vehicles, bicycles, pedestrians, and Transit. Typical projects include new traffic signal installations including pedestrian signals, upgrades to existing traffic signals including pedestrian signals, emergency vehicle pre-emption, new warning flasher installations, upgrades to existing warning flashers, left and right-turn lanes, radii improvements at intersections, bicycle lanes, and pedestrian crossings. The potential projects would have a total estimated cost of $75,000. Projects with a total estimated cost of less than $25,000 are generally funded through the Transportation & Engineering Department's operating budgets. When these types of projects are identified and determined to be needed as a result of a proposed development, the potential improvements are typically funded by private sources. Traffic calming projects would ***not*** be

included since there is a separate policy and an account code already established for traffic calming projects.

These projects are typically identified as Traffic Engineering staff responds to various requests from citizens throughout Asheville. Once identified and reviewed in depth, many of these projects would then move into the design and construction stage if funding was available. According to our records, these types of projects have been approved in the past through the Capital Improvement Program including the widening of Yorkshire Street and emergency vehicle pre-emption at the intersection of College Street and Charlotte Street. Privately funded projects that have been constructed in the past include a double left-turn lane along NC 81 Swannanoa River Road at its intersection with US 74-A (South Tunnel Road) and a new traffic signal at the intersection of River Hills Road and the access for Pier One/Dick's Sporting Goods.

During September 2008 action was taken to approve funds from the General Capital Reserve Fund in the amount of $50,000 to install a traffic signal at the intersection of Fairview Road and Third Street in the Oakley community. This project is a good example of the type of project that should be funded through a Traffic Safety Projects Fund. During the ongoing construction of the Grove Park Inn Traffic Calming Project, a traffic signal was determined to be warranted at the intersection of Charlotte Street and Edwin Place. This project is another good example of the type of project that should be funded by the subject means.

This action complies with the City Council 2008-09 Strategic Operating Plan by protecting the traveling public by making traffic safety related improvements to the existing street infra-structure including intersections.

Pro:

- This action would provide a means to address traffic-related safety issues within a timely manner thereby reducing potential risk to the City.

Cons:

- This action would reduce the total amount of Capital Improvement Program Funds available on an annual basis.
- The total estimated annual cost is $100,000.

The total estimated annual cost is $100,000. $48,000 is proposed to come from savings from the Yorkshire Street widening project and $52,000 from the General Capital Reserve Fund. Currently, the balance in the General Capital Reserve Fund is $238,316 and after reducing it by the proposed amount, the new balance would be $186,316. Funds would only be spent on an as-needed basis as the various needs are identified.

Staff is carefully monitoring the approved budgets of the New Haw Creek Road sidewalk project and the Grove Park Inn Traffic Calming project to identify possible savings. At this time, staff is confident that after all of the expenses for both projects are reconciled, we will be able to identify $52,000 in savings that could then be transferred back to the General Capital Reserve Fund.

Staff recommends that City Council approve a budget amendment in the amount of $100,000 to create an annual Traffic Safety Projects Fund that would be used to design and install various traffic safety related improvements throughout the City of Asheville, excluding traffic calming projects.

ORDINANCE BOOK NO. 25 – PAGE 112

B. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO CONTRACTS FOR THE BUSINESS TECHNOLOGY IMPROVEMENT PROJECT WITH TYLER TECHNOLOGIES, INC., AS WELL AS OTHER

VENDORS FOR A CITY-WIDE SOFTWARE MIGRATION AND IMPLEMENTATION

This item was removed from the Consent Agenda for discussion and/or an individual vote.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Davis moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Mumpower and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

B. RESOLUTION NO. 08-237 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO CONTRACTS FOR THE BUSINESS TECHNOLOGY IMPROVEMENT PROJECT WITH TYLER TECHNOLOGIES, INC., AS WELL AS OTHER VENDORS FOR A CITY-WIDE SOFTWARE MIGRATION AND IMPLEMENTATION

Summary: The consideration of a resolution authorizing the City Manager to enter into contracts for the Business Technology Improvement Project (BTIP) with Tyler Technologies, Inc, as well as other vendors in total amounts not to exceed $2,000,000 for a city-wide software migration and implementation.

Review:

- During a financing discussion with Council on June 10, 2008, staff also discussed benefits and planned efficiency improvements
- Council approved a budget of $2,000,000 and allowed staff to proceed
- As part of Request for Proposals (RFP) process, staff has made the decision to enter into negotiations with Tyler Technologies

Pros:

- Prioritize a reasonable level of business technology as a means to make staff operations more efficient
- Meets multiple city council objectives
- Enhances ability to engage in process re-engineering

Con:

- Any software implementation causes some degree of organizational turbulence during implementation

This action ties into Council's "Green" goal by implementation of processes (i.e. contracting) that will require significantly less paper. It also ties into Council's "Sustainable" goal in several meaningful ways: (1) This project will better enable staff to fulfill the specific action item of "Ensure financial accountability by matching resources with strategic initiatives," specifically enhancing systems so that "creating meaningful performance measures" can be better accomplished; (2) In the same manner, the specific action item of "Strengthen efforts to create measurable goals, accountabilities, and outcomes for all city policies and operations" will also be enhanced by this project; and (3) This project will provide a foundational system so that the rollout of a modern development services system is possible, allowing staff to pursue the specific action item of "Reform and streamline the development review process to improve the ease and

efficiency of the customer's experience without compromising the quality of standards or other strategic goals (affordability, environment, etc.)" through deployment of better, greener, more online technology.

Fiscal Impact:

- Per the June 10, 2008, Council meeting, financing has been secured at $2,000,000
- RFP bids came in at up to $3.1M, even without taking into account supplementary costs such as hardware
- Of the qualified bids, the Tyler bid was the lowest
- Staff's original estimates included contingency, but current estimates of all relevant project costs are at $2M without contingency

Typically, these types of projects have 10-20% budgeted for contingency. Staff would like to make Council aware that, based on bids received, we do not have contingency budgeted.

We will keep Council updated in quarterly reports as to cash flows and project success, and make significant effort to closely manage the project to avoid change orders.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into contracts for the Business Technology Improvement Project (BTIP) with Tyler Technologies, Inc, as well as other vendors in total amounts not to exceed $2,000,000 for a city-wide software migration and implementation.

Information Services Director Jonathan Feldman responded to various questions from Councilman Mumpower, some being, but are not limited to: is the timing for this venture ideal under current and anticipated budget restraints; in the face of the current economic realities may we not anticipate a reduction in the cost of technology upgrade services and software; since the $2 Million budget does not factor in normal contingency cost considerations of 10-20%, are there are other costs (hardware, staff training time, etc.) that will represent a future budget consideration around this system upgrade; and can we ask staff to go back to the vendor and explore renegotiation of the contract.

Mr. Feldman explained why this project is important now, noting the following examples of how this project is important to organizational re-engineering: (1) we anticipate that paper usage will decrease by at least 80,000 sheets per year; (2) finance is expected to save 900+ hours/year in increased efficiencies; (3) utility billing anticipated to save 1100+ hours/year in increased efficiency; (4) employee self-service functions are expected to save 700+ hours/year across the organization; and (5) contract tracking will become an automated and accountable process and is expected to significantly improve current paper and inter-office mail based processes.

Chief Financial Officer Ben Durant also responded to questions from Council regarding debt service; is this a sound long-term investment; and what is the dollar figure associated with the number of man hours saved.

Mayor Bellamy supported the action noting the following software purchases are sound core and central components for the City: general ledger and financial reporting; budgeting; fixed assets; project and grant management; payroll & personnel; miscellaneous billing & accounts receivable; utility billing; cash receipting; purchasing and requisitions; inventory management; contract management; accounts payable; bank reconciliation; land management & GIS integration; job cost/work order; fleet & equipment; facilities management; parking tickets; and business licenses/miscellaneous permitting. She did ask, however, that as negotiations take place, that Mr. Feldman try to get a lower rate.

Councilman Newman moved for the adoption of Resolution No. 08-237. This motion was seconded by Vice-Mayor Davis and carried on a 4-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 385

III. PRESENTATIONS & REPORTS:

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER PERMANENTLY CLOSING A PORTION OF WALLACK STREET

Mayor Bellamy opened the public hearing at 5:42 p.m.

Assistant Public Works Director Richard Grant said that this is the consideration of a resolution permanently closing a portion of Wallack Street. This public hearing was advertised on October 31, November 7, 14 and 21, 2008.

N. C. Gen. Stat. sec. 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Patsy Brison, representing property owners Asheville-Buncombe Community Christian Ministry Inc. and Robert and Joan Ledford, have requested the City of Asheville to permanently close an unopened portion of Wallack Street.

He has received two communications from Bill Goacher, owner of 202 Asheland Avenue, and Beacon Properties, owner of 200 Asheland Avenue, who support the closure.

The Greenway Commission reviewed the closure of the unopened portion of Wallack Street at their meeting on November 13, 2008, and strongly advised to deny approval of the Wallack Street closure as part of this section is on the Greenway Master Plan.

Regarding the Strategic Operating Plan, this closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more effective use of the existing adjacent properties.

Con:

- The closure will impact the greenway master plan.

There will be no fiscal impact related to this closure.

In consideration of the impact to the Greenway Master Plan and the recommendation from the Greenway Commission, City staff cannot support the request for the closing of a portion of Wallack Street.

Rev. Scott Rogers, Executive Director of the Asheville-Buncombe Community Christian Ministry, spoke in support of the closure. He said that they were not aware of the meeting with the Greenway Commission and didn't have the opportunity to explain the reasoning behind the closure. He explained that due to the topography of the bank, a greenway is not appropriate for that area. He said the reason for the street closing request is so they can clean up their boundary lines since the property is for sale. He suggested that the Greenway Commission didn't have all the relevant information on the request when they voted to recommend denial.

Mayor Bellamy closed the public hearing at 5:47 p.m.

Vice-Mayor Davis, who was very familiar with the site, explained why he didn't think the greenway would be placed in that area, and supported the closing.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Vice-Mayor Davis moved to permanently close a portion of Wallack Street. This motion was seconded by Councilman Mumpower.

Councilwoman Cape could not support the motion to close but supported sending the request back to the Greenway Commission for further evaluation, with the petitioners present. She felt that greenways typically reduce crime as they invite more people to walk on them. The Greenway Commission has been tasked with the responsibility of reviewing the Greenway Master Plan and after hearing the petitioner's request, they may recommend the Plan be altered or that the area still remain on the Plan.

Councilman Newman agreed it may be difficult for a greenway to be constructed on that property but we do rely upon the Greenway Commission to give Council recommendations. He would support sending this back to the Greenway Commission and that the petitioners be given the opportunity to explain their request.

Upon inquiry of Vice-Mayor Davis, Parks & Recreation Director Roderick Simmons stated that the Greenway Commission did not walk or visit the site, but looked at the Greenway Master Plan and once it was determined that it was on the Plan, they recommended denial.

Councilman Mumpower felt the Greenway Commission did not do their due diligence in this action. The topography and realism of the property far exceeds the potential of a greenway.

Mayor Bellamy asked that the Greenway Commission be advised that City Council very much respects and honors their opinions, and may not always agree with them, but that they consider all factors when a request is brought to them, not just checking to see if the property is on the Greenway Master Plan.

Councilwoman Cape agreed with Mayor Bellamy in that the role of the Greenway Commission has a great impact on our community as we look for alternative routes to move around the City.

Vice-Mayor Davis withdrew his motion to permanently close a portion of Wallack Street. He then moved to continue this matter until January 27, 2009, in order to give the Greenway Commission an opportunity for further evaluation of the request with the petitioners being given an opportunity to be heard at the meeting. This motion was seconded by Councilwoman Cape and carried unanimously.

B. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF THE PROJECT IDENTIFIED AS CONGRESS AT GASTON, LOCATED AT CONGRESS STREET, GASTON STREET AND CHOCTAW STREET, FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO URBAN RESIDENTIAL DISTRICT/CONDITIONAL ZONING FOR THE DEVELOPMENT OF A ONE MULTI-FAMILY BUILDING WITH 27 UNITS

ORDINANCE NO. 3679 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY CONGRESS AT GASTON, LOCATED AT CONGRESS STREET, GASTON STREET AND CHOCTAW STREET, FROM RS-8 RESIDENTIAL

SINGLE-FAMILY HIGH DENSITY DISTRICT TO URBAN RESIDENTIAL DISTRICT/CONDITIONAL ZONING FOR THE DEVELOPMENT OF A ONE MULTI-FAMILY BUILDING WITH 27 UNITS

Mayor Bellamy opened the public hearing at 6:00 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to conditionally zone the project identified as Congress at Gaston, located on Congress Street, Gaston Street and Choctaw Street, from RS-8 Residential Single-Family High Density District to Urban Residential District/Conditional Zoning for the development of a one multi-family building with 27 units. This public hearing was advertised on November 21 and 28, 2008.

She said the subject property, currently owned by the City of Asheville, consists of .94 acres in the RS-8 zoning district. It is located within the city limits at the corner of Congress and Gaston Streets in the East Riverside community. The property is under negotiation for purchase by Mountain Housing Opportunities in accordance with the City's goal of making city-owned land available for development where appropriate and in accordance with other goals of the City. The transfer of property will come before Council for consideration at a later date.

The property is part of a larger parcel (5.92 acres total) that is currently vacant and divided by the Town Branch stream valley. The property was acquired by the City as part of the East Riverside Redevelopment Plan implementation in the 1960s and 1970s.

Directly to the west and north of the subject property are the residual parts of the city-owned property zoned RS-8 and Office II District (OII) . Further west, across the Town Branch stream valley and taking access from South French Broad Avenue, is a property in the OII zone containing medical offices. Properties to the north, above Choctaw Street, are also zoned RS-8 (Residential Single-Family High Density District) and contain single-family homes or are vacant. To the west, is another city-owned property zoned RS-8 containing public tennis courts. To the immediate south is a property zoned RM8 containing a residential quadruplex.

The proposal, by Mountain Housing Opportunities, is for a single building containing 27 dwelling units. The building is proposed to have an 8,133 square foot footprint and be 31 feet tall (three stories with covered parking underneath). In addition to the covered parking, surface parking and the creation of on-street parking are also shown in the plans. The developer is proposing a mix of one-, two-, and three-bedroom units for a total residential density of 28.72 units per acre. Thirty (30%) percent or 8 units are proposed to meet the City's requirements for affordable housing. Access to the parking areas is off of Congress Street. The buildings are being designed to meet "Healthy Built Homes" standards. Town Branch runs northwest of the property on which the development is proposed. This stream corridor is proposed for greenway development in the City's Greenway Master Plan. Discussions are underway with the developer concerning the development of the greenway in this area.

The applicant sought two modifications from the City's development standards for this project.

- The first request was for a design variance concerning the entrance spacing requirements in Section 7-8-25(f)(12)b. of the Unified Development Ordinance (UDO). This variance would waive the requirement that all buildings in the Urban Residential District include a well-defined, operable entrance at regular intervals not exceeding 45 feet on each primary façade. Due to the topography of the site, the need for extended slope for the required handicapped ramping at the additional entrances would create a problem with access to the sidewalk. This variance had to be granted by the Planning and Zoning Commission (Sec. 7-8-25(f)(12)g.). This variance was unanimously approved by the Commission their November 5, 2008, meeting.

- The second modification seeks allowance for two of the required street trees along Congress to be spaced more than sixty-five feet apart (proposed to be seventy feet apart). This modification is necessitated by the location of an existing sewer line, the entrance into the development, and the setback requirements in URD. Council must approve this modification.

Staff is supportive of both of these modifications.

The larger parcel (5.92 acres) is split zoned; part of the property is RS-8 and the other portion is zoned Office II. The City of Asheville Planning staff is initiating a rezoning of the remaining RS-8 portion of the lot to URD. This process is running concurrently with the conditional zoning request.

At a meeting on October 20, 2008, the City of Asheville Technical Review Committee (TRC) reviewed the conditional zoning request and made a positive recommendation (with conditions) that the project be forwarded to the Asheville Planning and Zoning Commission. The developer has resubmitted since that time, addressing the bulk of the conditions.

This conditional zoning request was recommended to City Council for approval by a 5-0 vote of the Asheville Planning and Zoning Commission at their meeting on November 5, 2008. The only speakers on this matter were staff and representatives of the developer.

Section 7-7-8(d)(2) of the UDO states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The project, if approved, must meet all the technical standards set forth in the City's UDO and Standards and Specifications manual. The developer has been working closely with City staff to ensure compliance.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The developer, in proposing a URD development, has worked, in designing this project, with the topography of the land which slopes down approximately 25 feet toward Town Branch. The developer is in discussions with the Parks and Recreation Department concerning the development of the greenway in this area.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   Although in a predominately single-family residential area, the development is located directly opposite tennis courts and a multi-family building. It is a small project (27 units) in an area with large streets so traffic should not be greatly impacted by the development.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   Although the project presents a greater density than development in the immediate area, it is in close proximity to numerous office, institutional, and multi-family developments. The project is designed so that balconies are facing the street (with parking in the rear) to provide a relationship between the dwellings and surrounding properties. The proposed

development meets the stated purpose of the Urban Residential District in complementing "existing residential neighborhoods by providing an improved diversity of housing types, scale, affordability, and character in areas where they can best be served....."

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   The proposed use supports the 2025 goals and vision as follows:
   - Increasing the supply of affordable housing.
   - Promoting compatible infill development.
   - Making surplus City-owned land available for development.
   - Permitting and encouraging transit supportive density (8-16 units per acre minimum) at transit nodes.
   - Supporting green building.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   The proposed development is located along Transit Route 18 and on streets with large rights-of-way that lead to several major roadways. Infrastructure and services are available to serve this development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   Because the development is small (27 units), a traffic impact study was not warranted. As previously stated, the development is proposed to be located on streets with large rights-of-way that lead to several major roadways.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:
- The project offers affordable units, aligning with City Council's goals.
- The proposed development provides housing in a transit-served area near numerous institutional and employment centers in Asheville.
- Higher density infill development furthers the goals and objectives of the comprehensive plan.
- The project takes surplus City-owned land and puts it back on the tax rolls.
- The project is being designed to meet "Healthy Built Homes" standards.
- Helps to further the City's greenway master plan.

Con:
- The project presents a density that is greater than found in the immediate vicinity.

Planning Staff and the Asheville Planning and Zoning Commission recommend this conditional zoning application to City Council. This conditional zoning request was recommended to City Council for approval by a 5-0 vote of the Asheville Planning and Zoning Commission at their meeting on November 5, 2008. At that meeting, the Commission approved a variance for this project, allowing fewer entrances on the façade facing Gaston Street than are required by the ordinance.

Mr. Mike Vance, representing Mountain Housing Opportunities, said that this is a first phase of a multi-year project which started over 1.5 years ago. They went through a large

neighborhood process in the summer of 2006 and this is the result. There will be a mix of 1, 2 and 3 bedroom condominiums. They have committed to 30% affordable, but their target numbers are that 11 of those 27 will be affordable by City standards and will also be sold to families with incomes below 80% of area median income. The price ranges proposed are from $125,000 up to the low $200,000, with a mix of affordable and market rate units. They have also been working with the plans for a future greenway. He noted that location is key as it follows their model of placing homes near services and employment. He asked for Council's support as they are continuing their goals of sustainable development.

Mayor Bellamy closed the public hearing at 6:11p.m.

Mr. Vance and Ms. Jane Mathews, architect for the project, responded to Councilwoman Cape regarding the community input into the project.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3679, to conditionally zone the project identified as Congress at Gaston, located on Congress Street, Gaston Street and Choctaw Street, from RS-8 Residential Single-Family High Density District to Urban Residential District/Conditional Zoning for the development of a one multi-family building with 27 units, subject to the landscape modification requested, the design variance, and subject to the following conditions: (1) Uses shall be limited to the 27 residential units proposed; (2) The project shall include 30% (8) units complying with the City of Asheville's affordable housing standards; (3) The project will be designed and constructed to meet Healthy Built Homes standards; (4) The project shall comply with all conditions outlined in the TRC staff report; (5) All site lighting must comply with the City's Lighting Ordinance and be equipped with cut-off fixtures or full cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (6) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (7) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (8) This project will undergo final review by the TRC prior to issuance of any required permits. This motion was seconded by Councilman Newman and carried unanimously.

ORDINANCE BOOK NO. 25 - PAGE 115

C. PUBLIC HEARING TO CONSIDER THE REZONING OF PROPERTY LOCATED ON CONGRESS STREET AT GASTON STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO URBAN RESIDENTIAL DISTRICT

ORDINANCE NO. 3680 - ORDINANCE TO REZONE PROPERTY LOCATED ON CONGRESS STREET AT GASTON STREET FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO URBAN RESIDENTIAL DISTRICT

Mayor Bellamy opened the public hearing at 6:16 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to rezone property located on Congress Street at Gaston Street from RS-8 Residential Single-Family High Density District to Urban Residential District (URD). This public hearing was advertised on November 21 and 28, 2008.

Ms. Cogburn said that the 3.65 acre subject property, owned by the City of Asheville, is located off of Choctaw, Gaston, and Congress Streets in the East Riverside neighborhood. It is part of a larger parcel of 5.92 acres that is split zoned (RS-8 and Office II). The property, currently vacant, was acquired by the City as part of the East Riverside Redevelopment Plan implementation in the 1960s and 1970s. Another .94 acres part of this property is the subject of a separate conditional rezoning under concurrent review.

The property is bordered on two sides by property that is zoned RS-8 and on the others by property zoned RM-8 and Office II. The land uses in the area are varied. To the north is an area largely comprised of single-family homes. To the west are offices and vacant land. Offices are found immediately south of the property as well. To the east, is additional city-owned property containing public tennis courts and vacant land.

Planning and Development Staff initiated this rezoning after receiving application for a conditional rezoning to URD for the .94 acre portion of the parcel. The staff believes that that this City-owned property is a good location for development meeting the goals of the Urban Residential District. The stated purpose of the URD is "to complement existing residential neighborhoods by providing an improved diversity of housing types, scale, affordability, and character in areas where they can best be served by City services and infrastructure." Rezoning this prior to receiving a development application requiring conditional zoning makes the process simpler for the applicant without jeopardizing City oversight of the project. City review of any proposed project would be a part of any sale. It should be noted, however, that only a small portion of this property is actually realistically developable to any extent. The site is bisected by the fairly steep stream valley of Town Branch, leaving two separated developable areas.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- The proposed zoning would provide land for dense, infill housing in a transit-served, mixed-use area near numerous institutional and employment centers in Asheville.
- Higher density infill development furthers the goals and objectives of the comprehensive plan.
- Rezoning the property could make the property more attractive for purchase, thus taking surplus City-owned land and putting it back on the tax rolls.

Con:

- Although the surrounding area contains a mix of uses, the density allowed in URD is greater than what is found in the immediate vicinity of this property.

This rezoning petition was recommended for approval by a 6-0 vote of the Asheville Planning and Zoning Commission. No one spoke on the matter.

The Planning Staff and the Asheville Planning and Zoning Commission both recommend that this rezoning be approved.

Mayor Bellamy closed the public hearing at 6:18 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3680. This motion was seconded by Councilwoman Cape and carried unanimously.

At Mayor Bellamy's request, City Attorney Oast said that in the future, when appropriate, the development agreement would be brought before Council prior to the project consideration.

ORDINANCE BOOK NO. 25 – PAGE 121

D. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO REFLECT THE CURRENT PRACTICES AND RESPONSIBILITIES OF THE TECHNICAL REVIEW COMMITTEE

ORDINANCE NO. 3681 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO REFLECT THE CURRENT PRACTICES AND RESPONSIBILITIES OF THE TECHNICAL REVIEW COMMITTEE

Mayor Bellamy opened the public hearing at 6:19 p.m.

Urban Planner Kim Hamel said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to reflect the current practices and responsibilities of the Technical Review Committee (TRC). This public hearing was advertised on November 21 and 28, 2008.

Ms. Hamel said that Article III of the UDO as it relates to the duties and responsibilities of decision making bodies has remained virtually unchanged since the UDO was adopted in 1997. This amendment will modify the UDO to reflect the current practices and responsibilities of the TRC as they have evolved in practice.

In August 2008, the TRC adopted a new and improved set of Rules of Procedure that reflects a number of improvements established for projects and applications being reviewed by the Committee. This amendment will bring the UDO into accordance with the recently adopted Rules of Procedure. The following items provide a summary of the proposed changes:

- Updating the types of development proposals and applications the committee is responsible for reviewing;
- Clarifying the type of action required by the committee for specific types of development review (approval, denial, or recommendation to another advisory body);
- Updating membership to reflect the current structure of the committee;
- Updating the meetings schedule to reflect the number of meetings held per month in accordance with the current meeting schedule (from one meeting per month to two meetings per month)

This ordinance supports the *Asheville City Development 2025 Plan* by improving communication and coordination for a development review process that requires public participation. Additionally, the ordinance supports the *Asheville City Council's Goals and Vision* by completing UDO amendments to improve clarity and address community goals.

Pros:

- The amendment brings the UDO in line with the established Rules of Procedure adopted by the TRC
- Reflects current procedure and practices of the TRC
- Simplifies the information to improve clarity and comprehension

Con:

- None identified

City staff recommends approval of the code amendment as proposed.

Mayor Bellamy closed the public hearing at 6:20 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3681. This motion was seconded by Vice-Mayor Davis and carried unanimously.

ORDINANCE BOOK NO. 25 - PAGE 124

E. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING ANIMAL CEMETERIES AND ANIMAL CREMATORIES

Mayor Bellamy opened the public hearing at 6:21 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) concerning animal cemeteries and animal crematories. This public hearing was advertised on November 21 and 28, 2008.

Ms. Cogburn said that the Planning and Development Department recently received an inquiry about the development of a pet cemetery and crematory. Presently, the UDO contains no reference to animal cemeteries or crematories. As a result, such uses would be allowed only in the River District, where all uses are permitted unless specifically prohibited. Staff feels that the ordinance should address such uses specifically, and, therefore, proposes the following amendment to the UDO to establish fair and reasonable standards for such uses in the City of Asheville's zoning jurisdiction. In drafting this ordinance, staff conducted research on animal cemetery and crematory operations and regulations and also looked at ordinances from other communities. The proposed ordinance changes:

- Establish definitions for "animal cemeteries" and "animal crematories."
- Allow animal cemeteries as a Use by Right Subject to Special Requirements in all residential districts, and the CBI, CBII, Institutional, HB, RB, River, CBD, CI, and Industrial Districts. These are the same districts that allow cemeteries for humans. The special requirements would require that the cemetery be operated by an incorporated entity and that no internment occur within ten (10) feet of a property line or within a required setback, whichever is greater.
- Allow animal crematories as a Use by Right Subject to Special Requirements in the Institutional, HB, RB, and River Districts. The conditions would address emissions, other potential nuisances, and buffering, and would require that the use be accessory to an animal cemetery, veterinary clinic, or animal shelter.
- Allow animal crematories as a Use by Right Subject to Special Requirements in the CI and other Industrial Districts. The conditions would address compliance with applicable state and federal regulations.

This ordinance was recommended for approval by a 6-0 vote of the Asheville Planning and Zoning Commission. No one spoke on the matter.

This ordinance supports the *Asheville City Development Plan 2025* goal of reviewing and modifying development regulations to be responsive to technological and social changes and economic development in the community.

Pros:

- Adds language to address uses not presently referenced in the UDO.

- Adds fair and reasonable standards for the establishment of animal cemeteries and crematories.

Con:

- Objections may be raised to allowing animal cemeteries and crematories in the City of Asheville.

City staff and the Asheville Planning and Zoning Commission recommend that City Council adopt the ordinance.

Mayor Bellamy closed the public hearing at 6:23 p.m.

Councilman Newman moved to approve an amendment to the Unified Development Ordinance to add development standards for animal cemeteries and crematories. This motion was seconded by Councilman Mumpower.

Due to a concern raised by Vice-Mayor Davis regarding the allowance of animal cemeteries as a Use by Right Subject to Special Requirements in all residential districts and a concern raised by Councilwoman Cape regarding clarification of the definition of animal cemeteries, Councilman Newman withdrew his motion to approve, and moved to continue this matter until January 13, 2009. This motion was seconded by Councilman Mumpower and carried unanimously.

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. INTERVIEW DISCUSSION FOR CITY COUNCIL VACANCY

Mayor Bellamy explained the interview process and announced that public comment would not only be taken at this meeting, but also prior to the actual voting on the vacant seat at the December 9, 2008, meeting.

Mr. William Meredith felt the process should have been a special election than appointment. He appreciated Council's consideration of his application.

It was the consensus of Council to narrow the field of applicants to six 30-minute interviews.

Mayor Bellamy thanked all the candidates for their response to the City Council vacancy. Applicants include: Catherine Alter; Charles W. Archerd; Malcolm F. Arthur; Randall Barnett; Dana W. Bierce; Keith V. Blankenship; Cecil Bothwell; Jenny G. Bowen; Brian Bradley; Bill Branyon; Claude Jeffery Chandler; Anthony Alan Coxie; Abigail Emison; Sylvia E. Farrington; Clifford O. Feingold, DDS; Linda S. Fowler; Bryan Freeborn; Phillip H. Gray; Lisa-Gaye Hall; Spencer Ellis Hardaway; Phillip Hardin; Ed Hay; Rebecca Hecht; Jan Howard; Charlie Hume; George E. Keller; Michael R. Kerr; Kathryn Liss; Esther Elizabeth Manheimer; Jay Marino; Catherine S. Martin; Barber H. Melton; William C. Meredith; Kelly Miller; Suzanne Molloy; Duane Nix; John M. Noce; James W. Oglesby; John Quinn; Jason Rector; Richard Sandoval; David Schulman; Gordon D. Smith; Glenda P. Weinert; Linda Carol Williams; Brian P. Woods; and John R. Yarnall.

Each Council member (Councilman Russell submitted his names prior to the meeting) submitted their names to be considered for an interview, with the top six being interviewed. After tallying the votes, the following resulted: Charles W. Archerd (3 votes); Sylvia E. Farrington (4 votes); Clifford O. Feingold (1 vote); Linda S. Fowler (2 votes); Bryan Freeborn (2 votes); Spencer Ellis Hardaway (2 votes); Ed Hay (1 vote); Charlie Hume (4 votes); George Keller (1 vote); Esther

Manheimer (4 votes); Jay Marino (1 vote); Kelly Miller (4 votes); Gordon D. Smith (1 vote); Linda Carol Williams (2 votes) and Brian P. Woods (1 vote). After a brief discussion, it was the consensus of Council to narrow the field of interview applicants to the following 5 that had received either 3 or 4 votes: Charles W. Archerd, Sylvia E. Farrington, Charlie Hume, Esther Manheimer and Kelly Miller.

On behalf of City Council, Mayor Bellamy thanked all the individuals who applied for the position. From reviewing the applications, she noted we have some outstanding individuals in our community who are willing to serve.

It was the consensus that during the appointment process of the meeting on December 9, 2008, City Council members will have the opportunity to express their preference prior to a motion being made.

Mayor Bellamy said that all pre-arranged 30-minute interviews (with a 5 minute break between each) would be held beginning at 1:40 p.m. on Tuesday, December 9, 2008, in the Council Chamber. She urged the public to attend. In addition, all interviews would be live on Charter Channel 11.

Mayor Bellamy said that the City's Charter provides that in the event a seat becomes vacant that this body decides who will fill that seat. There have been times where Council has chosen names without any application process. There have also been times where Council has chosen the next highest vote-getter from the last election. We are in our statutory authority to fill the vacancy in this way. We have tried to be as transparent as possible, with applications being submitted to the media or public daily as they came in. As soon as the deadline closed, we placed on our website all applications and supporting materials. We have an open process and want to work and move forward together.

VII. OTHER BUSINESS:

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. William Meredith asked Council to consider a rule in the future where a current seated Council member must fulfill their term prior to running for a different office.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 6:52 p.m.

Magdalen Bunneson
CITY CLERK

Jerry M Bellamy
MAYOR

Tuesday – December 9, 2008 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Vacant Council Seat

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Russell gave the invocation.

I. PROCLAMATIONS:

A. EMPLOYEE RECOGNITIONS

City Manager Jackson recognized the following City employees who were instrumental in the City receiving the International Economic Development Council New Media Award: Stephanie Monson, Jason Mann, Blake Esselstyn, and David Michelson. He then explained how Asheville was recognized for a new economic development initiative. The City of Asheville city cross-departmental team developed the award winning new application. The new tool that is designed to assist new and existing businesses make informed business location decisions. Asheville was a clear standout with mapAsheville-Priority Places, an interactive mapping analysis application designed to strengthen quality economic development investment in the City. MapAsheville-Priority Places provides users the ability to search and analyze key location factors based on priorities established by the user. It also provides tapestry reports of demographic information on the selected priority places. The application is part of the mapAsheville suite of GIS-based tools designed to provide information about the City. Other applications in mapAsheville include Crime Mapper, which provides access to crime related information and statistics by area; Development Mapper, which provides increased access to information concerning large-scale development activities in the City; and Asheville's GIS application, which provides a streamlined interface for basic users, as well as tools for direct access to the advanced GIS user's interface.

City Manager Jackson recognized the following City employees who completed in the Worldwide Firefighter Relay Competition. In the Women's Relay - Charley Cox, Ruth Olson, Joy Ponder, Karen Shuart and Kelley Webb. In the Men's Relay - Rick Miller, David Sauer, Garry Shackelford and Jason Worley. For a whole season, 9 local Asheville firefighters have been training and competing in nearby Scott FF Combat Challenge events in hopes to qualify to attend the World Competition in Las Vegas. Their hard work paid off and both a women's relay team and a men's relay team competed this past week in the world competition. Both teams ran qualifying times to move forward to the final competition held on Saturday, November 15th, 2008. The men's team advanced to the semi-final rounds, finishing with an honorable time of 1:27. The women's team advanced into the finals and respectfully finished second in the world just .63 seconds slower then the first place team. The whole competition will air on Versus channel in January 2009 including the final race of our Asheville women's relay team bringing home the silver. The teams were sponsored by a partnership between Asheville Fire and Rescue, the Asheville Firefighters Association, and private businesses coupled with multiple fundraisers. We

are proud of the recognition for Asheville that these local firefighters presented at such an impressive event.

City Manager Jackson then noted that the Asheville Police Department was presented to the Commission on Accreditation for Law Enforcement Agencies, Inc. on Saturday, December 6 for review of their on-site visit by assessors last August. Based upon the August on-site they had the best accreditation report and on-site visit since we began this process and were first accredited in 1994. The Commission had nothing but praise for the Asheville Police Department and voted to reaccredit us for another three years.

Police Chief Bill Hogan said that seeking accreditation is a challenging, demanding, stressful, and time consuming process that he believed is worth the effort because it proves to this community and other law enforcement agencies that we meet all the required national standards to become one of the select few agencies to receive this certification and distinction. In the United States there are 16,000+ law enforcement agencies and Asheville is one of the less than 800 national and international law enforcement organizations that have met the demanding standards of excellence to receive the distinction of accreditation. This recognition is a direct reflection of each Police Department employee and their personal commitment to the Guiding Principles and adherence to Police Department and City policies. A number of Police Department employees had direct contact with the assessors during their visit in August and they impressed them with their knowledge and dedication to our profession and this City.

On behalf of City Council, Mayor Bellamy thanked the employees on what they do on behalf of the City of Asheville and City Council. She was proud of City staff and looked forward to highlighting more accomplishments.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "C", "D", and "E" were removed from the Consent Agenda for discussion and/or individual votes.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON NOVEMBER 25, 2008, AND THE FORMAL MEETING HELD ON DECEMBER 2, 2008

Councilwoman Cape asked that the November 25, 2008, minutes be approved with the inclusion of the word "not" in the following sentence regarding discussion of transportation of nuclear waste: "...We are saying that through the middle of our downtown is **not** an appropriate route for taking this kind of waste."

B. RESOLUTION NO. 08-238 – RESOLUTION AMENDING THE 2008 CITY COUNCIL MEETING SCHEDULE TO DELETE THE DECEMBER 16, 2008, WORKSESSION

RESOLUTION BOOK NO. 31 – PAGE 386

C. RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR A NON-MATCHING GRANT WITH THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES FOR STORMWATER MANAGEMENT FEATURES AT THE NATURE CENTER, INCLUDING RAIN GARDENS AND WETLAND AREAS

RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR A NON-MATCHING GRANT WITH THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES FOR STORMWATER MANAGEMENT FEATURES

ALONG THE SECOND PHASE OF REED CREEK GREENWAY, INCLUDING A RAIN GARDEN AT THE CAUBLE STREET TRAILHEAD

These items were removed from the Consent Agenda for discussion and/or individuals votes.

D. RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR A GRANT AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR ADMINISTRATION COSTS OF THE TRANSPORTATION DEMAND MANAGEMENT PROGRAM

This item was removed from the Consent Agenda for discussion and/or an individual vote.

E. RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR A GRANT AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO FUND THE TRANSIT PLANNING PROGRAM

This item was removed from the Consent Agenda for discussion and/or an individual vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Mumpower moved for the adoption of the Consent Agenda, with the amendment to the November 25, 2008, minutes. This motion was seconded by Councilman Newman and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

C. RESOLUTION NO. 08-239 – RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR A NON-MATCHING GRANT WITH THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES FOR STORMWATER MANAGEMENT FEATURES AT THE NATURE CENTER, INCLUDING RAIN GARDENS AND WETLAND AREAS

RESOLUTION BOOK NO. 08-240 – RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR A NON-MATCHING GRANT WITH THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES FOR STORMWATER MANAGEMENT FEATURES ALONG THE SECOND PHASE OF REED CREEK GREENWAY, INCLUDING A RAIN GARDEN AT THE CAUBLE STREET TRAILHEAD

Summary: The consideration of a resolution authorizing the City Manager to accept grant funds for stormwater demonstration projects at the WNC Nature Center and at the Cauble St. trailhead to the Reed Creek Greenway.

Funds are available through the North Carolina Department of Environment and Natural Resources, Division of Water Resources to implement water quality projects. In conjunction with the City of Asheville, the North Carolina State University Water Quality Group has identified grants funds and is offering to coordinate the funds to the City to support stormwater demonstration projects at the WNC Nature Center, and at the Cauble St. trailhead to Reed Creek Greenway. Each grant requires a cash or in-kind match from the City.

The first grant at $115,800 will be used to construct rain gardens and stormwater wetlands on the grounds of the Nature Center. The rain gardens will capture, treat, and cool much of the existing runoff from animal habitats while simultaneously creating an educational display and beautifying the grounds. The stormwater wetlands will intercept, treat, and cool

runoff from existing impervious surfaces throughout the facility before releasing it into the Swannanoa River. The in-kind match for the project valued at $57,900 consists of 1) staff time for project administration, 2) staff time and equipment for site preparation and construction, and 3) sign fabrication.

The second grant at $53,000 will be used to construct a rain garden along the Reed Creek Greenway at the Cauble St. trailhead. The rain garden will collect, treat, and cool stormwater runoff from the parking area and road as well as a portion of impervious surfaces from the adjacent CITGO gas station before releasing it into Reed Creek. The cash match for the project valued at $26,500 is budgeted in the City's FY 08/09 CIP budget for construction of Reed Creek Greenway and will not require any additional funding from the City.

The projects comply with the City Council Strategic Operating Plan Focus Area: Green - Asheville will be the southeastern leader in energy and environmental sustainability while preserving and the city's natural beauty by expanding city education programs to include climate awareness, water conservation, recycling, stormwater, and sustainability initiatives.

This action complies with the Unified Development Ordinance: Stormwater, Soil Erosion and Sedimentation Control, Illicit Discharge and Connection Ordinance, article 7, chapter 12, section 2.

Pros:

- Both projects will strengthen the City of Asheville's commitment to water quality
- Both projects will serve as public examples of the type of best management practices as adopted by the City as part of the new Stormwater, Soil Erosion and Sedimentation Control, Illicit Discharge and Connection Ordinance (section 7-12-2)
- Furthers the mission of the Nature Center by providing examples of native flora while serving as a model of resource stewardship
- Addresses need to manage stormwater from new animal habitats and in public places

Cons: None noted.

Increases the City's Fiscal Year 2008/09 capital improvement budget by $168,800.

City staff recommends City Council adopt a resolution authorizing the City Manager to accept grant funds from North Carolina Department of Environmental and Natural Resources, Division of Water Resources to implement stormwater demonstration projects at the WNC Nature Center and at the Cauble St. trailhead to Reed Creek Greenway.

Councilman Mumpower felt that these items demonstrate the dysfunction of federal and state governments in providing grants with the realities we find ourselves in today. They should concentrate on their core responsibilities. With the current economic climate, he felt we have no business in participating in these kind of activities.

Councilman Newman felt that our taxpayers pay federal and state taxes and for them to receive nothing in return is unfair. The grants are competitive and awarded based on specific criteria.

Councilwoman Cape felt that the role of government is to help guide society towards a better end. She explained how we have a responsibility to practice good management.

Councilman Newman moved for the adoption of Resolution No. 08-239. This motion was seconded by Councilwoman Cape and carried on a 4-2 vote, with Vice-Mayor Davis and Councilman Mumpower voting "no."

Councilman Newman moved for the adoption of Resolution No. 08-240. This motion was seconded by Councilwoman Cape and carried on a 4-2 vote, with Vice-Mayor Davis and Councilman Mumpower voting "no."

RESOLUTION NO, 08-240 – RESOLUTION BOOK NO. 31 – PAGE 389

D. RESOLUTION NO. 08-241 – RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR A GRANT AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR ADMINISTRATION COSTS OF THE TRANSPORTATION DEMAND MANAGEMENT PROGRAM

Summary: The consideration authorizing the City Manager to apply for a grant and enter into an agreement with the North Carolina Department of Transportation (NCDOT) for administration costs of the Transportation Demand Management (TDM) program.

TDM programs are programs which promote an alternative transportation option to the single occupant vehicle. Included among these alternatives are carpooling, vanpooling, telecommuting, transit, bicycle, flexible work hours, compressed work weeks, and parking policies and price structures.

NCDOT's Public Transportation Division is funding TDM programs across the state to support the provisions of the Ambient Air Quality Improvement Act of 1999, Senate Bill 953, to address growing concerns over ground level ozone pollution from motor vehicles and the need to deal with increasing vehicle miles traveled (VMT) and NO_x emissions. This bill established the goals of reducing emissions of nitrous oxides (NO_x) from motor vehicles by 25% by 2009 and reducing the growth of VMT in the State by 25% by 2009.

This program only funds the administrative costs associated with the TDM program, up to 50% of the total administrative expenses. This includes salaries, fringe benefits, marketing, etc.

There are six TDM strategies that the City of Asheville's TDM program is required to employ in order to accomplish the TDM Program Goals set by NCDOT. They are:

1. Conduct marketing efforts/activities identified in a marketing plan.
2. Coordinate with local transportation and land use planning efforts.
3. Facilitate ridematching services through the ShareTheRideNC website.
4. Promote the Best Workplaces for Commuters^{SM} Program.
5. Collect and calculate data on VMT and NO_x reductions through TDM activities.
6. Operate in a manner consistent with the NCDOT goals regarding making our transportation network safer, making our transportation network move people and goods more efficiently, and making our infrastructure last longer.

The City's TDM program began in August 2005 and was administered under the French Broad River Metropolitan Planning Organization (MPO) and the City of Asheville's Transportation and Engineering Department. Since the functions of the MPO have been relocated to the Land of Sky Regional Planning Council, the TDM program was given its own budget code of 1606 to help with accountability. The 2008/09 budget for this program was approved during the City of Asheville's budget process.

Programs currently being administered are, but not limited to:

- The *PASS*port (employer bus pass) Program
- The Emergency Ride Home Program
- Strive Not to Drive – annual promotional event
- Share the Ride NC – Statewide ridematching program

On March 10, 2008, the City of Asheville applied for the FY2009 TDM Grant. On June 5, 2008, the Board of Transportation approved the funds in the maximum amount of $108,109 for the City of Asheville's TDM Grant.

This TDM program supports the City of Asheville's 2008/09 Strategic Plan by helping to promote emission-reducing options, as well as supporting the Asheville Transit System through programs such as the *PASS*port program.

Pros

- The current 50% match is reimbursed by NCDOT.
- To date, these statewide programs have reduced the growth of VMT by 24.6% - the goal for Senate Bill 953 was 25%.

Cons

- None.

The project cost will be $108,109; 50% of this total will be paid by NCDOT and 50% by the City from already budgeted funds.

City staff recommends City Council authorize the City Manager to apply for a grant and enter into an agreement with the NCDOT for administration costs of the TDM program.

Councilman Mumpower felt that these items demonstrate the dysfunction of federal and state governments in providing grants with the realities we find ourselves in today. They should concentrate on their core responsibilities. With the current economic climate, he felt we have no business in participating in these kind of activities.

Councilman Newman felt that our taxpayers pay federal and state taxes and for them to receive nothing in return is unfair. The grants are competitive and awarded based on specific criteria.

Councilwoman Cape felt that the role of government is to help guide society towards a better end. She explained how we have a responsibility to practice good management.

Councilman Newman moved for the adoption of Resolution No. 08-241. This motion was seconded by Councilwoman Cape and carried on a 4-2 vote, with Vice-Mayor Davis Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31– PAGE 391

E. RESOLUTION NO. 08-242 – RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR A GRANT AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO FUND THE TRANSIT PLANNING PROGRAM

Summary: The consideration of a resolution authorizing the City Manager to apply for a grant and enter into an agreement with the N.C. Department of Transportation to fund the Transit Planning program.

The Metropolitan Planning Organization (MPO) 5303 planning grant from the Federal Transit Administration (FTA) is a grant designated exclusively for transit planning which renews annually. The funds are currently administered by the City of Asheville as a Direct Recipient of federal transit funds. The funds are primarily used to pay staff salaries for time spent on transit planning. The FTA provides 80% of the funds. The state provides 10% and the City of Asheville provides 10%.

This fiscal year 2008-2009 funding is in the amount of $65,020, $6,502 (10%) of which are required to be a local match. This will continue funding that has been received in prior years.

The grant revenue and the match of $6,502 are currently budgeted in the Transportation and Engineering Department's budget.

These program supports grant administration and reporting activities; long range and short range transit planning; transportation improvement program preparation, Title VI and DBE programs, planning and operational analysis.

Regarding the Strategic Operating Plan, this program will support the green and sustainable focus areas, specifically developing a sustainable funding structure for Asheville Transit.

Pros:

- The funds help funding an existing position.
- Approval allows $58,518 of federal and state funds to be received for transit planning.

Cons:

- None.

The project cost will be $65,020 with local participation of $6,502.

City staff recommends City Council adopt a resolution authorizing the City Manager to apply for a grant and enter into an agreement with the N.C. Department of Transportation to fund the Transit Planning program.

Councilman Mumpower felt that these items demonstrate the dysfunction of federal and state governments in providing grants with the realities we find ourselves in today. They should concentrate on their core responsibilities. With the current economic climate, he felt we have no business in participating in these kind of activities.

Councilman Newman felt that our taxpayers pay federal and state taxes and for them to receive nothing in return is unfair. The grants are competitive and awarded based on specific criteria.

Councilwoman Cape felt that the role of government is to help guide society towards a better end. She explained how we have a responsibility to practice good management.

Councilman Newman moved for the adoption of Resolution No. 08-242. This motion was seconded by Councilwoman Cape and carried on a 4-2 vote, with Vice-Mayor Davis and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 392

III. PRESENTATIONS & REPORTS:

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE PERMANENTLY CLOSING OF A PORTION OF FERNWOOD AVENUE

RESOLUTION NO. 08-243 – RESOLUTION TO PERMANENTLY CLOSE A PORTION OF FERNWOOD AVENUE

Mayor Bellamy opened the public hearing at 5:27 p.m.

Assistant Public Works Director Richard Grant said that this is the consideration of a resolution to permanently close a portion of Fernwood Avenue. This public hearing was advertised on November 14, 21, 28 and December 5, 2008.

N. C. Gen. Stat. sec.160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, property owners; Myra Hirschberg and Thomas Caldwell, Adam S. Pittman Guy K. Penland, Anita F. Hatcher, Lisa R. Mathis, Kay Susan Bennett, and Robert J and Phyllis Roberson have requested the City of Asheville to permanently close an unopened portion of Fernwood Avenue.

The Greenway Commission reviewed the requested closure at their meeting on November 13, 2008, and concluded there was no visible use for retaining this unopened parcel of Fernwood Avenue.

The closing is subject to the retention by the City of Asheville Water Resources Department its successors and assigns, of a 20-foot wide permanent easement for the operation and maintenance of a two inch water line lying 10 feet on each side of the center line of said two inch water line located within the proposed Fernwood Avenue closure.

Regarding the Strategic Operating Plan, this closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more effective use of the existing adjacent properties.

Con:

- In consideration of the location of the unopened right-of-way, staff can find no potential challenges regarding the closure of the alley.

There will be no fiscal impact related to this closure.

City staff recommends adoption of the resolution to permanently close an unopened portion of Fernwood Avenue.

Mayor Bellamy closed the public hearing at 5:29 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 08-243. This motion was seconded by Vice-Mayor Davis and carried unanimously.

RESOLUTION BOOK NO. 31 – PAGE 393

B. PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING OF THE PROJECT IDENTIFIED AS CARRIER POINT, LOCATED AT STATE STREET AND SHORT MICHIGAN AVENUE, FROM COMMERCIAL DISTRICT, RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT, RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT AND RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO RM-16

RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR THE DEVELOPMENT OF 140 CONDOMINIUM UNITS WITH SITE DEVELOPMENT MODIFICATION REQUESTS TO SETBACKS AND LANDSCAPING STANDARDS

ORDINANCE NO. 3682 – ORDINANCE TO CONDITIONALLY ZONE THE PROJECT IDENTIFIED AS CARRIER POINT, LOCATED AT STATE STREET AND SHORT MICHIGAN AVENUE, FROM COMMERCIAL DISTRICT, RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT, RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT AND RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING FOR THE DEVELOPMENT OF 140 CONDOMINIUM UNITS WITH SITE DEVELOPMENT MODIFICATION REQUESTS TO SETBACKS AND LANDSCAPING STANDARDS

Mayor Bellamy opened the public hearing at 5:30 p.m.

Urban Planner Nate Pennington said that this is the consideration of an ordinance to conditionally zone the project identified as Carrier Point, located at State Street and Short Michigan Avenue, from Commercial Industrial District, RS-8 Residential Single-Family High Density District, RM-8 Residential Multi-Family Medium Density District and RM-16 Residential Multi-Family High Density District to RM-16 Residential Multi-Family High Density District/Conditional Zoning for the development of 140 condominium units with site development modification requests to setbacks and landscaping standards. This public hearing was advertised on November 28 and December 5, 2008.

The applicant seeks the conditional zoning of approximately 11.04 acres currently zoned CI, RS-8, RM-8 and RM-16 to RM-16 CZ for a multi-family condominium project with 140 units. The property is located between State Street and Short Michigan Avenue within the City's corporate limits.

If the conditional zoning application is approved, the site would have an overall density of 12.68 dwelling units per acre. The maximum net density in the RM-16 zoning district is one dwelling unit per 2,500 square feet or approximately 17.4 dwelling units per acre; however it should be noted that other site features would likely not support this level of density. The project is proposed to be built in one phase.

The following list provides a breakdown of the proposed development:

- 3 condominium buildings with 3 – 4 story configurations
- Maximum building heights of approximately 31 feet (primary fire department access to ceiling of highest occupied floor)
- 27 – one bedroom units
- 105 – two bedroom units
- 8 – three bedroom units

The subject property is vacant and consists of seven primarily wooded lots. A named stream, Moore Branch, bisects the property along State Street and serves as a tributary to the French Broad River. Over 30% of the site has been designated as open space and tree save area and these areas have been concentrated along the boundaries of the stream to the property's north, south and eastern perimeters.

The primary access point to the subject property is being proposed along State Street. A secondary emergency vehicle access point is proposed through the extension of Grenada Street

via Short Michigan Avenue. This access is proposed to be restricted through the use of bollards or other similar means and will not allow for non-emergency vehicle ingress and egress.

The applicant will be requesting the closure of two unimproved rights-of-way as part of the development and these will be conducted through separate applications if the project is approved by City Council. The rights-of-way subject to closure petition involve Swannanoa Drive and Stewart Street. The applicant owns the property on the adjacent sides of the rights-of-way that will be petitioned for closure.

The applicant is requesting a modification to the site development standards of the Unified Development Ordinance (UDO) pursuant to Section 7-7-8(c)(6) of the UDO from City Council. The RM-16 zoning district requires additional setbacks for side and rear yards based on the number of residential units for a maximum required setback of 40 feet. The modification request would allow for parking spaces to occur and a portion of building #1 to encroach into the required 40 foot side and rear yard setbacks by up to 34 feet resulting in a minimum six (6) foot setback in some areas. A second modification was initially sought for a reduction in perimeter parking landscaping standards. However, staff has since worked with the applicant to resolve the need for this modification by subsequent site plan revisions that include tree islands along the perimeter continuous runs of parking spaces.

The applicant intends to pursue LEED certification for the project; and a list of green building techniques/features is attached for City Council consideration. The applicant has made a commitment that 10% or 14 of the total units will be offered at rates meeting the City's definition of affordability. Staff is also recommending measures to maintain some long-term affordability and/or income qualifications for the affordable units if the applicant is unable to provide the committed percentage of the aforementioned units. The Planning & Zoning Commission (P&Z) approved the project with the condition that 10% of the units are sold at the City's affordable rates and be reserved for income qualified households. The applicant has since stated that their goal is to provide significantly in excess of 10% and would prefer not to be restricted. Staff has revised a proposed alternative condition for the Council's consideration in the event that the applicant does not meet their stated goals.

The subject site is surrounded by a mix of single-family residences, vacant lots and commercial uses zoned RS-8, RM-8, RM-16, CI and River.

The RM-16 residential multi-family high density district was created to permit a full range of high density multi-family housing types along with limited institutional public and commercial uses appropriate within high density residential areas. It is intended that this district be located near employment centers, shopping facilities, roads and other urban infrastructure capable of handling the demand generated by high density residential development.

At their October 20, 2008, meeting the Technical Review Committee (TRC) approved this project subject to the conditions. One neighbor expressed concerns about the proposed driveway cut and retaining wall along State Street, removal of existing vegetation and proposed rights-of-way closures.

At their November 5, 2008, P&Z meeting, they unanimously approved this project subject to the conditions in both the P&Z and TRC staff reports. The Commission heard from neighboring citizens with concerns ranging from pedestrian and automobile traffic, rental vs. owner occupied units, stormwater, loss of vegetation and restricted vs. unrestricted access to the site from Grenada Street. Considerable discussion ensued about the proposed secondary access along Grenada Street and the Commission ultimately approved the project with the condition that the applicant be allowed to close access on Grenada Street via Short Michigan Avenue with a vehicular and pedestrian barrier that meets the City's emergency standards.

Section 7-7-8(d)(2) of the UDO states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   This has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and all other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The proposed use is generally compatible with the surrounding natural features and topography. The applicant could utilize the existing road infrastructure and available rights-of-way for access from Short Michigan Avenue rather than impacting Moore Branch in order to provide access from State Street where the stream crossing will require the installation of a culvert to accommodate natural stream flow and the proposed driveway. However, legitimate safety concerns regarding access from Short Michigan Avenue renders this option undesirable. The design of the project seeks to condense/restrict development to the higher, flatter portions of the property while keeping the natural sloping property towards Moore Branch undeveloped and as designated open space and tree save area. The project must comply with all City standards in regards to grading and erosion control.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   Staff does not expect that the proposed use would negatively impact adjacent property values.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   The proposed density of 140 dwelling units is consistent with the requirements of the RM-16 zoning district. The majority of the site is currently zoned CI and the density permitted in that zoning district is 16 dwelling units per acre or 1.4 units less than the proposed zoning of RM-16 allows per acre. While the RM-16 zoning district will allow for a slightly higher density per acre, it does not permit the range of uses (specifically commercial) that CI allows. Therefore, the RM-16 CZ designation restricts the property to that of a residential nature specific to the attached site plan. Given the proximity of other multi-family housing, commercial uses and available infrastructure in the area staff feels that a condominium development of this size and density is appropriate for the area.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   The application of compatible infill growth supports key goals and objectives as described in both The Asheville City Development Plan 2025 and the City Council Goals and Vision Plan. The comprehensive plan identifies affordable housing as one of the most pressing problems facing the City of Asheville. The developer has made a specific commitment to include designated affordable units into the project as a whole. Other goals include high density, infill development and green building construction techniques.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   The proposed development is located near transportation facilities and other utilities appear adequate. The initial technical review by other technical agencies and utility providers has not revealed any problems for serving the use.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   A traffic impact study is not required for the subject project because the anticipated traffic at full-build-out conditions will be less than 100 vehicles per hour (68 vehicles per hour during the morning commuting peak hour and 79 vehicles per hour during the afternoon commuting peak hour). Based on the anticipated traffic, the proposed use should not cause undue traffic congestion or create a traffic hazard. In addition, from a traffic-engineering standpoint, the proposed single, two-way access point should be able to serve the anticipated traffic.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- The proposed development will provide 14 additional affordable dwelling units to the City's current inventory.
- The applicant intends to pursue LEED certification for the project and a list of proposed green building techniques/features has been provided.
- Provides another opportunity to further the City's goal of high density infill development in proximity to employment centers, services and transportation lines.

Cons:

- In its current configuration, the project will impact a natural stream and restrict access to one of its proposed entrances.
- Results in the additional loss of CI zoning.

Staff concurs with P&Z and recommends approval of the proposed project and conditional zoning request subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must meet City of Asheville lighting standards and utilize cut-off or full-cutoff fixtures in order to avoid any light trespass and offensive glare; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials, green features and orientation on site must comply with the conceptual site plan and building elevations presented with this application; (5) Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (6) This project shall undergo final review by the TRC prior to issuance of any required permits; (7) Applicant must make application for rights-of-way closures if project is approved by City Council and before final TRC submission; (8) A lot recombination application for all seven (7) subject lots must be submitted before zoning permit issuance; and (9) 10% of the total number of units must be sold at affordable rates to income qualified households per the City of Asheville's standards; in the event that the applicant meets their stated goal that more than 10% of the units will meet the affordability standards, this condition will be waived. Staff also supports the applicant's efforts to achieve a higher goal of providing an entirely affordable product to the citizens of Asheville.

Mr. Will Buie, engineer with Lapsley and Associates, said they have been working with staff on this project for quite some time. He explained how this project brings a lot of things to the City that are very positive. He showed a colored rendering of the site with access off State Street. The project only requires one access; however, should that access off State Street become flooded in a 100-year storm event, they recommended that the owner consider a

secondary access to the property for emergency vehicles only, off Grenada Street. They worked with staff on access, stormwater, parking, affordable housing, green building techniques, and LEED certification. He asked for Council's support of this conditional zoning request.

Mr. Ken Etterman, Project Manager, explained that their goal is to provide an affordable and LEED certified product on an infill site that has topography challenges. He pointed that they had two meetings with neighborhood groups to discuss this project. They have worked with their immediate neighbors to minimize any impact.

Mr. Christopher Gibbs, property owner across the street on State Street, spoke in opposition of the conditional zoning explaining for various reasons, some being, but are not limited to (1) the Carrier Point development is out of tune with the existing neighborhood; (2) the proposed entrance on State Street is dangerous, unnecessary and forced; (3) the roads around the proposed development are already at or beyond capacity; (4) the proposed Carrier Point development will lower property values in the adjoining neighborhoods; (5) State Street, Riverview Road and adjoining bridges are already over used as cut-through roads; (6) there are several bottleneck areas which cannot handle more traffic; (7) there is no parking adjacent to the proposed development; and (8) every feature of this site shows that the natural entrance should be from the existing right-of-way off of Short Michigan Avenue.

Mr. Fred English spoke against the conditional zoning request due to its proximity to Pisgah View Apartments and its drug activity.

Mayor Bellamy closed the public hearing at 5:41 p.m.

Mr. Pennington, Mr. Buie and Mr. Etterman responded to various questions/comments from Council, some being, but are not limited to: was the community informed about the setback requests; has the developer met with adjoining neighbors to address any concerns they may have; what is the impact to the stream; are the units condominiums; and are the elevation drawings accurate.

Councilwoman Cape stated that people in that area are trying hard to reclaim their neighborhood and bring a sense of neighborhood to that area. We do have challenges with Pisgah View Apartments around the corner and she wants to be careful about going in and struggling against the people who are trying to establish balance in that community.

Councilwoman Cape felt that this setback appears to be an intrusion into the required setbacks which supports separation between changes of use and is designed to support and maintain the quality of life of the differing uses. When Councilwoman Cape questioned if the 130 units vs. the 140 units had to do with meeting the required setbacks, Mr. Etterman explained that the higher density is required as they are working on a challenging site while trying to build an affordable project.

In response to Councilman Mumpower about how much confidence the developer has in completing the project; Mr. Etterman assured Council that they would not start the project or grade the site unless they have funding and pre-sales to move forward.

Upon inquiry of Councilman Mumpower, City Attorney Oast said that a condition could be included to not release the site for grading until all the appropriate approvals have been obtained. Mr. Etterman agreed with that condition.

In response to Mayor Bellamy, Assistant Director of Transportation and Engineering Ken Putnam said that they did look at the entrance of the project on State Street. When the Technical Review Committee has its final review, they will ensure that site distance triangles are maintained and the entrances made have the appropriate site distances.

In response to Vice-Mayor Davis, Mr. Etterman said that their price range will be approximately $125,000 to $160,000.

Councilwoman Cape said that the Housing & Community Development Committee is looking at Pisgah View Apartments and others to try to re-engineer those housing developments so they are not at one level price point because problems can arise. She felt there needs to be a mix of price points in the project so there will be a mixture of people into the community.

Mayor Bellamy said the City has invested in Carrier Park and we are looking at more improvements in the River District. We also need developers to invest in the River District. With the Appledorn development in Shiloh, there was controversy by the neighbors at the start, but that development has now reinvigorated that community. Too often there is stigma on affordable housing, but what makes housing change is having community support of not accepting bad behavior. We need help from not only the police, but the neighborhood as well. She sees this project as an opportunity for working individuals in this community to live in Asheville.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3682 to conditionally zone the project identified as Carrier Point, located at State Street and Short Michigan Avenue, from Commercial Industrial District, RS-8 Residential Single-Family High Density District, RM-8 Residential Multi-Family Medium Density District and RM-16 Residential Multi-Family High Density District to RM-16 Residential Multi-Family High Density District/Conditional Zoning for the development of 140 condominium units with site development modifications to setbacks and landscaping standards, and subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must meet City of Asheville lighting standards and utilize cut-off or full-cutoff fixtures in order to avoid any light trespass and offensive glare; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials, green features and orientation on site must comply with the conceptual site plan and building elevations presented with this application; (5) Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (6) This project shall undergo final review by the TRC prior to issuance of any required permits; (7) Applicant must make application for rights-of-way closures if project is approved by City Council and before final TRC submission; (8) A lot recombination application for all seven (7) subject lots must be submitted before zoning permit issuance; (9) 10% of the total number of units must be sold at affordable rates to income qualified households per the City of Asheville's standards; in the event that the applicant meets their stated goal that more than 10% of the units will meet the affordability standards, this condition will be waived. Staff also supports the applicant's efforts to achieve a higher goal of providing an entirely affordable product to the citizens of Asheville; and (10) not release the site for grading until all the appropriate approvals have been obtained. This motion was seconded by Councilman Russell and carried on a 5-1 vote, with Councilwoman Cape voting "no".

ORDINANCE BOOK NO. 25 – PAGE 127

C. PUBLIC HEARING TO CONSIDER A REQUEST TO REVIEW A PROPOSED SIGN PACKAGE IN ACCORDANCE WITH SECTION 7-13-10 OF THE UNIFIED DEVELOPMENT ORDINANCE FOR THE RIVER ARTS DISTRICT

ORDINANCE NO. 3683 – ORDINANCE ADOPTING THE RIVER ARTS DISTRICT SIGN PLAN PACKAGE

Mayor Bellamy opened the public hearing at 6:04 p.m.

Urban Planner Alan Glines said that this is the consideration of an ordinance adopting the River Arts District Sign Plan Package. This public hearing was advertised on November 28 and December 5, 2008.

In 2007, City Council adopted a provision in the sign ordinance that allows mixed-use areas an opportunity to propose a signage plan that would address way-finding signage in a comprehensive fashion. This is the first such sign package reviewed for a distinct district in the City. The applicant is the River District Artists, an artist group with over 100 members. The group has been responsible for the successful studio strolls in the spring and fall each year as well as other special studio events.

In the past the River District Artists (RDA) had signs permitted as "special temporary event of public interest" as found in Article 14 of the Unified Development Ordinance (UDO), Accessory and Temporary Uses and Structures. This has not been a streamlined process for either City staff or members of the RDA. The sign package request is a way to comprehensively review the sign program and gain City approval without submitting a new sign application for each event.

The River Arts District is best defined by a map which is a self-identified arts district area which has now come to be recognized by the City. Over time the River Arts District may expand into additional areas by a vote of the RDA and it is intended that this sign package agreement would apply to the expansion areas as well. He showed the detail of the logo that has been developed for the River Arts District. This design will be modified (enlarged or reduced) to create the other signage requested in this application so that a unified brand for the River Arts District is established. The special signage associated with this package will be in addition to the individual business signs currently allowed in the sign ordinance.

While the district is predominately zoned River, it also includes other commercial districts such as Commercial Industrial and Urban Place and has been identified as a special area deserving preservation, rehabilitation and careful redevelopment for the past two decades through several plans and through the goals of the River District designation in the UDO. The River Arts District also received special recognition in the Wilma Dykeman Riverway Master Plan adopted by City Council in 2004 and is summarized as a special and unique mixed-use district with a goal to maintain and preserve the older industrial uses, buildings and character. Opportunities for economic growth for artists, live/work units and other combinations of permanent and temporary uses are encouraged and supported in this district.

The signage package for the River Arts District is summarized below and includes the following types of permanent signage:

- Banner signs to be placed on buildings housing participating artist members and attached to each building in a variety of ways including projecting and flat mounted brackets to be at least 9 feet above the sidewalk/ ground level. The banner signs will be placed at each building entrance or every 100 feet along the building whichever is greater. Banners will vary in size to include: 24"X48", 36"X60" and 48"X72". The largest sized signs will be limited to buildings (or portions of buildings) that meet either of the following scenarios:

    1. Setback 25 or more feet from the pavement edge
    2. Buildings 10,000 square feet or larger

- Three monument signs to be placed at locations within the River Arts District and limited to 24 s. f. per sign face (double faced) and height up to 9 feet tall. Locations will be determined at a later date and shall comply with all other requirements for "community identification signage".

- Wall murals featuring the River Arts District logo with a size not to exceed 200 square feet at two locations. The sites are to be determined by RDA and of course, with the building owner's permission.

Along with the permanent signage, RDA is requesting approval of the following temporary signs that will be placed during events that include Studio Strolls, 'open house' demonstration events and other special events. Temporary signage will not be limited by number of events but by duration of signage.

The types of temporary signage include the following:

- A-frame signs to be placed on private property and public sidewalks where 6 feet of clearance is maintained. A-frame signs placed on sidewalks will also be subject to liability insurance and other requirements of the City. The size of the signs will be no larger than 24" X 48" and will be displayed only during special events.

- Off-premise ground signs limited to four square feet and placed on private property outside of the public right of way (ROW). Signs may appear 24 hours prior to the event and be removed within 24 hours upon its conclusion.

- Pennant Streamers to be mounted on the building face or courtyard areas and limited to 200 linear feet per building. These special event pennants will be limited to 24 hours before and after the event is completed. Pennants will be placed at least 14 feet above the sidewalk and will not cross the street.

Some of the requested signage would normally be considered on-premise temporary signage and could be permitted on a case by case basis under existing standards; however, more flexibility and frequency needed to be considered to meet the special needs of the district. Most of the off-premise signage would not be allowed in the form requested but could be considered in smaller numbers or in different forms. The fact that no single business will have additional advertising space as a part of this program but rather the signage will apply to the district as a whole mitigates this issue.

The following summary has been created to better understand the signage requested for the River Arts District, and to note what would be allowed under the existing sign code.

SIGNAGE PROPOSED	UDO ALLOWED	RIVER DISTRICT ARTISTS REQUEST	DEVIATIONS
Banner Signs (Permanent sign)	Banner signs are allowed in several commercial districts with specific size and maintenance requirements	Banner signs will match requirements for similar signs as noted in the ordinance. The largest of the signs 48" X 72" will be limited to buildings (or portions of buildings) 10 K sq. ft. or more or buildings setback 25 feet or more from street edge	Banner signs are allowed in commercial districts however "River Arts District" branding would not be allowed except if approved with the sign package. The RDA request also includes non-standard sizes.
Community Identification Monument	Community identification signs are limited to a single sign at the	3 separate signs up to 24 s. f. (double faced) and up to 9'	The 3 monument signs proposed means that two additional signs are

Signs (Permanent sign)	entrance to a community and limited to 24 square feet (double faced) and 9' tall.	tall, to be placed at locations to be determined by the RDA meeting COA standards.	requested through the sign package.
River Arts District Murals (Permanent sign)	'Art' murals are not regulated by the code. However if a business name is included or the nature of the business is portrayed as a part of the mural then it is similar to a standard development sign subject to the size and quantity limitations identified in the code for the zoning classification.	Murals using the River Arts District logo are to be placed at two prominent locations to be determined by the RDA. The size of each mural will be limited to 200 square feet.	Multiple tenant development signs are limited to 200 s.f. total in these zoning districts. The 2 mural signs will be up to 200 square feet each. They are not associated with any specific development and best fit in a sign package.
A-frame signs (Temporary)	Allowed in CBD, NCD, UV and UR Districts, sidewalk locations are required to meet City co-insurance and other standards	Special allowance for this sign package meeting size standards and located on private property or City sidewalks following COA procedures.	A-frame signs are not normally allowed in River, UP and CI districts.
Off-premise ground signs (Temporary)	Certain off-premise signs are allowed in non-residential areas with specific requirements for spacing, size, for locations outside of the ROW and the sight visibility triangle Snipe signs in public rights of way are expressly prohibited	Approximately 35 small ground signs to be placed at strategic locations directing patrons to the district.	The proposed signs would exceed the number of signs allowed and the spacing requirements for off-premise signs. All signs would need to be placed out of right-of-way areas unless special approvals are obtained.
Pennant streamers (Temporary)	Not allowed unless part of a temporary sign application meeting those standards. Pennants displayed to draw attention and move/ flap in the wind would be prohibited	Pennants streamers limited to 200 linear feet attached to buildings and used in courtyard spaces.	Request includes pennants that may otherwise be prohibited as a "wind sign"

The stated purpose for allowing a separate signage plan outlined in Article 13 of the UDO is as follows:

"..... to permit creativity in sign design and placement to address site issues and constraints associated with topography, pedestrian-orientation, way-finding and other conditions unique to the subject development"

The sign package request meets the special purpose of encouraging creativity and way-finding for a district that is specifically identified and highlighted in City of Asheville adopted plans, particularly the *Wilma Dykeman Riverway Master Plan*. No businesses are seeking additional identification space; instead the request will help identify a unique district for both residents and tourists. This proposal will be coordinated with the wider City co-sponsored wayfinding program for this area and other community destinations to help raise awareness of the district and direct patrons, citizens and visitors to an area that is uniquely Asheville. Although the details of the way finding program are not entirely determined at this time the River Arts District name will be incorporated into directional signage along major roadways and will number about 15 signs. The river front area is difficult to find for residents and tourists because access is confusing, many of the streets change names, and no single road provides a clear direct route. In addition there are few structures that act as a distinct landmark for the district. The River Arts District sign package combined with the proposed wayfinding program will establish the district name and logo as the common identification tools for the area and strategically placed banner signs, monument signs and murals will reinforce the boundaries and assist in wayfinding

This request supports the *Asheville City Council's Goals and Vision Plan*- particularly in the area of sustainability by improving opportunities for economic development at the river areas; support and expansion of the local arts community is important to the local economy.

Review by other public bodies: The RDA sign package will be presented to the River District Design Review Committee (RDDRC) at their December 3, 2008, meeting. They were unanimous in their support and supported the pennant streamers request. Sign package requests do not require review by the Planning and Zoning Commission.

Pros:

- Provides clear and recognizable logo for a specific district
- Promotes the City goals of wayfinding for community destinations
- Encourages entrepreneurship and support for the arts and other small businesses
- Supports economic development goals adopted by City Council
- Offers an organized method for coordinating various types of signage
- Reinforces Asheville's brand as a place unique among other cities in the state and region
- Saves time for staff and members of the River District Artists as signs are installed

Cons:

- Ground signs may be confused with snipe signs which are generally considered to be a nuisance in an urban environment; however, the careful placement and limited duration of use should offset some of these perceptions.
- The success of the sign program relies on the continued success of the River District Artists organization.
- Banner signs will have to be maintained and replaced as needed.
- The pennant streamers may be inconsistently and haphazardly displayed that may create a distraction (through movement by wind).

There is no expected fiscal impact for the City of Asheville for the approval of this sign package. There could be an indirect benefit to Asheville's local economy by supporting the River Arts District community.

Staff recommends that the signage plan for the River Arts District be approved as proposed but with the following amendments: (1) Place and space River Arts District murals so that they are not facing the same direction in the district; (2) Eliminate pennant streamers from the sign program because they will be difficult to consistently display and will have limited usefulness; and (3) Ground signs be approved so as to be placed to avoid rights of way and sight visibility triangle conflicts.

Mr. Fred English spoke in support of the sign package.

Ms. Pattiy Torno, Chair of the River District Design Review Committee, spoke in support of the River Arts District sign package, including pennant streamers. She briefed Council of the history of the River Arts District and how it has continued to grow to up to over 100 artists. The only negative comment they have heard is from people who are frustrated in finding the River Arts District.

Mayor Bellamy closed the public hearing at 6:18 p.m.

In response to Councilman Mumpower, Ms. Torno said that the sign package will be funded by the River Arts District.

Mayor Bellamy thanked the Committee members for their work in the River Arts District.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3683, including pennant streamers. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 25 - PAGE 133

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. APPOINTMENT OF NEW COUNCIL MEMBER

Mayor Bellamy announced that she received an e-mail from Ms. Sylvia Farrington that she has withdrawn from the process due to family priorities. She was not interviewed earlier in the day with the following other candidates: Mr. Charles Archerd, Mr. Charlie Hume, Ms. Esther Manheimer and Mr. Kelly Miller.

At 6:21 p.m., Mayor Bellamy asked for public comment.

Ms. Ruth Summers, Executive Director of the Grove Arcade Public Market Foundation, spoke in support of Mr. Kelly Miller.

A west Asheville resident felt Council should chose the candidate's values that are similar to former Councilwoman Holly Jones.

Mr. Fred English felt the vacant seat should have been filed by the 4th highest vote-getter from the General Election – Mr. Bryan Freeborn.

Mr. George Briggs spoke in support of Mr. Kelly Miller.

Ms. Kathy McCartin, President of the Biltmore Park Homeowners Association, spoke in support of Mr. Charlie Hume.

Ms. Jean Warner, resident on North Liberty Street, spoke in support of Mr. Kelly Miller.

Ms. Pam Myers, Director of the Asheville Art Museum, spoke in support of Mr. Kelly Miller.

At 6:34 p.m., Mayor Bellamy closed the public comment period.

Mayor Bellamy read Section 7 of Asheville's Charter, which reads "Any vacancy in the office of mayor or council shall be filled by the council for the remainder of the unexpired term from the qualified electors of the City of Asheville." The Charter does not provide a process for filling that vacancy but allows Council to make that determination. We received 47 applications and narrowed the interviews down to five. One candidate withdrew and Council interviewed the remaining four candidates earlier in the day.

After each Council member expressed their appreciation to all candidates stating they all of them had outstanding qualities, Vice-Mayor Davis chose Esther Manheimer; Councilman Russell chose Kelly Miller; Councilman Newman chose Esther Manheimer; Councilman Mumpower chose Charlie Hume; Councilwoman Cape chose Esther Manheimer; and Mayor Bellamy chose Kelly Miller. Results: Esther Manheimer had 3 votes; Kelly Miller had 2 votes; and Charlie Hume had 1 vote. There was not a majority vote (4) for any candidate.

Councilman Newman moved to appoint Esther Manheimer to the vacant City Council seat. This motion was seconded by Vice-Mayor Davis and said motion died on a 3-3 vote, with Vice-Mayor Davis, Councilwoman Cape and Councilman Newman voting "yes" and Mayor Bellamy, Councilman Mumpower and Councilman Russell voting "no."

Councilwoman Cape noted that Esther Manheimer and Kelly Miller were both fine people and the Council would be fortunate to have either person fill the vacant seat.

Councilman Mumpower moved to appoint Kelly Miller to the vacant City Council seat. This motion was seconded by Councilman Russell and carried on a 4-3 vote, with Mayor Bellamy, Councilwoman Cape, Councilman Mumpower and Councilman Russell voting "yes" and Vice-Mayor Davis and Councilman Newman voting "no."

On behalf of City Council, Mayor Bellamy congratulated and welcomed Kelly Miller as a member of the Asheville City Council.

Mayor Bellamy announced that Mr. Miller would take his Oath of Office on Friday, December 12, 2008, in the Council Chamber beginning at 5:00 p.m. The public was invited to attend.

VII. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of November 21 – December 4, 2008: Christopher San-Miguel (Streets), Brenda Hankinson (Streets), PSNC (Water), Janet Daye (Transit Services), Joe Austin (Police), AT&T (Water) and Evelyn C. Hill (Police).

These claims have been referred to Asheville Claims Corporation for investigation.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

IX. ADJOURNMENT:

Mayor Bellamy noted that this is the last meeting for 2008. She thanked her fellow Council members for everything they have accomplished during 2008. She thanked them for helping her mature as a person and looked forward to a positive 2009 as we have a lot to do as a Council and as a community. She wished everyone a wonder and safe holiday season.

Mayor Bellamy adjourned the meeting at 6:55 p.m.

Magdalen Burleson
CITY CLERK

Jerry M. Bellamy
MAYOR

Friday - December 12, 2008 – 5:00 p.m.

Special Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Robin L. Cape

Mayor Terry M. Bellamy welcomed everyone to the special session. On a somber note, she said that Councilwoman Cape's father, Robert H. Cape, passed away on Thursday, December 11, 2008. She asked that everyone keep Councilwoman Cape and her family in their prayers.

The Marine Corp JROTC from Asheville High School presented the Colors and the National Anthem.

Mayor Bellamy then introduced Dr. Bruce Frank from Biltmore Baptist Church who gave the invocation.

The Honorable J. Calvin Hill, Judge of the Buncombe County District Court, administered the Oath of Office to:

Council Member Kelly McDonald Miller

Council member Miller thanked his family and friends for their support and for the honor of being a member of the Asheville City Council. He promised to work diligently with Council to face the challenges ahead.

Mayor Bellamy was pleased to note that new Buncombe County Commission Chairman David Gantt was in attendance. She expressed her excitement of working with Council over the next year. She invited the audience to attend a small reception immediately following this meeting to honor Councilman Miller, with Dr. Robert Blackburn blessing the food.

ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 5:10 p.m.

Magdalen Burleson
CITY CLERK

Terry M Bellamy
MAYOR

Friday – January 9, 2009 - 1:00 p.m.
Saturday – January 10, 2009 - 9:00 a.m.
WNC Nature Center - Asheville, NC
Council Retreat

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Mayor Bellamy welcomed everyone to the City Council retreat and said that the focus of this retreat will be to together move the City in a good direction.

Mr. Keith Mastin, Education Director, welcomed City Council and staff to the WNC Nature Center.

Mr. Dan Lazar, member of the Board of Directors for the Friends of the WNC Nature Center, noted that it is on the site of the old Asheville City Zoo, which was converted into the nature center in 1974. The Nature Center teaches children, in that over 18,000 children participated in the Center's environmental education classes in Fiscal Year 2008 and over 25,000 children visited the Nature Center with their families in Fiscal Year 2008. The total Fiscal Year attendance was 86,000 people and the Center was designated a Blue Ridge Natural Heritage site in 2008.

Mr. Doug Williams, President of the Friends of the Nature Center, explained why it was important to invest in the Nature Center at this difficult financial time, and explained who the Friends of the Nature Center are. He explained the past projects funded by the Friends of the Nature Center and the 2009 planned projects, one of which is to raise funds to build an on-site veterinary clinic for the Center's animals that will be used as an educational tool for veterinary students. The veterinary clinic will have a total cost of $410,000, with the committed funds being $125,000 from the Friends and public donations to date is $7,500. Still needed is a proposed designation of 2009-10 State Grassroots Science Museum Grant of $100,000, with the unfunded balance being $177,500. The City can help by (1) designating the 2009-10 State Grassroots Science Museum Collaborative grant (estimated $100,000) for the construction of the veterinary clinic; and (2) include $177,500 2009-10 Capital Improvement Funds funds for the construction of the veterinary clinic.

Mayor Bellamy thanked Mr. Mastin for the use of the Nature Center and Mr. Williams for their report.

Retreat Agenda and Process

Mayor Bellamy introduced Mr. Lewis Isaac, who will be the facilitator for this meeting. He in turn reviewed the agenda, the role of the facilitator and the ground rules. Mayor Bellamy offered Council members to make any changes to the agenda, which they did not. She explained what she hoped would be accomplished and how.

Updates from Staff

Budget Update

Chief Financial Officer Ben Durant recapped the First Quarterly Report. He said that at the November 18, 2008, City Council worksession, staff presented the first quarter Fiscal Year (FY) 2008-09 Financial Report, as well as a Preliminary Budget Forecast for FY 2009-10. Due to the economic recession, staff projected that general fund revenue would come in under budget in the current fiscal year by $1.0 Million. Staff also reported to Council that the management team had already identified a set of budget savings strategies to address the $1.0 Million shortfall in the current year. These strategies

included, among others, implementation of a selective hiring program and the delay of capital equipment purchases.

Staff also reported to Council that initial budget projections for next FY 2009-10 showed that expenditures would exceed revenues in the general fund by approximately $5.3 Million. These initial projections reflected the cost of a "continuation budget" that included existing business practices and service levels. The management team was subsequently able to reduce this initial budget gap with the following recommended strategies: (1) eliminate market-based pay adjustments for employees; (2) reduce the employee merit pay pool; (3) offer an early retirement incentive program to reduce overall personnel costs; and (4) forego the annual contribution to the Housing Trust Fund.

Adjusting the budget projections to account for these four recommended strategies lowered the projected budget gap for FY 2009-10 to approximately $3.0 Million.

In December, the City received its October sales tax distribution from the N.C. Dept. of Revenue and it was up 23% over last October. As Council may recall, sales tax receipts were down 19% in the month of September. This double digit swing in collections between September and October is due to timing issues with the State's sales tax reports, and it highlights the difficulty in using monthly sales tax data to make meaningful projections. More importantly, through the first four months of FY 2008-09, the City's sales tax revenue is only 0.2% higher than at this time last year. In December, the City also received verification from Progress Energy that we are owed approximately $300,000 in utility tax back payments from the State. We expect to receive this one-time payment in mid-March of this year. Based on this information and updated estimates in other revenue categories, staff is anticipating that the current year shortfall will still be in the range of $850,000 to $1.0 Million.

Staff has not received any data as of yet to suggest that the preliminary budget projections for FY 2009-10 warrant any revisions at this time. However, several key pieces of information that will impact next year's projections will be received in the next 4 to 6 weeks. Important upcoming dates include (1) Late January: Official FY 2008-09 current year assessed valuation data will be received from Buncombe County; (2) February 2: Deadline for departments to submit initial continuation budget requests to the Finance Department; (3) Mid-February: December sales tax revenue will be reported by the State; and (4) February 15: Final deadline for employees to accept the City's early retirement incentive.

Staff will update the preliminary budget projections for FY 2009-10 based on the data received over the next six weeks and report back to Council in late February during the 2nd Quarter Financial Report. Also, it should be noted that the management team is continuing its in-depth analysis of re-engineering opportunities, as well as evaluating our service priorities and levels. Staff will also provide an update on these efforts during the February Financial Report and seek initial Council policy direction on staff's re-engineering ideas and service prioritizations for FY 2009-10.

Throughout Council discussion, Mr. Durant and City Manager Jackson responded to various questions/comments from Council (noting that questions that could not be answered would be provided to Council), some being, but are not limited to: is there a possibility the State may withhold funds; what is the rationale behind no annual contribution to the Affordable Housing Trust Fund this year; what is the status of the demolition lien on the Tunnel Road hotel property; will the street and sidewalk fund remain flat as it did in the Fiscal Year 2007-08 budget; what is the status of the 51 Biltmore Avenue parking deck and what are the plans for improving some of the other parking decks; what is the financial impact of the changes in legislation for the Transit Department's funding; what is the impact to the taxpayer for the City paying for water and stormwater utilities; what is the breakdown of the debt service requirements from the general fund, excluding payments for the $40 Million in revenue bonds for capital improvements for water lines; what would be the financial impact of Asheville Greenworks (Quality Forward) closing and how would it impact our downtown; how much do we spend in maintenance and cleaning the City; how much is currently in the Housing Trust Fund and how much has been repaid to the Housing Trust Fund; what is the impact to the tax base from the development of housing from the Housing Trust Fund; explanation of the amount the Local Government Commission requires and the City's policy regarding fund balance; how have salaries and fringe benefits rose over the past 3-4 years compared to other costs; what is the

rationale for not cutting each department's budget by 5%; is it anticipated that the property tax collection will be lower due to people being laid off or salary cuts; and suggestion to look at what other municipalities are doing to balance their budgets.

Mayor Bellamy, Councilwoman Cape and Councilman Newman all spoke about the value of the Housing Trust Fund and how valuable those funds are to leverage affordable housing tax credit projects. Mayor Bellamy and Councilwoman Cape supported the Housing Trust Fund being scaled back, but not in foregoing the annual contribution altogether.

Strategic Plan

Assistant City Manager Jeff Richardson briefly reviewed with Council the 2008-09 Strategic Plan's key milestones.

In response to Councilman Newman, Councilwoman Cape was pleased to report that since the City started their program in 2006-07, we reduced our energy consumption by a total of 12.8% last year. The Sustainable Advisory Committee on Energy and the Environment's annual report will be coming to Council shortly that will provide additional information.

Conclusions from Department Director Retreat

Assistant City Manager Jeff Richardson briefed Council on the staff discussion at the Department Director retreat held in December, 2008.

Mr. Richardson touched on Department Director's FY 2009-10 goals as follows: (1) reduce expenditures (a) reengineering opportunities; (b) organizational chart analysis (early retirement); (c) service prioritization (reduction strategy); and (d) communications strategy; (2) pursue revenue sources (a) annexation; (b) revenue larger fees for cost recovery potential (i) (non-city residents); (c) revenue reengineering ideas; (d) water rate increase (Consumer Price Index); (e) verify utility tax revenue received; and (f) asset management – real estate; (3) Capital Action Plan (a) policy direction for Capital Improvement Project affordable (size and scope); (b) 2/3 bond issuance; (c) economic stimulus package; (d) prioritize and refine inventory of deferred maintenance (i) buildings; (ii) rolling stock; and (iii) parks; (e) safety and security infrastructure/management systems; and (f) lobby for State and Federal Transportation money; (4) process improvements/BTIP (a) training for staff regarding process redesign and software tools; (b) implement process design and documentation (i) identify process improvements to take advantage of technology; (c) technology tool training (how to use?); (d) maintain involvement in process owners and key staff throughout process; (e) fully develop DRP prior to implementation of technology; and (f) communication plan; (5) employee retention (a) redefine Employer of Choice; (b) goal, communicate, communicate, communicate; (c) manage leadership schedules to allow time for informal time with employees; and (d) realistic total compensation program/package. The old Employer of Choice was agreed to be discussed at a later date – The Asheville Way (a) set aside funds for leadership training; (b) revitalize Corporate "U" (i) focus middle management; (c) continue discussions on diversity training; (d) manage leadership schedules to allow time for informal time with employees; (e) look for grant opportunities from private foundations for funding; (f) create Training Director position; (g) identify who the most likely candidates for succession are; (h) establish mentoring program; and (i) realistic total compensation package; and (6) (a) lobby for state and federal transportation money; (b) economic stimulus package (i) AT&T; (c) strengthen and market City of Asheville Youth Leadership Academy for workforce development; (d) development plan for Technology Park in Central Business District and high education and training center; (e) foster relationship with governmental agencies and private sector; (f) continue redevelopment of key city sites to promote high density infill (i) RFP sites; and (ii) 51 Biltmore; (g) revisit the current ED incentive package; (h) revisit Unified Development Ordinance amendments not involving life safety issues; (i) one stop shop; (j) continue to Wilma Dykeman implementation and encourage a joint City/County Advisory Commission; (k) review Community Development Block Grant policies for opportunity to promote affordable housing and infrastructure; (l) finalize and/or compete Downtown Master Plan, Transit Plan, and Parks and Recreation Master Plan; and (m) continue in-kind support of HUB; and (7) revisit Council implementation schedule on strategic goals.

City Manager explained that staff recognizes the challenges that we face as an organization to get through this fiscal crisis and the need to revisit how ambitious we set out to accomplish new and innovative things.

Mayor Bellamy said that Council will need to balance their goals to ensure that the quality of life or quality of service for our citizens is not put in peril.

Customer Service Summary

Assistant City Manager Jeff Richardson highlighted some of the Customer Service survey strengths and challenges communicated to our organization. Challenges/opportunities include: (1) transportation services; (2) affordable housing availability; (3) planning/community code enforcement; (4) Economic Development/employment opportunities; (5) downtown safety at night; (6) community environment; (7) recreation center; and (8) public trust. Strengths being (1) quality of life; (2) Asheville as a place to live; (3) neighborhood safety; (4) fire services; (5) garbage collection; (6) opportunities to attend cultural activities; (7) educational opportunities; (8) sense of community; (9) participation in community activities; (10) volunteer image; and (11) employee responsiveness.

Council Discussion

Mayor Bellamy said this is an opportunity to reaffirm the Asheville City Council 2008-09 Strategic Plan with the four focus areas of sustainable, affordable, green and safe, with opportunity for re-wording goals, objectives and action items or deleting them if accomplished. After a short discussion, it was the consensus of Council to add an additional focus area of "Fiscal Responsibility".

Each Council member explained their personal goals for 2009-10 as follows, some reaffirming the goal which is currently in the existing 2008-09 Strategic Operating Plan:

Councilman Newman

- Efforts to resolve lawsuit regarding Sullivan Act – ability for Asheville to grow through voluntary annexation agreement as new development takes place and seeks to connect to City services
- Reformation of the Unified Development Ordinance to achieve Council's goals in terms of green building and affordability
- Partnerships to achieve more effective prosecution of all offences

Councilman Mumpower

Councilman Mumpower said that his goal recommendations are predicated on the following (1) a belief that the Federal borrow and spend policies are neither appropriate or adequate to the role of security our economy and that our national and local economic downtown will be dramatic and long-term; (2) a positive that the best governments are those which anticipate revenue/service issues before the fact rather than react during or after the crisis; (3) a belief that sacrifice, adjustment, and recovery should be modeled from the top down; and (4) a position that we should not participate in further harm to our economy be seeking or accepting federal or state revenue that is derived from borrowed funds or budgetary largesse.

- An immediate 20% salary reduction for City Council members (senior managers should be encouraged to consider their own 10% cut)
- Discontinue funding all outside agencies, festivals, home loans, council travel, planning, paid consultation, and all other non-essential services – dedicate all resources to essential city services. Further, he believes that we should return all federal and state money that is in the pipeline but has not yet been used – including federal funding for Memorial Stadium (we mock the sacrifice of veterans by undermining the system for

which they sacrificed)

- Make "safety" a priority as Asheville's unique commodity for attracting new residents and businesses – "The Safest City in America" has the potential to become a very important product in a dangerous world. In anticipation of stepped up criminal activity in a time of economic difficulty, develop a publically championed zero tolerance policy for all criminal activity – press for more accountability from state criminal judicial system. Look for ways to eliminate "leakage" of our limited public safety resources – waiting time in courtrooms, involvement in non-essential services while on city duty (festivals as an example), etc.
- Instruct City Manager to implement a 10% cut in the City budget within 30-60 days – be prepared with a plan for a 20% cut in the new budget year
- Pursue a four day work-week for City staff and work to cut back hours versus staff as a means to spreading the impact of the upcoming downturn – resist temptations to prematurely use City fund (savings) reserves. Begin screening to roll back enforcement responsibilities and unnecessary rules in the Unified Development Ordinance and other city ordinances (flag ordinance, chicken costume regulation, double standard sign ordinances, etc.)
- Recognition of progress – but continued failure to illuminate our open air drug markets and reassessment of methods, needs, and opportunities to more seriously commit to securing this goal and more effectively protecting our children (it is a personal view that our failure to eliminate our open air drug markets and resulting harms in public housing and vulnerable low income neighborhoods as a form of child abuse)
- Work with the Housing Authority to establish a partnership program that establishes one housing development as a model "Safe Place" – including zero tolerance for any criminal activity, stepped up police enforcement, zero tolerance for rule violations, strict standards of behavior for residents/visitors, outside support from volunteer churches and civic organizations, increased use of technology, etc. – we need a model that is working to prove that we can do it in every public housing development
- Stop dodging our local responsibility to enforce illegal immigration – this is hands down America's quickest and most realistic jobs creation program and will dramatically reduce the drain on our social services, health care, education, and criminal justice systems
- Support an "all of the above" policy on energy independence – emphasizing realistic and empirically ground methodologies;
- Dedicate ourselves to jobs creation – model and encourage a city-wide "Buy America" policy, creatively support local export industries, push 287 (g), and encourage 21st century education to match 21st century realities (stop pushing "college" and start pushing skills and employability).

Councilwoman Cape

- Support voluntary annexation agreement as new development takes place and seeks to connect to City services
- Get in front of the conversation of what we are interested in, in terms of affordability, green initiatives, incentivizing, etc. and have that information ready when we get out of our economic turndown
- Understanding of conditional use limitations and how can we make our processes work better to achieve our goals
- Support City's goal of energy reduction
- Utilize the economic incentives we received for energy efficiencies to see how can we help jump start the economy, along green building and green businesses, with the tools we have in place

Councilman Miller

- Work with the County and State legislators on the water issue: possible solution prior to any further legal expenditures. Is there a win-win where both sides give up a little to achieve a lot? Annexation issue is also part of this priority;

- Budget – Adhere to our mission: the City of Asheville is committed to delivering an excellent quality of service to enhance your quality of life. How do we do this, knowing we have a budget deficit and a sick economy
- Health of downtown Asheville: implementing solutions to four important social issues affecting the City's health: (a) graffiti and vandalism; (b) cleanliness; (c) towing; and (d) panhandling
- Asheville Downtown Master Plan: adoption and developing a specific plan of action that is complete with timeline and fiscal/policy implications so we can convert the plan from written recommendations to action
- Economic development and job creation: maintain aggressive and proactive strategies with key partners to make the City of Asheville as business friendly as we possibly can during these difficult times
- PSP: no idea the impact a completed PSP will have on our community as well as budget and resources. A well vetted management plan for a completed PSP that includes annual maintenance and operations plan, budget, usage guidelines and a governance model that achieves predetermined objectives
- Comprehensive growth management plan: (Pat Smith with community foundation)
- Riverfront development – Wilma Dykeman Riverway or greenway infrastructure
- Healthy lifestyles what are those programs and policies we can affect that add to Asheville's growing reputation as a healthy place to live, work and play. Lighten up for life, bike paths, sidewalks, farm to table
- Affordable housing: maintain those dollars in the Affordable Housing Trust Fund, if possible
- Green sustainable solutions: provide incentives and easy to understand green solutions for industry, residents and small businesses so we can truly walk the sustainability talk (Community Energy Advisory Council)
- Volunteerism
- Safe/secure

Councilman Russell

- Look at publicly owned properties and ways to improve our ordinances for our own spaces;
- Unified Development Ordinance – look at ways at being more objective and predictable
- Consolidation
- Concentrated effort to review financial impacts for all projects
- Business friendly and encouragement of economic growth

Vice-Mayor Davis

- Civic Center, use of volunteers and review of public skating venue
- Public safety – Continue efforts to eliminate open air drug market – Partnership for a nuisance court
- Hope to keep merit pay in to some degree
- Riverfront development – City function with office
- Fireworks on New Years Eve

Mayor Bellamy

- Recommend no tax increase
- Advocate for measured reduction strategies across departments
- Support funding for Affordable Housing Trust Fund
- Support funding for basic city services including infrastructure, public safety, park and parks and recreation
- Use current funding that has been allocated and raised to complete W.C Reid Center
- Recommend pursuing opportunities for cost savings – during the fuel shortage were

there practices that were adopted that can be continued to cut costs
- Reduce the number of monthly Council meetings
- Work with Buncombe County and State legislators on addressing concerns in the water Agreement
- Develop a local economic stimulus package, similar to the N.C. Dept. of Transportation's potential Economic Stimulus and Recovery Plan, which she presented out to Council
- Lobby federal and state legislators on behalf of needs outlined in economic stimulus Package
- Develop a Riverway Redevelopment Commission in connection with Buncombe County, Chamber, Riverlink and river property owners
- Work with Henderson County on providing water to Northern Henderson County - receive land back and split the proceeds of a sale
- Work towards additional green jobs for the citizens of Asheville
- Maintain diversity
- Maintain goals of being a safe, affordable, green and sustainable City of Asheville
- Keep Asheville clean

Mayor Bellamy noted two recommendations (1) Planning & Zoning – Keep safe, attractive, energy efficient homes among your highest priorities by continuing your support of the Asheville Housing Trust Fund; (2) Asheville Downtown Commission – (a) commitment to aid in communication and help to be a better liaison for downtown issues; (b) partnership with Pritchard Park warden; (c) implement Social Issues Task Force's downtown plans; (d) better infrastructure – implement Wayfinding Program; and (e) better communication/management of City's downtown services.

It was the consensus of Council for the Mayor to write a letter to the Grove Park Inn expressing the City's appreciation for the fireworks the first three Saturdays in December, 2008.

City Council then, with the understanding that we are in a time of economy concern, affirmed the Asheville City Council 2008-09 Strategic Plan (including the fifth focus area of fiscal responsibility) and re-worded the existing goals, objectives and action items, deleting them entirely if accomplished or if they could not be accomplished in 2009-10.

In response to Councilwoman Cape, City Manager Jackson provided Council with copies of the Planning & Development Department's current development process review schedule being worked on, which detailed the process, timeline and particular section amendments being reviewed.

The following is a list of the new goals and objections, that received majority support of Council, to be folded into the 2009-10 Strategic Operating Plan:

- Explore potential of a zero tolerance policy
- Provide leadership in buying and hiring local
- Consolidation
- Support efforts to improve public safety in downtown parks and public spaces
- Continue support of Housing Trust Fund
- Develop an economic stimulus package
- Expand all non-salaried volunteer opportunities

City Manager Jackson said that the following items, which did not receive majority support of Council, would be reviewed to see if it is in the specific department's current work plan:

- Review of the Affordability Housing Task Force
- Review of the Sustainable Advisory Committee for Energy & the Environment
- Review of the conditional use process (consensus of Council to have City Attorney Oast bring forward an ordinance to delete this process)
- City Council salary reduction
- Discontinuance of outside agency funding

- 10% cut in the City's budget
- Four day work-week (consensus to reaffirm program)
- Review enforcement responsibilities in the Unified Development Ordinance
- Enforcement of illegal immigration laws
- balanced approach to energy use
- Suspension of additional investment this year in planning documents, consultants and studies

At Mayor Bellamy's request, it was the consensus of Council to have the Veterans and Memorial Day celebrations included as part of the festivals that the City adopts annually. She noted that Memorial Day has been included since 2002.

At 5:10 p.m., Mayor Bellamy said that the City Council retreat will continue at 9:00 a.m. on January 10, 2009.

Saturday, January 10, 2009 - 9:00 a.m.
WNC Nature Center - Asheville, NC

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower (left meeting at 11:44 a.m.); Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

Mayor Bellamy welcomed everyone to the continuation of the City Council retreat, noting that she was pleased with the progress made at the meeting yesterday.

City Council Committees

Mayor Bellamy initiated discussion concerning whether the four City Council Committees are worthwhile of Council's time.

After discussion, it was the consensus of the majority of Council to continue with the four City Council Committees, as each have value. She felt that items should be routed through the appropriate City Council committee prior to consideration by the full Council. If there is no City Council Committee for the item, the matter is to be reviewed by City staff. Mayor Bellamy suggested that all strategic goals be aligned with the specific Council Committee for reporting, as that may help with the focus of the Committee. City Manager suggested that once the strategic goals are reworded, they would be routed through the Council committees for review and comment/revision before being placed on Council's agenda for adoption. Staff liaisons to the Council committees will also place an item on the Committee's quarterly agenda for a strategic operating plan update, with periodic reporting by the Committee chairs to the full Council.

Public Safety Committee – Mayor Bellamy and Vice-Mayor Davis – A third member is yet to be determined

Planning & Economic Development Committee – Vice-Mayor Davis, Councilwoman Cape and Councilman Russell (change to 2:00 p.m. on the second Wednesday of each month)

Finance Committee – Councilman Newman, Councilman Russell and Councilman Miller

Housing & Community Development Committee – Councilwoman Cape, Councilman Newman and Councilman Miller (with regular meeting time and date to be determined)

Boards & Commissions Committee – Vice-Mayor Davis, Mayor Bellamy and Councilman Mumpower (with regular meeting time and date to be determined)

It was the consensus of Council to include the appropriate City Council committee recommendation in all staff reports.

Boards & Commissions

After a brief discussion about the role of City Council liaisons, it was the consensus of Council to ask the Boards & Commissions Committee prepare a letter, with prior Council review, to all Chairs re-establishing the values of the committee, advising them of their City Council liaison, explaining City Council's role as a liaison vs. a regular voting member, re-stating their mission and the importance of the committee to reflect citizen views on topics, etc. She felt the liaison's role is to advise the board what Council's goals are specific to that particular board and that the board be reminded to keep the liaison involved. An annual report from each Committee will be provided to Council, along with monthly minutes shortly after the meetings occur.

It was the consensus of Council that the Boards & Commissions Committee (1) review all boards to determine if they receive funding from the City and if so, there should not be a voting member of Council on the board; and (2) look if there are any competing roles or overlapping responsibilities for the different boards.

Recognizing the importance of our boards & commissions, Mayor Bellamy noted that she is making sure that all applicable agenda items are thoroughly reviewed by the appropriate board/commission prior to coming to the full Council.

City Council Agenda Scheduling for City Council Members

Discussion surrounded the policy for City Council members to place an item on the agenda. Options available include the former policy of three or more members, one member of Council, and/or City Council Board Committee Chairs.

Mayor Bellamy noted that it is her goal to get a Council-requested item on the formal meeting agenda within 30 days.

Mayor Bellamy was concerned with the amount of time spent in discussing an agenda item. Each hour of the Council meeting is approximately $2,000, and it is her goal to reduce that cost. Councilman Mumpower noted that he is a minority representation and that he will continue to passionately and verbally defend his conservative position.

There was a brief discussion about the amount of time spent on the Consent Agenda items and the purpose of the Consent Agenda, which is to be adopted by a unanimous vote of the Council of the routine, non-controversial items. Mayor Bellamy suggested that members of Council are furnished with a copy of the tentative monthly agenda at the beginning of the month and perhaps any concerns regarding an item can be resolved prior to the meeting. In addition, the agenda item, in its entirety, is provided to Council at least three days prior to the formal meeting and suggested any questions be forwarded to the City Manager for response prior to the meeting.

Public Comment at Meetings

Mayor Bellamy asked for clarification as to whether Council will or will not allow public comment, under the Informal Discussion and Public Comment section, if the item was discussed on the agenda.

It was the consensus of Council that if Council receives the agenda item purely for information purposes only and no public comment was allowed at that time, that it would be appropriate for the public to comment on that item at the end of the meeting.

After a brief discussion regarding Council members speaking under informal discussion and public comment, Councilman Mumpower recalled that only 2-3 times he used that venue in that he felt he was being censured.

Councilman Newman felt that the public comment period is the time that Council has set aside to listen to the public.

It was reaffirmed that there will be no discussion on the agenda of personnel issues. If an item should arise, it will be referred to the City Manager.

It was the consensus of Council that when individuals speak under public comment and ask Council questions that the Mayor advise the person that the City Manager will meet with them after the meeting to set up a meeting time and time to discuss their concerns.

It was the consensus of Council for Mayor Bellamy to work with City staff to advise the public via a program on our Government Channel about Council meeting procedures.

Mayor Bellamy said that regardless of whether she is running for office or not, she will continue handling her responsibilities as Mayor of the City of Asheville until her term as Mayor ends.

Worksessions

Mayor Bellamy brought forward discussion about the Council worksessions. After a brief discussion regarding the value of Council Committees, it was the consensus of Council to hold only two formal meetings a month (2nd and 4th Tuesdays) at 5:00 p.m. in the Council Chamber and to amend the 2009 City Council meeting schedule to delete the 3rd Tuesday worksession (effective immediately). When worksessions are needed (budget, etc.), it was suggested that they be held either on the 3rd Tuesday of the month, or prior to the regularly scheduled formal meetings.

A brief discussion was held regarding meetings on the 5th Tuesday of any given month. It was the consensus of Council that (1) the 5th Tuesdays of any given month be blocked off for community meetings; however, the March 31, 2009, date be held for the Mission Hospital Board meeting, previously scheduled; and (2) that the June 30, 2009, date be a community meeting in the South Asheville area (not Shiloh, since Council has previously been there), at 6:00 p.m., at a place to be determined. It was also the consensus of Council to limit City staff attendance at the meetings to key departments and others who may be able to complement requests from that area.

Intergovernmental Relations

Mayor Bellamy briefly updated Council on the meeting with Henderson County representatives. It was pointed out that Henderson County does not want to buy the system from the City of Asheville, nor do they have the money to invest in to buy into the water system. They have no desire to be in the water business. They were also clear that they have until 2012 to decide if they will build a sewer treatment plant at Bent Creek. After 2010, they can transfer the property to the Metropolitan Sewerage District (MSD), who then has 10 years within which to build a sewer treatment plan. She has asked City Attorney Oast to prepare a letter asking what MSD's position is on that property. MSD will respond back to the City in writing. Since it could be 13 years before the City gets the 137 acres back, they proposed taking the amount offered by former Mayor Charles Worley, which was not a reasonable figure. In addition, Progress Energy would like to expand some of their power lines on the property, however, the City will need to get an appraisal to see the financial impact if they do expand their lines. Those power lines will, of course, impact the value of the land. Another meeting will be held in approximately 30 days and Progress Energy will update the group on this proposed expansion. At the next meeting, Henderson County will also provide some Best Practices information from other cities who have regional water service providers in the area, e.g., how are they governed and what do they look like.

Councilman Newman also noted that the existing water agreement needs to be amended so that it is clear on the responsibilities of both parties.

A discussion was held on the position City Council would like for the Mayor to represent at their next meeting. It was the consensus of Council that the language in the existing water authority with Henderson County be reviewed for amendment; to explore the potential for an early transfer of the 137 acres back to the City with a riverfront greenway and no payment up front to Henderson County. But, if there is real interest in selling the property, that a potential split (which would be negotiated) would be of interest to City Council, with details to be worked out. After the information is received from MSD, this matter, and the issue about an appraisal of the property, will be discussed further by Council.

A brief discussion was held whether the proceeds from the sale of the property would be rededicated to the water system to possibly prevent the need for a water tax increase, or used for other uses in the general fund.

Legislative Priorities

Vice-Mayor Davis said that research done by the Task Force for the Future of the Civic Center confirmed almost all arenas, conference, convention and performance centers throughout the state enjoy a percentage of hotel/motel room tax, either in the initial construction or through the life of the facility for capital improvement. The percentage varies from a half to three percent but an increment of room tax is consistently applied to the communities' public gathering places. Once again, Asheville is treated uniquely; other venues are not required to garner room nights as a condition to receive proceeds from room tax. He also remains firmly convinced that the Asheville Civic Center is directly responsible for many room nights and, at the very least, is a direct contributor to the vibrant downtown and the destination it has become. Our legislative agenda should include the request for a one percent dedication of hotel/motel tax revenue to be used for debt service on a near term upgrade of the Asheville Civic Center, consistent with the recommendation of the Task Force for the Future of the Civic Center. Should the one percent be beyond what Council is comfortable in asking, at least a half percent should be requested for the Civic Center Capital Improvement Program. It is a fair and normally dedicated tax that will help alleviate the burden of the local taxpayer as is done throughout the country, and, particularly, North Carolina. Recognizing the downturn in the economy, we may not be successful in this session but the request must be persistently included in our legislative agenda.

There was brief discussion about the regional nature of the Civic Center and the need for outside revenue to help renovate it. Councilman Miller felt the hotel tax money might be better spent on more advertising or on a new performing arts center where it could generate more hotel stays and sale tax revenue, which would spread the burden. He explained the three granting cycles of the Tourism Development Authority's Product Development Fund, and strongly suggested staff bring forward a strong proposal for those funds.

It was the consensus of City Council to include Vice-Mayor Davis' request on the Council's legislative agenda; and for staff to make application to the Tourism Development Authority's Product Development Fund for a Civic Center renovation project making the case how the Civic Center is a beneficial to tourism in our community.

Mayor Bellamy said that a vote will be taken on the legislative agenda at the January 27, 2009, meeting, at which time Council will review last year's requests and include any new ones. City Attorney Oast said that Council can continue to make legislative requests up until the deadline.

Mayor Bellamy said that a meeting with our state legislators will be set up to discuss Asheville's legislative agenda.

Upon inquiry of Councilman Newman, City Attorney Oast suggested City Council discuss the legal issues surrounding the water agreement in closed session with the policy issues being discussed in open session.

At 11:43 a.m., Councilman Russell moved to go into closed session pursuant to N.C. Gen. Stat. sec. 143-318.11(a)(3) to consult with the City Attorney on a matter with the respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: the City of Asheville, the State of North Carolina, and Buncombe County. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no". At this time, Councilman Mumpower left the meeting.

At 12:43 p.m., Councilman Russell moved to come out of closed session and return to the formal meeting. This motion was seconded by Vice-Mayor Davis and carried unanimously.

It was the consensus of Council to hold a worksession on annexation and the water agreement on Tuesday, January 27, 2009, at 3:00 p.m.-4:45 p.m., in the Council Chamber.

At 12:46 p.m., Mayor Bellamy adjourned the meeting.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – January 13, 2009 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Bellamy gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "E", "H" and "I" were removed from the Consent Agenda for discussion and/or an individual vote.

At the request of City Manager Jackson, Consent Agenda Item "F" was removed from the Consent Agenda for a presentation and/or individual vote under New Business.

A. **APPROVAL OF THE MINUTES OF THE FORMAL MEETING HELD ON DECEMBER 9, 2008; AND THE SPECIAL MEETING HELD ON DECEMBER 12, 2008**

B. **RESOLUTION NO. 09-1 - RESOLUTION AUTHORIZING THE MAYOR TO APPLY FOR AND ENTER INTO AN AGREEMENT FOR GRANT FUNDS WITH THE N.C. PARKS AND RECREATION TRUST FUND FOR REIMBURSEMENT OF LAND ACQUISITION FOR THE BEAUCATCHER OVERLOOK PARK PROPERTY**

Summary: The consideration of a resolution authorizing the Mayor to apply for and (if awarded) enter into a grant agreement with the N.C. Parks and Recreation Trust Fund for the purchase of Beaucatcher Overlook Park property.

Funds are available through the North Carolina Department of Environment and Natural Resources, Division of Parks and Recreation in the North Carolina Parks and Recreation Trust Fund (PARTF) to assist with the development of parks, recreational facilities, and greenways. The City of Asheville wishes to submit a grant application for $500,000. If awarded, grant funds will be used to offset the City's financial commitment of the existing lease-purchase agreement for the Beaucatcher Overlook Park property.

The grant application requires a dollar for dollar cash match valued at $500,000. The cash match is available through a combination of funds in partnership between the City of Asheville, Trust for Public Land and Buncombe County.

Creating a downtown overlook park is an idea that has been talked about for years in the Asheville area. In 1920, the City of Asheville established the first city plan authored by John Nolan, an early city planner, which identified the infrastructure needs for the growing city. The Nolan plan delineated a circle of parks surrounding Asheville, and major city parks in every neighborhood. The key component of the park system was an expansive overlook park along Beaucatcher Mountain, and open space connecting it to downtown Asheville and the surrounding neighborhoods.

The City's acquisition of the 30 acres of woodland covering the slope of Beaucatcher Mountain is serving as a catalyst to revive the overlook park vision, and is visible from nearly everywhere in downtown Asheville. The site is perfectly situated to be the centerpiece of a new vision for the area around Beaucatcher Mountain including Memorial Stadium, McCormick Field and White Fawn Reservoir.

The City is also in the process of finalizing a new Parks, Recreation, Greenways, and Cultural Arts master plan which will set the pace for capital projects for the next few years. The recommendations from the master plan will determine how the build out of the park fits into the overall vision.

This action complies with the *City Council Strategic Operating Plan* Focus Area: Green - Asheville will be the southeastern leader in energy and environmental sustainability while preserving and the city's natural beauty by contributing to developing the greenway master plan process, and pursuing opportunities to preserve open space.

This action complies with the Downtown Master Plan and the Parks, Recreation, Greenways, and Cultural Arts Master Plan (both pending City Council approval).

Pro:

- If awarded, the grant will reimburse the City for a portion of payments on Beaucatcher Overlook Park property.

Con:

- The grant application process is competitive and a grant award is not guaranteed.

Award of the grant will reimburse the City of Asheville $500,000.

City staff recommends City Council to adopt a resolution authorizing the Mayor to apply for and enter into an agreement for grant funds through the North Carolina Parks and Recreation Trust Fund for $500,000 for reimbursement of land acquisition costs for the Beaucatcher Overlook Park property.

RESOLUTION BOOK NO. 31 – PAGE 395

C. RESOLUTION NO. 09-2 - RESOLUTION SETTING A PUBLIC HEARING ON FEBRUARY 10, 2009, TO CONSIDER THE PERMANENT CLOSING OF AN UNOPENED ALLEY OFF PATTON AVENUE

Summary: The consideration of a resolution of intent to close an unnamed alley off of Patton Avenue and request a public hearing for February 10, 2009, regarding this issue.

N. C. Gen. Stat. sec. 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, property owner Western Carolina Rescue Ministries Inc. has requested the City of Asheville to permanently close an unnamed alley off of Patton Avenue.

The Greenway Commission met on Thursday, December 11, 2008, and approved closure of the unopened alley off of Patton Avenue.

Regarding the City Council Strategic Operating Plan, this closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more effective use of the existing adjacent properties.

Con:

- In consideration of the location of the unopened right-of-way, staff can find no potential challenges regarding the closure of the alley.

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt a resolution setting a public hearing for February 10, 2009, to close an unnamed alley off of Patton Avenue.

RESOLUTION BOOK NO. 31 – PAGE 396

D. RESOLUTION NO. 09-3 - RESOLUTION ACCEPTING COUNTRY MEADOWS DRIVE, BAITY DRIVE, NICHOLAS DRIVE AND BRANDI DRIVE AS CITY MAINTAINED STREETS

Summary: The consideration of a resolution to accept various developer constructed streets as city-maintained streets in the recently annexed area of the City of Asheville known as Sardis Road area that is described in the Annexation Services Plan dated May 22, 2007.

Ordinance # 7-15-1(f)(4)a requires that streets dedicated for public use by accepted by resolution of the City Council.

Country Meadows Drive from NC 112 to the end of maintenance is a developer constructed street that has an average width of 22 feet, a length of 0.32 mile, and a right-of-way width of 45 feet.

Baity Drive from Country Meadows Drive to the end of maintenance is a developer constructed street that has an average width of 21 feet, a length of 0.09 mile, and a right-of-way width of 45 feet.

Nicholas Drive from Country Meadows Drive to the end of maintenance is a developer constructed street that has an average width of 21 feet, a length of 0.08 mile, and a right-of-way width of 45 feet.

Brandi Drive from Country Meadows Drive to the end of maintenance is a developer constructed street that has an average width of 21 feet, a length of 0.07 mile, and a right-of-way width of 45 feet.

Transportation and Engineering Department staff and Public Works Department staff have inspected these streets and recommend their change of ownership from privately-maintained streets to city-maintained streets.

Following City Council's approval of this resolution, the subject streets will be added to the official Powell Bill List.

This action complies with the annexation services plan for the Sardis Road Area that was approved by City Council on May 22, 2007. This action also complies with the City Council 2008-09 Strategic Operating Plan within the Sustainable Focus Area by accepting street infra-structure to help support the healthy growth of the City.

Pros:

- The City of Asheville will receive Powell Bill Funds from the North Carolina Department of Transportation (NCDOT) to maintain the streets *(Total mileage = 0.56 mile)*.
- The streets provide access and connectivity in a residential setting.

Con:

- Powell Bill Funds will not cover 100% of the total cost to maintain the street.

There will be no initial financial impact to the City, although the responsibility of maintenance will belong to the Public Works Department. The City will receive Powell Bill Funds in the future to help maintain the street. Currently, the Powell Bill Funds equate to $6,326 per mile compared to the City's maintenance cost of $18,189 per mile.

Staff recommends that City Council accept the subject streets as city-maintained streets.

RESOLUTION BOOK NO. 31 – PAGE 397

E. RESOLUTION AUTHORIZING THE CITY MANAGER TO SUBMIT AN APPLICATION TO THE N.C. DEPT. OF COMMERCE FOR RENEWAL OF THE TWO URBAN PROGRESS ZONES WITHIN THE CITY OF ASHEVILLE

This item was removed from the Consent Agenda for discussion and/or an individual vote.

F. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE BUILDING GROUP FOR CLEANING THE VENTILATION HANDLING SYSTEMS

BUDGET AMENDMENT TO FUND CONTRACT FOR CLEANING THE VENTILATION HANDLING SYSTEMS

These items were removed from the Consent Agenda for a presentation and/or an individual vote.

G. RESOLUTION NO. 09-6 - RESOLUTION AMENDING THE 2009 CITY COUNCIL MEETING SCHEDULE TO DELETE ALL THIRD TUESDAY WORKSESSIONS

RESOLUTION BOOK NO. 31 – PAGE 403

H. RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR A FIT COMMUNITY DESIGNATION IN COLLABORATION WITH HEALTHY BUNCOMBE, AND TO SERVE AS THE FISCAL AGENT FOR FIT COMMUNITY GRANT APPLICATION IN THE WEST END/CLINGMAN AVENUE AND THE SOUTH FRENCH BROAD NEIGHBORHOOD ASSOCIATIONS

This item was removed from the Consent Agenda for discussion and/or an individual vote.

I. RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR AND ENTER INTO A SAFE ROUTES TO SCHOOL GRANT FOR PROPOSED PEDESTRIAN INFRASTRUCTURE IN HAW CREEK

This item was removed from the Consent Agenda for discussion and/or an individual vote.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Cape moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Russell and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

E. RESOLUTION NO. 09-4 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SUBMIT AN APPLICATION TO THE N.C. DEPT. OF COMMERCE FOR RENEWAL OF THE TWO URBAN PROGRESS ZONES WITHIN THE CITY OF ASHEVILLE

Summary: The consideration of a resolution authorizing the City Manager to submit an application to the North Carolina Department of Commerce for renewal of the two Urban Progress Zones within the City of Asheville.

In July of 2006 the NC General Assembly passed legislation (House Bill 2170) that created a new business tax credit program, replacing the William S. Lee credits, which were repealed for business activities that occurred on or after January 1, 2007. The newer program is called Urban Progress Zones.

On July 24, 2007, Asheville City Council passed a resolution authorizing the City Manager to submit an application for state designation of Urban Progress Zones. The application was successful and two zones have been designated. Renewal of the designation, including an adopting resolution by City Council, is required annually.

Under the Urban Progress Zone program, businesses that add new jobs or invest in business property, and operate under specific NAICS codes, are eligible for state tax credits. To be eligible, the business must also:

- pay an average weekly wage for all full-time employees equal to or greater than 110% of the state average weekly wage,
- provide health insurance for full-time employees and pay 50% of premiums,
- have no significant environmental violations in the last five years,
- have no outstanding citations under OSHA and no serious violations within the last three years, and
- have no overdue taxes.

Regarding the Strategic Operating Plan, the Urban Progress Zone designation is compliant with the 2008-2009 Strategic Plan as the program:

- Supports efforts to hold the line on taxes and find areas for tax and fee relief
- Supports diversified job growth and small business development
- Supports a stronger river redevelopment partnership, (Zone 2 includes river district)

Pros:

- This action will allow us to provide incentives for business growth and investment within distressed Asheville communities.
- Eligible businesses are allowed to file for the tax credits as part of their NC corporate income tax, NC corporate franchise tax, or -in the case of insurance companies- the state premiums tax. No separate application process to redeem the credits is required.
- The Asheville-Buncombe Economic Development Committee has endorsed Urban Progress Zones.

Con:

- Must reapply or renew each year.

Urban Progress Zones do not require city investment beyond identification of eligible zones and application. Credits are applied only to state taxes.

City staff recommends City Council approve a resolution authorizing the City Manager to submit an application to the North Carolina Department of Commerce for renewal of two existing Urban Progress Zones within the City of Asheville.

Economic Development Director Sam Powers responded to Councilman Mumpower's question of what the zones are and what the productive value is of these initiatives.

Councilman Mumpower felt that with the state's budget deficit he sees no reason to ask for these special type arrangements, especially with such a broad and vague area.

In response to Vice-Mayor Davis, Mr. Powers said businesses have the opportunity to take credits as part of their state corporate income tax. He does receive approximately 15-20 calls a year from businesses asking us to help them verify that they are in the Urban Progress Zone. He felt this is a program that businesses in Asheville are taking advantage of.

Vice-Mayor Davis said that the zones are areas that have some difficulties with businesses originating and being sustainable. The zones include fairly large properties with small businesses and a lot of poor neighborhoods and he would support the zones.

Mayor Bellamy said that any person who does not have access to a computer but who would like to have the materials that are in front of City Council, should contact City Clerk Maggie Burleson at 259-5601.

Councilwoman Cape moved for the adoption of Resolution No. 09-4. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 399

H. RESOLUTION NO. 09-7 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR A FIT COMMUNITY DESIGNATION IN COLLABORATION WITH HEALTHY BUNCOMBE, AND TO SERVE AS THE FISCAL AGENT FOR FIT COMMUNITY GRANT APPLICATION IN THE WEST END/CLINGMAN AVENUE AND THE SOUTH FRENCH BROAD NEIGHBORHOOD ASSOCIATIONS

Summary: The consideration of a resolution authorizing the City Manager to apply for a Fit Community Designation in collaboration with Healthy Buncombe, and to serve as the fiscal agent for Fit Community grant application in the West End/Clingman Avenue and the South French Broad Neighborhood Associations.

The City of Asheville received a three-year Fit Community Designation in 2006 in partnership with Healthy Buncombe, a local coalition to program and promote both local and state initiatives to support healthy lifestyles in the Fit Together initiative. The Fit Community designation recognizes North Carolina municipalities that have exhibited a commitment to supporting healthy life styles in the areas of physical activity, healthy eating and youth tobacco use prevention. Fit Community is a program of Fit Together, an initiative of the North Carolina Health and Wellness Trust Fund. The City is now coming into the third year of the designation and wishes to reapply for a second three-year designation in collaboration with Healthy Buncombe.

The West End/Clingman Avenue and the South French Broad Neighborhood Associations wish to make a pre-application to be considered for the full application process for a $60,000 Fit Community grant application for programs at Aston Park. If invited to the next phase of the grant application, the City of Asheville will serve as the applicant and fiscal agent. If awarded the grant, the City will then serve as a pass through for grant funds and fiscal agent on behalf of the neighborhood associations.

This action does not comply with the City Council Strategic Operating Plan.

Pros:

- Fit Community designation sets the stage for community agencies to pursue future Fit Community grants
- Supports the West End/Clingman Avenue and the South French Broad Neighborhood Associations efforts to pursue a Fit Community grant for programs at Aston Park.

Con:

- None

With regard to the City Council Strategic Operating Plan, this grant will add playground equipment to the new playground that was just installed, and to develop programs in the park to entice the community to use Aston Park.

There is no fiscal impact on the receipt of the Fit Community Designation. In the event a Fit Community grant is awarded, the City will serve as the fiscal agent.

City staff recommends City Council adopt a resolution authorizing the City Manager to apply for the Fit Community Designation in collaboration with Healthy Buncombe, and to support the West End/Clingman Avenue and the South French Broad Neighborhood Associations efforts to pursue a Fit Community grant for programs at Aston Park.

Councilman Mumpower said that this money is coming out of the state budget with billions of dollars in deficits. He felt the help we need from the state is in our court system. Even though this is a good project, it's not necessary.

In response to Mayor Bellamy, Parks & Recreation Director Roderick Simmons said that the funding does not come from the state, but from a tobacco settlement.

Councilwoman Cape moved for the adoption of Resolution No. 09-7. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 404

I. **RESOLUTION NO. 09-8 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR AND ENTER INTO A SAFE ROUTES TO SCHOOL GRANT FOR PROPOSED PEDESTRIAN INFRASTRUCTURE IN HAW CREEK**

Summary: The consideration of a resolution of support and administration for a Safe Routes to School grant application for proposed pedestrian infrastructure in Haw Creek, and authorization to accept the grant if awarded.

Safe Routes to School (SRTS) is a federally-funded grant reimbursement program providing an opportunity for communities to improve conditions for bicycling and walking to school. According to the SRTS program requirements the City Council must adopt a resolution of support and administration prior to submission of the grant application.

Evergreen Charter School is proposing a sidewalk along one side of Bell Road, which would connect New Haw Creek Road to the existing sidewalk at Ozark Springs Lane. This would allow their students a safer walking route from the Happy Valley area and from a proposed Asheville Transit System stop to the school. Evergreen has existing internal pedestrian pathways that allow connection to the sidewalk and is willing to continue to improve that on-site network with parent and community volunteers.

Regarding the Strategic Operating Plan, this application is the first step to obtaining Safe Routes to School grant funding, which fulfills a safety focus area element: "Support the Safe Routes to School program by implementing one school this year."

Pros:

- Allows up to $300,000 in additional pedestrian infrastructure investment with outside funds
- Extends existing sidewalk to a logical terminus
- Contributes to pedestrian safety
- Encourages active children
- Brings a share of already allocated federal funds to Asheville
- Requires no local matching funds.

Cons:

- The grant may not cover the entire project, so other funding would have to be sought
- The city will be responsible for project management and grant administration

The engineer's estimate for the project is $357,840. The grant limit is $300,000, leaving a gap of $57,840. The engineer's estimate includes $25,000 for contract administration, which would be done by city staff, leaving a cash gap of almost $23,000, which would have to be funded from other sources, by use of other in-house resources, or by modifications to the design.

City staff recommends City Council adopt the resolution, which expresses support for the grant application, ability to administer a Safe Routes to School grant, and authorizes the City Manager to accept the grant if awarded.

Councilman Mumpower feels that it's irresponsible for the City to participate in any efforts from the state or federal governments with their terrific deficits.

Councilwoman Cape moved for the adoption of Resolution No. 09-8. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 405

III. PRESENTATIONS & REPORTS:

A. AT&T GRANT FOR THE UNC-ASHEVILLE MATH TUTORING CERTIFICATION PROGRAM

Mr. LaVoy Spooner, WNC Regional Director for External Affairs for AT&T, announced that AT&T has awarded a grant of $25,000 to UNC-Asheville to be used to develop a Math Tutor Certification Program. He was pleased that this Council values public education and fully supports the efforts that may improve the academic performance and ultimately the graduation rate of the students in our community. AT&T shares this same commitment to education and creative solutions that will reduce the drop-out rate of secondary school students. He thanked Mayor Bellamy for the key role she played in bringing their attention to this funding opportunity to support the University's Math Tutor Certification Program. This program will train tutors who will work with low performing and/or low income students to improve their math skills and performance which should contribute to an improved overall academic success for those students. The program will create a cadre of math tutors skilled in educational practices, knowledgeable of school policies and familiar with the North Carolina standard curriculum. He then presented the check to UNC-Asheville Chancellor Anne Ponder.

On behalf of the UNC-Asheville, Chancellor Ponder thanked AT&T for the gift. She also thanked City Council for making this opportunity available to UNC-Asheville in order to receive this investment in education public. She explained UNC-Asheville's strategic plan and she felt this is a shining example of the University taking on its public responsibility. She felt this will enhance educational opportunities in Asheville where they are needed most.

Mayor Bellamy thanked Chancellor Ponder for partnering with the City to bridge the gap between Asheville and UNC-Asheville. To the math wizards, she appreciated them reaching out to the community to fill a gap when the Asheville-Buncombe Education Coalition closed their doors.

She also thanked Mr. Spooner and AT&T in recognizing the Charter School Teacher of the Year as well as Teacher of the Year for Asheville City Schools.

B. STATE OF THE AIRPORT UPDATE

Mr. David Edwards, Director of the Asheville Regional Airport, introduced Mr. Dave Hillier, Chairman of the Asheville Regional Airport Authority, and presented Council with the following state of the Asheville Regional Airport Authority. He provided Council with an Airport overview regarding the Fiscal Year 2008 traffic statistics, land, major uses; runway information, and passenger traffic growth, which from Fiscal Year 2003's 219,584 passengers to Fiscal Year's 2008 282,538 passengers

Regarding air service, he explained they have 26 daily non-stop flights to the following hub cities: Atlanta, Charlotte, Cincinnati, Detroit, Houston, Newark and Minneapolis/St. Paul. These flights are on 4 commercial air carriers – Continental (12%), Delta (40%), US Airways (35%) and Northwest (13%). New non-stop service opportunities include Boston, Chicago, Ft. Lauderdale/Miami, Tampa, and Washington, D.C.

Regarding community benefits, he explained that based on a 2007 economic impact study by Tom Tveidt, Director of Research for the EDC of Asheville-Buncombe County, the Airport provides the following total direct, indirect and induced impact for jobs of 2,410; for annual economic impact of $205,124,969; and for annual payroll of $61,625,669. It is estimated that each additional daily flight of a 50 seat passenger jet generates approximately $9,125,000 in annual economic impact.

He then reviewed the Airport's (1) revenue and expenses for Fiscal Year 2003 through 2008; net income for Fiscal Year 2003 through 2008; and the current budget for Fiscal Year 2008-09.

He briefed Council on the Airport Art Program; and discussed the following developments in the Airport: terminal complex development; terminal project – ticket counter; terminal project – baggage make-up; terminal project – baggage claim; new access control/security system; regional boarding ramps; upgraded airside concessions; guest service center; new terminal advertising program; new rental car maintenance facility; new corporate hangar; and new fixed base operator facility. He explained the 2008-09 Capital Improvement Programs of Runway Rehabilitation including lighting and shoulders – design; ARFF equipment purchase; pre-conditioned air project; aircraft lavatory cart facility and building automation – for a total cost of $1,694,104

Upcoming development projects include (1) rehabilitation of runway 16/34 ($7.5 Million); (2) rehabilitation of public parking ($3.0 Million); (3) reconstruction of General Aviation roadway infrastructure ($2.75 Million); and (4) installation of a Virtual Security Perimeter Control System (one of four airports nationwide selected by the Transportation Security Administration for a grant to fund the project). Proposed stimulus projects include (1) construction of the Westside parallel taxiway system ($36.75 Million); and (2) expansion of the General Aviation roadway system ($5.75 Million).

The Airport is working with Carolina Mountain Land Conservancy to submit a grant to place approximately 28 acres of Airport property located directly on the French Broad River into a permanent conservation easement status. City Council was originally briefed on this item on March 27, 2007. The application deadline is February 1, 2009. A conservation easement would allow for bike and walking trails that would connect to much of what has been discussed as a part of the Urban Trail down along the French Broad River. The final easement documents will be reviewed by the Airport Authority and brought back to City Council for their review and approval. This is a great opportunity to give back to the community. At this point Council is not committing to do anything, but they would like to know that they have Council's support in at least submitting the application.

He was pleased to invite City Council to the terminal improvement unveiling/ribbon cutting on February 26, 2009.

Councilman Mumpower questioned why we would want to restrict any Airport property when we don't have a clear sense of the future. Mr. Edwards explained the advantages of having a conservation easement. He said that the Airport can show good faith from an environmental standpoint to protect and give back to the community. This particular property is located right on the French Broad River (in the floodway) and commercially it is not developable. The conservation easement is all on the Airport property and it can be used for the benefit of walking and biking trails, etc. in an area not identified for any use.

In response to Councilman Miller, Mr. Edwards talked about increasing the size of our regional jets and which non-stop opportunities he would like to see happen.

Councilman Newman, member on the Airport Authority, explained that the decision by the Airport for a conservation easement is not significant, but when you look at a connected system of greenways all the way along the French Broad River, it is quite significant. The neighboring properties are also very interested in placing some of their property in a conservation easement as well for this endeavor.

On behalf of City Council, Mayor Bellamy thanked Mr. Edwards and Mr. Hillier for their work at the Airport.

IV. PUBLIC HEARINGS:

A. ORDINANCE NO. 3685 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE REGARDING ANIMAL CEMETERIES AND ANIMAL CREMATORIES

Mayor Bellamy said that this public hearing was held on December 2, 2008, and continued to this date in order to give staff the opportunity to research some questions raised by City Council.

Urban Planner Julia Cogburn said that this is the consideration of amendments to the Unified Development Ordinance (UDO) concerning animal cemeteries and animal crematories.

The Planning and Development Department recently received an inquiry about the development of a pet cemetery and crematory. Presently, the UDO contains no reference to animal cemeteries or crematories. As a result, such uses would be allowed only in the River District, where all uses are permitted unless specifically prohibited. Staff feels that the ordinance should address such uses specifically, and, therefore, proposes the following amendment to the UDO to establish fair and reasonable standards for such uses in the City of Asheville's zoning jurisdiction. In drafting this ordinance, staff conducted research on animal cemetery and crematory operations and regulations and also looked at ordinances from other communities. The proposed ordinance changes:

- Establish definitions for "animal cemeteries" and "animal crematories."
- Allow animal cemeteries as a Use by Right Subject to Special Requirements in the CBI, CBII, Institutional, HB, RB, River, CBD, CI, and Industrial Districts. These are the same districts that allow cemeteries for humans with one exception. Human cemeteries are allowed in all residential districts. The special requirements would require that the cemetery be operated by a business entity, that arrangements (such as contracts and trust accounts) be in place to ensure perpetual care and appropriate closure procedures, and that no internment occur within ten (10) feet of a property line or within a required setback, whichever is greater.
- Allow animal crematories as a Use by Right Subject to Special Requirements in the Institutional, HB, RB, and River Districts. The conditions would address emissions, other potential nuisances, and buffering, and would require that the use be accessory to an animal cemetery, veterinary clinic, or animal shelter.
- Allow animal crematories as a Use by Right Subject to Special Requirements in the CI and other Industrial Districts. The conditions would address compliance with applicable state and federal regulations.

On December 13, 2008, Asheville City Council first reviewed this proposed wording amendment and suggested three changes. The staff has revised the ordinance to address the following concerns:

- The definition of "animal cemeteries" should clearly indicate that these regulations do not apply to the private burial of family pets on private property.
- Change draft to delete allowance for animal cemeteries in residential districts.
- The requirements for animal cemeteries should include something that would require perpetual care.

This ordinance supports the *Asheville City Development Plan 2025* goal of reviewing and modifying development regulations to be responsive to technological and social changes and economic development in the community.

This ordinance was recommended for approval by a 6-0 vote of the Asheville Planning and Zoning Commission at their meeting on November 5, 2008. No one spoke on the matter.

Pros:

- Adds language to address uses not presently referenced in the UDO.
- Adds fair and reasonable standards for the establishment of animal cemeteries and crematories.

Con:

- Objections may be raised to allowing animal cemeteries and crematories in the City of Asheville.

City staff and the Asheville Planning and Zoning Commission recommend that City Council adopt the ordinance.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

After Mayor Bellamy asked for public comment and received none, Councilman Mumpower moved for the adoption of Ordinance No. 3685. This motion was seconded by Vice-Mayor Davis and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 138

B. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING REQUEST FOR THE PROJECT IDENTIFIED AS WEST CHESTNUT STREET APARTMENT BUILDING, LOCATED AT 132 WEST CHESTNUT STREET, FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING, WITH AN EXCEPTIONAL DEVELOPMENT DENSITY BONUS, FOR THE DEVELOPMENT OF A 13-UNIT APARTMENT BUILDINGS

ORDINANCE NO. 3686 - ORDINANCE TO CONDITIONALLY ZONE THE PROJECT IDENTIFIED AS WEST CHESTNUT STREET APARTMENT BUILDING, LOCATED AT 132 WEST CHESTNUT STREET, FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING, WITH AN EXCEPTIONAL DEVELOPMENT DENSITY BONUS, FOR THE DEVELOPMENT OF A 13-UNIT APARTMENT BUILDINGS

Mayor Bellamy opened the public hearing at 5:50 p.m.

Urban Planner Jessica Bernstein said that this is the consideration of an ordinance to conditionally zone the project identified as West Chestnut Street Apartment Building, located at 132 West Chestnut Street from RM-8 Residential Multi-Family Medium Density District to RM-16 Residential Multi-Family High Density District/Conditional Zoning, with an exceptional development density bonus, for the development of a 13-unit apartment building. This public hearing was advertised on January 2 and 9, 2009.

City Attorney Oast said that a valid protest petition has been filed, thus requiring a three-fourths vote of City Council to approve the rezoning of the property.

Ms. Bernstein said that the applicant is requesting a Conditional Zoning from RM-8 (Residential Multi-family Medium Density District) to RM-16 (Residential Multi-family High Density District) with a density bonus pursuant to Section 7-16-2(b)(17) of the Unified Development Ordinance (UDO) to construct a 13-unit multi-family building.

The site consists of one parcel located at 132 West Chestnut Street, currently undeveloped and 0.37 acres in size (according to Buncombe County Tax Assessment). The parcel and surrounding area is zoned RM-8 and is in the Montford Historic District. The site formerly held a 12-unit apartment building that was destroyed by fire more than 10 years ago.

The applicant is proposing to construct a multi-family building with a total of 13 units with 20 parking spaces. Underlying zoning allows for three (3) units on the site and the RM-16 conditional zoning would allow for six (6) units. The density bonus, which requires 20% of the units to be offered at affordable rates, provides a 200% increase over base density – resulting in 13 units (3 affordable).

The structure is proposed at three (3) stories – 31'4" and the 13 units range in size from 760 to 1513 square feet. The design and materials have been approved by the Historic Resources Commission (HRC) as well as site standard modifications as listed below. The applicant is proposing to pay a fee-in-lieu for a portion of the required open space (fee-in-lieu money is directed into a fund dedicated to the acquisition of park space and greenways).

Access to the site is proposed from an existing alley, located immediately west of the parcel. The alley would be improved by the applicant to a width of eight feet. A total of 20 parking spaces are provided – seven spaces are enclosed under the building and the 13 remaining surface spaces are located to the rear (10) and west side (3) of the structure. A five and a half foot (5.5') sidewalk exists along West Chestnut Street and will remain.

The parcel is within the Montford Historic District and was required to undergo design review by the Historic Resources Commission (HRC). Pursuant to Section 7-11-7, the HRC is allowed to flex certain development standards and the following items were modified on September 10, 2008, at a formal hearing:

- Setback reductions (front from 15' to 10', east side from 39' to 15' 6", west side from 39' to 9'6")
- Parking encroachment into rear and west setback

The proposal was reviewed by the Technical Review Committee (TRC) on November 17, 2008, and was approved with the conditions. No members of the public spoke regarding this project.

The Planning & Zoning Commission approved the project by a unanimous vote of 6-0 on December 3, 2008. One member of the public spoke in opposition to the project because of on-street parking congestion on the block due to the high number of multi-family uses in the area and the potential for this proposal to add to the number of cars parked along West Chestnut. Staff explained that the provision in Section 7-11-2(c)(4) of the UDO which states that residential projects within one mile north of the CBD shall not be required to provide off-street parking if on-street parking is permitted on that street and there is transit to serve the project does apply in this situation. Although that provision means that the applicant is not required to provide any off-street parking at all, they have included 20 spaces which should result in the majority of residents parking off-street.

Exceptional Development - Incorporation of exceptional development practices into the site design allows for a project to seek alteration standards for density (to justify the 200% density bonus). For this project, the applicant has indicated they are providing:

- high quality building design (design and materials have been approved by the HRC);
- enhanced landscaping through the use of additional and/or larger plants (property line buffers included on two sides adjacent to SF uses – east and south – although not required by code);

- environmentally sensitive design that preserves existing vegetation and enhances other environmental features of the property beyond what is typically required (two mature trees being preserved at southern end of site & supplemental property line buffers);
- minimizing the number of access points by using existing curb cuts; and
- designating 20% of the units as affordable according to City standards.

Section 7-7-8(d)(2) of the UDO states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The proposed use and development of the land is compatible with the natural features and topography of the site. Although most of the existing vegetation will be removed, the site is not heavily vegetated to begin with. Also, the proposed landscaping is beyond what code requires and will offer additional screening from single-family properties to the east and south. Other site landscaping is fitting and compatible with the residential neighborhood. There are no significant topographic features on the site.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The development is not expected to injure the value of adjoining or abutting properties, especially given many of the exceptional development standards being incorporated into the design.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   This area is zoned RM-8 which is intended for a mix of single-family and multi-family development and does allow for development standard bonuses. The proposal for this 13-unit apartment building and site design has been designed to comply with the guidelines of the Montford Historic District and was not found to be incompatible with the scale, bulk, coverage and character of the area. While it is a large structure, there is an established pattern of larger and medium-sized single-family homes and apartments intermingled with smaller homes in the Montford area (see Exhibit C map). Also the site design is similar to the previous layout with the former apartment building which was destroyed by fire over a decade ago.

   The base zoning (RM-8) would allow only 3 units; this request incorporates a conditional zoning up to RM-16, which would allow 6.4 units. By incorporating exceptional development standards and affordable housing, the applicant is requesting a 200% density bonus, resulting in 13 units total (see above section detailing exceptional development). Staff does not believe that the additional units create an incompatible situation as it relates to surrounding density or character because of the careful design

consideration provided by the HRC. One-third of the parking spaces are enclosed beneath the building and any impact from the rear parking area should be mitigated by the landscaping plan and fencing along the east and rear property boundaries.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
The *Asheville City Development Plan 2025* proposes a Smart Growth development pattern by encouraging higher density residential infill projects (pg. 31) and incentives for the construction of affordable housing (pg. 50). One way to accomplish this goal is to apply existing zoning tools to incentivize higher density residential infill development. This project utilizes the "Exceptional Development Standards" with altered site specifics and a 200% density bonus from incorporating 20% of the units as affordable.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
This proposed development is located near major road facilities, interstate connections and along a City bus route (#11). In addition, basic infrastructure appears adequate and preliminary review by other service providers has not revealed any problems for future service to the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
The proposed project has been reviewed by the City Traffic Engineer and it should not cause undue traffic congestion along the existing street infrastructure because the anticipated traffic at full build-out conditions is expected to be less than 100 vehicles per hour (10 vehicles per hour during the morning peak hour and 25 vehicles per hour during the afternoon peak hour during a typical weekday).

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:
- The project offers affordable housing units, aligning with City Council's goals.
- The proposed development and design as approved by the Historic Resources Commission will complement the existing residential fabric of the neighborhood.
- Higher density infill development furthers the goals and objective of the comprehensive plan.

Con:
- The project exceeds the density allowance under the current RM-8 zoning district unless the Conditional Zoning and density bonus is approved.

Based on the above findings and that the project appears to comply as Exceptional Development with affordable housing, staff recommends approval of the conditional zoning and approval of the density bonus as requested by the applicant.

Mr. Chris Cole, representing the development team, was present to answer questions.

Ms. Daisy Johanson, property owner at 124 W. Chestnut Street, did not support the conditional zoning request.

Ms. Cecilia Johnson, property owner of 127 and 131 W. Chestnut Street, showed Council pictures which illustrated her concerns of traffic and parking problems in the area. She said that if this project is allowed to be built, there would be 34 apartment units on this one block.

Mayor Bellamy closed the public hearing at 5:58 p.m.

City Attorney Oast explained the protest petition standard which is governed by the state statutes.

In response to Mayor Bellamy, Ms. Bernstein confirmed that this would be a net gain of one apartment unit from what was there prior to the fires.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3686, to conditionally zone the project identified as West Chestnut Street Apartment Building, located at 132 West Chestnut Street from RM-8 Residential Multi-Family Medium Density District to RM-16 Residential Multi-Family High Density District/Conditional Zoning, with approval of the density bonus for incorporation of exceptional development standards and 20% affordable units, for the development of a 13-unit apartment building, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application and as approved by the HRC. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by the TRC prior to issuance of any required permits; and (6) The applicant will work with the City's Community Development staff on coordinating the affordable rental units. The three affordable units must be income qualified (at or below the Housing Trust Fund's Maximum Rent schedule) and a deed restriction must be placed on each affordable rental unit limiting any rental increase to no more than 4% per year for the first 10 years in a form approvable by the City Attorney (or the annual increase in the Consumer Price Index, whichever is greater for the term hereof). An annual rent certification form must be completed on December 31 of each year verifying the current rents of the affordable units throughout the duration of the affordability period. This motion was seconded by Councilman Miller and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 142

C. PUBLIC HEARING TO CONSIDER THE REZONING OF PROPERTIES LOCATED ON SAND HILL ROAD AND SMOKY PARK HIGHWAY FROM INDUSTRIAL DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

ORDINANCE NO. 3687 - ORDINANCE TO REZONE PROPERTIES LOCATED ON SAND HILL ROAD AND SMOKY PARK HIGHWAY FROM INDUSTRIAL DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

Mayor Bellamy opened the public hearing at 6:04 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to rezone properties located on Sand Hill Road and Smoky Park Highway from Industrial District to Commercial Industrial District. This public hearing was advertised on January 2 and 9, 2009.

Mr. Esselstyn said that the subject area is comprised of six parcels and a portion of a seventh, totaling about 178 acres, including a substantial fraction of the campus formerly occupied by American Enka and BASF operations and now partially used by Colbond, Inc. The entirety of the subject area is currently zoned Industrial. (The excluded portion of the seventh

parcel is currently zoned RS-2, and would not be affected.) Though the area has limited direct frontage on Sand Hill Road, it comes near that road at another point and has a long expanse across the railroad tracks from Smokey Park Highway. The applicant, representing three corporations owning the seven parcels, wishes to rezone to property to Commercial Industrial.

The boundaries of the subject parcels have recently been adjusted, with the result that six of the seven parcels straddle the City's corporate limits, and have at least a small portion in the extraterritorial jurisdiction area (ETJ). Staff has discussed with the applicant the preference of the City and Buncombe County for properties to fall within a single jurisdiction, and the applicant has expressed willingness to consider a variety of options, including annexation, to address this concern.

The area within City limits was annexed in 1994 and was initially zoned Heavy Industrial, then zoned Industrial with the adoption of the Unified Development Ordinance (UDO) in 1997. The remaining area came into the ETJ in 2001 and was zoned Industrial at that time.

According to the UDO's Article 8, the purpose of the Industrial District is to "reserve land for existing and future industrial activities and for land uses that support industrial activities. Development standards are established to ensure that land uses located outside the Industrial District are not adversely affected by the negative impacts of industrial uses. Industrial Districts shall be located to capitalize on existing infrastructure where possible, such as transportation facilities and utilities. Supporting land uses are characterized as providing supplies, raw materials, transportation, or storage services to industries or providing services to industrial employees."

The applicant's request for Commercial Industrial zoning stems from a desire to be able to attract a wider range of possible tenants. In recent years, much of this industrial campus has been underutilized and interest in developing or occupying the site with an industrial use has been limited. The Industrial zoning district allows relatively few commercial uses, and does not include general retail sales, general office uses, medical clinics, or residential occupation by non-employees in the list of permitted uses. The applicant would like to offer the land for a mix of uses and proposes one option being a large planned development that could include retail, office, medical, and park space.

The stated purpose of the Commercial Industrial district (also known as CI) is "to provide areas for a wide range of commercial and industrial uses including: light manufacturing, wholesale, warehousing, services, retail sales, offices, and residential uses. The district is established where environmental conditions and urban infrastructure are adequate to support commercial and industrial development." Further, "Assembly, packaging, processing, production and manufacturing" uses are permitted in CI, as in Industrial; the only industrial uses permitted in the Industrial district but not in CI are recycling plants and certain other types of recycling facilities.

While standard rezonings can not be based upon proposed site design options, there are elements which staff feels could be instructive as background information. A major issue at this location is how a large-scale development separated from the current industrial operations would be accessed through the existing relatively narrow connections to Sand Hill Road. The applicant has expressed strong interest in a design which would involve construction of a bridge from Smoky Park Highway over the railroad tracks to provide more direct traffic access to that larger thoroughfare.

Certain areas of the site would have to be redeveloped as brownfields. One section of the subject area, formerly used as a landfill, would have limited potential for construction, but the applicant has been in discussions with Buncombe County regarding possible dedication of that area for public ball fields. (This section is across Hominy Creek from the current Buncombe County Sports Park accessed from Sand Hill School Road.) Stretches along Hominy Creek also have limited development potential, due to flood hazards and deed restrictions, but they have

been noted for years for their potential as a greenway corridor in excess of a mile long. The applicant has stated an interest in creating an easement for a greenway, and has had preliminary meetings with staff regarding the process, although nothing has been resolved to date.

While the above options are of great interest, the staff emphasizes that the proposed rezoning should be considered independent of any park element, greenway, or bridge to Smoky Park Highway as there is no agreement to any of these elements at this time. With no binding written commitment of any such future action, and with this matter under consideration as a standard rezoning, neither the Planning and Zoning Commission nor the City Council have the authority to add such elements as a condition for approval of the rezoning. Staff felt an overview of these options that have been discussed could be a helpful means of considering how constraints of the site could be overcome and potentially used to public benefit. It is additionally worth noting that addition of these amenities is not strictly dependent on the rezoning and could occur under the existing zoning as well.

The Comprehensive Plan includes a policy stating that Industrially zoned land should be preserved for industrial uses. This is further emphasized in the Sustainable Economic Development Strategic Plan that identifies a shortage of industrial zoned properties as one of its top priority issues to be addressed in our area. However, there are recent precedents (detailed above), also in the Candler area, for City Council approval of similar zoning changes. Two 30+ acre areas were recently rezoned from Industrial to Residential zoning districts.

If the subject area is rezoned, there would still be three large adjacent areas zoned Industrial, measuring roughly 40, 60, and 84 acres in size, as well as other nearby Industrial zoning on the opposite side of Sand Hill Road. Furthermore, in 2005 an area of approximately 125 acres along Sardis Road ¼ mile southeast of the subject properties was rezoned from Community Business II to Commercial Industrial. Additionally, the CI district proposed in this rezoning does not preclude industrial use (as residential districts do), continuing the option of many types of industrial uses, and adding the potential for many other marketable uses. Although these new options increase the likelihood that the land will be occupied by non-industrial use, they also give more options for development to the property owner. Unfortunately, however, this 350+ acre contiguous industrially zoned site with rail spurs into its interior appears to be a one-of-a-kind situation in the City's jurisdiction, and opening it up for non-industrial development could close the door on a potential employer seeking just such an opportunity.

After recent rezonings of industrially-zoned land were approved despite the City's adopted policy, City Council felt that stakeholders should be consulted about their perspective on the policy given changing views about the future of this region's economy. Director of the Office of Economic Development Sam Powers attended these discussions, and, applying the findings to this case, states that "OED staff feels a case can be made for recommending approval for CI zoning of the referenced property."

Staff has received communications from three members of the public regarding this rezoning. Two nearby residents and one business owner called seeking more information. None expressed any opposition, and one of the residents wished to explicitly indicate her support.

At their December 3, 2008, meeting the Planning and Zoning Commission voted unanimously to recommend approval of the proposed rezoning.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- Rezoning could encourage development and cleanup of a significant underutilized area.
- Subsequent to this site's initial zoning, 125 acres nearby have been rezoned to Commercial Industrial.

Cons:

- The Comprehensive Plan, as well as the Sustainable Economic Development Strategic Plan, includes a stated policy to preserve Industrially zoned land for industrial uses.
- Site has unique characteristics that no other industrial site in Asheville can offer.

Staff has concerns about rezoning Industrially-zoned land, due to the policies against such action stated in the Comprehensive Plan and other plans. Both the Planning and Zoning Commission and City Council have, however, supported similar rezoning in the recent past, and since 2006 stakeholders have not expressed significant concern about the rezoning of such land to Commercial Industrial. If the City Council wishes to consider this rezoning independent of the existing policies, staff feels a good case can be made for recommending approval.

Mr. Will Buie, representing the owners, gave a brief history of the site, noting that they have been developing Asheville Commerce Park which is an industrial park adjacent to this property. He explained how the site has its challenges, either for an industrial site or any other use. The applicant is going through the brownfields cleanup process now with the N.C. Dept. of Environment & Natural Resources. When BASF sold the property, the deed restricted everything on the upper side of Sand Hill Road so that no residential uses could take place on that property. On another portion of the property there is an old closed out landfill on the site. He explained why economic and environmental factors are reasons why they are not asking for a conditional zoning. One of the driving factors for a rezoning is that they have not been successful in some of the industrial development on the property; however, they believe there is a significant portion of the property that will be industrial. The flexibility that CI provides is important because the overall redevelopment of this property is going to be very costly. Even though this is a straight rezoning, he explained what their intentions are for the property, noting that they have a commitment from the N.C. Dept. of Transportation and Buncombe County to fund $1 Million towards construction of a road and bridge over the railroad to access the property from US 19-23. He urged the Council for their support of this rezoning request.

City Attorney reminded Council that if the property is rezoned, any use permitted in the Commercial Industrial District will be allowed on the property and no potential plans for the property can be considered in this action.

At 6:17 p.m., Mayor Bellamy closed the public hearing.

When Councilman Mumpower questioned the City's Comprehensive Plan against rezoning industrial land, City Attorney Oast said that the Plan should be treated as a guide, not a command. Councilman Mumpower felt that our continued investment in planning documents is applied with a sense of situational ethics.

In response to Vice-Mayor Davis, City Attorney Oast said the in the Commercial Industrial District, there is no structure size; however, the project would be governed by the Level III conditional use process.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. 3687. This motion was seconded by Councilman Russell and carried unanimously.

D. PUBLIC HEARING TO CONSIDER THE REZONING OF PROPERTY LOCATED ON 1498 SAND HILL ROAD FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO INSTITUTIONAL DISTRICT

At staff's request, Councilman Russell moved to continue this public hearing until January 27, 2009. This motion was seconded by Councilman Mumpower, and after Mayor Bellamy called for public comment, and received none, said motion carried unanimously.

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. MOTION APPROVING THE W.C. REID COMMUNITY CENTER'S CONSTRUCTION PLAN

Parks & Recreation Director Roderick Simmons said that this is the consideration of a $2 million plan for the construction of the WC Reid Community Center for Creative Arts.

The City of Asheville is developing construction plan for the WC Reid Community Center, which has served the community first as an elementary school and then as a community center for over 80 years with modest facility improvements to enhance its basic services. For the facility to evolve into a more focused, multi-disciplinary program, the building and grounds require building code, functional and aesthetic improvements.

A plan was developed in 2006 to renovate the Reid Center into a cultural art center. PBC+L Architects was contracted to develop a plan using extensive community input and focus group sessions with various users of the facility. The final plan was estimated at $8 million but did not move forward to construction since it proved too costly as fundraising limitations were reassessed. In addition, staff revisited the purpose of the facility in light of community support that indicated its preference for a balance between the cultural arts, recreation activities and flexible programming space.

Staff then explored two options at $4 million per option: 1) renovate the existing building and 2) tear down existing facility and build new which was also developed by PBC+L. The intent was to measure the pros and cons of the two options to determine which was more feasible including but not limited to the best use of investing the dollars that will support the multiple use of recreation and cultural art programs for the community. The demolition of the current facility and replacing it with a new one seemed to be the best solution.

After input from the Reid Center Advisory Board and the Recreation Advisory Board, it was proposed to develop a $2 million construction plan which fits within the amount of funds on hand via previous fundraising. In light of the economy in which further fundraising is becoming more challenging and construction costs are escalating rapidly, this budget allows for a building that uses only funds that are already raised.

To help reduce construction cost in demolition and site preparation, and to allow for future development, an alternate site is being considered. Livingston Street Park will fulfill this vision by providing a larger and more level property, and also very visible within the heart of the Reid Center neighborhood creating a dynamic recreation complex that is located along major public transportation routes and closer to adjacent neighborhoods.

Livingston Street Park will accommodate the first phase of construction with space for a future phase. The first phase will focus on the required features that have been promised to the current funding sources including an auditorium, multipurpose class rooms, office space and restrooms. A future phase could eventually accommodate a new gymnasium, more parking and

a water feature to replace the deteriorated Walton Street swimming pool. The construction plan details the scope of work, layouts, timeline and costs with commentary for this option.

The Reid Center Advisory Board and the Recreation Advisory Board reviewed the preliminary concept in November 2008, and the construction plan in January 2009. Both boards support the plan.

This action complies with the *City Council Strategic Operating Plan* Focus Area Green by 1) making environmentally efficient capital improvement decisions and supporting energy efficient funding for facilities and operations, and 2) sustainable focus area by developing a long-term plan to address aging infrastructure including facilities and sidewalks.

Pros:

- Enhance the City's ability to provide unique, vital recreation and community services via this first phase of development on a site with more potential
- Investment in a new center will extend its useful life as a community center by an estimated 25 years
- Ability to implement the first phase of the project without additional funding
- The existing center will operate during the construction of the new facility

Cons:

- The work is extensive and costly to develop a new center
- The first phase of the project will not meet a number of programming needs for the community
- The current athletic programs at Livingston Street Park will be relocated to other athletic facilities
- Future construction phase of the center will require increased operating budget to support operations, programming and maintenance over time

The $2 million new construction option will not require additional capital funds or increased operating costs to operate and maintain the facility at this time, although additional funds will be required to support future phases of the project.

Staff is requesting the City Council approve of the W.C. Reid Community Center $2 million plan for new construction that will meet current grant obligations and build the new center on the Livingston Street Park site. He said that they will use the money they have to make the design work within the guidelines approved.

Mr. Chad Roberson with PBC+L Architects, reviewed with Council the construction design. The said the first phase of the construction will have dedicated space for a theater, four multi-purpose classroom spaces, and an office which will accommodate the cultural art programming component. A gymnasium and a water feature could eventually be added in a future phase which may accommodate additional programs such as sports, senior programs, after school, visual arts classes, dance classes, aerobics, yoga, board meetings, special events, other seasonal programs and additional parking. Since the existing center will not be closed during construction of a new facility, core services such as the after school program will continue. Tenants such as Partners Unlimited will be permanently relocated with assistance from the City to a location where they can continue to provide services to their core components.

In response to Councilman Miller, Mr. Roberson said that there is a 5% (approximately $77,000) contingency, noting that they have been very conservative in estimating the project.

In response to Councilwoman Cape, Mr. Simmons said that the Reid Center is a functional building, but it just does not function as a recreation community center for community programming.

In response to Councilwoman Cape, Mr. Simmons said that we do have other options for the adult softball programs.

In response to Councilman Russell, Mr. Simmons said that City's portion of this is the $500,000 Parks and Recreation Trust Fund match, which was from a prior year's Capital Improvement Plan allocation generated through the operating budget.

Councilman Mumpower could not support this action due to our current economy and our budget restrictions. He felt a bigger difference in the community would be to take the $500,000 and invest it in stopping the drug dealers who actively corrupt the community in various ways.

Mayor Bellamy thanked the Reid Center Advisory Board, the Recreation Board, the Junior League of Asheville, the Janirve Foundation and all others who helped with dollars and volunteer time in this fundraising effort. This addresses the community's need for a good place for their children to play. We must address the Capital Improvement Program and the needs of our community. She hoped we will look for ways to get the gymnasium built. She felt this is a creative way to address long-term needs.

When Mayor Bellamy asked for public comments, none were received.

Councilman Newman moved to approve the WC Reid Community Center $2 million plan for new construction that will meet current grant obligations and build the new center on the Livingston Street Park site. This motion was seconded by Councilwoman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

B. MOTION TO APPROVE LIGHTING PLAN FOR JOHN B. LEWIS SOCCER COMPLEX AT AZALEA PARK

Parks & Recreation Director Roderick Simmons said that this is the consideration of an Asheville Buncombe Youth Soccer Association (ABYSA) and WNC Soccer Foundation (WNCSF) lighting plan and financing proposal to purchase and install lights on the four fields at the John B. Lewis Soccer complex at Azalea Park, and to fund the remaining balance on the soccer complex construction.

In 1999, WNCSF entered into an agreement with the City of Asheville to help fund and construct the John B. Lewis Soccer Complex at Azalea Park at a cost of $3.3 million. To date WNCSF, ABYSA and the City have raised all but $543,135 of construction funding.

When the soccer complex was built, electrical conduits were installed with the intent to add field lights at a later date. ABYSA is now proposing to provide funding for the purchase and installation of the Musco "Structure Green" lighting system for a total of $510,000.

Musco is a leader in the outdoor field lighting industry in energy efficiency and glare control. The system complies with the City's lighting standards for outdoor sport fields as stated in the Unified Development Ordinance as outlined below.

- The mounting height shall not exceed 80 feet from finished grade
- Fixtures are equipped with a glare control package and aimed so light beams are directed and fall within the primary playing area
- The hours of operation for the lighting system for any game will not exceed one hour after the end of the event.

ABYSA conducted extensive public input to the proposed lights via 1) conducted two public meetings, 2) canvassed the neighbors adjacent to Azalea Park to alert them to the lighting plan and to invite to the public meetings, 3) invited the neighbors who live on Gashes Creek Rd.,

and in the Viewpoint and Parkway Forest to the public meetings, and 4) consulted with the Blue Ridge Parkway. The majority of public response does not oppose the addition of lights on the field, although most residents sited the need for road improvements to Azalea Road to accommodate the increased traffic and parking that already occurs at Azalea Park.

The ABYSA funding plan for the lights include a grant proposal to the Tourism Product Development Fund (TPDF) in January 2009. The proposal is part of the City's evaluation of potential TPDF proposals that support city projects via the Recreation Advisory Board and the City Council sub-committee.

The Recreation Advisory Board reviewed ABYSA's proposal at its regular meeting on November 10, 2008 and it unanimously recommended the lighting plan assuming it meets all City lighting standards, conducive to public input and programming needs.

At its regular meeting on December 8, 2008, the Recreation Advisory Board reviewed and prioritized the two potential TPDF proposals associated with the Parks, Recreation & Cultural Arts Department. The board unanimously recommended priority one as the John B. Lewis Soccer Complex lights, and priority two as Beaucatcher Overlook Park development.

Staff supports ABYSA's application for a Tourism Product Development Fund grant for the project. However, the proposal contains a funding plan that still needs to be refined and worked out with City staff.

The project complies with the City Council Strategic Operating Plan Focus Area: Green - Asheville will be the southeastern leader in energy and environmental sustainability while preserving and the city's natural beauty by making environmentally efficient capital improvement decisions and support energy efficient funding for facilities and operations.

Pro:

- Expand soccer programming time for youth and adult soccer players, and expand programming time for other adult and youth sports such as football and Lacrosse.

Con:

- Increase the City's soccer complex annual facility maintenance and operating cost by approximately $10,500 per year due to expanded programming time.

- The addition of lights via the donation accomplishes a master plan recommendation and an identified CIP goal.
- Adding lights will increase the City's soccer complex annual facility maintenance and operating cost by $10,500 per year.

Staff recommends City Council approve a motion allowing placement of lights on the four fields at the John B. Lewis Soccer Complex at Azalea Park contingent upon ABYSA and WNCSF fund the remaining balance on the soccer complex construction.

Mr. Mike Rottjakob, Executive Director of the Asheville-Buncombe Youth Soccer Association, said that the Western North Carolina Soccer Foundation (1) was established as a 501 (c) (3) in 1994, the WNCSF's sole mission is to support efforts to develop soccer facilities for use by Asheville and Buncombe County area youth and adult soccer players; (2) has a proven track record as a fundraising partner with the City of Asheville in the development of the John B. Lewis Soccer (JBL) Complex; and (3) has produced $1.2 Million in private fundraising for the construction of the JBL.

For over 25 years, the ABYSA has been dedicated to providing soccer programming to families that is age appropriate and provide in a physically and emotionally safe environment. We current employ 10 fulltime staff, 15 part-time coaches, and utilize over 43,000 volunteer hours in

serving 4,400 youth and adult participants through partnerships with the City of Asheville and Buncombe County. We strive to make programming broadly available to the entire community and administer a robust financial aid program to address financial obstacles to participation for families. In 2008, we began an effort to greatly expand our outreach to provide soccer programming in Asheville Housing Authority neighborhoods, free of charge, to address transportation and other barriers. ABYSA is a financially strong 501 (c) (3) not for profit organization with a proven track record as a fundraising partner with the WNCSF and the City.

Regarding the tourism economy, ABYSA hosts state-wide and regional soccer tournaments, and state-wide league play, that brings significant numbers of out of town visitors in Asheville. In 2008, ABYSA hosted 6 weekend tournament events This represents documented use of nearly 5,000 hotel room nights and an economic impact of over $2 Million as calculated by the Asheville Area Convention and Visitors Bureau. Over 220 North Carolina Youth Soccer Association Classic League games were hosted in Asheville in 2008, bringing 6,600 additional out of town visitors. While unable to count hotel room use for these games, it is significant and many of these visitors shop, eat and pay sales tax in Asheville, even when their visit does not require an overnight stay. Growth in ABYSA programming has provided for incremental increases in hotel room use and economic impact over the last 3 years.

Why field lights? Without lights, the all-weather artificial turf is used at only 50% of its capacity. Current programming fills all available field time and during many months availability does not meet the need. An additional investment of $500,000 to the $3.3 Million already invested will increase use by 68% and more than double use during 4 of the busiest soccer programming months. The addition of lights will add capacity for more than 1400 hotel room nights to existing tournaments, and an additional $575,000 in economic impact each year.

JBL capacity and utilization (1) current utilization, and potential utilization with the addition of lights, can also be expressed in terms of user hours; (2) when a "user hour" unit represents one person playing for one hour. Current programming provides 126,000 user hours of play at JBL. With the addition of lights, 211,000 user hours would be used for programming. This represents 85,000 additional user hours, or hours of exercise if you will, a 68% increase in programming for our vast soccer playing community.

The public input process includes (1) public input was gathered during door to door visits in the immediate neighborhood of the park and during two public meetings with WNCSF, ABYSA and City representation; (2) feedback from these visits and meetings revealed very little concern about the addition of field lighting to the park; and (3) park neighbors did express concern about the need for improvements to Azalea Road and parking on the road during weekends.

Regarding the City of Asheville input, the ABYSA and WNCSF conducted a focus group meeting the City staff representing Finance; Transportation & Engineering; Planning; Public Works; and Parks, Recreation and Cultural Arts to review the proposal and offer comments on key issues. The following concerns were addressed: floodway issues; Azalea Road safety; parking on Azalea Road; lighting standards; and on-going energy, maintenance and park staffing expenses.

Musco's "Structure Green" lighting system is the industry leader in energy efficiency, light spill and glare reduction. It is the most environmentally friendly product on the market and is endorsed by the National Park Service.

The lighting plan for JBL field lighting project addresses three components: (1) resolves the outstanding fundraising balance for the soccer complex construction of $543,135; (2) describes a funding plan to support the addition of lights only after the funding has been secured and requires no City financing for the project; and (3) addresses issues of long term maintenance of the lighting system, utility costs, and costs associated with increased park staffing.

He then reviewed the finance plan. Regarding the outstanding fundraising balance (1) ABYSA will assume responsibility for $400,000 of the $543,135 outstanding fundraising balance by increasing its annual contribution through the WNCSF by $40,000 each year for ten years; (2) the remaining $143,135 will be secured through the sale of sponsorship; and (3) the field lighting project will add incentive and re-vitalize fundraising for the construction of JBL.

Regarding the lighting system finance (1) construction and installation of lights will begin only after ABYSA and WNCSF have secured funding for the entire project. The City will not be asked to assume any financing; (2) ABYSA has set aside some cash reserves to kick off the fundraising campaign; and (3) the project is a strong match for Buncombe County Tourism Development Fund investment goals

Regarding operations cost (1) Musco's "Structure Green" lighting system comes with a 25-year warranty that covers re-lamping after 5,000 hours of use and is included in the purchase and installation price; (2) ABYSA will pay for the electricity it consumes for use of the lights; and (3) the addition of field lights, and the resulting increase in park maintenance and staffing expense, is estimated to be $10,500 per year.

The proposal summary is (1) there is a compelling need for field lighting at the John B. Lewis Soccer Complex and a great benefit to be realized by our large soccer playing community and the local tourism industry; (2) care has been taken to involve as many stakeholders as possible in the development of our proposal; and (3) our plan provides a finance strategy that allows for enhancement of a great city resource at little cost to taxpayers.

In response to Councilman Miller's potential conflict of interest regarding Tourism Product Development fund, City Attorney Oast said that Tourism Product Development Fund does provide financing for this, as the City does, but he did not feel that is a disqualifying conflict. It is his opinion that there is no conflict of interest for Councilman Miller.

In response to Councilman Mumpower, Mr. Rottjakob assured Council that he has worked with the budget office and has clearly outlined the individual roles regarding funding.

When Vice-Mayor Davis expressed concerns over Azalea Road, City Manager Jackson said that it is a top priority for road projects when we have discretionary funds. Since we are not able to fund the road improvements ourselves in this economic climate, it will be the first thing the Public Works Director and the Parks & Recreation Director will recommend when capital funds are allocated from the general fund budget for roads.

In response to Councilwoman Cape, Mr. Simmons said that this does comply with the City's new lighting standards.

Mayor Bellamy thanked the WNC Soccer Foundation for their commitment to this project. She also thanked the 6th grade class at Carolina Day School for keeping an eye on this project.

When Mayor Bellamy asked for any public comment and none was received, Councilman Mumpower moved to approve placement of lights on the four fields at the John B. Lewis Soccer Complex at Azalea Park contingent upon ABYSA and WNCSF fund the remaining balance on the soccer complex construction. This motion was seconded by Councilman Russell and carried unanimously.

C. ITEM F FROM THE CONSENT AGENDA

RESOLUTION NO. 09-5 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE BUILDING GROUP FOR CLEANING THE VENTILATION HANDLING SYSTEMS

ORDINANCE NO. 3684 - BUDGET AMENDMENT TO FUND CONTRACT FOR CLEANING THE VENTILATION HANDLING SYSTEMS

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with The Building Group to complete cleaning and sanitizing of the City Hall ventilation system floors 1 – 6, including the basement; and a budget amendment in the amount of $119,013 to fund the contract.

In September 2008 the City began a process of analyzing air quality and maintenance of the air handling system at City Hall. During this time, the Risk Management Division was notified of several employee complaints regarding air quality and mold issues in City Hall. An OSHA complaint was subsequently filed with the State of North Carolina. At that point, staff contacted a certified consultant (Art Martin & Associates) to evaluate the condition of the ventilation systems in City Hall. The results of the consultant's evaluation showed that the City Hall air handling systems did contain air contaminants, but that the contaminates were not airborne and findings did validate that employees are not at risk. Additionally, comparisons of the indoor air samplings do not exceed contaminate levels found in outdoor air samplings. The consultant recommended that the air handling system be cleaned and sanitized to remediate the existing mold growth and prevent future airborne contamination in regard to floors 1 – 6, including the basement.

With growing awareness of the negative impacts of indoor air pollution, the City is dedicated to addressing the cleanliness of City Hall's ventilation system. With Council approval, the City will begin a process of cleaning the ventilation and air handling system later this month. The cleaning process will take place on weekends which will limit employee access to the building at these times.

Remediation for floors 7 and 8 are more extensive and will require identifying and correcting water access points. This process requires the expertise of a building engineer, which will develop protocol for repointing bricks and window replacement. Once the water infiltration has been identified and corrected, remediation of floors 7 and 8 can begin. The engineering evaluation process is scheduled to begin in Spring of 2009. Depending on the engineering report, it is projected that remediation for floor 7 and 8 will begin Summer 2009.

This action complies with the City of Asheville's strategic plan in that is supports a sustainable city government through a strong commitment to infrastructure maintenance by ensuring that our buildings support a sustainable healthy and safe work environment.

Pros:

- Avoid OSHA fines.
- Reduce possible health hazard risk related to mold and air contaminants.

Cons:

- Continuing contamination of the air handling system and the air quality at City Hall.
- Increased complaints from employees and OSHA.
- Requires use of fund balance.

The total amount of the contract is $119,012.83. Funding for this unanticipated expense was not included in the Fiscal Year 2008-09 budget; therefore an appropriation from fund balance is required. It is estimated that at the end of Fiscal Year 2008-09, available fund balance will equal 19.4% of General Fund expenses.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into contract with The Building Group to clean the air handling system at City Hall floors 1 – 6, and basement, and a budget amendment in the amount of $119,013 to fund the contract.

When Mayor Bellamy asked for public comment, none was received.

Ms. Coulter responded to various questions/comments from Council, some being, but are not limited to: since mold spores common to most ventilation systems, why are we making this investment in City Hall; will there be an on-going maintenance plan; explanation of the OSHA fines; any idea of what percentage of the larger structures in Asheville have ventilation systems with the same mold spores; are mold spores common;

Councilman Mumpower could not support these actions until there is a more scientific basis for taking action.

In response to Councilman Newman, Ms. Coulter said that we have looked informally at our other buildings. City Hall is being addressed now due to the tremendous number of employees and citizens in the building on a regular day to day basis.

Councilwoman Cape moved for the adoption of Resolution No. 09-5. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting no.

RESOLUTION BOOK NO. 31 – PAGE 402

Councilwoman Cape moved for the adoption of Ordinance No. 3684. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 - PAGE 136

VII. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of December 5-18, 2008: Patricia Macrae (Parks & Recreation), Pam Wild (Water), AT&T (Water), Charter Communications – 4 claims (Water), and Dean Gowan (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

B. LAWSUIT

The following Complaint was received by the City of Asheville on December 23, 2008: Larry Roland v. City of Asheville. The nature of the proceeding is a complaint for personal injury from fall at the golf course. This matter will be handled by an attorney outside of the City Attorney's Office.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mayor Bellamy praised staff, volunteers and members of the community for the Burton Street Center Grand Re-opening event on Monday, January 12, 2009.

Mr. Gene Hampton spoke about the need for quality education in Asheville, North Carolina.

Mr. Brian Festa proposed a new curriculum to be integrated in our public education systems to address long term needs, e.g., teacher training and teaching teachers how to teach, integration of arts and music education. Per Mr. Festa's request, Mayor Bellamy said that City Manager Jackson would meet with him after the meeting regarding his request for information on the School Board's budget.

Mayor Bellamy adjourned the meeting at 7:27 p.m.

Magdalen Bouleson
CITY CLERK

Jerry W Bellamy
MAYOR

Tuesday – January 27, 2009 – 3:00 p.m.

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

Annexation

Urban Planner Julia Cogburn said that reviewed with Council some basic information about annexation. Annexation in North Carolina can take place via 3 mechanisms: (1) legislative annexation; (2) voluntary; or (3) statutory or involuntary annexation. North Carolina is one of handful of states that allows for involuntary annexation. Many government and financial scholars feel that the North Carolina statutes play a vital role in health of North Carolina cities and, therefore, the state itself. Annexation is based on the principal that it is good public policy to make that which is urban in nature (and meets certain qualifications) should be municipal for steady, orderly growth of our cities. Also, those on the edge who benefit from the services and amenities offered by a City should contribute to its operation.

Using a map, she showed the growth of Asheville over time. For the most part, in recent history, the City has proposed annexation at in a conservative fashion at least biennially. The characteristics of this approach have been: (1) To undertake annexation of properties that are clearly urban in nature, attempting to avoid the annexation of vacant land or sparsely developed properties; (2) To annex areas carefully defined from a service provision standpoint (the City has generally not looked at annexing areas that are difficult or complicated to serve); (3) To annex areas that enhance our ability to provide efficient and effective municipal service "gaps" such as property along a road corridor that has corporate jurisdiction on either side; (4) To look for areas that can benefit from enhance urban services (such as Enka Village where the City replaced a severely deteriorated sidewalk); (5) To annex areas in different quadrants of the City; and (6) To avoid, per direction of City Council, the annexation of industrial areas, primarily the southern part of Buncombe County west of Hendersonville Road.

Involuntary annexation is perhaps more important to Asheville as a growth management tool that other cities because we lack the incentives other cities have to ensure steady growth. The Sullivan Acts restrict ability to grow with water line extension and to charge differential rates. Asheville taxpayers absorb operation cost deficits for water customers not within the City.

Every other year, since 2002, the Asheville City Council has approved a Resolution of Consideration showing broadly areas that may be considered for annexation in the near future. State law provides that such a resolution, and accompanying map, may be adopted by cities as a preliminary step in the annexation process. The recent maps approved by the City of Asheville have been very expansive in scope, including areas that may not experience enough urban development in the near future to qualify for annexation, or are topographically or geographically illogical for annexation. Because of this, last year the Council asked staff to propose amendments to the map of consideration to make it more practical for the public and for the City as a tool for consideration of annexations. Using a map, she showed the existing area of consideration of about 66.5 square miles in size. Staff is proposing removal of about 23 square miles from the area of consideration. These are primarily areas that are not likely to urbanize in the near future, as they are substantially rural and have little immediate development potential due to their location or to topographic or geographic constraints. Council may wish to ask staff to

look at these areas and suggest a new Map of Consideration. Staff can be prepared to bring to Council in the coming months a new map for consideration.

If Council directs, staff is prepared to begin looking at future annexations in line with recent history or simply cleanup. Using the Map, she said that based on a very preliminary review some of the areas that might be considered are portions of the Royal Pines area, the Emma Road area, the Bent Creek area and the Charlotte Highway area. She noted that most of those areas have water service but not all of them have sewer service. There are also some minor cleanup annexations in the north, around the UNC-Asheville campus.

Annexations that remain in litigation include (1) Ridgefield Business Park (annexation ordinance passed in 2005 – Superior Court and North Carolina Court of Appeals have ruled in favor of the City of Asheville; (2) Airport Road (annexation ordinance passed in 2005 – Superior Court and North Carolina Court of Appeals have ruled in favor of the City of Asheville); and (3) Biltmore Lake (annexation ordinance passed in 2007 – depositions and discovery underway for upcoming trial).

She suggested Council give staff direction on if they wish to reconsider its direction concerning the annexation of industrial properties, especially those that are no longer in industrial use. In general, annexation by itself should not represent anything more than a marginal increase in the cost of doing business. However, as other costs rise, industrial property owners will continue to evaluate whether operations can be conducted in a more cost-effective manner at other locations.

When City Manager Jackson asked if the City were to get the application of conditioning water service based upon voluntary annexation, where and when would that be triggered by the development patterns. Ms. Cogburn responded it would be 15-20 years because so much of the areas outside the City limits already have water service.

Councilman Newman explained that for developments that are located in areas where it is not logical or cost-effective to provide city services, cities may sign an annexation agreement with the developer, which would allow them access to city infrastructure now in return for the city being able to voluntary incorporate the development into the municipality once the city has grown enough that it is cost-effective to provide services to that area.

City Attorney Oast said that he is aware of several situations where that occurs. He understands the way it works is if you are a development that is seeking service, but the city (for whatever reason) cannot or does not wish to have you voluntarily annex at the time, that the developer (who owns all the property) will sign an annexation agreement. And, as a condition of receiving service, and at such time as the city grows out in that direction such that voluntary annexation does not present service delivery issues, the city can invoke that agreement and the area comes into the city. In fact, the said the City has used that process in the past with the Town Center at Biltmore Park.

Upon inquiry of Mayor Bellamy, City Attorney Oast updated Council on the series of meetings held regarding annexation in Raleigh. Basically, he said that the Joint Legislative Committee voted in favor to recommend a moratorium on city-initiated annexations and if the laws are changed, voted to recommend that the people in the area to be annexed get to vote on whether they want to be annexed or not. He said he would provide Council a summary sheet.

Throughout discussion, Ms. Cogburn responded to various questions/comments (and for those she could not respond to, would be forthcoming to Council), some being, but are not limited to: does the City traditionally spend a lot of money in campaigning the positive side of annexation; is it true that if we were to annex everything in the Map of Consideration area it would be at least 25-30 years; and historically, how has Asheville annexed; is Asheville conservative or liberal with it's annexation.

Mayor Bellamy suggested that we meet with other municipalities to see how we can utilize the spheres of influence, similar to Charlotte/Mecklenburg, as a tool for our growth. After a brief discussion about the spheres of influence purpose, it was the consensus of Council to form a small Council committee to work with principles of other municipalities in our area, County Commissioners and legislators to consider moving the spheres of influence forward.

Councilman Mumpower pointed out how Asheville is treated differently than any other city in North Carolina. Our own legislators are responsible for creating this difference. He encouraged Council to (1) be bolder and honest with the community about the fact that Asheville is not being treated fairly; (2) develop a policy that for a 3-year period of time that Council will not annex industrial areas; (3) consolidate to avoid the duplication of services; (4) suspend action on forced annexation for one year; and (5) continue to fight the Sullivan Acts to make sure that Asheville is treated like other cities.

Councilman Newman reiterated his support of Council to reach a settlement with the County and our legislators on the water dispute. He felt that if there is a way to settle the questions outside of the judicial process, it would be in our best interest to find a solution. He then presented Council with the following proposal to settle the Sullivan Act dispute. The City of Asheville agrees that there sill be no differential rates charged for water customers inside and outside the City limits. The Sullivan Acts will be modified to allow Asheville to operate under the voluntary annexation policies that apply to all other cities in North Carolina. Asheville will not be allowed to divert Water Funds to the General Fund. However, up to 5% of Water Funds may be used for infrastructure improvement projects directly related to water line replacement (such as improving streets or sidewalks torn up during the line replacement process). Legal challenges to the constitutionality of the Sullivan Acts will be withdrawn. The proposed settlement represents a compromise – neither party gets everything they wish. However, it does address the core concerns identified by the City, County and legislators over the past several years. The benefits of the settlement to Asheville would be (1) the water system will be managed by the City, which has demonstrated good stewardship of the system over the past several years, investing tens of millions in long overdue water infrastructure repairs; (2) voluntary annexation will allow the City's tax base to grow as the area urbanizes; (3) the City will have additional funds to upgrade streets and sidewalks as part of the process for replacing old water lines; and (4) no additional expenses to carry out litigation associated with the Sullivan Acts. The benefits of settlement to non-City residents include (1) assurance that water rates will be no higher for non-City customers than for those who live in Asheville; (2) assurance that for all existing customers, water cannot be used as a condition for annexation into the City; (3) assurance that payments made for water services cannot be delivered to the City's General Fund; and (4) no more tax monies will need to be used in litigation associated with the Sullivan Acts. The benefit to the water system will be the assurance that the infrastructure will be fixed as funds cannot be diverted to non-water system programs. He said that under the previous agreement, the County paid for the management of the Nature Center, Golf Course and the baseball facilities, which together cost approximately $600,000 a year. The County also reimbursed Asheville for $1.7 Million for payments City taxpayers make for patrol and investigation services that are only provided outside the City limits. The total value of these tax equity arrangements was about $2.3 Million. There are a variety of opportunities for future partnerships between Asheville and Buncombe County to assure a fair plan for financing of facilities and services that benefit all taxpayers in the region. He then explained the importance of voluntary annexation.

Vice-Mayor Davis supported agreed with the majority of the proposal presented by Councilman Newman, if we have the ability to receive tax equity. He suggested the meeting with the group regarding the spheres of influence could include discussion about the tax equity, which may be in the form of consolidation of services.

Mayor Bellamy felt we should meet with the County soon to see if there is something in downtown Asheville that will meet their needs and help us financially, since they are considering

taking the Biltmore Square Mall off the tax rolls and moving their offices (approximately 600-700 people) from our downtown area. We need to be creative in what we bring to the table. She also felt that in order to resolve the issue with Henderson and Buncombe counties, we need to look at the results from the Land-of-Sky Regional Council study on water. She suggested putting a regional planning board in place – not an independent authority, but a group to see where growth is occurring and how we can work together as a region with water. We also need to educate the City taxpayers on how the sales tax works and about how much they pay and where their tax dollars are distributed, e.g., Asheville residents are not just paying for the cleaning of Asheville, but for the tourists and Buncombe County residents who come into Asheville.

In response to Councilman Russell, Mayor Bellamy said that approximately 130,000 people are served on the City's water system, of which 57,200 are Buncombe County residents.

Councilman Russell said that no one wants to be unfair, but phasing in a small differential rate would result in significant monetary gains to the City.

Councilman Mumpower could not support Councilman Newman's proposal in that it still treats Asheville citizens unfairly. He would not be opposed in taking 5, 10 or 15 years to implement a fair deal, but was opposed to Asheville being treated unfairly.

Councilwoman Cape pointed out that Asheville has an engaged citizenry in Asheville and suggested a bullet-point understanding of the issues so they can talk with our legislators too.

Councilman Newman suggested an analysis be performed of over the last 20 years of how many millions of dollars would Asheville have now and what our population would be if the developments that occurred in Buncombe County within close proximity to the City limits had been required to annex. He also wondered what our growth forecast will be (1) the ability for Asheville to grow; and (2) no ability for Asheville to grow. He explained that even if we prevail in court, the legislature does have the ability to grant cities or restrict cities annexation authority. We are not going to solve rate differential issue except through persuading the County Commissioners and legislators that we should have that right.

Councilman Miller agreed that while we wait for the court's decision, we obtain more information on the tax data while at the same time meet with our legislators and County Commissioners on a possible settlement.

Mayor Bellamy said that staff is also preparing information on the reality of water differential rates across North Carolina. She felt it was important for everyone to have clear and accurate data.

Mayor Bellamy believed that a subcommittee was identified at the retreat consisting of herself, Vice-Mayor Davis and Councilman Newman regarding water issues.

When Councilman Newman asked for clarification on a proposed settlement, Mayor Bellamy said that staff will be providing some additional information on questions raised so then Council as a whole can give direction to the subcommittee on if we are flexible on anything and if so, what are those areas we will be willing to reach middle ground. Per City Manager Jackson, staff could be prepared to provide an information update in 30 days or possibly at the February 10 meeting. He will meet with Mayor Bellamy to get it scheduled for another worksession.

Mayor Bellamy felt it was clear that our water system will be managed by the City. She reiterated that the total population served through our water system is 130,000, with 57,200 being County residents. There are 22,900 water meters in the County. Our current water system value is $1.3 Billion. She believed water is the gold of the 21st Century and having an independent non-elected authority to oversee that asset is a mistake.

In response to Councilwoman Cape, City Attorney Oast explained that we could win the lawsuit, but still be prohibited from requiring annexation as a condition of the extension of service.

Mayor Bellamy explained that we need the water system to have a good business practice model that is fair to Asheville and requires developers to tap into water systems that they are close to. Councilman Newman said that the spheres of influence model will assist in this issue.

In response to Councilman Mumpower about a policy not annexing industries for the next three years, City Attorney Oast said that he would have to research information on constitutional limits on differential taxation of industries. If Council develops a policy of this type, Planning & Development Director Judy Daniel asked for guidance on properties that are industrial and in business vs. industrially zoned properties that are no longer in manufacturing. Mayor Bellamy suggested this topic come back to Council for future discussion as Planning staff is taking an amendment forward to the Planning & Zoning Commission, and then onto Council, a proposed ordinance that responds to the current economic climate which will assist businesses and development proposals to open and operate more easily, while still meeting the technical Unified Development Ordinance standards along with City adopted goals.

Councilwoman Cape asked staff to provide Council with economic incentives for annexation.

City Manager Jackson said that the discussions coming before Council will include (1) looking at the development regulations; (2) discussing annexation policies; (3) formal consideration of the Map of Consideration; and (3) review of economic incentives for annexation.

At 4:50 p.m., Mayor Bellamy recessed the meeting for 10 minutes.

Tuesday – January 27, 2009 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Davis gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING JANUARY 30, 2009, AS "ASHEVILLE LYRIC OPERA DAY"

Mayor Bellamy proclaimed January 30, 2009, as "Asheville Lyric Opera Day" in the City of Asheville. She presented the proclamation to Mr. David Starkey, General and Artistic Director of Asheville Lyric Opera, who briefed Council on some activities taking place that day.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "C", "D", "E", "F" and "G" were removed from the Consent Agenda for discussion and/or individual votes.

A. APPROVAL OF THE MINUTES OF THE RETREAT HELD ON JANUARY 9-10, 2009; AND THE REGULAR MEETING HELD ON JANUARY 13, 2009

At the request of Councilman Miller, he asked that the January 9-10, 2009, retreat minutes be amended on page 11 to read: "Councilman Miller felt the hotel tax money might be better spent on more advertising or on a new performing arts center where it could generate more hotel stays and sale tax revenue, which would spread the burden."

B. RESOLUTION NO. 09-9 - RESOLUTION NAMING THE NEW CITY PARK ON MAPLE DRIVE IN THE HAW CREEK COMMUNITY IN HONOR OF HAZEL AND RORY MASTERS

Summary: The consideration of a resolution to name the new city park on Maple Drive in the Haw Creek community as Masters Park in honor of Hazel and Rory Masters.

The City of Asheville took ownership of a nine-acre property located on Maple Drive in the Haw Creek community shortly after City Council approved the acquisition for use as a future municipal park in November 2007. The action occurred as a result of a proposal from the Haw Creek Community Association (HCCA) to partner with HCCA and Buncombe County to acquire the land for the City. HCCA now proposes naming the future park Masters Park in honor of Hazel and Rory Masters to recognize their contributions to the Haw Creek community.

Rory Masters lived in the Haw Creek community for over 90 years, and he and his wife were the former owners of the park land before it transferred to their daughter. The Masters were dedicated community servants in Haw Creek highlighted by their contributions to the Haw Creek Volunteer Fire Department. They donated the land for the fire facility and donated the funds to establish the department, followed by leading a fundraising campaign to build the facility and acquire the fire equipment. Rory served as the volunteer fire department fire chief and Hazel headed the women's auxiliary. The Masters cared for their neighbors and over the years helped many who were in need.

Hazel Masters passed away in 1993, followed Rory Masters in 1998. Their daughter Chalene Noblett, continues to live in Haw Creek on the family homestead and continues her parents' giving spirit to the community.

This action complies with the City of Asheville's park facility naming policy. The Recreation Advisory Board considered the proposal at its December 8, 2008, meeting and unanimously recommended naming the park in honor of the Masters.

Pro:

- Naming the park in honor of Hazel and Rory Masters complies with the City of Asheville park facility naming policy in that 1) it commemorates an individual(s) for specific services as made evident by their contribution through community service, and 2) naming a park for a deceased individual(s) cannot occur for at least one year after passing.

Con:

- None

The Recreation Advisory Board recommends City Council to adopt a resolution naming the park on Maple Drive in the Haw Creek community as Masters Park in honor of Hazel and Rory Masters.

RESOLUTION BOOK NO. 31 – PAGE 407

C. BUDGET AMENDMENT FROM THE N.C. DEPT. OF ENVIRONMENTAL AND NATURAL RESOURCES, TO INCREASE THE BUDGET FOR CARRIER PARK

This item was removed from the Consent Agenda for discussion and/or an individual vote.

D. BUDGET AMENDMENT FOR AN APPROPRIATION FROM THE N.C. DEPT. OF HEALTH & HUMAN SERVICES, DIVISION OF AGING, AND THE LAND OF SKY REGIONAL COUNCIL/AREA AGENCY ON AGING THROUGH THE SENIOR CENTER GENERAL PURPOSE FUNDING, FOR THE SENIOR OPPORTUNITY CENTER

This item was removed from the Consent Agenda for discussion and/or an individual vote.

E. BUDGET AMENDMENT FOR AN APPROPRIATION FROM THE N.C. DEPT. OF HEALTH & HUMAN SERVICES, DIVISION OF AGING, AND THE LAND OF SKY REGIONAL COUNCIL/AREA AGENCY ON AGING THROUGH THE SENIOR CENTER GENERAL PURPOSE FUNDING, FOR THE HARVEST HOUSE

This item was removed from the Consent Agenda for discussion and/or an individual vote.

F. BUDGET AMENDMENT FROM THE N.C. GOVERNOR'S CRIME COMMISSION TO INCREASE THE BUDGET FOR THE WEST RIVERSIDE GUN VIOLENCE PROJECT IN ASHEVILLE'S WEED & SEE TARGETED AREA

This item was removed from the Consent Agenda for discussion and/or an individual vote.

G. RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A MATCHING GRANT FROM THE U.S. DEPT. OF HOMELAND SECURITY, FEDERAL MANAGEMENT AGENCY, FOR PROCUREMENT OF WILDLAND FIRE SUPPRESSION AND PERSONAL PROTECTION EQUIPMENT FOR THE ASHEVILLE FIRE & RESCUE DEPARTMENT

BUDGET AMENDMENT FROM THE U.S. DEPT. OF HOMELAND SECURITY, FEDERAL MANAGEMENT AGENCY, FOR PROCUREMENT OF WILDLAND FIRE SUPPRESSION AND PERSONAL PROTECTION EQUIPMENT FOR THE ASHEVILLE FIRE & RESCUE DEPARTMENT

These items were removed from the Consent Agenda for discussion and/or an individual votes.

H. RESOLUTION NO. 09-11 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH WYATT & BOWMAN WASTE CONTAINER LLC TO PROVIDE BULK CONTAINER

REFUSE/CARDBOARD COLLECTION SERVICES FOR VARIOUS CITY OF ASHEVILLE FACILITIES

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Wyatt & Bowman Waste Container LLC to provide bulk container refuse/cardboard collection services for various City of Asheville facilities.

In December 2008 the City's current annual contract for bulk container refuse/cardboard collection services was approaching its end. The City began an informal bid process to obtain competitive bids from service providers including minority business participants. At the close of the bid process and after review of bids, City staff determined that Wyatt & Bowman Waste Container LLC was the lowest responsive and responsible bidder. The bid process was performed to obtain the lowest competitive bid for an annual contract price and would be in effect for three years with renewal options. The lowest bid was for $46,289.83 annually and would result in a total three year commitment of $138,869.49

Wyatt & Bowman Waste Container LLC	$ 46,289.83	annual bid
G D S	$ 52,539.22	annual bid
Daugherty Waste Management	$ 66,740.00	annual bid
Consolidated Waste Services	$ 70,741.81	annual bid

This action complies with the City of Asheville's strategic plan in that it supports a sustainable city government through a strong commitment to infrastructure maintenance by ensuring that the City facilities support a sustainable healthy work, program and clean facility environment.

Pros:

- Reduce possible health hazard and fire risk related to waste and cardboard accumulation
- Promotes City of Asheville recycling efforts for cardboard/wastepaper refuse

Con:

- Accumulation of waste and cardboard products promote a health and fire risk

The total amount of the annual contract is $ 46,289.83. Funding for this annual bulk container refuse/cardboard collection service is included in the current Fiscal Year 2008-2009 operating budget.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into contract with Wyatt & Bowman Waste Container LLC to provide bulk container refuse/cardboard collection services.

RESOLUTION BOOK NO. 31 – PAGE 409

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Russell moved for the adoption of the Consent Agenda, with the January 9-10, 2009, amendment to the minutes. This motion was seconded by Councilwoman Cape and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

C. ORDINANCE NO. 3688 - BUDGET AMENDMENT FROM THE N.C. DEPT. OF ENVIRONMENTAL AND NATURAL RESOURCES, TO INCREASE THE BUDGET FOR CARRIER PARK

Summary: The consideration of a budget amendment, in the amount of $30,000, from a grant from the N.C. Dept. of Environmental and Natural Resources, Division of Water Resources (DWR) to increase the budget for Carrier Park.

In 2006 Buncombe County applied to DWR and was awarded a $30,000 grant to implement water quality features at Carrier Park. Once the project was complete in 2007, the County reimbursed the City for cost of the project although a budget amendment was not completed at that time. This action will complete the budget amendment process.

This action complies with the City Council Strategic Operating Plan in that it furthers the development of the Greenway Master Plan. It also complies with the Carrier Park Master Plan and the Greenway Master Plan in that it creates an educational opportunity for water quality along the French Broad Greenway Corridor.

Pros:

- Reimburses the City for construction cost at Carrier Park

Cons:

- None

The Carrier Park capital improvement budget will increase by $30,000. There is no impact on the City's General Fund budget.

Staff recommends City Council adopt a budget amendment, in the amount of $30,000, to increase the Carrier Park budget to account for a grant from the North Carolina Department of Environmental and Natural Resources, Division of Water Resources.

Councilman Mumpower spoke against the action in he felt that during our economic times, it is short-sighted of Council to be putting their monies into things that are nice, but not necessary.

Councilman Newman moved for the adoption of Ordinance No. 3688. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 150

D. ORDINANCE NO. 3689 - BUDGET AMENDMENT FOR AN APPROPRIATION FROM THE N.C. DEPT. OF HEALTH & HUMAN SERVICES, DIVISION OF AGING, AND THE LAND OF SKY REGIONAL COUNCIL/AREA AGENCY ON AGING THROUGH THE SENIOR CENTER GENERAL PURPOSE FUNDING, FOR THE SENIOR OPPORTUNITY CENTER

Summary: The consideration of budget amendments in the amount of $13,090 for Senior Opportunity Center and $13,090 for Harvest House for an appropriation from the State of North Carolina, Department of Health and Human Services, Division on Aging and the Land of Sky Regional Council/Area Agency on Aging through the Senior Center General Purpose Funding.

Funds will be used at the Senior Opportunity Center to 1) purchase portable room dividers for the multi-purpose activity room, 2) purchase and install computer station and computers, 3) replace chairs and tables, 4) purchase ice machine and lectern, 5) provide sewing

machine maintenance. The allocation requires a 25% local match which will be provided via in-kind services with in-house project management and labor.

Funds will be used at Harvest House to 1) purchase portable room dividers for the multi-purpose activity room, 2) replace chairs and chair carts, and 3) purchase band saw for woodshop. The allocation requires a 25% local match which will be provided via in-kind services with in-house project management and labor.

This action complies with the 2015 Parks and Recreation Master Plan in that it will enhance the level of program services at senior centers.

Pros:

- Room dividers will create a multipurpose use of large activity rooms thereby expanding program space
- Computer center will enhance the customer experience and expand program opportunities
- Woodshop equipment will enhance customer experience and safety
- Replace old and worn equipment

Con:

- None

Funds will supplement current operating budgets for Senior Opportunity Center and Harvest House. The 25% local match will be provided through in-kind services. There is no impact on the City's General Fund budget.

City staff recommends City Council to approve the budget amendment authorizing the City Manager to establish 1) a budget in the amount of $13,090 for Senior Opportunity Center, and 2) to establish a budget in the amount of $13,090 for Harvest House for purchase, replacement and installation of equipment.

Councilman Mumpower felt that with our budgetary constraints and the reality of our economic picture, he could not support this action. He felt the state's money would be better spent on something that will really make a difference and that is the court system.

Councilman Newman moved for the adoption of Ordinance No. 3689. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 152

E. ORDINANCE NO. 3690 - BUDGET AMENDMENT FOR AN APPROPRIATION FROM THE N.C. DEPT. OF HEALTH & HUMAN SERVICES, DIVISION OF AGING, AND THE LAND OF SKY REGIONAL COUNCIL/AREA AGENCY ON AGING THROUGH THE SENIOR CENTER GENERAL PURPOSE FUNDING, FOR THE HARVEST HOUSE

Summary: See Consent Agenda "D" above.

Councilman Mumpower felt that with our budgetary constraints and the reality of our economic picture, he could not support this action. He felt the state's money would be better spent on something that will really make a difference and that is the court system.

Councilman Newman moved for the adoption of Ordinance No. 3690. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 154

F. ORDINANCE NO. 3691 - BUDGET AMENDMENT FROM THE N.C. GOVERNOR'S CRIME COMMISSION TO INCREASE THE BUDGET FOR THE WEST RIVERSIDE GUN VIOLENCE PROJECT IN ASHEVILLE'S WEED & SEE TARGETED AREA

Summary: The consideration of a budget amendment, in the amount of $5,000, from the North Carolina's Governor's Crime Commission (GCC) to increase the budget for the West Riverside Gun Violence Prevention Project in Asheville's Weed & Seed targeted area.

The original budget for the West Riverside Gun Violence Prevention Project in the amount of $15,000 was approved by City Council on October 28, 2008, and required a $5,000 match. Since then the funder revised the requirement as no match and increased the grant award to by $5,000.

In October 2004, elected officials, city staff and Asheville citizens mobilized to develop comprehensive strategies to address issues of law enforcement, neighborhood restoration, and prevention/intervention/treatment programs and activities in the West Riverside area of Asheville as part of a Weed and Seed initiative. The program was introduced to the community via a series of public meetings to determine the concerns of residents of the target area, and was received favorably with the understanding that residents would be integrally involved in the planning and implementation of the initiative.

In July 2006, the U.S. Department of Justice announced the designation of Asheville as an "Officially Recognized" site for the federal Weed and Seed initiative aimed at reducing crime and improving quality of life. Weed & Seed sites are required to leverage additional funds to carry out their respective goals and objectives. This grant award will address the community driven Weed and Seed goals of: 1) reducing crime and improving public safety, 2) enhancing the relationship between the community and law enforcement, 3) providing accessible programs for youth, and 4) increasing parent involvement in education and after-school activities.

The additional $5,000 will enhance the funds already assigned for Asheville Police officer investigative overtime and FICA in the Weed and Seed area with a concentration on crimes related to gun violence and gang activity, and for gang suppression unit detective supplies and equipment. The project also provides a prevention element in which gang detectives will teach the "Gang Resistance Education and Training Families" (GREAT) curriculum in the Weed and Seed area. This will enhance the GREAT curriculum currently being taught at Randolph Learning Center. The GREAT curriculum is also being taught at Asheville Middle School as classes become available. No additional City funding will be required to support this grant.

This action complies with the City Council Strategic Operating Plan in that it supports the following goals in the Safe Focus Area: 1) expand community policing initiatives, 2) reaffirm commitment to eliminate open air drug market in Asheville, and 3) support recreation and employment alternatives for youth at risk of gang exposure.

Pros:

- Reduce gun crimes and gang activity in an area of Asheville that has high crime activity.
- Enhance the Weed and Seed strategy of providing a comprehensive crime prevention plan to address law enforcement, neighborhood restoration and prevention/intervention/treatment programs for residents of the target area.
- Mobilize community residents to take an active role in gun violence and gang prevention.
- Provide resources for residents as a means of personal growth and development.
- Multi-agency collaboration to address gun violence and gang prevention in the targeted area.

- Leverage resources to sustain the GREAT Families program which can be replicated in other areas of the city.

Con:
- Some resistance to change by the residents who live in the target area.

The fiscal impact will be the grant revenue of $5,000 for overtime for Gang Suppression Officers and the facilitation of Gang Resistance Education and Training Families program at no additional cost to the City.

City staff recommends City Council adopt a budget amendment authorizing the City Manager to increase this project budget in the amount of $5,000 for the Project Safe Neighborhoods Gun Violence Prevention Project for the Weed & Seed area.

Councilman Mumpower felt that with our budgetary constraints and the reality of our economic picture, he could not support this action. He felt the state's money would be better spent on something that will really make a difference and that is the court system.

Councilman Newman moved for the adoption of Ordinance No. 3691. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 156

G. RESOLUTION NO. 09-10 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A MATCHING GRANT FROM THE U.S. DEPT. OF HOMELAND SECURITY, FEDERAL MANAGEMENT AGENCY, FOR PROCUREMENT OF WILDLAND FIRE SUPPRESSION AND PERSONAL PROTECTION EQUIPMENT FOR THE ASHEVILLE FIRE & RESCUE DEPARTMENT

ORDINANCE NO. 3692 - BUDGET AMENDMENT FROM THE U.S. DEPT. OF HOMELAND SECURITY, FEDERAL MANAGEMENT AGENCY, FOR PROCUREMENT OF WILDLAND FIRE SUPPRESSION AND PERSONAL PROTECTION EQUIPMENT FOR THE ASHEVILLE FIRE & RESCUE DEPARTMENT

Summary: The consideration of a resolution authorizing the City Manager to accept a matching grant from the U.S. Dept. of Homeland Security, Federal Emergency Management Agency, and an associated budget amendment, in the amount of $70,197, for procurement of wildland fire suppression and personal protection equipment for the Asheville Fire & Rescue Department.

The U.S. Department of Homeland Security (DHS) and the Federal Emergency Management Agency has made funds available through Assistance to Firefighters Grant Number: EMW-2008-FG-11916 to enhance Asheville Fire and Rescue's (AFR) ability to protect the public and fire service personnel from fire and related hazards. Since 2001, The Assistance to Firefighters Grant Program has helped firefighters and other first responders to obtain critically needed equipment, protective gear, emergency vehicles, training, and other resources needed to protect the public and emergency personnel.

DHS has recognized that fire departments throughout the country have a wildland fire hazard and need specialized equipment to minimize losses. Departments that service not only their jurisdiction but also service their region for wildland response have received grant awards. AFR responds to such emergencies within Asheville but also in our region through mutual aid. With our region's growing urban interface, the threat of wildfire is a continuing concern for

Asheville and western North Carolina. AFR is working to address the emergency response needs by enhancing our wildland firefighting capabilities.

This grant will be utilized to purchase equipment to enhance the effectiveness and safety of AFR's firefighters while combating grass, woods and brush fires. The equipment includes fire suppression tools and appliances. Personal protective equipment for the department's members will provide superior protection while decreasing heat stress.

This equipment is needed with or without the grant. The grant enables AFR to accelerate the purchase of this equipment so that more firefighters can be equipped and protected this fiscal year than if we had not received the grant. The required match for the grant will come from the department's already designated FY 08-09 appropriated funds for this purpose. The equipment provided through this grant will become the property of Asheville City Government.

This action complies with the Strategic Operating Plan as follows: (1) Safe - By the equipping the department with upgraded wildland fire suppression and personal protective equipment, this grant will assist in making Asheville the safest city in America based on approved metrics for similarly sized cities; and (2) Fiscally Responsible – This grant allows the department to have the equipment that is needed to help protect firefighters and recognizes that AFR provides services to the region, thereby reducing the expenses of city taxpayers.

This item has been reviewed by the Council's Public Safety Committee and has received the committee's endorsement.

Pros:

- This grant will enable AFR to accelerate our procurement of this equipment beyond what our appropriated budget will currently allow.
- This equipment can be used both in our city and in our region.
- The city's match for this grant at 20% or $14,039 will come from the department's FY 08-09 budget.
- The Department of Homeland Security, Federal Emergency Management Agency, will provide $56,158 or 80% of the grant amount in matching funds for the purchase of wildland fire suppression and personal protection equipment.
- The equipment will increase the department's wildland firefighting capabilities.
- Firefighter and citizen safety will be enhanced.
- This equipment is immediately available to Asheville residents and businesses.

Con:

- None identified at this time.

There is no adverse fiscal impact associated with this grant. Accepting this grant will relieve the cost of this needed equipment from the upcoming Fiscal Year 2009-10 budget. The Fire Department will utilize funds already included in its Fiscal Year 2008-09 small capital budget to fund the $14,039 City match.

City staff recommends that City Council (1) authorize the City Manager to accept the matching grant from the Department of Homeland Security, Federal Emergency Management Agency to enhance the safety of our firefighters, community and region; and (2) adopt the associated budget amendment.

Councilman Mumpower felt that with our budgetary constraints and the reality of our economic picture, he could not support these actions. He understood the need of procurement of wildland fire suppression and personal protection equipment for the Asheville Fire & Rescue Department, but felt Asheville should pay for those things themselves and let the state spend their money on the court system, which will benefit everyone.

Councilman Newman moved for the adoption of Resolution No. 09-10. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 408

ORDINANCE BOOK NO. 25 – PAGE 158

III. PRESENTATIONS & REPORTS:

A. N.C. DEPT. OF TRANSPORTATION FUNDING POOLS

Assistant Director of Transportation and Engineering Ken Putnam said that during Council's consideration of a resolution supporting the proposed improvements to Victoria Road in the immediate area of Mission Health System as part of the hospital's overall master plan at the October 28, 2008, City Council meeting, there was discussion about the N.C. Dept. of Transportation (NCDOT) funding in general and a request was made to identify the "funding pools" and determine how they could benefit the greater community. As a side note, *the NCDOT Board of Transportation approved a total of $1,000,000 for Mission Health System on January 8, 2009.*

Typically, there are three "funding pools" that fall outside the Transportation Improvement Program (TIP) process and are controlled by the local Division office *(Board of Transportation member)* and/or the Secretary of Transportation in Raleigh. The subject "funding pools" include Divisionwide Small Construction Funds, Statewide Contingency Funds, and Public Access Funds. A fourth "funding pool" includes SB 622 Economic Development Funds; however, current funding has **not** been extended.

Divisionwide Small Construction Funds are intended for small to medium size projects that would improve traffic flow and/or public safety. Typical projects include providing turn lanes, medians, curb and gutter, resurfacing, traffic signals, and warning flashers. The work must be done on state-maintained streets and there is an annual cap of $250,000 for each specific project. See below:

DIVISIONWIDE SMALL CONSTRUCTION FUNDS

- Annual cap of $250,000 per specific project.
- Controlled by the Board of Transportation (BOT) member - $2,000,000 per year.
- Work must be on state-maintained streets.
- Typical projects include *(based on Board of Transportation meeting minutes)*
    1. Left-turn lanes
    2. Right-turn lanes
    3. Curb and gutter
    4. Medians/Directional Left-Overs
    5. Sidewalks *(not typically in Division 13)*
    6. Resurfacing *(including milling)*
    7. Traffic signals *(new installations and upgrading existing)*
    8. Warning flashers *(including solar powered)*

9. Traffic studies and preliminary engineering *(not typical)*
10. Corridor access management plans *(not typical)*

Statewide Contingency Funds are also intended for small to medium size projects that would improve traffic flow and/or public safety. Typical projects include providing turn lanes, medians, curb and gutter, resurfacing, drainage improvements, traffic signals, and warning flashers. These projects typically have an annual cap of $100,000 for each specific project *(higher caps can be approved on a case-by-case basis)* and the funds are administered by the State Senate, State House, and the Secretary of Transportation. See below:

STATEWIDE CONTINGENCY FUNDS

- Typical annual cap of $100,000 per specific project *(higher caps can be approved on a case-by-case basis)*
- Administration is shared by the President Pro Tempore of the Senate, the Speaker of the House and the Secretary of Transportation - $10,000,000
- Projects are recommended by the President Pro Tempore of the Senate, the Speaker of the House, and the Secretary of Transportation
- Typical projects include
    1. Access streets
    2. Left-turn lanes
    3. Right-turn lanes
    4. Medians/Directional Left-Overs
    5. Pedestrian walkways
    6. Resurfacing *(including milling)*
    7. Drainage improvements
    8. Traffic signals *(new installations and upgrading existing)*
    9. Warning flashers *(including solar powered)*
    10. Volunteer Fire Department Paving *(driveways and parking areas)*
    11. Protective dunes *(coast)*

Public Access Funds are intended to be used for providing school bus drives, drives to fire truck bays for volunteer fire departments, and access to new industry entities. Requests for these funds are made directly to the NCDOT by schools, volunteer fire departments, and various industry entities. See below:

PUBLIC ACCESS FUNDS

- Requests for funding typically come from schools, volunteer fire departments, and industrial entities. Written requests should be submitted to the appropriate Division Engineer.
- Industrial requests are for industries creating new jobs and are typically funded at $1000/job, with a maximum of $150,000 per project.
- Schools are funded for bus drives only and are limited to $50,000 per school.
- Rural volunteer fire departments can receive funds for providing drives to the bays for fire trucks and are limited to $25,000 per fire department.

- The appropriate Division Engineer reviews school and volunteer fire department requests and the Chief Engineer approves them. The Access Review Committee reviews and approves all public access requests.

With a new governor beginning her first term and the current economic climate, there is no guarantee that the subject funds will stay intact. He will continue to work closely with the local NCDOT staff in trying to identify appropriate projects within the City limits of Asheville that we could pursue.

Councilman Newman questioned how we can effectively implement the projects we want funded over the next five years with our transportation infrastructure plan. City Manager Jackson felt the increased interaction between our Metropolitan Planning Organization (MPO) representatives and City staff is very beneficial and he encouraged Council to continue that as staff develops an action plan. He said that it is the City's goal to be more strategic in putting our interests at the table by educating the MPO representatives and then seeking Council endorsement of the action plan.

Mayor Bellamy noted the changes in dynamics since there is new leadership at the NCDOT. She felt it was important to point out that even with the MPO being one step, the bigger fight is working with the Board and the new Secretary of Transportation to ensure that our projects do move forward. She said the downfalls in our area is that outside the Transportation Improvement Plan, we don't have any long-term plans for major roadways in the community. She felt it should be a priority for our two MPO representatives to look at where we're going, how do we get there, and how we can use the multi-modal system because it's imperative for our growth.

Vice-Mayor Davis said in Henderson County, all the cities and towns in Henderson County get together as a Henderson County MPO before they come to the main MPO meeting. He feels that is a great model and they may try to do something similar to that in Buncombe County.

Mayor Bellamy felt supported the Henderson County model for our area in that it's imperative that when we advocate to NCDOT, it's with one voice with one vision that they can stand behind.

In response to Councilman Mumpower, Mr. Putnam explained what funds were used for the $1 Million Mission Hospitals project, which decision was not filtered through the MPO.

Even though Councilman Mumpower felt the Mission Hospitals project is a good project, he felt it was reprehensible for them to sidestep the MPO process, which is the filtering body for decisions about regional roadways. He felt Council should take a formal position against these kind of activities.

Councilman Newman said the funding pools from NCDOT are not secret in that there are other ways to get projects funded. It's not currently structured that all projects get approved by the MPO; however, he would support that. He did feel that the MPO needs to be doing a good job effectively with the decisions they are currently charged with making. In addition the MPO needs to engage with the Secretary of Transportation and our Board members because, as it is currently constructed, they are important decision-makers in what projects get funded.

Mayor Bellamy said that Council's two MPO representatives will keep Council informed.

IV. PUBLIC HEARINGS:

A. RESOLUTION TO PERMANENTLY CLOSE A PORTION OF WALLACK STREET

Mayor Bellamy said that this public hearing was held on December 2, 2008, and continued to this date in order to give the Greenway Commission an opportunity for further evaluation of the request with the petitioners being given an opportunity to be heard at the meeting.

Councilman Mumpower said that there appears to be a potential for compromise on this issue and as such, he moved to continue this public hearing until February 10, 2009. This motion was seconded by Vice-Mayor Davis and carried unanimously.

B. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED ON 22 SULPHUR SPRINGS ROAD, FOR THE PROJECT IDENTIFIED AS SULPHUR SPRINGS CONDOMINIUMS, FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT AND COMMUNITY BUSINESS II DISTRICT TO URBAN RESIDENTIAL DISTRICT/CONDITIONAL ZONING, FOR THE DEVELOPMENT OF A MIXED USE BUILDING INCLUDING 27 RESIDENTIAL UNITS AND UP TO 2577 SQUARE FEET OF OFFICE AND COMMERCIAL SPACE, WITH TWO LANDSCAPE MODIFICATIONS AND DESIGN VARIANCE STANDARDS REQUESTED

ORDINANCE NO. 3693 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED ON 22 SULPHUR SPRINGS ROAD, FOR THE PROJECT IDENTIFIED AS SULPHUR SPRINGS CONDOMINIUMS, FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT AND COMMUNITY BUSINESS II DISTRICT TO URBAN RESIDENTIAL DISTRICT/CONDITIONAL ZONING, FOR THE DEVELOPMENT OF A MIXED USE BUILDING INCLUDING 27 RESIDENTIAL UNITS AND UP TO 2577 SQUARE FEET OF OFFICE AND COMMERCIAL SPACE

Mayor Bellamy opened the public hearing at 5:20 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to conditionally zone property located on 22 Sulphur Springs Road, for the project identified as Sulphur Springs Condominiums, from RM-8 Residential Multi-Family Medium Density District and Community Business II District to Urban Residential District/ Conditional Zoning for the development of a mixed use building, including 27 residential units and up to 3577 square feet of office and commercial space, with two landscape modifications and design variance standards requested. This public hearing was advertised on January 16 and 25, 2009.

Ms. Cogburn said that the subject property, currently owned by Buncombe Realty, consists of .84 acres located at 22 Sulphur Springs Road approximately .1 miles off of Haywood Road in West Asheville. Approximately 3/5ths of the property (to the west) is zoned RM-8 (Residential Multi-Family Medium Density District) with the remaining 2/5ths (to the east) zoned CBII (Community Business II District). The property contains an abandoned dwelling unit and miscellaneous outbuildings. It is fenced on all sides.

The property is surrounded by parcels zoned in various ways and containing varied uses. To the north, the property is zoned CBII, Institutional, and RM-8 and contains offices, church uses, and single-family homes. The property to the west and south is zoned RM-8 and contains single-family homes. To the east is CBII zoned property containing a duplex and offices.

The applicant is requesting conditional zoning to URDCZ (Urban Residential Conditional Zoning District) to allow for the development of a mixed use building. It is proposed that the building will contain 5 one-bedroom, 10 two-bedroom, 6 three-bedroom, and 6 four-bedroom dwelling units (24,541 square feet); 2,165 square feet of commercial space on the northeast side of the first floor; and, 1,412 square feet of office space in the basement level on the western side

of the building. Without the rezoning, 9 dwelling units could be constructed on the property. The development of 27 units is a density of 32 units per acre (the maximum in URD). The proposed building height is 30 feet (three stories), in conformance with the proposed URD zone. The building footprint is 9,872 square feet with an additional 1,051 square feet in exterior walkways.

Access to the parking for the development will be off of Sulphur Springs Road at the northeastern corner of the property. Parking to serve the development is located underneath the buildings, in a surface area to the rear of the buildings, and on the street. Thirty-nine spaces are provided. It is proposed that the sidewalk along Sulphur Springs Road (in front of the property) will be reconstructed during the development of the on-street parking. Per an arrangement between the applicant and the City Traffic Engineer, the on-street parking will be primarily constructed on the applicant's property, with 2 feet of the on-street parking width coming from the existing roadway.

The developer is proposing at least 5 affordable units (18%) and will meet the standards for Healthy Built certification. Four neighborhood meetings have been held to introduce this project to the residents of the area.

The developer has requested 2 modifications and 2 design variances for the project. The modifications to standards, which must be approved by Asheville City Council, are:

1. A modification to the buffer on the west side of the building to allow for placement of balconies on the first and second floors of the building. The intrusion into the required 20 foot buffer is 6 feet. The balconies will be 18 feet above the ground at the lowest point, providing adequate room for the planting of shrubs under the balcony. The full compliment of plantings will be provided in the buffer. Staff is supportive of this modification as it provides an interesting architectural element to this side of the façade and due to the fact that some plantings will occur within this area. An additional condition that evergreens required for this buffer be concentrated between the balcony and the property line was added by the Asheville Planning & Zoning Commission at the request of the adjoining property owner.

2. A modification to the required driveway width of 24 feet. The proposed driveway width is 20 feet. The building is predominately residential, but due to the provision of 3,577 square feet of office and commercial space the requirement is for a driveway 24 feet wide. The developer is requesting the modification because providing extra width would require either encroaching into the buffer on the west side of the property or removing the sidewalk located between the driveway and the building. The developer has worked with the City's Traffic Engineer to limit one of the parallel parking spaces in front of the building to a restricted loading space for the commercial and office uses. By doing so, the number of large vehicles entering the parking lot is limited and, therefore, staff is supportive of this modification.

The variances, which were approved by the Planning and Zoning Commission following a quasi-judicial hearing on December 3, 2008, are:

1. A variance to the requirement (Section 7-8-25(f)(12)b.) that pedestrian entrances be provided every 45 feet along the primary building façade. The proposed plans show 4 entrances along Sulphur Springs Road (two residential and one on each end for the commercial and office uses). The distance between the northeast commercial end of the building and the northeast entrance to the residential courtyard is 50 feet; the distance between the residential courtyard entrances is 115 feet; and the distance between the northwest office entrance and the northwestern residential entrance is 50 feet. The staff is supportive of this request due to the residential nature of this project. This URD standard anticipates more commercial activity along the first floor at street level.

2. A variance to the requirement (Section 7-8-25(f)(12)d.) that windows make up at least 60% of the area of the street facing first story façade. The proposed design provides for 38% openings in the first floor façade. Staff is supportive of this variance again, because of the residential nature of this project and also because the design of the project, with the courtyard openings, provides the pedestrian interest that is the purpose of this requirement.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The project, if approved, must meet all the technical standards set forth in the City's UDO and Standards and Specifications manual. The developer has been closely working with staff to ensure compliance and has recently revised the site plans to meet and correct many of the Technical Review Committee's conditions.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The developer, in designing a URD project has worked to create a project compatible with the surrounding area. The project should serve as a transition between the Haywood Road mixed use area and the single family home neighborhoods to the south.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The project is designed to serve as an appropriate transition between the Haywood Road commercial /office corridor and the single-family neighborhood to the south of the property. The property is currently in a derelict state and the redevelopment of this property as a transition, higher density property should increase, but definitely not injure the values of surrounding properties.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   Although the project presents a greater density than development to the south, it is in an area that transitions from commercial/office to single-family. It is an ideal location for a small, mixed-use project that transitions between the higher intensity uses along Haywood Road and the single-family neighborhoods to the south of the project.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   The proposed use supports the 2025 goals and vision as follows: (1) Providing affordable housing; (2) Promoting compatible, mixed-use infill development; (3) Permitting and encouraging transit supportive density (8-16 units per acre minimum) at transit nodes; and (4) Supporting green building.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   The proposed use is located .1 miles off of a major corridor in the City. Infrastructure and services are available to serve this development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   The proposed project has been reviewed by the City Traffic Engineer and it should not cause undue traffic congestion along the existing street infrastructure. The anticipated traffic at full build-out conditions is expected to be less than one hundred (100) vehicles per hour during the morning and afternoon peak hours during a typical weekday

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- The project offers affordable units, aligning with City Council's goals.
- The proposed development provides housing in a transit-served area.
- Higher density infill development furthers the goals and objectives of the comprehensive plan.
- The project will be designed to qualify for Healthy Built Homes certification or LEED certification.

Con:

- The project presents a density that is greater than that found in the immediate residential areas.

This conditional zoning request was recommended for approval by a 5-1 vote of the Asheville Planning & Zoning Commission. Three people spoke at the meeting – all were opposed to the development mostly due to traffic concerns.

She received an e-mail from a neighbor concerned about lighting in the area from the project. The standard condition on the project is they must meet the City's lighting plan. They will have to submit a detailed lighting plan to address that.

Mr. Gerald Green, representing the developer, explained the specifics of the project. He explained that several members of the development team have been involved with a number of projects in west Asheville. For this site, some of their eco concepts development's goals include (1) beautiful design; (2) context sensitive design; (3) pedestrian and transit oriented; (4) build community; (5) affordability; (6) accessible for all ages; (7) Healthy Built certified; (8) Energy Star Certified; and (9) sustainable design and construction. They held four community meetings beginning in August to ensure that all concerns were addressed. He said they tried to incorporate as many of the community's desires into the project. They also asked for concerns, some being (1) the building itself; (2) buffers; (3) scale with the neighborhood; and (4) site location. Some were concerned with speeding in Sulphur Springs Road and the need for traffic calming. They have worked with the City's Traffic Engineer with on-street parking and road width adjustment to help slow traffic down. He showed examples of the architectural design of the building in relationship to other homes in the area. He said they meet the following goals of the City's Comprehensive Plan (1) green building; (2) transit-oriented development; (3) pedestrian-oriented development; (4) mixed-use corridor development; (5) infill development; (6) affordable, mixed-income housing; (7) LID and BMP stormwater features; and (8) accessible design for all ages. Using a site plan, he showed the formation of the units. He then explained the unit mix and estimated pricing, noting that they are working with the City's Housing Trust Fund and other public subsidy money to try to reduce the pricing even further and get more affordable units. He explained the need for their modification and variance requests. He urged the Council to support this project that will be sustainable and serve the residents of west Asheville and the City of Asheville as a whole.

Mayor Bellamy closed the public hearing at 5:37 p.m.

There was a brief discussion, initiated by Councilwoman Cape, regarding a bike lane on Sulphur Springs Road. She suggested that a review of the Comprehensive Bicycle Plan be included in the Technical Review Committee's responsibilities.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3693 for the conditional zoning request for the project identified as Sulphur Springs Condominiums, located at 22 Sulphur Springs Road, with the modification to the buffer on the west side of the building and the modification to the driveway with, and subject to the following conditions recommended by City staff and the standard conditions: (1) Uses shall be limited to twenty-seven (27) dwelling units and commercial and office uses permitted in the Urban Residential District; (2) The project shall include a minimum of eighteen (18%) percent units complying with the City of Asheville's affordable housing standards. For dwelling units that are for sale, this requires that the units be sold at or below the City's price points for affordable units and be sold to income qualified individuals; (3) The project will be designed and constructed to meet Healthy Built Homes standards; (4) The project shall comply with all conditions outlined in the TRC staff report; (5) All site lighting must comply with the City's Lighting Ordinance and be equipped with cut-off fixtures or full cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (6) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (7) This project will undergo final review by the TRC prior to issuance of any required permits; and (8) The developer shall concentrate the required western buffer landscape evergreens into the area between the balcony and the western property line. This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 160

C. PUBLIC HEARING TO CONSIDER REZONING PROPERTIES LOCATED AROUND 152 BLEACHERY BOULEVARD FROM URBAN VILLAGE DISTRICT AND RIVER DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

ORDINANCE NO. 3694 - ORDINANCE TO REZONE PROPERTIES LOCATED AROUND 152 BLEACHERY BOULEVARD FROM URBAN VILLAGE DISTRICT AND RIVER DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT

Mayor Bellamy opened the public hearing at 5:56p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to rezone properties located around 152 Bleachery Boulevard from Urban Village District and River District to Commercial Industrial District. This public hearing was advertised on January 16 and 25, 2009.

Ms. Cogburn said that this rezoning request is the consequence of a recent conditional zoning for the Altamont at Riverbend Village project, which rezoned more than 15 acres from Urban Village to RM16/Conditional Zoning. As a result, the remaining neighboring area of land zoned Urban Village totals less than four acres, and Section 7-8-23 of the Unified Development Ordinance (UDO) states that the minimum area for an Urban Village District shall be five acres. Six Oaks, LLC, the owner of the Altamont site as well as the subject property on the east side of Bleachery Boulevard, was informed during their application process that this rezoning request would be required to address the creation of a non-conforming situation.

Commercial Industrial (CI) was proposed as an alternative by staff due in part to the area of land southwest of the subject area already zoned CI. Staff considered a rezoning of the CI area and roadway to Urban Village to assemble an area adding up to more than five acres to achieve conformity, but the slope of the land on the west side of the road (around 25%), the location of the road dividing the area, and the presence of a detention pond on the east side indicate too little usable land for a viable urban village design.

The three LLCs that own the 1.3-acre parcel (part of which is zoned Urban Village) on the west side of Bleachery Boulevard are also a party to the rezoning request, and have indicated their support of staff's execution of the proposed rezoning.

The stated purpose of the Commercial Industrial district is "to provide areas for a wide range of commercial and industrial uses including: light manufacturing, wholesale, warehousing, services, retail sales, offices, and residential uses. The district is established where environmental conditions and urban infrastructure are adequate to support commercial and industrial development."

The Urban Village (UV) District was "established to create mixed use development that is economically vital, pedestrian-oriented and contributes to the place-making character of the built environment. The Urban Village District offers the unique opportunity to provide quality and long lasting retail, office and residential uses in an organized layout that encourages the full range of access by patrons and users, and offers innovative high quality design of structures, public amenities and pedestrian facilities."

The recent conditional zoning decision effectively removed the possibility of an urban village development in this area. While the remaining area zoned UV does have development potential, it does not possess the physical characteristics needed for a successful urban village. The Commercial Industrial classification would allow for a varied mix of uses, consistent with the neighboring development on the roadway. And although the industrial uses permitted in CI would be unlikely choices on this corridor, the proposed zoning district could invite types of employment that are not available as permitted uses under the current zoning.

As of this writing, staff has received no communications from the public regarding this rezoning.

On January 7, 2009, the Planning & Zoning Commission voted unanimously to recommend approval.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:
- Rezoning would achieve compliance with the UDO.
- Proposed Commercial Industrial zoning is compatible with the surrounding area.

Con: None noted.

Staff feels the proposed rezoning is appropriate for the situation and recommends approval.

Mayor Bellamy closed the public hearing at 5:59 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Davis moved for the adoption of Ordinance No. 3694. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 166

D. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF 131 OLD CHARLOTTE HIGHWAY TO COMMUNITY BUSINESS I DISTRICT

ORDINANCE NO. 3695 - ORDINANCE TO ZONE 131 OLD CHARLOTTE HIGHWAY TO COMMUNITY BUSINESS I DISTRICT

Mayor Bellamy opened the public hearing at 6:01 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to zone 131 Old Charlotte Highway to Community Business I District. This public hearing was advertised on January 16 and 25, 2009.

Ms. Cogburn said that the City of Asheville recently completed the voluntary annexation (effective December 31, 2008) of a .85 acre tract located at 131 Old Charlotte Highway in eastern Buncombe County (approximately 1.9 miles from the current City limits). A single-family home is located on the property which has been purchased by the Asheville ABC Board for the development of a new ABC store. The property is at the edge of the Olde Eastwood Village community.

The property, along with surrounding properties in the area, is zoned NS (Neighborhood Service) District by Buncombe County. Staff proposes a similar City zoning classification, CBI (Community Business I) District for this parcel.

Pro:

- Zones property recently taken into the City of Asheville in consideration of the surrounding zoning and land use and the City's comprehensive plan.

Con:

- None noted.

This initial zoning was recommended for approval (7-0) by the Asheville Planning & Zoning Commission at their January 7, 2009, meeting. No one spoke at the meeting.

Based on the above findings and the analysis provided in the report, staff and the Planning & Zoning Commission recommend this initial zoning request to be reasonable.

Mr. Jack Sorrells, resident in the Reynolds High School area, questioned whether the location of this ABC store has met all the location requirements established by the State, e.g., avoidance near schools and churches. He said Old Charlotte Highway is a very narrow road with a small bridge. He said that Reynolds High and Reynolds Middle Schools are across the road and there are 3-4 churches in the area. He said that they are not opposed to an ABC store, but just this particular location.

Mayor Bellamy closed the public hearing at 6:04 p.m.

In response to Councilman Mumpower, Ms. Cogburn said that the City does not review the ABC store standards but only reviews City standards. City Attorney Oast said that review of ABC stores is a matter is governed by the State ABC Commission and he felt sure they could not open the store unless they complied with the law.

City Attorney Oast reminded Council that if this property is rezoned, any use allowed in the Community Business I District would be accepted on the property. In response to Councilman Mumpower, Ms. Cogburn noted other uses and limitations in the Community Business I District.

Since there was no representative of the petitioner to respond to questions raised, Councilman Mumpower was concerned about taking action.

Ms. Cogburn said that in discussions about several different stores that the local ABC Board is contemplating opening, she believed that this has received approval from the State, which would seem to her to indicate that they have met the state requirements.

Councilwoman Cape felt Council is being asked if we are going to continue the practice of allowing people who voluntarily annex into the City to petition us for what they think the best use is. Ms. Cogburn said that staff does ask the petitioners what zoning would work for them with regard to what their plans are and at that time they would indicate to them any concerns even before instituting a voluntary annexation. She said that this property was zoned by Buncombe County to Neighborhood Services which is very comparable to Community Business I District.

Councilwoman Cape felt that Asheville is so hungry to participate with people on voluntary annexations rather than involuntary annexations that it's hard pressed for the City to turn them away.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. 3695. This motion was seconded by Councilman Newman and carried on a 5-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no".

ORDINANCE BOOK NO. 25 – PAGE 168

E. PUBLIC HEARING TO CONSIDER THE REZONING OF PROPERTY LOCATED ON 1498 SAND HILL ROAD FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO INSTITUTIONAL DISTRICT

Mayor Bellamy said that this public hearing was originally scheduled for January 13, 2009, but was continued to this date at staff's request. She then opened the public hearing at 6:13 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to rezone property located at 1498 Sand Hill Road from RM-16 Residential Multi-Family High Density District to Institutional District. This public hearing was advertised on January 2 and 9, 2009.

Ms. Cogburn said that the subject property is located off of Sand Hill Road (NC 112) just past the intersection with US 19/23. Access to the property is via a private road, Chapel of Faith Drive. The property is 38.8 acres in size and is used as a cemetery with related operations/ buildings. The property is currently zoned RM-16 (Residential Multi-Family High Density District) and is in the City of Asheville's extraterritorial jurisdiction. The petitioner seeks a rezoning to Institutional.

The property is bordered by various uses and zoning district designations. To the west is the Vulcan Quarry operation (zoned Industrial); to the north are a variety of commercial, residential and institutional operations (zoned CBII and RM-8); to the east is vacant property

zoned Urban Village for the proposed Main Street at Enka Village; and, to the south are multi-family dwellings (zoned RM-16).

The property is bordered by creeks and streams, although only one stream is located on the property at the northern property line. A rail line is located immediately north of the property between the northern property line and US19/23. The property is mostly flat.

Although the rezoning results in the loss of multi-family zoning, as there is presently a cemetery on the property, it is highly unlikely that any such development would be proposed. More intense uses than are present would be allowed under either zoning district. The rezoning does allow for additional development of the cemetery operations on site.

Pros:

- Allows for more intense development in an area off a major corridor.
- Conforms to the City's goal of allowing appropriate non-residential uses in suitable locations.

Con:

- None noted.

Based on the analysis provided in this report, staff and the Planning & Zoning Commission find this request to be reasonable. This rezoning was recommended for approval by a 5-0 vote by the Planning & Zoning Commission. One person (the property manager) spoke in favor of the rezoning. Since the Planning & Zoning meeting some concerns have been expressed by owners of the Urban Village District property adjoining this property.

Mr. Dan Funchess, representing from Forest Lawn Memorial Park, asked Council to support the rezoning to allow them greater flexibility on what they would like to do with the property. They acquired the property in 2003 and would like to clean it up.

Mr. Wes Rinehart, Director of Marking of FIRC Group, owners of Main Street at Enka Village, said that they own the 2 tracts of land (east and south) that adjoin the cemetery. They are opposed to the rezoning in that it will have a detrimental impact on the Main Street at Enka Village project. The rezoning will allow the cemetery to install and operate a pet crematorium within feet of their urban village. They find that use so close to the proximity of their development to be undesirable. Such use would negatively impact their tenants, residences and patrons. FIRC received Master Plan approval for their site which will encompass over 100,000 square feet of retail, 30,000 square feet of office and approximately 500 residential units. Their proposed development is deep in the design and planning stage and they are primarily concerned about the visibility of a crematorium structure and the emissions and by-products of such use. Using a map, he showed the general area of the proposed pet crematorium in relationship to their site plan. While he was sure that today's crematory technology is advanced with safety and efficiency, the fact is that it will generate by-products and particulate matter, and they are concerned about the operational failure of pollution and odor controls. When FIRC purchased the property in February of 2007, they did so after significant due diligence and the understanding that the cemetery was zoned RM-16. Furthermore, a rezoning to institutional could be a stepping stone to a human crematory or other impactable zoning uses. Such uses would negatively affect the value, character and quality of the life of their development.

Mr. Rick Jackson, counsel for the FIRC Group, spoke against the proposed pet crematory with it's proposed location next to a high density residential development. He said the owner has ample opportunity, within his existing land, to relocate, preferably closer to the existing industrially zoned land and further away from existing residential lands. The owner was unwilling to talk with them about relocating the crematory within his land or even a possible land-swap for the purpose of relocating the crematory further away from their development. The crematory is to sit in a modular home which could be easily relocated within the site. The owner has chosen to

locate the crematory in that corner mainly because it can't be seen from the human cemetery. Even to the extent to which that proposed crematory doesn't emit odor and there is no visible smoke, based on the manufacture's description of such equipment, it will emit particulate matter. The impact on this particulate matter on the residents in the adjoining development, based on its close proximity, is a real concern. The proposed location of the pet crematory will jeopardize the adjoining urban village development and respectfully requested Council deny the rezoning.

City Attorney Oast reminded Council that this is not a conditional zoning, even though Council has received information about the intended use from people on both sides of the issue. If the property is rezoned, then any use that is available within that District could be placed on that property and the particular location of the proposed pet crematory is not something that Council can attach as a condition in this rezoning.

In response to Councilman Russell, Ms. Cogburn said that a Unified Development Ordinance amendment was recently brought before Council concerning animal crematories and animal cemeteries. For a rezoning, staff looks at what zoning is good for the property as a whole, but does not examine anyone's particular plans.

Mayor Bellamy closed the public hearing at 6:23 p.m.

Councilman Russell supported the urban village district on a major corridor and he was concerned that the location of the proposed pet crematory would be right next to residential property.

In response to Councilman Mumpower, Mr. Funchess said that it was not uncommon that when a crematory is located within an area to have concern about emissions. Numerous studies have been done on emissions and noted that there is more particulate matter emitted by fireplaces or a flame broiled hamburger grill than there is a crematory.

Mr. Funchess said that they are trying to create a natural buffer between the human burial aspect of the cemetery and their pet care initiative, out of respect to families and in compliance with the Cemetery Commission. He said they have interacted with the FIRC Group who would have been willing to not oppose the location if the cemetery was willing to enter into an agreement to give up their right-of-way into the cemetery or do something different with their right-of-way. He said that if they had to relocate the pet crematorium, it would kill their project as they must build it on a periphery part of the cemetery with a dedicated access. He noted that in that location now is a vacated maintenance building which is far more unsightly than a nice modular building. He said they are a small business trying to find an initiative to create revenue for the City. He noted they do have the support of the Humane Society and other agencies. In addition, he noted that the crematory will only be run one day a week.

Councilman Newman said that this is one of the uses allowed in the Community Business I District and noted that these kind of crematories around the country are located in highly developed urbanized areas with no adverse affects on neighboring properties.

Vice-Mayor Davis would have preferred this come to Council as a conditional zoning request. He wondered if both parties couldn't meet and arrive at a win/win solution.

When Assistant Planning & Development Director Shannon Tuch said that we don't typically buffer with a straight rezoning between two high density uses, but we could with a conditional zoning request. Ms. Cogburn explained that the way our landscape ordinance works now is that buffering is between zones and not uses. Mayor Bellamy felt that should be addressed, as the uses have significant differences.

Mayor Bellamy felt she could support a conditional use request with additional landscaping and buffer requirements.

In response to Mayor Bellamy, Mr. Funchess said that to relocate the pet crematory in a different area on their property causes a problem with ingress and egress. Where the site is proposed is a perfect setting for a low impact type of development of a pet care area. The other areas of the cemetery offer more value for human development than pet care development. He said that they are willing to buffer, noting that the location is 45 yards from the point of the building in the housing development. In addition, he noted that the property swap mentioned by Mr. Jackson was to move the modular in a 100-year floodplain, which would inhibit their modular structure.

Councilwoman Cape was also interested in a conditional zoning request as we find that most problems are encountered when we are not sensitive to neighboring issues.

Upon inquiry of Mayor Bellamy, both property owners said that they would be willing to work on a compromise.

Councilman Mumpower moved to table this item indefinitely with the suggestion that the applicant work with the adjoining property owner and staff in order to refine their request. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Newman voting "no."

F. PUBLIC HEARING TO CONSIDER THE APPLICATION FOR NEIGHBORHOOD STABILIZATION PROGRAM FUNDS THROUGH THE N.C. DEPT. OF COMMERCE

RESOLUTION NO. 09-12 - RESOLUTION AUTHORIZING THE MAYOR TO APPLY FOR NEIGHBORHOOD STABILIZATION PROGRAM FUNDS THROUGH THE N.C. DEPT. OF COMMERCE

Mayor Bellamy opened the public hearing at 6:48 p.m.

Planning & Development Director Judy Daniel said that this is the consideration of a resolution authorizing the Mayor to approve the City's application for $3 Million of Neighborhood Stabilization Program (NSP) funds - a program initiated by the US Department of Housing and Urban Development and implemented by NC Division of Community Assistance. This public hearing was advertised on January 16 and 25, 2009.

On September 26, 2008, the U.S. Department of Housing and Urban Development (HUD) allocated $3.92 billion to all states and direct grants to particularly hard-hit areas trying to respond to the effects of high foreclosures and home abandonment. This Neighborhood Stabilization Program (NSP) is designed to provide targeted emergency assistance through HUD's Community Development Block Grant (CDBG) Program under the Housing and Economic Recovery Act of 2008 (HERA).

In conjunction with this program HUD allocated $52 million dollars of NSP funds to the North Carolina Division of Community Assistance (NC DCA) to be allocated to greatest needs areas of the state; and another $5 million as a direct entitlement to Mecklenburg County, reflecting an extraordinary need. According to NC DCA, these allocations were based on foreclosure statistic analysis by HUD. Buncombe County became eligible to apply for a portion of DCA's allocation as a result of DCA's need assessment that indicated that Buncombe was in one of the 23 qualifying counties.

In response to the NSP grant opportunity, staff has developed a proposal to utilize an estimated $3 million of grant funding to address the local foreclosure problem. This proposal seeks to strategically acquire foreclosed or abandoned properties that are demonstrating a negative impact to the surrounding neighborhood. Through the redevelopment for rental or

resale of these high impact properties, the goal is to foster market recovery of the greater neighborhood. Research performed via the NC Department of Commerce has illustrated that the 28806 zip code has a greater concentration of sub-prime mortgages and foreclosed properties; therefore staff intends to target strategic properties in this area.

She said that the resale or rental of the redeveloped properties will be targeted toward persons and families of low to moderate income levels. Mountain Housing Opportunities (MHO) and OnTrack Financial Education and Counseling have agreed to partner with the City to implement this program. MHO will serve as redeveloper for selected properties, as well as assisting with the financing options available to qualified homebuyers to include Down Payment Assistance that will also be funded through this program. OnTrack will provide the 8 hours of required Housing Counseling to these potential homebuyers. Within the designated scope of this grant, 70% of the grant funding must target an end-user beneficiaries group up to 120% area median income, while 30% of the grant funding must be used to serve those below 50% area median income.

This action complies with the Strategic Operating Plan in that applying for NSP funding shows that Council is proactively pursuing strategies supporting aspects of the comprehensive affordable housing plan to increase the supply of affordable workforce housing.

Pros:

- Asheville is awarded $3 Million by HUD to create affordable housing.
- Local non-profits with experience implementing programs with the use of CDBG funds have agreed to partner with the NSP. This greatly increases the likelihood of this program's success
- Administrative and staff costs for program provided by HUD as a part of grant award.
- Stabilizes and or improves public safety in neighborhoods already identified as having issues with crime.

Cons:

- Very competitive application process with other cities and non-profits in NC. Buncombe County has lower need than other areas of the state, therefore, funding award is questionable
- This is not a foreclosure prevention program, funds are only used post foreclosure

If awarded, positive impact that CDBG funds will increase by $3 Million.

Ms. Daniel said that this is a very competitive process. She said that City staff recommends City Council adopt a resolution authorizing the Mayor to approve the City's application for $3 Million of Neighborhood Stabilization Program funds; a program initiated by the US Housing and Urban Development Department and implemented by NC Division of Community Assistance.

Ms. Nikki Reid, the City's Real Estate Manager, said that the intent of this grant is to address neighborhood destabilization specifically as it relates to the foreclosure crisis. Within the given scope of the grant, staff has developed a proposal that seeks to strategically acquire properties that have been foreclosed or abandoned, resulting in a negative impact to the surrounding neighborhood. Through the redevelopment of these high impact properties, the goal is to foster stabilization of the greater neighborhood.

Research performed by the N.C. Dept of Commerce has illustrated that the 2006 zip code area has a greater concentration of sub-prime mortgages and foreclosed properties; therefore, staff intends to target strategic properties in this area.

The success of this application depends on the strength of our local partnerships. The City has partnered with MHO and OnTrack Financial Education and Counseling to implement this program. The City of Asheville, utilizing the CDBG program administration expertise, will function as stewards of the grant and also provide the administration and assist with site selection and approval. MHO will perform the property acquisition. Please note that the grant requires that the property be purchased at a 15% below appraised price. MHO will also provide for the redevelopment of the properties and the resale or rental of the properties, as well as work with potential homebuyers on financing. OnTrack will provide the 8 hours of required homebuyer counseling to these potential buyers.

As required by the grant guidelines, 30% of these funds must target an end user beneficiary group at 50% or below area median income. The remaining 70% of the funds should be targeted to an end user group from 51% up to 120%.

To realize the intent of this grant, the awarded funds must be obligated within 18 months of the award grant. The date of notification for those entities receiving funds is February 16, 2009. Therefore, she recommended authorization to submit this application.

Mayor Bellamy closed the public hearing at 6:52 p.m.

In response to Councilman Mumpower, Ms. Reid said that the grant allows for up to 5% over and above the requested award to be utilized toward administration costs, which is approximately $150,000.

Councilman Mumpower spoke against this action as this will be paid for by (1) borrowed dollars that our children or grandchildren will have to pay for; or (2) tax dollars. He felt for the City to participate in this initiative (which is appealing) at this stage in our economic dilemma is not appropriate.

Councilwoman Cape felt this is an approach to deal with the dramatic things going on in our country, and in the long run the foreclosures are impacting neighborhoods terribly. She felt if there is $52 Million going to the State of North Carolina and we have a need in our community of people who are losing their homes and those who need homes, we would not be fulfilling our duty if we didn't participate in this process. As difficult as things are, we have an obligation to invest in ourselves.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-12. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 31 – PAGE 410

V. UNFINISHED BUSINESS:

A. RESOLUTION NO. 09-13 - RESOLUTION ADOPTING THE CITY OF ASHEVILLE'S LEGISLATIVE PROGRAM FOR 2009 SESSION OF THE NORTH CAROLINA GENERAL ASSEMBLY

City Attorney Oast said that the 2009 legislature convenes on January 28. Usually, one of their first orders of business is to establish the deadlines for submission of local legislative requests; those deadlines are usually in early to mid March.

There was considerable discussion regarding the conflict of interest law, especially as it relates to Councilman Miller. City Attorney Oast said that City Council is very conscientious about recognizing potential conflicts and consulting him in advance. He said that conflict issues are often situational and fact specific. Each potential conflict is reviewed on a case by case basis. He has spoken with the School of Government and has met with Councilman Miller regarding his roles and responsibilities with regard to the Chamber of Commerce and the Buncombe County Tourism Development Authority. Regarding the particular issue of the hotel/motel tax, it was his opinion that Councilman Miller does not have a disqualifying conflict of interest. Mayor Bellamy was acutely aware of the conflict of interest provisions when she was employed with Mountain Housing Opportunities while serving on Council and as Mayor. She wanted to make sure that we are transparent for the public trust.

Discussion and voting results occurred on the following topics (prior to votes taken, Mayor Bellamy asked for public comment and received none):

a. A one percent dedication of hotel/motel tax revenue to be used for debt service on a near term upgrade of the Asheville Civic Center, consistent with the recommendation of the Task Force for the Future of the Civic Center. Should the one percent be beyond what Council is comfortable in asking, at least a half percent should be requested for the Civic Center Capital Improvement Program. It is a fair and normally dedicated tax that will help alleviate the burden of the local taxpayer as is done throughout the country, and, particularly, North Carolina. Recognizing the downturn in the economy, we may not be successful in this session but the request must be persistently included in our legislative agenda.

   After considerable thought, Councilman Miller suggested the following language, in lieu of Vice-Mayor Davis' language: "Actively engage Buncombe County tourism leaders and local delegation officials to develop possible taxable policy options designed to improve the overall health and awareness of the Asheville area grand experience."

   As Vice-Mayor Davis appreciated Councilman Miller's effort in crafting different language, he explained why he preferred his language be included in the State legislative package.

   Vice-Mayor Davis said that research done by the Task Force for the Future of the Civic Center confirmed almost all arenas, conference, convention and performance centers throughout the state enjoy a percentage of hotel/motel room tax, either in the initial construction or through the life of the facility for capital improvement. The percentage varies from a half to three percent but an increment of room tax is consistently applied to the communities' public gathering places. Once again, Asheville is treated uniquely; other venues are not required to garner room nights as a condition to receive proceeds from room tax. He also remains firmly convinced that the Asheville Civic Center is directly responsible for many room nights and, at the very least, is a direct contributor to the vibrant downtown and the destination it has become.

   Councilman Newman moved to adopt the language proposed by Vice-Mayor Davis above. This motion was seconded by Vice-Mayor Davis and carried on a 4-3 vote, with Councilman Miller, Councilman Mumpower and Councilman Russell voting "no."

b. Repeal of Sullivan Acts.

c. Renew request (last proposed in 2005) to facilitate voluntary annexation of properties near the airport (proximity to Fletcher issue).

d. Authorization and funding for "quality of life (nuisance court)" enforcement program, similar to other N.C. cities.

e. Address issue of municipal incorporation of rural areas (this may be done in connection with review of annexation law).

f. Provide / clarify authority to regulate vehicle towing from parking lots.

Councilwoman Cape moved for the adoption of letters b – f above. This motion was seconded by Councilman Mumpower and carried unanimously.

g. Legislation allowing for a broader range of implementation of local affordable housing programs.

Councilwoman Cape moved for adoption of letter g above. This motion died for lack of a second.

Councilman Newman asked City Attorney Oast to look into this broad issue regarding any legislation that has already been enacted.

h. Clarifying authority of City to place conditions on sale of certain property.

Councilwoman Cape moved for the adoption of letter h above. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

i. Strengthen local authority regarding illegal immigration.

Councilman Mumpower moved for the adoption of letter i above. This motion was seconded by Councilman Russell and carried on a 6-1 vote, with Councilwoman Cape voting "no."

j. Support creation by N.C. Utilities Commission of an organization to design and implement statewide plan for energy efficiency and conservation (NOTE: legislative action may not be needed).

City Attorney Oast said that more information on this item will be available soon and asked Council to delay action on this issue.

k. Asheville First will be voted on at a later date since Council does not have language on this.

City Attorney Oast said that since submitting that report, Council has specifically expressed interest, at the retreat and other occasions, in legislation regarding the hotel tax, towing regulation, enhanced "quality of life" ordinance enforcement support (graffiti, litter, noise, etc.).

Discussion and voting results occurred on the following issues (prior to votes taken, Mayor Bellamy asked for public comment and received none):

1. The initiative being pursued by some cities (notably Durham) to design and implement Statewide plans for energy efficiency and conservation will require legislation.

2. The recent vacancy on Council revealed the need to more closely align our charter provision with State law, or simply repeal it.

3. The N.C. League of Municipalities has adopted its legislative agenda for 2009.

Councilwoman Cape moved for the adoption of item 3 above. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

4. The Asheville Chamber of Commerce will soon be adopting its 2009 Legislative Agenda, and Council may wish to review it as well.

City Attorney Oast said that as always, we will continue to review legislation proposed or introduced, on behalf of other municipalities, and to explore ideas that may require legislative support, and bring those suggestions to you for consideration.

Mayor Bellamy said that if Council approves this today, Council reserves the right to see on-going legislation as its drafted and have an opportunity to take a position on those. She said that the last date Council can add or delete items will be early to mid-March.

At 7:50 p.m., Mayor Bellamy announced a short break.

RESOLUTION BOOK NO. 31 – PAGE 411

B. RESOLUTION NO. 09-14 - RESOLUTION ESTABLISHING THE CITY OF ASHEVILLE'S FEDERAL PRIORITIES AND FEDERAL FUNDING REQUESTS FOR FISCAL YEAR 2010-11

Economic Development Director Sam Powers said that this is the consideration of a resolution authorizing the City Manager to submit the City's priorities, appropriations requests and legislative requests to Asheville's congressional delegation and staff for consideration in the 111th Congress.

The 111th Congress convened on Jan 8th, 2009. Congressional staff usually wishes to receive any funding requests from municipalities in early February to allow time for research and placement.

Of note of existing priorities, the legislation that has adversely affected Asheville Transit funding has finally been amended in favor of the City and other similarly sized systems. The bill allows transit systems serving urbanized areas whose population went from under 200,000 to over 200,000 in population in the 2000 census to use a portion of their (Fiscal Year) 2008 and 2009 urbanized area formula grants for operating costs. Transit systems in these areas can use an amount equal to 50 percent of the urbanized area formula grants received in Fiscal Year 2002.

This action complies with the following City Council Strategic Operating Plan goals: (1) Ensure financial accountability by matching resources with strategic initiatives and creating meaningful performance measures; and (2) Proactively pursue funding opportunities with state and federal economic stimulus packages.

City staff recommends City Council adopt a resolution authorizing the City Manager to submit the City's priorities, appropriations requests and legislative requests to Asheville's congressional delegation and staff for consideration in the 111th Congress.

Below are the City Council's currently adopted federal funding priorities:

- W.C. REID CENTER

Extensive renovation to or rebuilding of both interior and exterior and utilities of the W.C. Reid Center for Creative Arts, a 37,000-square foot community center to support a full-service, community based recreation program and multi-disciplinary arts program with an emphasis on providing services to at-risk youth and their families.
Amount requested: $4 to $6 million.

- ENERGY CONSERVATION RETROFITS FOR CITY BUILDINGS
  The Building Energy Conservation Retrofits appropriations will allow the City of Asheville to install programmable thermostats, light occupancy sensors, high energy efficient lighting in all 51 city owned buildings after which a holistic social marketing campaign will be conducted to encourage employee behavior change. The retrofits will provide significant cost savings through utilities and decrease the carbon footprint of the city organization, while providing a strong foundation for a social marketing program to effectively create sustainability behavior change.
  Amount requested: $749,200.

- TRAFFIC SIGNAL PREEMPTION
  A Traffic Signal Preemption System is an electrical device(s) that allow a traffic control signal to respond by giving priority to approaching response vehicles that are outfitted with special equipment. Such systems are designed to increase the safety of the public and responders, reduce emergency response times, and enhance public transit operations.
  Amount requested: $495,000.

- REGIONAL PUBLIC SAFETY TRAINING FACILITY
  The Regional Public Safety Training facility is a partnership between WNC local governments, state government and AB Tech. The facility will include an emergency vehicle driving pad, burn building, and a rescue tower. The project is a modular project and can be done in phases.
  Amount requested: $4 million.

- BUS REPLACEMENT
  The project entails the purchasing of fifteen (15) 30-foot hybrid buses to replace 75% of the fleet which are reaching their life-cycle, with more than ten (10) years in operations. This is a multi-year project that intents to replace the fleet in a three year period. The City is recommending buying hybrid buses, or buses using other energy efficient technology, instead of diesel. The use of alternative fuels will help the City to achieve the carbon emission reduction goals adopted by City Council. The project will affect positively the Western North Carolina population that lives in Asheville, Weaverville and Black Mountain and depends on transit to perform the daily activities, providing a more reliable and comfortable service. At the same time will bring benefits to the environment, reducing pollution and improving the quality of life.
  Amount requested: $7,875,000 over three (3) years ($2,625,000/year).

Below are the federal legislative priorities:

- Senate Bill 1738 "Combating Child Exploitation Act of 2007" to improve the Internet Crimes Against Children Task Force to increase resources for regional computer forensic labs, and investigate and prosecute predators.

- HR 1692 "The Fighting Gangs and Empowering Youth Act of 2007" which contains many things that focus on making sure that our youth have alternatives from gangs as well as increase penalties for gang activity.

- Senate Bill 1745 "Departments of Commerce and Justice, Science, and Related Agencies Appropriations Act, 2008" for support of our Weed and Seed program that is funded under this Act.

- "The Safe, Accountable, Flexible and Efficient Transportation Equity Act of 2003" (1) Sec. 9002 – extension of the highway-related taxes and trust fund; (2) Sec. 9003 – extension of tax benefits for alcohol fuels; (3) Sec. 9004 – private activity bonds for surface transportation infrastructure; and (4) Sec. 9005 – all alcohol fuel taxes transferred to highway trust fund.

- PL 110-140 "The Clean Energy Act of 2007" (HR 6) to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy.

- S. 1675 "Local Community Radio Act of 2007" to implement the recommendations of the Federal Communications Commission report to the Congress regarding low-power FM service.

- S. 234 "Wireless Innovation Act" to make broadband available to unconnected neighborhoods and communities – especially rural and mountainous areas – by exploiting unused frequencies in the broadcast spectrum known as "white spaces."

- Support to fund the expansion of the ERC broadband and fiber optic network in the region for education, medical and emergency service support.

- Lend support to the Land of Sky Regional Council of Government request for funding for a Comprehensive Economic Development Strategy – Regional Growth Management Planning Initiative for Western North Carolina.

- Support funding for energy efficiency and conservation block grants.

- Continued prioritization of the completion of I-26 components through Asheville.

- Accelerated use of Federal resources in local action on Asheville's drug distribution network.

- Enthusiastic Federal enforcement of existing laws affecting illegal immigration in Asheville.

Mayor Bellamy recommended the following items be removed from the federal package as both are moving forward: (1) W.C. Reid Center; and (2) Senate Bill 1738.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Vice-Mayor Davis moved to adopt Resolution No. 09-14, with all legislative items outlined by Mr. Powers excluding (1) W.C. Reid Center and (2) Senate Bill 1738. This motion was seconded by Councilman Miller.

Mr. Greg Borom, Director of Advocacy and Community Engagement for Children First, asked Council to (1) expand federal funding for child care subsidy programs; and (2) state child health insurance funding program.

Vice-Mayor Davis and Councilman Miller supported amending their motion to include the two items requested by Mr. Borom to the City's federal legislative agenda.

At Councilwoman Cape's request, Assistant Director of Transportation & Engineering updated Council on the status of the traffic signal preemption program.

In response to Councilwoman Cape, Vice-Mayor Davis, Chair of the Public Safety Committee, said that the regional public safety training facility is moving forward.

Councilman Mumpower felt that since all of these federal legislative items involve premium dollars, he could not support the motion.

The amended motion made by Vice-Mayor Davis and seconded by Councilman Miller carried on a 5-2 vote, with Councilman Mumpower and Councilman Russell voting "no."

RESOLUTION BOOK NO. 31 – PAGE 413

VI. NEW BUSINESS:

A. RESOLUTION NO. 09-15 - RESOLUTION REGARDING RECOMMENDATIONS FOR ECONOMIC STIMULUS PACKAGE

Mayor Bellamy said that Ms. Julie White, Director of the N.C. Metropolitan Mayor's Coalition, suggested Council adopt the following resolution in support of cities playing a role in the federal stimulus package. Their efforts are to put forth a list of ready to go projects to demonstrate cities ability to spend stimulus dollars quickly on worthy public infrastructure projects that will create jobs. They plan to collect all signed resolutions and distribute them to our congressional delegation and state elected officials. read the following resolution: "WHEREAS, The United States economy entered into a recession in December 2007 and it is widely agreed that economic stimulus is critical; and WHEREAS, To stimulate the economy, President-elect Barack Obama is working closely with Congress to prepare an economic stimulus package of up to $1 trillion they hope to pass soon after the President-elect's inauguration; and WHEREAS, previous stimulus bills have proven most effective if legislation is enacted soon after the recession is identified, funds are spent quickly while unemployment is high and new jobs are created when needed; and WHEREAS, North Carolina's jobless rate soared in December to 7.9 percent, the highest in 25 years; and WHEREAS, on December 19th, the North Carolina Metropolitan Mayors Coalition, representing the 26 largest city mayors, released a $2.8 billion list of shovel-ready public infrastructure projects that will immediately put citizens to work in construction, public safety, office, and retail jobs; and WHEREAS, academic research indicates that the list of upgrades for roads, public buildings, water systems, and other essential infrastructure would create nearly 100,000 jobs; and WHEREAS, the most efficient way to distribute federal funding is through existing federal programs; and WHEREAS, economic stimulus legislation should allow for a substantial role for municipal government, making it as easy as possible for local funding recipients to access and spend stimulus funds. NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ASHEVILLE THAT the City of Asheville recommends that Congress consider the following recommendations as it begins work on an economic stimulus package, to (1) Include Funding for The Economic Development Administration's Public Works and Infrastructure Program, and Economic Adjustment Assistance; (2) Include Funding for HUD's Community Development Block Grant Program (CDBG); (3) Include Funding for Energy Efficiency and Conservation Block Grant Program (EECBG); (4) Distribute State Revolving Loan Fund Dollars as Direct Grants; (5) Do Not Limit The Corps of Engineers' Ability to Spend Stimulus Funds; and (6) Distribute Transportation Stimulus Funds Through The Surface Transportation Program (STP). FURTHERMORE, BE IT RESOLVED THAT the City of Asheville recommends that the State of North Carolina strongly partner with cities when deploying these funds to spur our local economies and choose a wide range of local infrastructure projects that will create long-term positive benefits for our citizens."

Mayor Bellamy said that Council has been provided with information on some staff initiatives. She said this is not an issue Council will need to debate tonight as the federal government will spend time debating the merits or not. What is before Council tonight is a list of shovel-ready projects that could move forward. Since there has not been any grant or loan applications (which will be brought before Council), all Council is saying what can we use the shovel-ready money for. Staff compiled a list for Council review and if we want to participate, do we like what staff has put before us. She is asking if the City would like to participate in the economic stimulus package that is being put together.

Councilman Mumpower felt it was not the Mayor's place to instruct Council on how to debate an issue. There should have been a discussion on the policy question of whether the Mayor and City staff should have acknowledged the City's willingness to participate for $122 Million in special interest projects or sent out any list. He felt to distribute this list without public illumination was wrong.

Mayor Bellamy said Council can talk about the direction they would like to take and if this something they would like to pursue if, and when, that comes forward. Staff can then be prepared to put together grant applications for shovel-ready projects. We cannot deny the City of Asheville has a lot of capital needs. We have an aging water and transportation system. If we put together all the capital needs we have, the number would be staggering. To act like we don't have shovel-ready projects or a list of capital improvement projects is wrong. She noted that every year our Capital Improvement Plan is deliberated throughout the budget discussions.

Councilman Newman moved to give direction to City Manager Jackson to work with staff to identify capital projects that could be eligible for the types of infrastructure investments that will be forthcoming in the economic stimulus package developed by Congress and to share information with Council and our legislators about projects that may meet that criteria in Asheville; and, while City Council has the opportunity to disapprove any projects they don't want to fund, it is the intent for Asheville to participate in the infrastructure improvements that are likely to be forthcoming through the economic stimulus bill being developed by Congress. This motion was seconded by Councilwoman Cape.

Mr. Greg Borom, representing Children First Communities and Schools of Buncombe County, provided Council with their requests for inclusion in the economic stimulus bill: (1) improvement of our infrastructure and transportation services in lower income communities; (2) create job opportunities for people who live in lower income communities; (3) investment in transit; (4) encourage and partnership with Asheville GO and other job training programs to create a local green workforce; and (4) sidewalk on Louisiana Avenue to Emma Road.

Councilman Mumpower felt Council would be supporting a discredited idea and didn't believe the City should participate in it.

Councilman Newman said this is not an endorsement of any stimulus bill, but if there are investments forthcoming, we are directing the City Manager to make sure that any of our capital projects that may meet that criteria be reviewed for potential participation.

Councilman Miller felt that as a community Asheville needs to be at the table and ready to move forward.

When Mayor Bellamy asked for a friendly amendment to the motion to ask for an e-verify component to ensure that we are putting local people to work and being transparent as possible, Councilman Newman was not opposed to adding the language, however, he felt it was a different than the intent of his motion.

Mayor Bellamy said when she was in Washington meeting with mayors on this particular issue, they heard about the number of job losses on that particular day – 30,000 Americans lost their jobs. The Chief of Staff talked about making sure we employ Americans and that main street is impacted positively. It would be her hope that as we put together shovel-ready projects that we make the commitment to hire local people. If we created a list of all our capital needs, it would far exceed the $122 Million, e.g., infrastructure repairs; two floors in the City Hall building that aren't being used to their highest level because they need to be repaired; Council is working on the water system infrastructure (which is one of the oldest in the state); the Civic Center, etc. Every other year we elect congressmen, every six years we elect our senators and every four years we elect our president and that is the group of people who are deciding how they are going to direct our country. We need to see how we can work with them. We need to hold ourselves accountable and be transparent to our citizens.

After Mayor Bellamy asked for public comment and received none, the motion made by Councilman Newman and seconded by Councilwoman Cape carried on a 6-1 vote, with Councilman Mumpower voting "no."

Mayor Bellamy felt that we needed an e-verify component in our applications and contracts that will verify the status of individuals who are working on our projects to make sure they are local people. City Attorney Oast said that the use of the e-verify system may be a condition of projects that are funded with federal grants.

Councilman Mumpower moved to direct the City Manager to employ e-verify for any projects that come to Asheville out of the economic stimulus package. This motion was seconded by Councilman Russell.

After Mayor Bellamy asked for public comment and received none, the motion made by Councilman Mumpower and seconded by Councilman Russell carried unanimously.

Councilman Miller moved to adopt Resolution No. 09-15, recommending that Congress consider the following recommendations as it begins work on an economic stimulus package, to (1) Include Funding for The Economic Development Administration's Public Works and Infrastructure Program, and Economic Adjustment Assistance; (2) Include Funding for HUD's Community Development Block Grant Program (CDBG); (3) Include Funding for Energy Efficiency and Conservation Block Grant Program (EECBG); (4) Distribute State Revolving Loan Fund Dollars as Direct Grants; (5) Do Not Limit The Corps of Engineers' Ability to Spend Stimulus Funds; (6) Distribute Transportation Stimulus Funds Through The Surface Transportation Program (STP); and (7) Funding Infrastructure Improvements to our Nation's Arts and Cultural Institutions. This motion was seconded by Vice-Mayor Davis.

Councilwoman Cape asked for a friendly amendment to add the appropriate language, that is located in the stimulus package, regarding infrastructure funding for public school systems and education. Councilman Miller and Vice-Mayor Davis accepted the friendly amendment.

The Co-Director of Asheville GO (Green Opportunities) supported job training in that we need to ensure that those individuals have the training they need to access the jobs.

Councilwoman Cape indicated she would like to add workforce development to the resolution.

Councilman Mumpower felt we are spending money that does not exist and felt adoption of this resolution was a mistake.

The amended motion made by Councilman Miller and seconded by Vice-Mayor Davis carried on a 5-2 vote, with Councilman Mumpower and Councilman Russell voting "no."

Upon inquiry of Vice-Mayor Davis, City Manager Jackson said that the Azalea Road project will be reviewed to see if it meets the criteria for the final list for Council approval.

RESOLUTION BOOK NO. 31 – PAGE 417

B. BOARDS & COMMISSIONS

Regarding the Board of Adjustment, Councilwoman Cape moved to (1) reappoint Robert Middlemas as a Regular Member; (2) reappoint James Sheeler as an Alternate Member; and (3) appoint Janet Whitworth as a Regular Member. This motion was seconded by Mayor Bellamy and carried unanimously. It was the consensus of Council to interview Phillip Hardin, Juma Jackson and Eugene Britton for two alternate positions.

Regarding the Community Relations Council, Councilwoman Cape moved to reappoint Jill Fromewick. This motion was seconded by Mayor Bellamy and carried unanimously. It was the consensus of Council to interview Marvin Kent Purser and William Moore.

Regarding the Downtown Commission, Councilman Newman moved to (1) reappoint Brad Galbraith and Kitty Love; and (2) reappoint Pat Whalen's term to expire April 1, 2009. This motion was seconded by Councilman Mumpower and carried unanimously.

Regarding the Sustainable Advisory Committee on Energy & the Environment, Councilman Mumpower moved to (1) reappoint Ashley Featherstone; and (2) appoint Matthew Raker. This motion was seconded by Councilman Newman and carried unanimously.

Regarding the Firemen's Relief Fund, Councilman Newman moved to reappoint Leesa Gibbs. This motion was seconded by Councilwoman Cape and carried unanimously.

Regarding the Greenway Commission, Councilwoman Cape moved to reappoint Marc Hunt. This motion was seconded by Councilman Russell and carried unanimously.

Regarding the Metropolitan Sewerage District Board, Councilman Newman moved to reappoint Councilman Russell. This motion was seconded by Councilman Mumpower and carried unanimously.

Regarding the Tree Commission, Councilwoman Cape moved to (1) reappoint Starr Silvis and Bob Gale. This motion was seconded by Councilman Miller and carried unanimously. In addition, Councilwoman Cape moved to appoint Brandee Boggs. This motion was seconded by Councilman Newman and carried unanimously.

Regarding the School Board, Councilwoman Cape moved to reappoint Gene Bell and Al Whitesides to the Asheville School Board. City Clerk Burleson was instructed to place this item on the next City Council meeting agenda. It was the consensus of Council to send the questions from the prior School Board process to eligible candidates for response.

Regarding the vacancies left by former-Councilwoman Holly Jones, it was the consensus of Council (1) that Councilman Mumpower be the liaison to the Firemen's Relief Fund; (2) that Councilman Miller be the liaison to the Greenway Commission; (3) that Councilman Mumpower be the ex-officio non-voting member to the Buncombe County Tourism Development Authority; and (4) that the member to the Pack Place Board of Trustees be discussed at the next City Council Boards & Commissions Committee meeting.

It was the consensus of Council that the City Council Public Safety Committee's make-up be: Vice-Mayor Davis (Chair), Mayor Bellamy and Councilman Newman. It was noted that the Public Safety Committee would be moving their regular date and time to the 3rd Tuesday of each

month at 3:30 p.m. in the 4th Floor Training Room of the Municipal Building. This date and time change will be confirmed by City staff.

It was the consensus of Council that the City Council Boards & Commissions Committee will change to the 2nd Tuesday of each month at 4:15 p.m., in Room 209 of the City Hall Building, however, the February 10, 2009, time will change, due to interviews.

It was the consensus of Council that the City Council Finance Committee's make-up be: Councilman Russell (Chair), Mayor Bellamy and Councilman Miller.

VII. OTHER BUSINESS:

Miscellaneous

Councilwoman Cape announced there is only one more night to submit an application for the 33rd Year Building Bridges Program in our community.

Councilman Miller reminded the public that the best stimulus package we can provide is to shop and eat locally. Mayor Bellamy urged the public to buy locally.

Councilman Russell thanked Mayor Bellamy and Vice-Mayor Davis in lobbying a group that is looking at relocating their convention to Asheville.

Claims

The following claims were received by the City of Asheville during the period of December 9, 2008, through January 22, 2009: AT&T (Water), Arleen Holliday (Traffic Engineering), Paul Presley (Water), Progress Energy (Parks & Recreation), Ann E. Wilder (Water), and AT&T (Water).

These claims have been referred to Asheville Claims Corporation for investigation.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Gene Hampton spoke to Council about the need for quality education, as quality education and quality government equals quality of life for all.

Mr. Brian Festa spoke to Council about the need for a conscious evolution in the way we teach in the public school system.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:25 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – February 10, 2009 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Cape gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING FEBRUARY 2009 AS "BLACK HISTORY MONTH"

Mayor Bellamy read the proclamation proclaiming February, 2009, as "Black History Month" in the City of Asheville. She presented the proclamation to Ms. Pat Griffin, Outgoing President of the Stephens-Lee Alumni Association, who briefed City Council on some activities taking place during the month.

B. PROCLAMATION RECOGNIZING THE 100TH ANNIVERSARY OF THE NAACP

Mayor Bellamy read the proclamation recognizing the 100th Anniversary of the NAACP. She presented the proclamation to Mr. John Hayes, President of the Asheville NAACP, who briefed City Council on some activities taking place during the celebration.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "B", "C", "D", "E", "H", "I" and "J" were removed from the Consent Agenda for discussion and/or individual votes.

At the request of Mayor Bellamy, Consent Agenda Item "T" was removed from the Consent Agenda for discussion and/or an individual vote.

A. APPROVAL OF THE MINUTES OF THE FORMAL MEETING HELD ON JANUARY 27, 2009

B. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH BUNCOMBE COUNTY FOR THE PROVISION OF PARATRANSIT SERVICES

This item was removed from the Consent Agenda for discussion and/or an individual vote.

C. BUDGET AMENDMENT FROM COMMUNITY DEVELOPMENT BLOCK GRANT FUNDS TO SET UP THE PROJECT BUDGET FOR THREE SHELTERS IN HIGH DEMAND SPOTS SERVING LOW OR EMPLOYMENT AREAS ALONG THE MAIN CORRIDORS SERVED BY THE TRANSIT SYSTEM

This item was removed from the Consent Agenda for discussion and/or an individual vote.

D. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH ECON CONSTRUCTION TO CONSTRUCT THE VETERANS MEMORIAL AT MEMORIAL STADIUM

This item was removed from the Consent Agenda for discussion and/or an individual vote.

E. RESOLUTION AUTHORIZING THE CITY MANAGER TO GRANT TWO CONSERVATION EASEMENTS FOR TWO PROPOSED PROJECTS TO RESTORE STREAM BANKS IN MALVERN HILLS PARK AND WEST ASHEVILLE PARK AS PART OF AN AGREEMENT WITH RIVERLINK INC.

This item was removed from the Consent Agenda for discussion and/or an individual vote.

F. ORDINANCE NO. 3697 - BUDGET AMENDMENT TO INCREASE THE CIVIC CENTER FUND BUDGET TO REFLECT UPDATED FISCAL YEAR 2008-09 REVENUE AND EXPENDITURE PROJECTIONS

Summary: The consideration of a budget amendment to increase the Civic Center Fund budget by $136,000 to reflect updated Fiscal Year 2008-09 revenue and expenditure projections.

Primarily due to two two-night concerts last fall, concessions revenues are up significantly. At the same time, concessions expense budgets are running low. Civic Center Fund revenues and expenditures are expected to exceed budget by the end of Fiscal Year 2008-09. As a result, staff has calculated an updated estimate of the expected revenues and expenses in the Civic Center Fund. In order to fund anticipated expenses over the second half of the current fiscal year, staff is recommending that the Civic Center Fund expenditure budget be increased by $136,000. The additional revenue generated by concessions will cover the cost of the budget amendment; therefore no additional transfer from the General Fund is required. Staff is estimating that the year-end operating deficit for the Civic Center will be slightly less than the budgeted deficit.

This action complies with the City Council Strategic Operating Plan in that it supports the Civic Center as a regional entertainment destination and improves the Civic Center customer experience.

This item has been reviewed by the Civic Center Commission and, at its meeting on February 3, 2009, members unanimously recommended approval.

Pro:

- Provides sufficient budget authorization for anticipated expenditures in the Civic Center Fund without increasing the General Fund subsidy.

Con:

- None

Year-end operating deficit for the Civic Center is projected to be less than budgeted. This amendment is funded with Civic Center operating revenue; therefore no additional transfer from the General Fund is required.

City staff and Civic Center Commission recommend City Council approve a budget amendment to increase the Civic Center Fund budget by $136,000 to reflect updated Fiscal Year 2008-09 revenue and expenditure projections.

ORDINANCE BOOK NO. 25 – PAGE 172

G. RESOLUTION NO. 09-19 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A THREE-YEAR CONTRACT WITH MAIL MANAGEMENT SERVICES TO PROVIDE MAIL SERVICES FOR THE CITY OF ASHEVILLE

Summary: The consideration of a resolution authorizing the City Manager to enter into a three-year contract with Mail Management Services to provide mail services for the City of Asheville for an amount not to exceed the total approved budget for postage and contracted mail services each fiscal year.

City Council approved $537,417 to pay for postage and mail services for the City of Asheville general operations and enterprise funds as part of the Fiscal Year 2008-09 budget.

The City provides municipal services to more than 60,000 accounts. The billing data for this customer base is developed primarily from water meters, business license, permits and general correspondence to citizens and visitors in Asheville. The customer base is divided into multiple billing cycles and by general information correspondence each month. All water, sewer and storm water accounts are billed monthly, with the expectation of a payment being received from each monthly billing.

The City issued a Request for Proposals to contract with a service provider to provide mail services. The lowest, responsible bid was received from Mail Management Services, LLC, 88 Roberts Street, Asheville, N.C., for pricing based on volume and services to the City for a cost not to exceed the approved budget for postage and contracted services. Therefore, the total cost of the service in FY 08/09, including the postage that Mail Management Services, LLC will pay on behalf of the City, will be $537,417. Postage and service costs will vary from year to year based on postage rate, volume, type of service provided.

This action complies with the City Council Strategic Operating Plan in that it provides for greater fiscal responsibility by controlling costs.

Pros:

- Provide more predictable pricing for mail services
- Lower costs for mailing city bills and correspondence

Con:

- None

Funding for postage and mail services for the City of Asheville as appropriated in the Fiscal Year 2008/09 budget.

City staff recommends City Council to adopt a resolution authorizing the City Manager to enter into a contract with Mail Management Services, LLC to provide mail services to the City of Asheville for the amount of the approved budget for postage and contracted services.

RESOLUTION BOOK NO. 31 – PAGE 422

H. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF HUMAN SERVICES' INTERAGENCY COUNCIL ON COORDINATING HOMELESS PROGRAMS TO FUND HOMELESS INITIATIVE DATA COLLECTION

This item was removed from the Consent Agenda for discussion and/or an individual vote.

I. BUDGET AMENDMENT FROM THE BUNCOMBE COUNTY BOARD OF ELECTIONS FOR THE SENIOR OPPORTUNITY CENTER

This item was removed from the Consent Agenda for discussion and/or an individual vote.

J. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH JLS COMPANY, LLC TO CONSTRUCT THE HOMINY CREEK SECTION OF THE FRENCH BROAD RIVER GREENWAY

This item was removed from the Consent Agenda for discussion and/or an individual vote.

K. ORDINANCE NO. 3699 - BUDGET AMENDMENT FOR THE PARKER AVENUE WATER LINE RELOCATION PROJECT

Summary: The consideration of a budget amendment, in the amount of $40,000, for the installation of new water service lines and meters on Parker and Wood Avenues.

While installing a new waterline as part of the revenue bond project, the Water Resources Department identified approximately 23 service lines and meters along Parker and Wood Avenue which are connected to existing waterlines of insufficient size and condition. These services must be reconnected to the new waterlines in order to provide reliable water service to these existing water customers. This project will be set up as a separate capital project from the water system improvement projects and will not be funded with revenue bond funds. It will be funded with surplus funds from completed capital projects.

Three quotes were received for this project as part of an informal bidding process:

1.	S E Stewart & Son Plumbing	$29,970
2.	Wolfpen and Associates	$68,400
3.	Pipeline Utilities	$99,450

These quotes have been reviewed by the Water Resources Department and the City's Office of Economic Development (Minority Business Plan Compliance) with both of these offices recommending approval and award to the lowest bidder, S E Stewart & Son Plumbing, 314 Riverside Drive, Asheville, N.C.

The Water Resources Department has added a construction contingency of $10,030 to the lowest quote of $29,970 for a total project budget of $40,000. A construction contingency will allow for unexpected expenses related to this project. Even with an adequate construction contingency added, S E Stewart & Son Plumbing is still the lowest bidder on the project.

This project is part of the City Council strategic plan to improve City infrastructure.

Pro:

- The new water service lines and meters will replace old water service lines and meters, will coincide with planned street improvements and will provide more reliable service for the approximately 23 residential customers.

Con:

- Failure to approve the contract will result in old and undersized waterlines and meters remaining in place, which will result in water service for these specific connections to be of a lesser service level, meaning more frequent outages and low water pressures.

Cost of the Parker Avenue Water Service Line Project is estimated at $40,000. The lowest quote from S E Stewart & Son Plumbing is $29,970 but a contingency of $10,030 has been added to account for unexpected expenses for a total project budget of $40,000. These funds are available in the Water Resources Capital Projects Fund.

City staff recommends City Council approve a budget amendment, in the amount of $40,000, for the installation of new water service lines and meters on Parker and Wood Avenues.

ORDINANCE BOOK NO. 25 - PAGE 176

L. RESOLUTION NO. 09-22 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE SCHOOL BOARD

Summary: The consideration of a resolution reappointing members to the Asheville School Board.

The terms of Allison Jordan, Al Whitesides and Gene Bell, as members on the Asheville School Board, expire on April 1, 2009. Ms. Jordan is not interested in reappointment.

At the January 27, 2009, meeting, it was the consensus of Council to reappoint Mr. Whitesides and Mr. Bell to serve a three year term, term to expire April 1, 2013, or until their successors have been appointed.

The application deadline for Ms. Jordan's seat on the School Board is February 23, 2009, at 5:00 p.m.

RESOLUTION BOOK NO. 31 – PAGE 425

M. RESOLUTION NO. 09-23 - RESOLUTION APPOINTING MEMBERS TO THE DOWNTOWN COMMISSION

Summary: The terms of J. Patrick Whalen, Brad Galbraith and Kitty Love, as members on the Asheville Downtown Commission, expired on December 31, 2008.

On January 27, 2009, it was the consensus of Council to (1) extend Mr. Whalen's term until April 1, 2009; and (2) reappoint Mr. Galbraith and Ms. Love to each serve a three year term respectively, terms to expire December 31, 2011. All terms are until their successors have been appointed.

RESOLUTION BOOK NO. 31 – PAGE 426

N. RESOLUTION NO. 09-24 - RESOLUTION APPOINTING MEMBERS TO THE SUSTAINABLE ADVISORY COMMITTEE ON ENERGY & THE ENVIRONMENT

Summary: The consideration of a resolution appointing members to the Sustainable Advisory Committee on Energy & the Environment.

The terms of Ashley Featherstone and Margie Mears, as members of the Sustainable Advisory Committee on Energy & the Environment, expired on December 31, 2008.

At the January 27, 2009, City Council meeting, it was the consensus of Council to (1) reappoint Ashley Featherstone to serve a three year term, term to expire December 31, 2011; and (2) appoint Matthew Raker to serve a three year term, term to expire December 31, 2011. Both terms are until their successors have been appointed.

RESOLUTION BOOK NO. 31 - PAGE 427

O. RESOLUTION NO. 09-25- RESOLUTION APPOINTING A MEMBER TO THE FIREMEN'S RELIEF FUND

Summary: The term of Leesa Gibbs, as a member of the Firemen's Relief Fund, expired on January 1, 2009.

At the January 27, 2009, meeting, it was the consensus of Council to reappoint Ms. Gibbs to serve an additional two year term, term to expire January 1, 2011, or until her successor has been appointed.

RESOLUTION BOOK NO. 31 – PAGE 428

P. RESOLUTION NO. 09-26 - RESOLUTION APPOINTING A MEMBER TO THE GREENWAY COMMISSION

Summary: The term of Marc Hunt, as a member of the Asheville Greenway Commission, expired on December 31, 2008.

At the January 27, 2009, meeting, it was the consensus of Council to reappoint Mr. Hunt to serve a three year term, term to expire December 31, 2011, or until his successor has been appointed.

RESOLUTION BOOK NO. 31 – PAGE 429

Q. RESOLUTION NO. 09-27 - RESOLUTION APPOINTING A MEMBER TO THE METROPOLITAN SEWERAGE DISTRICT BOARD

Summary: The term of Councilman Bill Russell, as a member on the Metropolitan Sewerage District Board of Directors, expired on January 19, 2009.

At the January 27, 2009, meeting, it was the consensus of Council to reappoint Councilman Russell to serve a three year term, term to expire January 19, 2012, or until his term on City Council ends, whichever occurs first.

RESOLUTION BOOK NO. 31 – PAGE 430

R. RESOLUTION NO. 09-28 - RESOLUTION APPOINTING MEMBERS TO THE TREE COMMISSION

Summary: The consideration of a resolution appointing members to the Tree Commission.

The terms of Starr Silvis, Bob Gale and Bill Jones, as members on the Asheville Tree Commission, expired on December 31, 2008.

At the January 27, 2009, City Council meeting, it was the consensus of Council to (1) reappoint Ms. Silvis and Mr. Gale to each serve a three year term, terms to expire December 31, 2011; and (2) appoint Brandee Boggs to serve a three year term, term to expire December 31, 2001. All terms are until their successors have been appointed.

RESOLUTION BOOK NO. 31 – PAGE 431

S. MOTION APPOINTING MEMBERS TO THE CIVIL SERVICE BOARD BLUE RIBBON COMMISSION

Summary: The Asheville City Council has expressed an interest in reviewing the effectiveness and necessity of the Asheville Civil Board and the Civil Service Law.

The City of Asheville is unique when it comes to the management of its human capital because we have a Civil Service law that governs some of our personnel practices. Only several other cities in North Carolina have Civil Service laws. Since the Asheville Civil Service Law was enacted in 1953, there has been significant state and federal personnel laws enacted. These laws are used to govern employer's personnel practices, to include the City of Asheville. This commission's work would include analysis to determine the usefulness of the local legislative act, given the city's local personnel policies, coupled with state and federal personnel law now in effect.

At the January 27, 2009, City Council Boards & Commissions Committee, the reviewed the proposed Blue Ribbon Commission membership (Lou Bissette, Gene Bell, Maria Roloff, Linda McDaniels and Bill Cook) and its scope of duties. They recommended approval to the full Council.

The recommendation is that City Council appoint the Blue Ribbon Commission to analyze the effectiveness of Asheville's Civil Service Board and Law, whose scope of authority is outlined through a 1953 local legislative act. The scope of this Study Commission would be to determine, through its analysis, the effectiveness of the Civil Service Law and to offer advice on future policy direction. The Commission would report back to the City Council within 60 days upon appointment with recommendations.

T. RESOLUTION REAPPOINTING JOHN P. MIALL JR. AS CHAIR TO THE CIVIL SERVICE BOARD

This item was removed from the Consent Agenda for discussion and/or an individual vote.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Cape moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Miller and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

B. RESOLUTION NO. 09-16 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH BUNCOMBE COUNTY FOR THE PROVISION OF PARATRANSIT SERVICES

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Buncombe County for the provision of paratransit services.

The American with Disabilities Act of 1990 (ADA) and the Federal Transit Administration (FTA) regulations require any fixed route system such as the Asheville Transit system to provide paratransit services.

Mountain Mobility has provided these services to Asheville Transit since the 1990's when the ADA requirements began to be promulgated. Mountain Mobility is a county operated rural transit system. Mountain Mobility works cooperatively with Asheville Transit to provide fixed route service in Black Mountain and Candler to extend transit accessibility into the county. They also provide public transportation for a large number of non-profit and governmental agencies such as the council on aging, Industries for the Blind, and the Buncombe County Health Department.

The latest contract with Mountain Mobility was signed in 2007, as requested by the FTA during the triennial review to include an enumeration of the federal requirements which pass through to any agency or contractor with whom Asheville Transit spends federal funds.

Mountain Mobility has updated the contract to reflect increases in fuel and labor costs which will allow them to continue providing the same level of service. The rate will increase from $1.20 to $1.25, representing a four percent increase per shared service mile during the day. In addition, Mountain Mobility added paratransit night service to comply with ADA regulations at a rate of $3.10 per shared service mile.

The contract sets the method for determining fares (by the mile) and adjust the rates according to increases or decreases based on the gallon of fuel, commits the county to purchasing, maintaining and operating equipment, providing services to qualify ADA customers and schedule trips according to ADA guidelines, and incorporates all Federal regulations.

Each party may cancel on thirty days notice.

The total cost of this project for Fiscal Year 2009 is $296,986 of which City of Asheville is reimbursed 80% of the annual total expense under Section 5307 of the annual federal allocation. The City contributes 20% as local match ($59,397) during the same period. These funds were already budgeted for this fiscal year. The City's share under the old rates was $57,021.

Regarding the Strategic Operating Plan, this program will support the affordable and sustainable focus areas, specifically developing a long-term plan to address the City's aging infrastructure and offering a standard of living that is affordable and attainable for people of all income levels, life stages and abilities.

Pros:

- Allows the City to provide required paratransit service without a large capital investment.
- Provides a comparable standard of transportation for people with disabilities which will not allow them to ride the bus.
- Furthers intergovernmental cooperation to achieve a common goal of increasing mobility for all persons.
- Complies with Federal regulations.

Con:

- There are no disadvantages to the City of Asheville.

The project cost will be $296,986; 80% or $237,588 of this total will be reimbursed by Section 5307 and will require 20% or $59,397 local match by the City. The contribution under the

former rates would be $285,107, being $57,021 the local contribution. Funding for provision of paratransit services, including the City's match, is already a part of the FY 2008-09 Transit Fund budget.

City staff recommends City Council approve a resolution authorizing the City Manager to enter into an agreement with Buncombe County for the provision of paratransit services.

Councilman Mumpower was concerned using borrowed federal dollars under the current economic circumstances.

Councilman Newman moved for the adoption of Resolution No. 09-16. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 419

C. ORDINANCE NO. 3996 - BUDGET AMENDMENT FROM COMMUNITY DEVELOPMENT BLOCK GRANT FUNDS TO SET UP THE PROJECT BUDGET FOR THREE SHELTERS IN HIGH DEMAND SPOTS SERVING LOW INCOME OR EMPLOYMENT AREAS ALONG THE MAIN CORRIDORS SERVED BY THE TRANSIT SYSTEM

Summary: The consideration of a budget amendment, in the amount of $25,000, from Community Development Block Grant funds, to set up the project budget for the Street Furniture Improvement project.

The street furniture improvement project seeks to install three (3) shelters in high demand spots serving low income or employment areas along the main corridors served by the transit system.

The Asheville Transit System (ATS) is a consolidated bus service that has been operating for more than 30 years. The fleet serves mainly transit dependant groups (low income levels represent 91% of the ridership) and in a lower scale attend other socio-economic levels; the service provides a geographic coverage of more than 75% in the City of Asheville (COA) boundaries and 40% in the entire urbanized area.

During the last years, the service has experienced a moderate growth in ridership (more than 20% in most of the routes) over the previous years. New routes have been developed and new bus stops have been installed to attend the growing demand along the routes. Most of the bus stops neither offer comfortable accommodation nor protection from the weather, affecting the riders that have to wait for the bus in an unfriendly environment. This project will help improving transit infrastructure and fulfilling some of our rider's needs.

The project will be financed with funds received from a Community Development Block Grant (CDBG) in the amount of $25,000 that was approved during April 2008. The project includes purchasing of three shelters, installation of concrete pads and accessible routes.

The shelters will be located as follows:

1 shelter - Patton Avenue and North Louisiana Ave. as part of the sidewalk project the City will be building later this year. This shelter will match the one that will be installed in the opposite corner with 2007 CDBG funds.
1 shelter – Hendersonville Rd. and Erwin St.
1 shelter – Downtown Asheville, College St. and Rankin Ave.

The installation is programmed to occur later this year after completion of the permit process with the North Carolina Department of Transportation and Building and Safety Department.

This action complies with the City Council 2009-10 Strategic Operating Plan within the Sustainable Focus Area by supporting a strong commitment to infrastructure maintenance and capital improvements.

The Transit Commission has been supportive of the Street Furniture project and the use of CDBG monies to fund the shelter installation.

Pros:

- The subject project is attending the growing demand for public transit service.
- The street furniture project will provide protection and comfortable accommodation to Asheville Transit System riders.

Con:

- There are no disadvantages to the City of Asheville.

The total financial impact for the subject project is $25,000 financed with Community Development Block Grant funds. There is no impact on the City's FY 2008-09 operating budget.

Staff recommends that City Council adopt a budget amendment to set up the project budget for the Street Furniture Improvement project.

Councilman Newman moved for the adoption of Ordinance No. 3696. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 170

D. RESOLUTION NO. 09-17 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH ECON CONSTRUCTION TO CONSTRUCT THE VETERANS MEMORIAL AT MEMORIAL STADIUM

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with ECON Construction to construct the Veterans Memorial at Memorial Stadium for an amount not to exceed $215,000.

This project was initiated in 2003 as part of a larger plan to renovate the entire Memorial Stadium. Due to the lack of funding and challenges to raise additional funds, City Council approved in 2007 to reduce the scope of work to include only the Veterans Memorial component that is fully funded by a grant by Housing and Urban Development grant.

The City issued a request for proposals for the project and the lowest, responsible bid was received from ECON Construction, 11709 Fruehauf Drive, Suite 222, Charlotte, N.C., that totaled $194,430 for the base bid and four alternates selected by staff. The Veterans Memorial project is scheduled for completion by Memorial Day of 2009.

Approximately $30,000 has already been expended on professional fees. The initial work will total $194,340 which includes the base bid amount of $173,450 and four alternates: 1) Alternate 2 - Demolish Existing Chain Link Fence and Install New Chain Link Fence ($5,000), 2) Alternate 4 – Brick Columns and Granite Band ($5,980), 3) Alternate 7 – Brick Banding and Mulch at Trees ($4,850), and 4) Alternate 10 – Donor Courtyard ($5,150).

Staff wishes to retain $20,660 the balance of the funds for contingency purposes. Should these not be expended in part or whole in the early stages of the project, staff seeks to implement four additional alternates: 1) Alternate 9 – Scatter Garden ($5,050), 2) Alternate 8 – Tree Planting ($5,250), 3) Alternate 6 – Irrigation and Landscaping ($4,950), and 4) Alternate 3 – Metal Benches ($5,000) which would total $20,250.

This action complies with the City Council Strategic Operating Plan in that it contributes to the Sustainable Focus Area in that is addresses the city's aging infrastructure including facilities.

This action complies with the proposed Parks, Recreation, Cultural Arts and Greenway Master Plan in that it improves the design and theme of an existing park and improves an existing park to meet community standards.

At its regular meeting on August 11, 2008, the Recreation Advisory Board reviewed the project and recommended supporting the construction plan of the project.

Pros:

- Provide a meaningful memorial for the veterans of the region of Western North Carolina
- Fully funded by a Housing and Urban Development grant
- Enhance the entrance of Memorial Stadium

Con:

- The project will require maintenance resources

The contract is within the funds budgeted for the project by a $247,000 Housing and Urban Development grant.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with ECON Construction to construct the Veterans Memorial at Memorial Stadium for an amount not to exceed $215,000.

Councilman Mumpower said that the started and chaired the Memorial Stadium Restoration Committee about five years ago to restore the memorial component of that facility. Even though he had misgivings back then, on behalf of that Committee, he solicited former Congressman Taylor to assist us in raising monies for that effort. Former Congressman Taylor was successful in obtaining a grant for roughly $250,000. We now have modified smaller version of the Veterans Memorial. He spoke strongly against spending $250,000 on a memorial, when the VA Hospital could use that money to help veterans who don't have access to health care and who have lost their jobs. Even though a veteran's memorial is dear to his heart, this is not the time to spend federal dollars (borrowed monies). If Council votes against this action, he would be willing to pick up the responsibility to try to do this privately, but under no circumstances does he believe we should create a memorial out of these kinds of dollars and at this time in our economic climate.

In response to Councilwoman Cape, Parks & Recreation Director Roderick Simmons explained why he felt the Memorial Stadium Restoration Committee (although now inactive), would support moving forward with the contract for the Veterans Memorial.

Councilman Newman felt that this was largely an effort by Councilman Mumpower and since he recommends this not move forward, he felt Council should follow his direction.

Councilman Mumpower said that the Committee almost raised the funds, but Hurricane Katrina hit and construction costs rose by approximately 30% which stopped them. His commitment was not to ask for city government dollars and they honored that commitment. Over a period of time they did raise private funds. Personally, he was responsible for raising $75,000

in private funds. Any funds they did raise, with the exception from a grant from the State of N.C., came from active work by the members of this Committee. He would be hesitant about reconstituting the committee in that he feels it is the wrong thing to spend these borrowed dollars.

In response to Councilman Miller, Mr. Simmons said that this contract would employ approximately 25 people for approximately 4 months.

Mayor Bellamy did some research on how Americans have dealt with recessions. She discovered that our country bought bonds. She has, and encouraged others, to invest in our and our children's future by buying bonds. She talked with Congressman Shuler and said that if our community is willing to invest in our country, she needed him to direct dollars to Asheville. He made that commitment. She will also contact Senators Burr and Hagan and make that same request. Her goal is to provide leadership to our community.

Councilwoman Cape moved for the adoption of Resolution No. 09-17. This motion was seconded by Councilman Miller and carried on a 5-2 vote, with Councilman Mumpower and Councilman Newman voting "no."

RESOLUTION BOOK NO. 31 – PAGE 420

E. RESOLUTION NO. 09-18 - RESOLUTION AUTHORIZING THE CITY MANAGER TO GRANT TWO CONSERVATION EASEMENTS FOR TWO PROPOSED PROJECTS TO RESTORE STREAM BANKS IN MALVERN HILLS PARK AND WEST ASHEVILLE PARK AS PART OF AN AGREEMENT WITH RIVERLINK INC.

Summary: The consideration of a resolution authorizing the City Manager to grant two (2) conservation easements for two proposed projects to restore stream banks in Malvern Hills Park and West Asheville Park as part of an agreement with RiverLink, Inc.

RiverLink, Inc. has secured a grant from the North Carolina Clean Water Management Trust Fund to restore 1,000 feet of Buttermilk Creek to Hominy Creek as it flows through Malvern Hills Park, and to restore 800 feet of Rhododendron Creek as it flows through West Asheville Park. The grantor requires 1) a minimum 50-foot conservation easement along the creeks within the project area, and 2) a 50% match which is the value of the donated easement. Total conservation easement area is six acres. Total project cost as estimated by RiverLink, Inc., is $440,000.

This action complies with the City Council Strategic Operating Plan in the Green Focus Area by providing a valuable education component by placing interpretive signs that would explain restoration, water quality, and threats to our streams.

This action also complies with the City Council Strategic Operating Plan in the Safe Focus Area by providing stabilization throughout the reach of the project involving rock and log features placement in the streams, as well as native riparian plant species to prevent future stream bank erosion. Storm water cells will be positioned to catch runoff from parking lots in order to slow down the water before it enters the stream reducing future erosion and filtering out pollutants.

This action also complies with the Asheville City Development Plan 2025 by the following 1) Continue to coordinate with and support efforts by RiverLink, Land of Sky Regional Council, and state and federal agencies to improve water quality, 2) Encourage the use of conservation easements to preserve riparian areas, and 3) Develop appropriate riparian buffer requirements, as needed, to enhance the environmental function of streams, creeks and rivers.

At its regular meeting on March 12, 2007, the Recreation Advisory Board expressed their support for the proposed project to restore stream banks in Malvern Hills Park and West Asheville Park as part of RiverLink, Inc.'s application for the grant to the North Carolina Clean Water Management Trust Fund.

The conservation easements restrict the City's activities on or its use of, the easement area and any activity inconsistent with the purposes of the conservation easement are prohibited. For example, the following activities and uses are expressly prohibited within the Easement Area: 1) industrial and commercial activities and uses 2) agricultural, timber harvesting, grazing and horticultural uses 3) disturbance of natural features, plants or animals 4) construction of buildings 5) mineral use, excavation, and/or dredging 6) the alteration of water bodies or activities that are detrimental to water quality; and 7) dumping.

Pros:

- Expand opportunities for education on water quality, restoration and threats to streams.
- Improve safety in two parks by stabilizing the banks to prevent future erosion.
- Improve water quality and stream integrity in two creeks.

Cons:

- Additional maintenance costs to maintain the bank plantings.
- Restricts the City's use of the easement area.

Additional maintenance costs will be dependant on the planting plan. Staff estimate five hours of labor per month to maintain stream bank planting areas.

City staff recommends City Council adopt a resolution authorizing the City Manager to grant two (2) conservation easements for a proposed project to restore stream banks in Malvern Hills Park and West Asheville Park as part of RiverLink, Inc.'s grant from the North Carolina Clean Water Management Trust Fund, and execute said grants of easements, subject to the approval of the City Attorney.

Even though these are good projects, Councilman Mumpower was concerned using state and private dollars when we have a $3 Billion deficit.

Councilman Newman moved for the adoption of Resolution No. 09-18. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 421

H. RESOLUTION NO. 09-20 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF HUMAN SERVICES' INTERAGENCY COUNCIL ON COORDINATING HOMELESS PROGRAMS TO FUND HOMELESS INITIATIVE DATA COLLECTION

Summary: The consideration of a resolution authorizing the City Manager City Manager to enter into an agreement with the N.C. Dept. of Human Services' Interagency Council on Coordinating Homeless Programs to fund Homeless Initiative data collection.

A maximum of $4,000 was offered to 10-Year Plan communities in North Carolina by the North Carolina Interagency Council on Coordinating Homeless Programs (NC ICCHP). RFA funds were designated to be spent on data collection only. The Homeless Initiative applied for funding support in four areas, and received the maximum award possible of $4,000. The four areas are:

1. Point in Time Count: This is a national count endorsed by the Department of Housing and Urban Development. Results from this count directly impact the approximately million dollars received by Asheville and Buncombe County through HUD's Continuum of Care Grant. In collaboration with the Homeless Coalition, The Homeless Initiative offers point in time count trainings, collects, analyzes, and reports out on data.

2. Aggregate, Unduplicated Count: The only accurate way to collect and aggregate, unduplicated count of people who experienced homelessness and accessed services over the past year is to use the Homeless Management Information System. The Homeless Initiative will work with community partners to strengthen data in HMIS so that a report can be pulled from the system.

3. Annual unduplicated count of children experiencing homelessness: The Homeless Initiative will work with school liaisons from City and County schools to collect an annual, unduplicated count of children experiencing homelessness.

4. 2008 Calendar Year Accomplishment Report: This report is completed by all 10-Year Plan communities in North Carolina. Participation by agencies is voluntary, so any data collected depends on local agency's willingness to provide necessary information. The Homeless Initiative will collect, analyze, and complete the Accomplishment report based on available data.

Regarding the Strategic Operating Plan, City Council has recently adopted the following four goals: *sustainable, affordable, green and safe.* An objective listed under the affordability goal states is to support initiatives to end homelessness. Accepting this grant will help the Homeless Initiative collect data that can be used by the City Council when evaluating initiatives designed to end homelessness.

Pro:

- In tight budget times, funds to further the work of the Homeless Initiative can enhance the services it offers to the community.

Con:

- No apparent cons.

This grant funding was included in the adopted Fiscal Year 2008-09 General Fund budget, so there is no additional fiscal impact associated with this agenda item.

City staff recommends City Council adopt a resolution authorizing the City Manager City Manager to enter into an agreement with the N.C. Dept. of Human Services' Interagency Council on Coordinating Homeless Programs to fund Homeless Initiative data collection.

Councilman Mumpower felt this was a frivolous use of money for an inexact process.

Councilman Newman moved for the adoption of Resolution No. 09-20. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 423

I. ORDINANCE NO. 3698 - BUDGET AMENDMENT FROM THE BUNCOMBE COUNTY BOARD OF ELECTIONS FOR THE SENIOR OPPORTUNITY CENTER

Summary: The consideration of a budget amendment, in the amount of $6,000, from the Buncombe County Board of Elections, for the Senior Opportunity Center.

In 2008, the Buncombe County Board of Elections donated $6,000 to the City of Asheville to support senior programs and services at the Senior Opportunity Center in return for the use of the center as an early and regular voting site. Funds will be used to support general senior programs and services at the center.

This action complies with the 2015 Parks and Recreation Master Plan in that it will enhance the level of program services at senior centers.

This action complies with the Asheville City Development Plan 2025 in that it cooperates with public agencies and private individuals and organizations in an effort to make the provision of parks, recreation facilities and programs, and open space as effective and efficient as possible.

Pro:

- Provide funds to support senior programs and services at Senior Opportunity Center.

Con:

- None

Increase budget by $6,000 and supplement current operating funds budgets for Senior Opportunity Center. There is no impact to the City's operating budget.

Staff recommends City Council to approve the budget amendment authorizing the City Manager to increase the budget by $6,000 for Senior Opportunity Center.

Even though Councilman Mumpower stated he is not against our senior citizens, he felt we are being careless with our dollars.

Councilwoman Cape felt the Board of Elections is a big part of our community and we are in partnership with them to offer locations. If the Board of Elections has funds to make sure that their operations move forward and those funds can be adequately used, she felt that is a proper use of those funds.

Councilman Newman moved for the adoption of Ordinance No. 3698. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 174

J. RESOLUTION NO. 09-21 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH JLS COMPANY, LLC TO CONSTRUCT THE HOMINY CREEK SECTION OF THE FRENCH BROAD RIVER GREENWAY

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with JLS Company, LLC to construct the Hominy Creek section of the French Broad River Greenway for an amount not to exceed $635,000.

The City of Asheville is preparing to construct the Hominy Creek section of the French Broad River Greenway, a 1.2-mile multi-use trail along the French Broad River that will connect Carrier Park to Hominy Creek Park.

The City issued a request for proposal for construction of the greenway and received a bid from JLS Company, LLC who was selected as the lowest, responsible bidder whose base bid was $535,802.60. Staff is including a contingency budget of $99,197.40 or about 18% due to the nature of the terrain. City Council approved the CIP budget for the project as part of the Fiscal

Year 2007/08 Capital Improvement Plan (CIP) budget via a $300,000 grant from North Carolina Department of Transportation, and $590,000 via the City of Asheville.

This action complies with City Council's Strategic Plan in the Green Focus Area in that it advances the promotion of emission-reducing transportation options including greenways, and pursues opportunities to preserve open space.

This action complies with the Asheville City Development Plan 2025 in that it implements the adopted Greenway Master Plan.

This action complies with the Greenway Master Plan and the proposed Parks, Recreation, Cultural Arts, and Greenways Master Plan in that it extends an existing greenway by constructing a greenway that is currently funded.

Although the Greenway Commission did not take formal action on this project when it first began several years ago, it receives a regular project update at monthly board meetings. The Greenway Commission endorses the project.

Pros:

- Add 1.2 miles to French Broad River Greenway corridor extending it to a total 2.6 miles
- The contract amount is within the project budget

Con:

- The additional greenway mileage will require maintenance resources

Funds are currently funded in the City's CIP budget. The remaining CIP funds that will not be expended on this contract ($255,000) will be deposited into the Fund Balance in order to help address budget challenges.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with JLS Company, LLC to construct the Hominy Creek section of the French Broad River Greenway for an amount not to exceed $635,000.

Councilman Mumpower had no trouble with greenways, but was concerned with expending funds for a project that is nice, but not necessary.

Councilman Newman moved for the adoption of Resolution No. 09-21. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 424

T. RESOLUTION REAPPOINTING JOHN P. MIALL JR. AS CHAIR TO THE CIVIL SERVICE BOARD

Summary: The consideration of a resolution to reappoint Mr. John P. Miall Jr. as the Chair of the Asheville Civil Service Board, effective immediately and until February, 2010, or until his successor is duly appointed by the City Council, as provided by law.

Mayor Bellamy could not support a motion to reappoint Mr. Miall. She said that Mr. Miall is a wonderful person; however, we have had some issues on the Civil Service Board and thought to start a fresh prospective on this Board we should appoint a new Chair. We won a court case and the Board unanimously appointed a fifth member to the Board so it may not be a bad idea to have that person Chair it, for a fresh start.

Councilman Mumpower moved to reappoint Mr. Miall as Chair to the Civil Service Board. As liaison to that Board, it has been his experience that under very difficult circumstances Mr.

There will be no fiscal impact related to this closure.

In consideration of the impact to the Greenway Master Plan and the recommendation from the Greenway Commission including further detailed review by Commission members, City staff cannot support the request for the closing of a portion of Wallack Street.

City Attorney Oast said that at Council's January 27, 2009, meeting, Council continued the item regarding the petitioned closure of a portion of the unopened right-of-way of Wallack Street to allow for development of a possible compromise.

Using a map to illustrate his comments, City Attorney Oast further explained that in 1977 much of this area was part of the urban renewal project and the Housing Authority brought forward a request to close a lot of streets, one of which was a portion of Wallack Street. The closing was subject to the Housing Authority's commitment to provide access to the opened portion of Wallack Street. Those portions of Wallack Street that were closed are not affected by the action Council is being requested to close at this time.

He has spoken with the Chair of the Greenway Commission and representatives of the owners of the property abutting the portion of the right-of-way that is being requested for closure. As a starting point, the abutting owners desire a complete closure of the right-of-way; the Greenway Commission recommends not closing it so that it may remain available for use as a future greenway. However, a couple of options were discussed.

1. There is a paved driveway serving the rear of one of the buildings that abuts the right-of-way (ABCCM). One option that was discussed and that both ABCCM and the Greenway Commission would accept is to close only so much of the right-of-way as to allow that driveway area to become part of the adjacent property, with the City retaining some right of access across that closed portion. This option would leave the rest of the right-of-way unclosed, and does not satisfy the other abutting property owners, located to the north of ABCCM.

2. Another option that was discussed is closing the right-of-way, but taking back an easement that would make the right-of-way available for greenway purposes, if the City elected to install one. This was also acceptable to ABCCM, although it was a less desirable option. However, it was not acceptable to the other abutting property owners, primarily because it did not resolve many of the issues that prompted them to seek closure of the right-of-way in the first place, and because it continues the uncertainty on the future use of this area. Moreover, both the Chair of the Greenway Commission and the abutting property owners expressed some concern about the policing and maintenance responsibilities that would necessarily accompany an easement.

Since neither of the above options are acceptable to all parties, it appears that Council should proceed with its consideration of the petition for closure of the Wallack Street right-of-way, continued to this date.

City Attorney Oast responded to various Council questions surrounding easements, rights-of-way and public access.

Councilwoman Cape said that we do have a Greenway Master Plan and this section is on that Plan. Even though City doesn't own all the parcels for the greenway, we do own a part of it and like most greenways, the City will have to acquire some connecting parcels to complete the greenway. In addition, she was concerned about the precedent that will be set in that if someone encroaches onto City-owned property they can request the property be reverted to them. She believed that ABCCM is a valuable community partner, but strongly supported the Greenway Master Plan.

Due to a potential compromise, Mayor Bellamy re-opened the public hearing at 6:04 p.m.

Mr. Marc Hunt, Chair of the Greenway Commission, used a map showing the entire portion of the proposed greenway in that area. He hoped that the City will work with private land owners and the Housing Authority to gain the needed access for a greenway. This greenway corridor is listed at number 11 out of 26 greenways they studied in terms of importance. Even though the Greenway Commission and ABCCM were not able to come to an agreement, the following proposal is something he believed the ABCCM largely agrees with: "Only that portion of Wallack Street right-of-way that includes the fence and gate constructed by ABCCM (but only to the centerline of the Wallack Street right-of-way) be closed and thus come under the ownership of ABCCM. The closure would be conditioned; however, on the retention by the City of an acceptable easement on that closed portion that would allow for an unlimited public access easement for a future greenway or trail. Further, the terms of the easement would not preclude vehicular access similar to that which ABCCM now enjoys." He said that it has also been suggested that Council might grant the closure request and retain easements on the entire closed portion. The Greenway Commission strongly recommends against that as the diminished rights the City would have under an easement could prove challenging to maintain and ultimately inadequate in order to implement a greenway.

Mr. Michael Soule, representing Asheville on Bikes, explained how bicycle riding has a direct impact on the health of the community, and urged Council to support advancing our greenways.

Mayor Bellamy closed the public hearing at 6:14 p.m.

Councilwoman Cape moved to deny the closing of a portion of Wallack Street. This motion was seconded by Councilman Newman.

There was discussion on the compromise, noting that the compromise suggested by Mr. Hunt is acceptable to the City, the Greenway Commission and ABCCM; however, the other abutting property owners north of the ABCCM (who are not present) do not support the compromise. He understood they want their property line straightened out and they don't know the future of that property.

Councilwoman Cape amended her motion to close only that portion of Wallack Street right-of-way that includes the fence and gate constructed by ABCCM (but only to the centerline of the Wallack Street right-of-way) and thus come under the ownership of ABCCM. This closure is conditioned; however, on the retention by the City of an acceptable easement on that closed portion that would allow for an unlimited public access easement for a future greenway or trail. Further, the terms of the easement would not preclude vehicular access similar to that which ABCCM now enjoys. This amended motion was seconded by Councilman Newman and carried unanimously.

Mayor Bellamy wanted to make sure that when the City has the opportunity to develop the greenway that we have no problems with the current property owners at that time. City Attorney Oast said that the resolution is recorded in the Buncombe County Register of Deed's Office.

RESOLUTION BOOK NO. 31 – PAGE 432

C. PUBLIC HEARING TO CONSIDER THE PERMANENT CLOSING OF AN UNOPENED ALLEY OFF PATTON AVENUE

RESOLUTION NO. 09-30 - RESOLUTION PERMANENTLY CLOSING AN UNOPENED ALLEY OFF PATTON AVENUE

Miall has persistently tried to find a point of fairness and consideration to the problems and personality issues that have existed on this Board. He has crafted, with the help of others, a successful course that has brought us to a place where a brighter day is ahead.

Vice-Mayor Davis seconded the motion, adding that Mr. Miall has more than demonstrated over the years his ability to work with people. There have been difficulties on that Board and he felt that Mr. Miall is capable of being fair and equitable in getting that Board to a better place.

Councilwoman Cape felt this puts Council in a difficult position when they haven't had the opportunity to interview Mr. Miall, especially when some Council members have not had the opportunity to meet Mr. Miall.

Councilman Miller suggested this appointment be delayed until the next meeting in order to give Council the opportunity to interview Mr. Miall.

Mayor Bellamy said that in the past if there was a Council member concerned about the process and requested an opportunity for interview, that has happened. Therefore, she asked for Councilman Mumpower and Vice-Mayor Davis to withdraw their motion to allow Council the opportunity to interview Mr. Miall.

Councilman Mumpower and Vice-Mayor Davis withdrew their motion to reappoint Mr. Miall as Civil Service Board Chair.

Councilwoman Cape moved that any member of Council that wishes not to vote for the reappointment of someone that it be pulled from the Consent Agenda and the position be re-interviewed or remanded back to the Boards & Commissions Committee. This motion died for a lack of a second.

It was the consensus of Council to direct City Clerk Burleson to arrange an interview time for Mr. Miall. City Attorney Oast noted that Mr. Miall will continue to serve in the capacity as Chairman until Council acts.

III. PRESENTATIONS & REPORTS:

A. PRESENTATION OF THE FISCAL YEAR 2007-08 ANNUAL AUDIT REPORT

Chief Financial Officer Ben Durant said that at the conclusion of each fiscal year, an annual audit of the city's financial statements is conducted. The purpose of the audit is to obtain reasonable assurance that basic financial statements are free of material misstatement; to examine evidence supporting the amounts and disclosures in the financial statements; and to assess accounting principles used and the overall presentation of the financial statement.

Mr. Brian Broom, Director of Dixon Hughes, PLLC, summarily reviewed with Council the annual audit. He said that the following is the audit and financial statement summary: "Our report for the 2008 audit expresses an unqualified opinion on the fair presentation of the basic financial statements in all material respects, in conformity with accounting principles generally accepted in the United States of America. Our report can be found on Page 1 of the Comprehensive Annual Financial Report (CAFR). Our reports on compliance and internal control, in accordance with Government Auditing Standards, OMB Circular A-133, and the State Single Audit Implementation Act, disclosed one instance of non-compliance in the administration of federal awards programs. They also noted some areas for improvement in the City's accounting function that they have communicated to management in a separate letter dated December 30, 2008.

There was a brief discussion, initiated by Councilman Mumpower, on whether the $505,989 of total assets shown on the summary financial statement included our water assets, which our engineers estimate to be $1.2 Billion. Mr. Broom asked that City staff provide them with further information and if there are unrecorded assets or infrastructure assets, those figures can be adjusted. City Manager Jackson said that he report the findings back to Council.

Mayor Bellamy thanked Mr. Durant, Budget Director Tony McDowell and their staff for providing a transparent budget.

IV. PUBLIC HEARINGS:

A. RESOLUTION TO PERMANENTLY CLOSE A PORTION OF WALLACK STREET

RESOLUTION NO. 09-29 – RESOLUTION CLOSING A PORTION OF WALLACK STREET

Mayor Bellamy said that this public hearing was held on December 2, 2008, and continued to January 27, 2009, in order to give the Greenway Commission an opportunity for further evaluation of the request with the petitioners being given an opportunity to be heard at the meeting.

On January 29, 2009, this public hearing was continued in order to explore a compromise on this issue.

Public Works Director Mark Combs said that this is the consideration of a resolution permanently closing a portion of Wallack Street. This public hearing was advertised on October 31, November 7, 14 and 21, 2008.

N. C. Gen. Stat. sec. 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Patsy Brison, representing property owners Asheville-Buncombe Community Christian Ministry Inc. and Robert and Joan Ledford, have requested the City of Asheville to permanently close an unopened portion of Wallack Street.

On November 13, 2008, the Greenway Commission reviewed the proposed closure of the unopened portion of Wallack Street, and voted to recommend denial of approval of the Wallack Street closure as part of this section is on the Greenway Master Plan.

At the December 2, 2008, City Council meeting, the Greenway Commission was directed to further evaluate the closure with the petitioners to look at ways to find a solution mutually beneficial to both parties.

This process complies with the City's Strategic Operating Plan states: "Promote sustainable, high-density, infill growth that makes use of existing resources." This closure would facilitate maximum land use potential for further development.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more effective use of the existing adjacent properties (in-fill and higher density)

Con:

- The closure will impact the Greenway Master Plan

Mayor Bellamy opened the public hearing at 6:29 p.m.

Assistant Public Works Director Richard Grant said that this is the consideration of a resolution permanently closing an unopened alley off Patton Avenue. This public hearing was advertised on January 16, 23, 30 and February 6, 2009.

N. C. Gen. Stat. sec. 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, the adjoining property owners, Western Carolina Rescue Ministries Inc., have requested the City of Asheville permanently close an unopened portion of Shady Lane.

The Greenway Commission reviewed the requested closure at their meeting on August 14, 2008, and concluded there was no visible use for retaining this unopened parcel of Shady Lane

This action complies with the Strategic Operating Plan in that this closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties.

Con:

- In consideration of the location of the unopened right-of-way, staff can find no potential challenges regarding the closure of the alley.

There will be no fiscal impact related to this closure.

City staff recommends adoption of the resolution to permanently close an unnamed alley off Patton Avenue.

Mayor Bellamy closed the public hearing at 6:29 p.m.

In response to Councilwoman Cape, Mr. Combs explained the street closing review process of a street closing, which consists of sending documents to (1) all utilities to determine if there is any easement or infrastructure on the property, (2) other City departments for review, and (3) the Greenway Commission for their review. We also post notices in at least two places along the right-of-way and advertise the closing, all of which is paid by the petitioners.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 09-30. This motion was seconded by Councilman Newman and carried unanimously.

RESOLUTION BOOK NO. 31 - PAGE 434

D. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE FOR THE PURPOSE OF FILLING IN MISSING INFORMATION, CORRECTING MISTAKES, RESOLVING DISCREPANCIES AND CLARIFYING THE ORDINANCE

ORDINANCE NO. 3700 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE FOR THE PURPOSE OF FILLING IN MISSING INFORMATION, CORRECTING MISTAKES, RESOLVING DISCREPANCIES AND CLARIFYING THE ORDINANCE

Mayor Bellamy opened the public hearing at 6:32 p.m.

Urban Planner Julia Cogburn said that this is consideration of an amendment to the Unified Development Ordinance (UDO) for the purpose of filling in missing information, correcting mistakes, resolving discrepancies and clarifying the ordinance. This public hearing was advertised on January 30 and February 6, 2009.

Working with the UDO on a daily basis, the Planning and Development staff has noted a number of instances where the ordinance contains discrepancies, is incomplete, or needs clarification. Staff compiles these issues as they are noted and regularly proposes amendments to correct these situations and to make the UDO a clearer document for staff and public use. This set of proposed amendments addresses fifteen of those discovered issues.

She reviewed with Council the following description of each amendment as follows:

a. This amendment adds the language "and/or where the requirements are modified in accordance with Section 7-7-8(c)(6)" to clarify that modifications may be granted to standards and requirements of the general zoning districts in conditional zoning matters.

b. The addition of a new number (7.1) to the conditional zoning process simply puts in writing the practice of taking detailed plans back to TRC before a permit is issued.

c. This amendment adds Urban Place and Light Industrial to the zoning district list and places these along with URD, NCD, and Urban Village in a more appropriate place on the listing of "Highest" to "Lowest" use districts.

d. & e. These amendments change two subsections so that the prohibition of "drive through facilities" is handled in the same way in all districts where there is such a prohibition (Neighborhood Commercial and CBI). This places the term "drive through facilities" under the prohibited uses listing rather than in the design and operations standards where it often gets lost.

f. This amendment is a correction of a reference (from "chapter" to "article").

g. This amendment codifies a long standing interpretation (1/07) that handrails on steps, etc. are not included when figuring the height of such steps, etc. This is important as steps, terraces, patios, and uncovered decks can encroach up to ten feet in a required front setback so long as they do not have a height greater than 30 inches.

h. This amendment corrects a citation reference.

i. This amendment also corrects a citation reference.

j. This amendment codifies our recently adopted practice of requiring financial surety for a private drive in an alternative access ("four lot") subdivision if the developer wants to record the plat prior to completing the drive. Staff has dealt with a few instances where drives were not completed and lots were sold with the developer walking away from this responsibility.

k. This amendment simply calls the reader's attention to the section that lists the districts where tree save areas are not required.

l. This amendment is a renumbering to bring this section in line with the numbering system found throughout the UDO.

m. This amendment drops the words "and may be covered under one permit" from the last sentence of the section enumerating requirements for temporary storage containers in nonresidential districts. This phrase was dropped due to the fact that in another part of the same article, it is stated that permits are not required for temporary storage containers in nonresidential districts.

n. This amendment corrects an incorrect district listing (should be Urban Village and not Neighborhood Commercial District).

o. This amendment takes "group homes" out of the medium impact listings. "Group homes" were listed twice; in both the low and medium impact listings.

This action complies with the Strategic Operating Plan in that it supports the Council goal of bringing forward UDO amendments that improve clarity and address community goals.

At the Planning & Zoning Commission meeting on January 7, 2009, they unanimously approved the amendment (6-0) with no speakers on the issue.

Pros:

- Codifies past staff interpretations and practices on issues.
- Corrects incomplete or improper listings and citations.
- Adds or amends language for greater clarity.

Cons:

- None Noted.

City staff recommends approval of these wording amendments.

Mayor Bellamy closed the public hearing at 6:33 p.m.

There was a brief discussion about the housekeeping changes.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3700. This motion was seconded by Councilman Miller and carried unanimously.

ORDINANCE BOOK NO. 25 - PAGE 178

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO AMEND STANDARDS RESTRICTING AND REGULATING DIGITAL BILLBOARDS

ORDINANCE NO. 3701 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO AMEND STANDARDS RESTRICTING AND REGULATING DIGITAL BILLBOARDS

Mayor Bellamy opened the public hearing at 6:38 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is consideration of an amendment to the Unified Development Ordinance to amend standards restricting and regulating digital billboards. This public hearing was advertised on January 30 and February 6, 2009.

In May 2008, the City Council reviewed and approved standards that allowed and regulated digital billboards along certain corridors within the City of Asheville corporate limits. The Asheville City Council subsequently reviewed and adopted the same standards. Since adoption, six separate digital billboards have been permitted along major thoroughfares including: Smoky Park Highway; Hendersonville Road; Long Shoals Road; Tunnel Road; and Sweeten Creek Road.

Asheville appears to be somewhat ahead of other municipalities in adopting standards to permit and regulate digital billboards. Those standards that were adopted, along with the existing restrictions to off-premise billboards, generally appear to appropriately address safety and land use concerns. Any new billboards must meet all applicable standards including those that accommodate the removal/relocation/reconstruction of existing non-conforming off-premise billboards. Commonly referred to as the "cap and replace" ordinance, these standards "cap" the total number of billboards in the city based on a former survey but allows the billboards to be relocated within certain road corridors. In some cases, the relocation of a billboard will result in a net reduction of structures if signs are consolidated and relocated. The digital billboard ordinance requires a conversion of three square feet of traditional sign face for every one square foot of digital sign face, resulting in a reduction of total square footage. As with traditional billboards, digital billboards can only be located within the permissible road corridors; those corridors include:

1. Patton Ave. – from the French Broad River to the outer limit of the extraterritorial jurisdiction area (ETJ) in Enka
2. Merrimon Ave. – from Chestnut St. north to Woodfin
3. Sweeten Creek Rd. – from Fairview Rd. to the outer limit of the ETJ
4. Hendersonville Rd. – from I-40 interchange to the outer limit of the ETJ
5. Tunnel Rd. – from the tunnel to the outer limit of the ETJ past Oteen
6. Brevard Rd. – from I-240 Interchange to the outer limit of the ETJ
7. Airport Rd. – Hendersonville Rd. to the boundary between Buncombe County and Henderson County, and
8. Long Shoals Rd. – from Hendersonville Rd. to the outer limit of the ETJ.

The characteristics of the eight road corridors vary to some degree but are all generally heavily travelled roads supporting an automobile oriented pattern of development. All eight roads are NCDOT managed roads with varying rights-of-way. In most cases, the right of way widths are well over 75 feet.

Recent applications have helped staff identify an unintended omission in the standards that regulate billboards where, presently, no setback is required from either the right-of-way or travel lane of the road. This is particularly concerning in respect to the digital billboards where the brightness levels and changing images have the potential to become hazards to motorists if placed too closely to the travel lanes. This amendment will attempt to correct this by requiring a minimum setback from the right-of-way to ensure that the signs will remain a reasonable distance from the roadways to minimize any potential hazards and/or nuisances. Due to the varying right-of-way widths, staff is proposing a setback of 10-feet for rights-of-way that are 75-feet or greater in width while proposing a setback of 20-feet for those less than 75-feet in width.

Additionally, due to concerns over sounds and other potential nuisances or hazards, staff is also proposing a separation of 50-feet from any residential structure to ensure a reasonable quality of life for residents, particularly for those who may have limited choices.

This action complies with the Strategic Operating Plan in that safety focus area in that it ensures that standards are in place that help to control or mitigate potentials hazards or nuisances to motorists and residents.

Pros:

- Protects the general public from potential hazards and/or nuisances.
- Maintains opportunity outdoor advertising.

Cons:

- Reduces the number of potential locations for new digital billboards.

This draft has been circulated to CIBO, CAN, and CREIA along with other interested parties.

Staff recommends approval of the amendment to the standards regulating digital billboards.

Mayor Bellamy closed the public hearing at 6:41 p.m.

In response to Councilwoman Cape, Ms. Tuch said that she has received less than five calls about the digital billboard ordinance and was not aware of any light trespass concerns.

Mayor Bellamy said that she has received several e-mails and phone calls from the south Asheville area about the billboards on Hendersonville Road and Long Shoals Road. Their concerns are about the size, height and lighting. She suggested City staff look at the billboard which is in the back yards of homes on Burton Street because there is no separation of trees or shrubs. She felt the ordinance needed to be reviewed in terms of size, lighting and separation of issues. Mayor Bellamy said she will ask the individuals who have contacted her to contact staff for their investigation of the concerns.

Councilwoman Cape supported the motion and urged staff to investigate any concerns to see if the ordinance can be better crafted.

In response to Councilman Newman, City Attorney Oast said the City's ability to regulate billboards on federal property is severely limited, but any located on City streets are under our control. He would research to see if the City has any ability to require a buffer between uses, but if the billboard is on the interstate, it's in a different class.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3701. This motion was seconded by Councilman Russell and carried on a 6-1 vote, with Mayor Bellamy voting "no".

ORDINANCE BOOK NO. 25 - PAGE 182

V. UNFINISHED BUSINESS:

A. RESOLUTION NO. 09-31 - RESOLUTION ADOPTING THE 2009 STRATEGIC OPERATING PLAN

City Manager Jackson said that this is the consideration of a resolution reaffirming City Council's Strategic Operating Plan and a related performance measurement and reporting system.

At its January 2009 retreat, City Council used feedback from a citizen survey conducted in summer 2008 to update its Strategic Operating Plan and the goals and objectives that correspond to the plan's key focus areas. During this process, City Council agreed that it was important to balance the strategic plan with the financial constraints of current economic conditions. As a result of these discussions, a new focus area was added called "Fiscal Responsibility."

In addition to updating the strategic goals, City Council also discussed systems for measuring and reporting progress associated with the Strategic Operating Plan. The plan serves as the guiding document for the city's strategic and operational priorities. Under the direction of the city manager, department business plans are annually aligned with the strategic plan to ensure Council's goals and priorities are implemented. The city manager and staff then provide City Council with quarterly management reports that include comprehensive updates regarding the Council's goals and related initiatives. At the January retreat, there was consensus among Council members to continue this system of management reporting.

Additionally, Council agreed to align City Council Committees with the focus areas outlined in the Strategic Operating Plan. Council Committees will receive updates on policy goals, metrics and major initiatives associated with their area of focus. Committee Chairs will then be responsible for providing progress updates to the entire City Council concurrent with the management reporting cycle. The committee assignments are noted with each focus area below.

City Council's strategic plan states that Asheville will be a city that is:

- **Affordable** -The City of Asheville will offer a standard of living that is affordable and attainable for people of all income levels, life stages and abilities. *Housing and Community Development Committee*

- **Fiscally Responsible** - The City of Asheville will create a stronger, more prosperous community with smart investments that accomplish real, lasting, tangible returns. *Finance Committee*

- **Green** - Asheville will be the southeastern leader in clean energy and environmental sustainability while preserving and enhancing the city's natural beauty. *Shared by the entire City Council with the Sustainability Advisory Committee on Energy & the Environment serving in an advisory role.*

- **Safe** - Asheville will be one of the safest and most secure communities when compared to similar cities. *Public Safety Committee*

- **Sustainable** - Asheville will support a sustainable community and a sustainable city government through a strong commitment to infrastructure maintenance, capital improvements, long-term planning. *Planning & Economic Development Committee*

This item has been reviewed by the City Council and the Executive Management Team.

Pros:

- Provide Council and city staff with an overall direction and goals of the organization
- Provide Council and city staff with a measure of success

Con:

- None noted.

The Strategic Operating Plan provides guidance for funding priorities throughout the budget process.

City staff recommends City Council adopt a resolution affirming Council's 2009 Strategic Operating Plan.

Councilwoman Cape suggested we be consistent in our wording of "fiscal responsibility", "fiscally responsible" or "financially responsible." In that focus area, she suggested Council focusing a little more on our own responsibility as an organization – perhaps a bullet point of "The City of Asheville will operate its organization to the highest fiscal responsibility."

Councilman Newman felt the Plan as presented does capture our areas around fiscal responsibility.

Mayor Bellamy asked City staff to wordsmith the "fiscal responsibility" focus area to address Councilwoman Cape's suggestion and that language be revisited on February 24, when the budget is discussed.

In response to Councilman Mumpower's concern about not supporting some of the action items, City Attorney Oast said that Council can take a complex motion and divide it. That would be one way for a Council member to support the Strategic Operating Plan with some exceptions.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved to adopt Resolution No. 09-31. This motion was seconded by Councilwoman Cape and carried unanimously, with Councilwoman Cape opposing "explore potential of a zero tolerance policy"; and Councilman Mumpower opposing the following items: (1) continue support of Housing Trust Fund; (2) proactively pursue funding opportunities with state and federal economic stimulus packages; (3) achieve short term and long term energy goals and reduce city carbon emissions by 2% per year; and (4) continue community policing initiatives.

Councilman Mumpower, in conjunction with Mr. Gene Bell, Executive Director of the Asheville Housing Authority, reviewed with Council a Safe Place proposal – a partnership proposal directed to improving the safety of public housing residents in Asheville. It is a model, a possibility and a necessity. He and Mr. Bell will be at the Public Safety Committee meeting on February 17 to discuss this in more detail.

Current realities are (1) some of our public housing developments continue to be "hotspots" for drug sales and related criminal activity; (2) too many of our community's children, elderly, and vulnerable citizens live in unsafe circumstances; and (3) the downturn in the economy holds the potential to increase criminal activity in Asheville.

A Safe Place is an effort to focus on one public housing community to ensure that safety, health, and opportunity standards in that community equal or exceed that of other neighborhoods in Asheville.

Safe Place components consist of (1) resident involvement and leadership; (2) community/church/civic club participation; (3) zero tolerance for criminal activity; (4) increased security services; (5) dedicated and persistent police presence; (6) consistent rule enforcement; and (7) a standard to match other Asheville neighborhoods.

The urgency is (1) changes in our economy predict an increase in criminal activity in Asheville. It is in everyone's interest that we act proactively on behalf of those most at risk; and (2) it is crucial that we have a system in place to meet the warm weather challenges. Our target is 60 days.

What is needed from the City of Asheville is (1) continued dedication to eliminating Asheville's open air drug markets; (2) stepped up police enforcement in our first "A Safe Place" development; and (3) political support and a firm devotion to creating a safe place and keeping it that way forward.

At this meeting, he requested (1) a general commitment to help from the City; and (2) Council's suggestions and support going forward.

Together we have an opportunity to create another model of success in Asheville's public housing. In our rapidly changing social and economic reality, unified action is a necessity. We appreciate the opportunity to partner with the City of Asheville in making a difference that will touch every citizen in the City of Asheville.

It was the consensus of Council to support this effort and to refer this to the Public Safety Committee.

Councilwoman Cape explained the idea behind Asheville First is that we have great local goods and services produced in this area and when you buy local you support the local economy. Her interest is also in supporting the emerging green economy. There are other cities that have crafted policy directions to create a program that would benefit local businesses and/or green businesses within the context of it being fiscally sound. She said that organizationally, do we need a policy that looks at how our own generated waste impacts our fiscal bottom line.

Councilman Mumpower, working with Councilwoman Cape, presented the Asheville First mission of establishing a comprehensive "Asheville First/America First" program dedicated to encouraging our citizens to purchase American, Asheville, and regional goods and services as a local response to a growing international economic crisis.

The motivations would be (1) There are strong indications that the crisis in our economy will grow worse; (2) Asheville City is in a position to model and encourage local solutions; (3) Asheville and WNC have a wide range of locally produced goods and services that would benefit from local support; (4) "Buy American" is a legitimate means to supporting American manufacturing jobs, regionally produced green technologies, local produce, and area service providers; (5) Asheville and WNC have the potential to produce a national model; and (6) Local education and action are a positive means to gaining a sense of control in difficult times.

Marks include: (1) Asheville City government as a model of Asheville/America First; (2) Regional and domestic application as a broader agenda; and (3) Inclusion of other local governmental entities, associations, and private businesses.

The methods would be (1) within legal limits, establish city policies that give extra weight to local/domestic goods and services; (2) Filter future policy decisions toward the priority of supporting local and domestic job creation; (3) Staff the program using existing staff and/or volunteers; (4) Rely on modeling and education (our TV channel as a sample resource) as our primary tools; and (5) Create a direct tie with Council's "Go Green" initiatives – let Asheville lead the way.

Vice-Mayor Davis supports buying local, but he cautioned Council that we live in a global economy.

City Manager Jackson said there are some immediate minor things staff can do to shed some light on what we are doing in terms of promoting businesses, contracting and purchasing. For transparency, in the staff reports we have begun to provide Council with the addresses of our contractors we are doing business with. He asked for direction from Council on how they want to partner with the Asheville Downtown Association, Chamber of Commerce, local restaurants, etc.

in participating in public relations programs to support that kind of consumer behavior. We can also provide information on what we can reasonably do in terms of state law and local regulations. We have consistently placed an emphasis on that issue and included criteria in our call for professional services when it comes to commodities, supplies and purchase. However, we are very limited in following the state bidding process. He would be happy to supply that information to the Finance Committee or to the full Council.

Councilman Russell, Chair of the Finance Committee, supported buying from local businesses and felt it would be appropriate for the City Manager to provide that information to the Finance Committee for review.

Councilwoman Cape felt we need to keep our tax dollars at home and urged the public to make a conscious choice of buying local, opposed to over the internet or by 1-800 phone numbers.

Councilman Miller followed up by saying buying local builds community. When people purchase, we want them to purchase things in our area.

Councilman Newman moved to refer the Asheville First program to the Finance Committee. This motion was seconded by Councilman Miller and carried unanimously.

Councilman Mumpower, working with Councilman Russell and Councilman Miller, presented the Volunteer Corp proposal. Its mission would be to establish a comprehensive volunteer program dedicated to supporting the services of the City of Asheville.

Motivations include (1) In anticipation of impending economic difficulties, additional staff support needs are anticipated; (2) Asheville is blessed with strong pool of skilled, capable, and enthused retirees/other volunteer resources; and (3) Volunteers are a low cost means to supplementing/improving city services.

Marks include (1) All departments have the potential to benefit from volunteer resources; (2) Parks and Recreation, Asheville Police Department, Public Works, and Transit/Parking offer stand-out opportunities; (3) Expand volunteer corp. to explore on-site and from home opportunities; and (4) Provide opportunities/structures that uplift our volunteers as they uplift the city.

The methods would be (1) staff the program by expanding responsibilities of existing staff; (2) Pursue creative options that take us out of traditional comfort zones in volunteer utilization; (3) Explore models of volunteer utilization that are exceptional, expansive, cost effective, and dynamic; and (4) Have a positive and highly visible recognition program for our volunteers.

Mayor Bellamy said that expanding all non-salaried volunteer opportunities is an action item in our Strategic Operating Plan and staff has direction to begin working on this.

RESOLUTION BOOK NO. 31 - PAGE 436

VI. NEW BUSINESS:

A. RESOLUTION NO. 09-32 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPROVE THE MODIFICATION OF TERMS FOR A HOUSING TRUST FUND PROJECT KNOWN AS BOSTIC PLACE

Ms. Judy Daniel, Planning & Development Director, said that this is the consideration of a resolution authorizing the City Manager to approve the modification of terms for a Housing Trust Fund (HTF) project known as Bostic Place, by agreeing to the sale of three project lots to Habitat

for Humanity, decreasing the total number of required affordable units from eleven (11) units to eight (8) units, and extending the maturity date for the first HTF lien to February 1, 2010, to allow for completion and sale of the final unit in Phase I.

Since 2005, the City has provided two Housing Trust Fund loans totaling $378,750 for the development and sale of 11 affordable units at Bostic Place in the Shiloh area. The first HTF loan was made in 2005 in the amount of $218,750 and required seven affordable units. The 2nd HTF loan was approved in 2008 and required four additional units. To date, $93,750 has been repaid and three of the promised units have been completed and sold.

The homes in Bostic Place were designated to be modular construction. The lots designated for sale to Habitat for Humanity will be completed with stick-built homes. It is anticipated; however, that the designs will be compatible and that the homes will conform well to the existing neighborhood.

The construction of the remaining units is currently behind schedule; but the developer anticipates that the project will be fully completed within the next 12 months. To help expedite this process, the developer has asked that he be allowed to sell three of the proposed lots to Habitat for Humanity for completion. Habitat will retain the affordability requirement for these lots so there will be no net loss to the community in terms of the total number of affordable units received under the original loan agreements. In exchange for agreeing to this transaction, the City would receive a release fee for each lot equal to 1/7th of the original loan amount for Phase I, plus accumulated interest. This would generate approximately $96,250 in program income that would be returned to the fund for reinvestment in other affordable projects.

If approved, in addition to the understanding that Habitat will retain the affordability provisions originally agreed to by the developer; the developer would only need to complete one (1) additional unit to satisfy the first HTF lien. An extension of the loan maturity date will be required to allow for completion and sale of the final unit in Phase I. The remaining four (4) units secured by the second HTF loan would be completed as originally agreed and released as they are sold.

The request for modification was presented to the Housing and Community Development Committee on January 28th and was unanimously approved.

This action complies with the Strategic Operating Plan in that the project is supportive of the City's goal of providing safe and decent affordable housing units to the citizens of Asheville.

It also addresses the priorities of the Consolidated Strategic Housing & Community Development Plan by increasing the housing stock, providing affordable rental units, building high quality energy-efficient housing, and coordinating development with transportation and jobs.

Pros:

- Returns $96,250 to the Trust Fund for reinvestment in other worthy projects.
- Allows the developer to more quickly complete the project.
- Purchase by Habitat ensures that the homes are sold to income-qualified families as originally agreed.

Cons:

- The current maturity date on the first HTF loan will need to be extended to allow for completion and sale of the final unit.
- Once the lots are released, the City no longer has the ability to monitor affordability.
- The project has experienced construction delays, but appears ready to proceed.

Funding for the Housing Trust Fund has been previously appropriated. The receipt of release fees from the proposed sale will increase the balance in the Trust fund from $611,030 to approximately $707,280.

Staff recommends adoption of a resolution authorizing the City Manager to modify the terms of the Loan Agreement for Bostic Place Phase I.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 09-32. This motion was seconded by Councilman Russell and after the Mayor asked for public comments and received none, the motion carried unanimously.

RESOLUTION BOOK NO. 31 – PAGE 440

B. USE OF SPANISH IN DIRECTIONAL SIGNS

Councilman Mumpower said that the policy issue is that the City has placed directional signage containing English and Spanish in proximity to the City's police station. He asked for the opportunity to discuss policy on the appropriateness of dual language signage and the expenditure of City funds on such.

The impact is that the influx of illegal immigrants is unprecedented in our history. It is a personal belief that the U.S. and our community are unable to absorb this illegal influx without significant harms to our culture and economy.

He outlined the following concerns: (1) Dual language signs send a message of implicit acceptance of illegal immigration; (2) Dual language signs are expensive; (3) This action was initiated in response to Federal pressures versus local initiative; (4) The words for "Police Station" in English and Spanish are similar and thus redundant; (5) Enabling non-English speaking people to remain so inhibits assimilation at all levels; and (6) Energy invested in dual language signs is an unnecessary use of limited city resources.

His position is that all City signage should be in English.

Police Chief Bill Hogan said that language access for Limited English Proficiency (LEP) persons is a protection under Title VI of the Civil Rights Act of 1964, the Title VI regulations, and Presidential Executive Order 13166 issued in 2000 by President Clinton and affirmed by President Bush in a memorandum dated October 25, 2001, that requires all government or private entities receiving Federal assistance to provide meaningful access to LEP persons.

The basis for Executive Order 13166 is Section 601 of Title VI of the Civil Rights Act of 1964, 42 U.S.C. 2000d which provides that no person shall "on the ground of race, color, or national origin be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance." Section 602 directs and authorizes Federal agencies to issue rules, regulations or orders of general applicability. 36 Federal agencies provide assistance to government and private agencies for many programs and activities to include the Department of Transportation that requires language access for public transportation riders, the Department of Housing and Urban Development requiring access for LEP clients accepting CDBG funding, the Department of Labor requires language access for job program participants, the Department of Health and Human Services requires language access for health care programs, the Department of Education for any education programs and the Department of Justice to name a few. Obviously many programs carried out by the City of Asheville use federal funds and are by law required to provide meaningful language access to LEP persons.

All Federal agencies provide assistance and are required to publish 'Guidance" and "Implementation" documents approved by the Department of Justice, Office of Civil Rights. Hence the DOJ, OCR attorney conducting the compliance review.

The APD is the subject of an (LEP) Compliance Review conducted by the United States Department of Justice, Office of Justice Programs, Office of Civil Rights, (DOJ, OJP, OCR) requiring the enactment of provisions to provide meaningful access to programs and activities for limited English proficiency persons. Charlotte and Greensboro were also selected for a Compliance Review around the same time period.

The APD was notified November 15, 2007 of selection for a LEP Compliance Review that began with set of 30 in depth questions requiring written responses addressing what steps have been taken to provide access and assistance to LEP individuals. LEP is defined as individuals who do not speak English as their primary language and have a limited ability to read, write, speak or understand English. Census, empirical and local community resources data reveal that APD LEP clients are primarily Spanish speaking with Slavic (Russian and Ukrainian) being secondary. The on site inspection was June 25 – 27, 2008, and was conducted by a DOJ, OJP, OCR staff attorney. The compliance review is pursuant to Title VI of the Civil Rights Act of 1964 and the Omnibus Crime Control and Safe Streets Act of 1968. The final report was completed and delivered to the APD in December 2008. The scope of the review was narrowly related to APD's provisions of services to people with LEP. The report contains documentation of efforts to comply and deficiencies that must be corrected for taking steps to provide meaningful access to programs and activities for LEP persons. Implementation will include translation of vital forms and documents to include rights advisements and reports, oral and written translation access, signage at the Municipal Building and Community Resource Centers as well as tracking of all LEP contacts and assistance provided.

This action is Federal law and complies with City Council Strategic Operating Plan in that funding for programs under the focus area *Critical Services and Infrastructure* Goals 1 – 6 for APD programs are funded through DOJ, OJP financial assistance programs. The Weed and Seed program, drug suppression equipment and communication technologies are three examples.

The DOJ, OJP, OCR has submitted their findings and the APD is designing the implementation plan based on the findings according to law.

In response to Councilman Newman, Police Chief Hogan said we have also been asked to put signs in our police substations, with not only this is where it's located, but basic information on how they can get help. They also want to make sure that we have the capability of assisting any citizens that cannot speak English proficiently so that they are not deprived of services that should be rendered to them by the government.

In response to Councilman Mumpower if the City does not comply, City Attorney Oast said that he didn't know about the Limited English Proficiency compliance with this executive order, but in situations were communities have not complied with federal law, like the Fair Housing Amendments Act of 1988, there have been lawsuits brought by federal government that can result in significant fines. He felt there is a potential for the City to experience a loss of federal revenue and some fines.

Councilwoman Cape said we strive to be a community that is welcoming to people and when they need the police, they need to know they can find them and that it's a welcoming place for them. If they have a crime to report, they can walk in and not be automatically lost. This is a nation of immigrants who assimilate in different manners. Usually the older people often don't ever gain English as a full language, but they may be someone who had a crime acted upon them. Whether or not the federal government is using a heavy hand or not, she thinks they are

asking us to reach beyond our regional small mindedness and recognize that we are a large county that is expanding with people from all over the world.

When Mayor Bellamy called for a motion, she received none.

C. RESOLUTION NO. 09-33 - RESOLUTION APPOINTING MEMBERS TO THE BOARD OF ADJUSTMENT

Vice-Mayor Davis, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Board of Adjustment.

The terms of Richard Ford (Regular member), James Sheeler (Alternate member), Robert Middlemas (Regular member), and Janet Whitworth (Alternate member), as members on the Board of Adjustment, expired on January 21, 2009. In addition, there currently exists an Alternate member vacancy left by Lee McElrath, whose term will expire on January 21, 2010.

At the January 27, 2009, City Council meeting, it was the consensus of Council to (1) appoint Janet Whitworth as a Regular member to serve a three year term, term to expire January 21, 2012, or until her successor has been appointed; (2) reappoint James Sheeler as an Alternate member, to serve an additional three year term, term to expire January 21, 2012; and (3) reappoint Robert Middlemas as a Regular member to serve an additional three year term, term to expire January 21, 2012, or until his successor has been appointed.

Also at the January 27, 2009, City Council meeting, it was the consensus of Council to interview Phillip Hardin, Juma Jackson and Eugene Britton IV for the Alternate positions.

After Council spoke highly of the candidates, Phillip Hardin received 5 votes, Juma Jackson received 7 votes and Eugene Britton IV received 2 votes. Therefore, (1) Mr. Jackson was appointed as an Alternate member to serve a three year term, term to expire January 21, 2012; and (2) Mr. Hardin was appointed as an Alternate to serve an unexpired term, term to expire January 21, 2010. In addition, (1) Janet Whitworth was appointed as a Regular member to serve a three year term, term to expire January 21, 2012; (2) James Sheeler was appointed as an Alternate member, to serve an additional three year term, term to expire January 21, 2012; and (3) Robert Middlemas was reappointed as a Regular member to serve an additional three year term, term to expire January 21, 2012. All appointments are made until their successors have been appointed.

RESOLUTION BOOK NO. 31 – PAGE 441

D. RESOLUTION NO. 09-34 - RESOLUTION APPOINTMENT MEMBERS TO THE COMMUNITY RELATIONS COUNCIL

Vice-Mayor Davis said that this is the consideration of a resolution appointing members to the Asheville-Buncombe Community Relations Council.

The terms of Jill Fromewick and Michael Burkhead, as members of the Asheville-Buncombe Community Relations Council, expired on December 31, 2008.

At the January 27, 2009, City Council meeting, it was the consensus of Council to reappoint Jill Fromewick to serve a three year term, term to expire December 31, 2011, or until her successor has been appointed.

Also at the January 27, 2009, City Council meeting, it was the consensus of Council to interview Kent Purser and William Moore.

After Council spoke highly of the candidates, it was the consensus of Council to appoint William Moore as a member to the Community Relations Council to serve a three-year term, term to expire December 31, 2011. In addition, Jill Fromewick was reappointed to serve a three year term, term to expire December 31, 2011. Both appointments are made until their successors have been appointed.

RESOLUTION BOOK NO. 31 – PAGE 442

E. BOARDS & COMMISSIONS

Due to the worksession scheduled at 3:00 p.m. on Tuesday, February 24, 2009, it was the consensus of Council that the board & commission interviews be held at 5:00 p.m. on Tuesday, February 17, 2009, in Room 209.

It was the consensus of Council to interview Tabatha Hamlin, Vanessa Penix, Daniel Collins and Richard Stiles for a vacancy on the HUB Community Economic Development Alliance.

It was the consensus of Council to interview Gerald Hixson, Gordon Smith, Crystal Williams, Stephen Bolden and Wanda J. Lanier for vacancies on the Homeless Initiative Advisory Committee. Vice-Mayor Davis noted that the Homeless Initiative Advisory Committee recommended Gerald Hixson, Gordon Smith and Stephen Bolden.

At Mayor Bellamy's request, Councilman Mumpower moved to appoint the City Manager or his designee to the Pack Place Board of Trustees to replace Mayor Bellamy. This motion was seconded by Mayor Bellamy and carried unanimously.

It was the consensus of Council to appoint Mayor Bellamy as the liaison to the Homeless Initiative Advisory Committee.

Vice-Mayor Davis said that Ms. Andrea Robel from the U.S. Census Bureau made a presentation to the Boards & Commissions Committee about the need for Asheville to establish a "Complete Count" Committee. When the City's committee is formed, they will appoint a City representative to Buncombe County's Complete Count Committee, per Ms. Robel's request. Mayor Bellamy moved to establish a Complete Count Committee and directed City Clerk Burleson to begin advertising for this short-term action committee. This motion was seconded by Councilman Mumpower and carried unanimously.

In response to Councilman Russell, City Clerk Burleson said that letters to all board and commission chairs defining liaison/member roles will be going out within the next couple of weeks.

Councilwoman Cape announced that the Planning & Economic Development Committee meeting scheduled for Wednesday, February 11, 2009, has been cancelled.

Councilwoman Cape thanked City staff for providing various adopted plans and the Code of Ordinances on City Council laptops.

Councilwoman Cape will be updating Council in the future on developing a National Coalition for Integrated Solutions to deal with some national challenges facing our community.

VII. OTHER BUSINESS:

A. LAWSUIT

The City received four Complaints on January 29, 2009, from Buckeye Construction Company. The four separate lawsuits involve water system improvement contracts at Brevard Road/Clayton Road, Hendersonville Road, Weston Road, and Beaucatcher Road, for breach of duty in the City's delay in issuing the Notice to Proceed resulting in material price increases, failure by the City to acquire necessary easement agreements, and costs associated with stop, start, demobilizing, move, remobilize, and restart work. This matter will be handled in-house.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Brian Festa spoke to Council about the need for a conscious evolution in the way we teach in the public school system.

Mr. Gene Hampton spoke to Council about the need for quality education, as quality education and quality government equals quality of life for all.

Mr. Fred English commented on the economic stimulus package.

Mr. John Blackwell asked for direction on how to apply for a position on the URTV Inc. Board of Directors.

Closed Session

At 8:13 p.m., Councilman Miller moved to go into closed session for the following reason: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: State of North Carolina; County of Buncombe; and City of Asheville - The statutory authorization is contained in G.S. 143-318.11(a) (6); and (2) To prevent the disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C. Gen. Stat. sec. 143-318.11 (10) (e) - The statutory authority is contained in G.S. 143-318.11(a)(1). This motion was seconded by Councilman Newman and carried unanimously.

At 8:34 p.m., Councilman Newman moved to come out of closed session. This motion was seconded by Councilwoman Cape and carried unanimously.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:34 p.m.

Magdalen Burleson

Zoning - Public hearing to zone properties on Airport Road, 179

Tuesday – February 24, 2009 – 3:00 p.m.

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

Budget

Chief Financial Officer Ben Durant briefed Council on the following overview: (1) second quarter results and current year budget trends show a $754,000 revenue shortfall; (2) short-term "stop-gap" measures have been implemented in the current year to close the gap; and (3) Fiscal Year (FY) 2009-10 budget numbers continue to indicate an imbalance between revenues and expenditures.

He then reviewed the current General Fund budget of $90,549,715.

General Fund revenue highlights include (1) property tax projections have improved (a) FY 2008-09 tax base grew 4.2% vs. 10-year average of 3.3%; and (b) revenue will exceed budget by $100,000; and (2) sales tax projections have been lowered (a) sales tax revenue through December down 3.1%; (b) revenue will fall short of budget by $1.5 Million; (c) one-time state utility payment of $300,000; and (d) overall General Fund revenue (a) initial projected shortfall of $1.0 Million; and (b) revised projected shortfall of $754,000.

General Fund expenditure reduction strategies include (1) selective hiring program - $250,000; (2) delay equipment and vehicle purchases until spring - $225,000 (3) divert Civic Center capital project savings - $100,000; and departmental line item reductions - $425,000. This would be a total savings of $1 Million.

He then reviewed the FY 2009 current year trends in Fund Balance, with the year-end estimate of 19.7%.

In response to Mayor Bellamy, City staff explained the General Fund budget amendments (expenses) adopted since the start of the fiscal year.

He provided Council with the FY 2008-09 Second Quarter Report. He reviewed the fall outlook for the initial General Fund gap. Initial budget assumptions include (1) 1.5% overall growth in revenue (a) property tax growth of 2.0% in FY 2008-09 and FY 2009-10; and (b) sales tax growth of 0% in both FY 2008-09 and FY 2009-10; and (2) expenditures (a) continue market-based pay adjustments and merit program; (b) 10% increase in health care budget; (c) 5% increase in operating costs due to inflation in key areas; and (d) no increase in debt service or capital outlay.

The current outlook regarding budget assumptions include (1) property tax projections have improved (a) FY 2008-09 tax base grew 4.2% vs. 10-year average of 3.3%; and (b) growth is expected to slow to 2.0% in FY 2009-10 due to recession; (2) sales tax projections have been lowered (a) sales tax revenue through December down 3.1%; (b) revenue will fall short of budget by $1.5 Million in current year; and (c) sales tax revenue likely to remain flat in FY 2009-10; (3) Airport Road and Ridgefield annexations (a) become a part of the City on March 31; (b) additional FY 2009-10 revenue of $900,000; (c) additional FY 2009-10 costs of $575,000 (ii) 3 firefighters and payments to rural departments; (ii) 2 police officers; (iii) Airport Road sewer installation; and

(iv) sanitation costs; (4) net revenue gain of $325,000; (5) suspend market adjustments - $1 Million; (6) eliminate merit pay (salary freeze) - $750,000; (7) reduce Housing Trust Fund transfer - $300,000; (8) reduce Transit Fund transfer - $500,000; (9) re-engineering, streamlining (a) 20 General Fund positions eliminated - $1 Million; (10) increase cost recovery from fees - $500,000; (11) reduce Fund Balance from 19% to 18% - $1 Million; (12) cost savings opportunities (a) shift to volunteers; (b) private sponsorships; (c) service level reductions, e.g., once vs. twice monthly brush collection - $500,000; and (13) Council strategic priorities (a) downtown cleanliness program; and (2) Pack Square Park operations - $250,000.

He then reviewed the current outlook of the General Fund budget gap of $375,000.

Regarding the budget forecast, Council policy direction is needed as follows (1) staff recommends Council review and consider current forecast assumptions; (2) is Council comfortable with current property tax, sales tax, and overall revenue assumptions; and (2) is Council comfortable with the budget balancing mix (a) cost controls; (b) re-engineering; (c) salary freeze; (d) Fund Balance usage; and (e) other expenditure assumptions.

Regarding the budget process, Council policy direction is needed as follows (1) staff recommends submittal of the Manager's Recommended Budget on May 12; (2) between now and April 14, staff recommends that the Council Finance Committee review major policy issues; (a) revenues/fees; (b) capital maintenance and improvement priorities; (c) outside agency contracts; and (d) service reduction and volunteer/sponsorship opportunities; and (3) Council may also wish to schedule a public input opportunity during a regular March meeting.

Throughout discussion, Council members voiced their suggestions for ways to cut the budget while Mr. Durant responded to various questions/comments from Council (noting that those he could not respond to would be furnished to Council in the near future). Some questions/comments include: how confident are we with the revenue picture; comments regarding the use of Fund Balance; how deep are we projecting to go into Fund Balance; what other monies are available for the Transit Fund and the Housing Trust Fund; information on the Fund Balance decline which was an accounting issue regarding health care; information on the use of Fund Balance when contracts are entered into prior to June 30, but bills are not received until after July 1; what has Fund Balanced been used for in the past few years; additional information on plans for personnel compensation regarding across the across the board freeze on salaries vs. considering some strategic areas that might suffer from that approach; additional information on what kinds of fee increases are proposed; how is the City meeting the standards regarding firefighter staffing on trucks (responded to by Fire Chief Greg Grayson); additional information requested on all the budget balancing mix presented by staff; does the proposed budget still maintain the current 401-K contribution for all employees; analysis of putting the 5% 401-K contribution in paychecks instead of the retirement system; additional information on the increase cost recovery from fees; and information on how this budget will make the City organization be healthier in the long run.

Councilman Russell, Chair of the Finance Committee, asked for Council's direction if they are comfortable with the general budget balancing mix of (a) cost controls; (b) re-engineering; (c) salary freeze; (d) Fund Balance usage; and (e) other expenditure assumptions. He encouraged Council to contact members of the Finance Committee on any issues they would like reviewed.

City Manager Jackson said that this budget has been a management team effort and they are prepared to list priorities for further reduction. He asked for Council direction on what sequence they would like for staff to bring the additional information forward - the Finance Committee and/or City Council. He didn't feel that any one meeting would allow for a complete review of the specific information requested. He suggested some follow-up effort by the Finance Committee to schedule the individual topics out and in what order.

After discussion, it was the consensus of Council to obtain all requested information in two weeks and then make a determination of the budget balancing mix.

At the request of the Finance Committee, it was the consensus of Council to move the outside agency requests from the Finance Committee responsibility to the Housing & Community Development Community.

Councilman Russell noted that the Finance Committee will be reviewing the fees and charges in the next 30 days so if Council has any specific interest, please contact a member of the Finance Committee.

Councilman Russell noted that in the assumptions, $3 Million out of the $5 Million is coming from the City's employee base.

City Manager Jackson said that we are making extra efforts to communicate with our employees and are inviting their input. In addition, he said that Mayor Bellamy has asked for continuing updates on the economic stimulus package at each of our Council meetings.

Mayor Bellamy said that it's imperative that we look at what makes Asheville work – its employees. We need to make sure that people have jobs so they can buy goods and services in our community. She will consider making cost cuts in other areas that are important to her in order to save someone's job. We need to make sure we have good staff and that they feel secure in their job.

City Attorney Oast said the adoption of the budget schedule will be considered by Council at their March 10, 2009, meeting.

At 4:30 p.m., Mayor Bellamy recessed the meeting for 30 minutes.

Tuesday – February 24, 2009 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis (left meeting at 9:58 p.m.); Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower (left meeting at 9:47 p.m.); Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Ms. Sue Ross, teacher, and students from the Odyssey School led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Miller gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING FEBRUARY 2009 AS "AMERICAN HEART MONTH"

Mayor Bellamy read the proclamation proclaiming February, 2009, as "American Heart Month" in the City of Asheville. She presented the proclamation to Dr. Caldwell, representing WNC Hypertension and Wellness Center, who briefed City Council on some activities taking place during the month.

B. PROCLAMATION PROCLAIMING FEBRUARY 2009 AS "NATIONAL CHILDREN'S DENTAL HEALTH MONTH"

Mayor Bellamy read the proclamation proclaiming February, 2009, as "National Children's Dental Health Month" in the City of Asheville. She presented the proclamation to Mr. Bill Murdock, representing the Eblen-Kimmell Charities, who briefed City Council on how the Children's Dental Health Program started and some of the activities taking place during the month.

II. CONSENT AGENDA:

At the request of City staff, Consent Agenda Items "D" and "J" were removed from Council's consideration.

At the request of Councilman Mumpower, Consent Agenda Items "C", "F", "G", and "H" were removed from the Consent Agenda for discussion and/or individual votes.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON FEBRUARY 10, 2009

B. ORDINANCE NO. 3702 - ORDINANCE DISSOLVING THE FILM COMMISSION

Summary: The consideration of an ordinance dissolving the Asheville Film Commission.

The Asheville Film Board was created in 1998 by Ordinance of the Asheville City Council. Since the years of its creation, the Board has undergone some changes including a name change in 2001 to the Asheville Film Commission (AFC). The AFC's mission, composed of 13 members, is to support the City as a "film friendly" town and to support media arts in the area. The AFC has had difficulty attracting and maintaining members. In reviewing its mission and the declining interest of its membership, the Commission at its June 18, 2008, meeting, determined that its mission would be more effectively delivered and expanded into media arts by transitioning into a stakeholder group with assistance from the Office of Economic Development, which has been endorsed by the City Council Boards and Commission Committee.

Pros:

- Greater access to additional digital and media arts stakeholders to support City of Asheville in its effort to be a "film friendly" town.
- Reduction in staff time with more flexibility in scheduling meetings
- Continued interest from former AFC members

Con: None.

There is no budgetary impact at this time. Staff time for meetings would be reallocated for other economic development activities.

City staff recommends that City Council adopt the ordinance dissolving the Asheville Film Commission.

C. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH WALKER PARKING CONSULTANTS FOR WALL STREET AND RANKIN AVENUE PARKING GARAGES RESTORATION

This item was removed from the Consent Agenda for discussion and/or an individual vote.

D. RESOLUTION APPOINTING A REPRESENTATIVE OF THE ASHEVILLE AREA ARTS COUNCIL TO THE PUBLIC ART BOARD

At staff's request, Vice-Mayor Davis moved to remove this item from Council consideration. This motion was seconded by Councilman Russell and carried unanimously.

E. RESOLUTION NO. 09-36 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXCHANGE SPECIALIZED FIRE APPARATUS WITH BRINDLEE MOUNTAIN FIRE APPARATUS LLC FOR THE ACQUISITION OF A CUSTOM HEAVY DUTY RESCUE TRUCK

Summary: The consideration of a resolution authorizing the City Manager to dispose of surplus and used specialized equipment used by the Asheville Fire and Rescue Department (AFR) in a no cost exchange for other specialized equipment to be used by AFR.

Typically city government uses publicsurplus.com or govdeals.com to dispose of worn out and surplus fire apparatus and equipment. Given city government's challenging budget situation and current economic conditions, AFR proposes to trade current surplus and used equipment for another piece of used equipment that will best meet the department's current needs, without having to incur any additional costs. Because we currently have several vehicles to dispose of, we can receive a much higher value by packaging the vehicles together for an even trade than we could by selling the vehicles individually. We are also reducing our overall fleet size and maintenance costs by using this disposal method.

North Carolina General Statute sec. 160A-271 allows city government to exchange property in order to acquire new property. An advertisement of the city's intent is required. This required advertisement has been properly posted for action at this Council meeting.

We have received appraisals of the vehicles to be disposed of. The following vehicles to be disposed of and their disposal value are as follows:

Property:	Value:
1999 International Tanker	$55,000
1994 Volvo/American Eagle Heavy Rescue	$12,000
1992 Grumman 102' Aerial	$20,000
1994 KME 55' Quint	$ 5,000
1992 KME 52' Snozzle	$10,000
1997 Freightliner 3D Hazmat	$35,000
1994 KME 75' Firestix Aerial	$22,000
1993 KME 75' Firestix Aerial	$17,000 *(not available until after 9-1-09)*
	$176,000

The following vehicle is proposed for exchange as an even trade for the above listed equipment: 1996 Pierce All Wheel Drive Heavy Duty Rescue Truck with a Fair Market Value of $176,000.

The above vehicle has been thoroughly evaluated by city staff and determined to be in sound mechanical condition with 30,000 miles. This vehicle is planned to serve as a reserve

rescue truck for AFR as well as a city hazmat truck. To purchase a similar vehicle as brand new would cost in excess of $500,000.

Regarding the Strategic Operating Plan, this action falls under the focus areas of (1) Safe - By providing appropriate reserve equipment for AFR, it will aid in making Asheville the safest city in America based on approved metrics for similarly sized cities; and (2) Fiscally Responsible – This action generates the highest value for the equipment that the city needs to dispose of. This is an even trade and taxpayers will not encumber additional costs to provide this piece of reserve equipment.

This item has been reviewed by the Council's Public Safety Committee and has received the Committee's endorsement.

Pros:

- This process will provide the highest value possible for the equipment that the department will dispose of – aiding our current budget situation.
- This is an even trade that will not cost taxpayers additional funds in order to procure the new to us equipment.
- This equipment will meet the department's current void for a reserve rescue and city hazmat truck.
- This new to us equipment will be immediately available to serve Asheville residents and businesses.

Con:

None identified at this time.

There is no adverse fiscal impact associated with this action. Value of similar vehicles using the typical disposal methods are much less than the value that we receive by packaging the equipment together for a trade.

City staff recommends that City Council adopt the resolution authorizing the manager to dispose of specialized equipment as an exchange.

RESOLUTION NO. 31 – PAGE 444

F. RESOLUTION AUTHORIZING THE CITY MANAGER OR HIS DESIGNEE TO CREATE A POLICY FOR AWARDING RETIRING POLICE OFFICERS THEIR SERVICE WEAPONS

This item was removed from the Consent Agenda for discussion and/or an individual vote.

G. RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AMENDED PROFESSIONAL SERVICES AGREEMENT WITH MCGILL & ASSOCIATES TO PREPARE ENGINEERING AND CONSTRUCTION DOCUMENTS FOR THE SANITARY SEWER INSTALLATION IN THE SARDIS ROAD AREA OF THE 2007 ANNEXATION

This item was removed from the Consent Agenda for discussion and/or an individual vote.

H. RESOLUTION AUTHORIZING THE MAYOR TO APPROVE A GRANT OFFER FROM THE FEDERAL AVIATION ADMINISTRATION FOR THE NORTH GENERAL AVIATION EXPANSION

This item was removed from the Consent Agenda for discussion and/or an individual vote.

I. RESOLUTION NO. 09-40 - RESOLUTION AUTHORIZING EXECUTION OF AN EASEMENT ACROSS CITY PROPERTY ON RESERVOIR ROAD – MCCAULEY DRIVE (WHITE PINE RESERVOIR)

Summary: The consideration of a resolution granting a utility easement over City property at White Fawn reservoir.

The City of Asheville owns the property known as White Fawn reservoir, as well as property coming down from the ridge on the west side. There are two towers on this property; these towers are used by various telecommunications service providers pursuant to licenses or lease agreements with the City. The towers receive electrical power from Progress Energy.

Progress Energy needs to upgrade its service to one of the towers (the western or lower one) from secondary to primary, and requires an easement for this purpose. Though this service line has been in place for many years, as far as we can determine, there is no recorded easement for it. This is not unusual in older areas of town.

The easement that is being requested would be 30 feet in width, and Progress Energy would be permitted to construct and maintain its line, including poles which would(increase from 30 to 40 feet in height), guy wires and anchors, and to keep the area cleared of trees and undergrowth. The location would be the same as the current service line. Progress Energy would be required to restore any area disturbed by its work to its previous condition. The lines and poles, even at the increased height, would not project higher than the tree line or ridge line, and would not intrude on the City's property any more than it currently does. The last 40 feet (from the supply line to the base of the tower) would be underground.

This area has been identified as having potential for future park or recreational use and the tower itself may be removed or relocated at some point. The line would not interfere with current use of the property, and in fact would improve service to the City's lessees and licensees, who in turn provide a needed service to many businesses and citizens. However, the degree of compatibility with future use is more difficult to gauge. With this in mind, the easement could be structured to permit the underground installation of the line at such time as the property is developed for recreation purposes. The cost of this could be included as part of the lease or license agreements.

The requested action complies with the City Council's Strategic Operating Plan in that it (a) supports a service that many businesses and individuals rely on to conduct their daily affairs; (b) provides critical infrastructure.

The requested action complies with the 2025 Plan and Parks Master Plan in that it does not interfere with any current recreational use of the property, and may facilitate such use by keeping path clear of undergrowth, and limiting conflicting uses.

Pros:

- Continues and improves existing telecommunications service to tenants / licensees of City facilities
- Formalizes a previously undocumented arrangement for use of City property

Cons:

- May require periodic trimming / removal of vegetation within easement area
- No use by City in a manner that interferes with easement
- Potential for incompatibility with future uses (but this can be addressed)

The fiscal impact is indirect; facilitates City's ability to continue leasing of towers.

If Council approves of the easement, City staff recommends adoption of the resolution authorizing the City Manager to execute the easement, subject to approval of the City Attorney.

RESOLUTION NO. 31 – PAGE 448

J. RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A SECOND ADDENDUM TO THE INTERGOVERNMENTAL AGREEMENT WITH BUNCOMBE COUNTY DATED SEPTEMBER 2, 2003, TO ESTABLISH AN OPERATIONAL AGREEMENT FOR THE CONSOLIDATED 911 CALL CENTER

At staff's request, Vice-Mayor Davis moved to remove this item from Council consideration. This motion was seconded by Councilman Mumpower and carried unanimously.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Cape moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Russell and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

Councilman Newman moved to approve Consent Agenda Items "C", "F", "G", and "H." This motion was seconded by Councilwoman Cape.

C. RESOLUTION NO. 09-35 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH WALKER PARKING CONSULTANTS FOR WALL STREET AND RANKIN AVENUE PARKING GARAGES RESTORATION

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Walker Parking Consultants to provide engineering services for Wall Street and Rankin Avenue parking garage restorations.

The City of Asheville owns and operates three parking garages; Civic Center, Rankin Avenue, and Wall Street. The Civic Center deck was built in 1976 and the others in 1988. Like any structure, these parking decks deteriorate over time and require restorative maintenance. This normally consists of waterproofing, concrete repairs, and re-caulking of joints between concrete slabs but a detailed assessment is required to be sure. The City of Asheville commenced a multi-year program to accomplish restoration of the garages in 2007. The restoration work was completed in Civic Center garage in 2008. Plans are for restoration work on Wall Street Parking Garage in fiscal year 2008/2009 and in Rankin Avenue Parking Garage in fiscal year 2010/2011. City staff recommended, and Council approved, including restoration work on Wall Street garage for inclusion in the Capital Improvement Plan for fiscal year 2008/2009.

Included in Parking Services' operating budget for the current fiscal year is $500,000.00 for debt service on the proposed parking garage on Biltmore Avenue. As construction of that facility has not yet started, this money will not be needed for debt service. Combining those funds with money in the Capital Improvement Plan will provide adequate funds to complete the restoration of both garages. This action will prevent the City from having to fund Rankin Avenue

Parking Garage restoration work and debt service on the proposed Biltmore Avenue deck simultaneously next fiscal year. Combining the work will also significantly reduce the engineering services fees and expenses.

During fall of 2008 Parking Services sent out a Request for Proposal to interested firms to provide engineering services for the restoration of Wall Street Parking Garage. The scope of work included a detailed assessment of the condition of the facility, preparation of working drawings, preparation of bid package for general contractors, and supervision of the restoration work. Five firms responded to the request for proposal. An internal review committee consisting of the Assistant Director, Transportation & Engineering, Minority Business Outreach Coordinator, and the Parking Services Manager selected Walker Parking Consultants as the most qualified and responsive of the five.

Walker Parking Consultants' fee for engineering services for the Wall Street Parking Garage restoration is $82,000.00. Parking Services requested, and received a quotation for a combined fee for engineering services for the Wall Street and Rankin Avenue parking garages restoration at $116,750.00; a significant per garage reduction. The primary savings will be on travel and lodging expenses. Staff is requesting authorization to sign a contract with Walker Parking Consultants, 1850 Parkway Place, Suite 730, Marietta, Georgia, for no more than $125,000.00; $116,750.00 for the contract and $8,250.00 for contingencies.

This action complies with the City Council Strategic Operating Plan in that it addresses a plan to maintain the City's aging facilities.

Pros:

- Combining the engineering services for both Rankin Avenue and Wall Street garages significantly reduces the overall cost than if they were done separately.
- The advantage of this to the City is by correcting problems in the deck now will prevent more costly repairs later and will extend the useful life of the parking facilities.
- Precludes the City from having to fund a large debt service and restoration project in one fiscal year.

Con:

- Completing both garages at the same time can be administratively cumbersome but is not insurmountable.

Funds were approved in the fiscal year 2008/2009 Operating and Capital Improvement Plan budgets.

City staff recommends City Council adopt a resolution authorizing the City Manager to sign a contract with Walker Parking Consultants in an amount not to exceed $125,000.00 for engineering services to complete Wall Street and Rankin Avenue parking garages restorations.

When Councilman Mumpower asked what provisions we have to ensure the contractor is hiring legal citizens, City Manager Jackson said that our contracts have boilerplate language that requires all our contractors comply with each and every federal regulatory requirement.

Councilman Mumpower could not support this action in that he felt City government is not making a responsible effort to make sure our contractors and their subcontractors hire legal citizens.

As noted after the Consent Agenda, Councilman Newman moved for the adoption of Resolution No. 09-35. This motion was seconded by Councilwoman Cape. This motion then carried on a 6-1 vote, with Councilman Mumpower voting "no."

10

F. RESOLUTION NO. 09-37 - RESOLUTION AUTHORIZING THE CITY MANAGER OR HIS DESIGNEE TO CREATE A POLICY FOR AWARDING RETIRING POLICE OFFICERS THEIR SERVICE WEAPONS

Summary: The consideration of a resolution authorizing the City Manager or his designee to create a policy for awarding retiring police officers their service weapon.

North Carolina General Statute sec. 20-187.2 provides that surviving spouses, or by surviving children if widowed of a law enforcement officer killed in the line of duty or who was a member of a law enforcement agency at the time of death, and retiring law enforcement officers shall receive upon request and at no cost, the badge worn or carried by the deceased or retiring officer. The statute further provides that the governing body of a law enforcement agency may also award to a retiring member or surviving relative as provided above, upon request, the service side arm of the retiring or deceased officer.

As is the practice of most police departments, for convenience and efficiency, the Chief of Police, has customarily awarded service side arms to retiring officers and to surviving family members of deceased officers. The department's Chiefs of Police have made such awards in consideration of the officers' many years of loyal and dedicated service to the City.

A law enforcement officer's badge and service side arm are more than just tools necessary for the performance of his or her duties; they are symbolic of service as a law enforcement officer. In recognition of this belief years ago, North Carolina passed, General Statute 20-187.2.

For honoring the dedicated service of a career police officer most police departments in the United States and in North Carolina including CALEA accredited agencies such as Raleigh, Charlotte, Burlington, Winston-Salem, Greensboro, Durham, High Point, Fayetteville, Greenville, Cary, Kannapolis, New Bern, NCALE, NCSHP, Monroe, Clayton, Albemarle, Rocky Mount have the Chief of Police or City Manager award service side arms to retiring officers or to surviving family members of deceased officers. This is a common and cherished tradition across the United States. Some municipalities and counties charge a token $1.00; others require no cost to the retiring officer or surviving spouse. North Carolina General Statute 20-187.2 provides for this.

Neither the City of Asheville nor the Asheville Police Department has ever awarded to retiring officers, or to qualifying surviving family members of deceased officers, the service side arm of the retiring or deceased officer. The loyal and dedicated service of the officer who has completed years of service to the City of Asheville and is eligible to retire under the North Carolina Local Law Enforcement Retirement system with the City of Asheville has gone without any award of their service side arm.

On February 17, 2009, the Public Safety Committee reviewed this request and endorsed it.

Pros:

- Positive recognition by the City of Asheville for a difficult career with many sacrifices
- Long term appreciation by the retiring officer
- High morale booster for current personnel

Con:

- Minimal budget impact

There will be minimal financial impact for the replacement of a handgun. Replacing weapons is an ongoing part of the budgeting process and weapons in the department are in varying stages of life expectancy and diminishing value.

Chief William A. Hogan and any subsequent Chief of Police at the time of retirement award the service weapon with the official credentials to said officer. Chief William A. Hogan and any subsequent Chief of Police at the time of the death of an officer award the service weapon with the official credentials to the survivor of said officer. This in accordance with North Carolina General Statute 20-187.2, for officers retiring after February 1, 2009. The retiring officer must have completed 20 years of credible service with the City Of Asheville and meet the requirements under the North Carolina Retirement System for Local Law Enforcement Officers. If an officer retires with less than 20 years of service with the city and retires on a service related physical disability, the officer will be awarded the service weapon and official credentials in the same manner.

Officers retiring in good standing with 10 - 20 years creditable service with the City of Asheville can request the award of the service weapon for a cost of $ 250.00. Any retirements under 10 years can request the award of the service weapon for fair market value.

Non physical service related disability retirements will be evaluated based on individual circumstances with a determination to be made by the Chief of Police.

City staff recommends City Council authorize the City Manager or his designee to create a policy for awarding retiring police officers their service weapon.

At the request of Councilman Mumpower, Police Chief Hogan explained the reasoning behind the policy request, in that it is a way of recognizing employees.

In response to Councilman Mumpower, Chief Hogan said that the policy could be made retroactive.

As noted after the Consent Agenda, Councilman Newman moved for the adoption of Resolution No. 09-37. This motion was seconded by Councilwoman Cape.

After a brief procedural discussion, Councilman Mumpower moved to amend Councilman Newman's original motion for a separate vote on Consent Agenda "F". This motion was seconded by Councilman Russell and carried on a 4-3 vote, with Mayor Bellamy, Councilwoman Cape and Councilman Newman voting "no."

Councilman Mumpower moved to approve Resolution No. 09-37, with the City Manager (1) exploring the potential for retroactive consideration for our police retirees at the discretion of City operational staff; and (2) reporting back to Council on any logistical or practical concerns. This motion was seconded by Councilman Russell and carried unanimously.

Vice-Mayor Davis was pleased to note that the Secretary of State honored the Asheville Police Department for their participation in apprehending almost $1 Million in counterfeit merchandise this past year.

RESOLUTION NO. 31 – PAGE 445

G. RESOLUTION NO. 09-38 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AMENDED PROFESSIONAL SERVICES AGREEMENT WITH MCGILL & ASSOCIATES TO PREPARE ENGINEERING AND CONSTRUCTION DOCUMENTS FOR THE SANITARY SEWER INSTALLATION IN THE SARDIS ROAD AREA OF THE 2007 ANNEXATION

Summary: The consideration of a resolution authorizing the City Manager to execute an amendment to an existing professional services contract with McGill & Associates to prepare the required documents to install sanitary sewer as outlined in the 2007 annexation services plan.

In June of 2008, a Request for Qualifications (RFQ) was solicited from several engineering firms for the engineering services required to design and construct the proposed sewer service in the Sardis Road area, as described in the 2007 annexation services plan. Several firms submitted RFQ's and a committee selected McGill & Associates (located at 55 Broad Street, Asheville, N.C.) as the firm to negotiate terms with first. Their initial fee was higher than estimated, but McGill & Associates suggested that they might be able to reduce the fee with a more detailed review of the sewer alignment. Therefore, the initial scope of work was reduced to include only preliminary surveying and engineering. The reduced fee was $20,200.00, and was executed on September 16, 2008. McGill & Associates determined that the proposed alignment could be changed such that the number of easements could be reduced substantially, therefore reducing the overall cost of the design and construction accordingly.

In addition to these costs savings, the Transportation and Engineering Department has re- examined this contract to determine what components could be done with City staff. Based on this evaluation, several tasks have been omitted from the proposal, and re-assigned to the Engineering Services Division, further reducing costs. The total estimated cost reduction equals $103,000.00.

This contract amendment will allow for the design, right of way acquisition, and construction of the sanitary sewer for Sardis Road area that was part of the 2007 annexation. The original contract allowed McGill & Associates to proceed with the preliminary surveying and engineering, and is nearing completion.

This action complies with the City Council Strategic Operating Plan in that it will enhance the infrastructure within our municipal limits, and fulfill the City's obligation outlined in the 2007 annexation of the Sardis Road area.

Pros:

- Will allow for the ultimate construction of approximately 6,455 linear feet of new sanitary sewer within the Asheville City limits.
- Will fulfill the City's obligation of the 2007 annexation of the Sardis Road area.

Con:

- The City will not receive any financial return directly from installation of the sewer, as it will be turned over to MSD upon completion.

This will cost the City $164,490.00 in fees for professional services.

City staff recommends City Council adopt a resolution authorizing the City Manager to execute an amendment to an existing professional services contract with McGill & Associates.

Councilman Mumpower could not support this action in that he felt City government is not making a responsible effort to make sure our contractors and their subcontractors hire legal citizens.

As noted after the Consent Agenda, Councilman Newman moved for the adoption of Resolution No. 09-38. This motion was seconded by Councilwoman Cape. This motion carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 446

H. RESOLUTION NO. 09-39 - RESOLUTION AUTHORIZING THE MAYOR TO APPROVE A GRANT OFFER FROM THE FEDERAL AVIATION ADMINISTRATION FOR THE NORTH GENERAL AVIATION EXPANSION

Summary: The consideration of a resolution authorizing the Mayor to approve a Grant Offer from the Federal Aviation Administration (FAA) in the amount of $1,889,029.

The FAA has offered a grant agreement to the Asheville Regional Airport. This grant, in the amount of $1,889,029 is for the North General Aviation Expansion Project No. 3-37-0005-034-2009.

Staff recommends adoption of the resolution authorizing the Mayor to execute the grant agreement for Project No. 3-37-0005-034-2009.

Councilman Mumpower felt that he could not support spending $2 Million at our airport during this economic climate. He also questioned if there was any policy to make sure the workers are legal citizens.

As noted after the Consent Agenda, Councilman Newman moved for the adoption of Resolution No. 09-39. This motion was seconded by Councilwoman Cape. This motion carried on a 6-1 vote, with Councilman Mumpower voting "no."

City Attorney Oast said that the use of the E-Verify System is a requirement of all federal contracts. He noted that there has been legislation introduced in the General Assembly to require the E-Verify System in state contracts as well.

After a brief discussion on the City's efforts to hire and require contractors and subcontractors to verify and hire legal citizens, it was the consensus of Council to instruct City Manager Jackson to update the information provided to Council earlier and explore other audit practices.

RESOLUTION BOOK NO. 31 – PAGE 447

III. PRESENTATIONS & REPORTS:

A. QUARTERLY REPORTS

Boards & Commissions Committee Chair Report

Vice-Mayor Davis, Chair of the Boards & Commissions Committee, provided Council with an update of their activities during the last quarter. He thanked his other Committee members of Mayor Bellamy and Councilman Mumpower for their hard work on this Committee.

Strategic Operating Plan

Assistant City Manager Jeff Richardson reviewed with Council the 2008-09 Strategic Operating Plan.

In the affordable focus area (1) Community Development Block Grant (CDBG) and HOME funds as of December 31, 2008 (a) 54 projects; (b) 584 affordable units; (c) served 6,000 citizens; (d) 40 micro-businesses; and (e) 29 applications received (1/1/09); (2) Housing Trust Fund as of December 31, 2008 (a) $1.6 Million allocated; and (b) 76 affordable units; (3) Ten Year Plan to End Homelessness (a) $500,000 in CDBG and HOME funds as of December 31, 2008; and (b) promotional campaign for "Spare Change for Real Change; and (4) Employer of Choice (a) implemented 3 tiered health insurance plan; and (b) expanded flexible work schedules - condensed work weeks, with no service reductions.

In the green focus area (1) Public Works (a) collected 7,838 tons of recyclable material in 2008; (b) constructed 6.08 miles of sidewalks in 2008; and (c) CNG sales are 60% higher than projected (1/1/09; (2) Engineering & Transportation (a) transit received $2.1 Million for five hybrid buses and a Federal Transit Administration Grant; (b) 1.5 Million transit passengers (12/31/08); and (c) two "Hop and Ride" locations; (3) Water Resources; (a) Water Resources re-certified as ISO 14001; and (b) Water Production upgrades as part of the bond project are complete; (4) Office of Economic Development (a) acquired property along Swannanoa River Road for floodplain/river protection (Wilma Dykeman Riverway Plan); and (5) Building Safety (2/1/09) (a) 36 sustainable fee waivers issued totaling $11,800 in fee waivers for green building efforts.

In the safe focus area of Asheville Fire and Rescue (AFR) (1) 94% customers rate AFR services as excellent/good in citizen survey; (2) extended 2008 responding to 15,377 calls; (3) AFR benchmarked performance with ICMA, AFR's workload is comparative to cities with populations 150,000 people; and (4) secured property for a future fire station in west Asheville.

In the safe focus area of the Asheville Police Department (APD) (1) APD responsible for mutual aid to U.S. Secret Service for dignitary protection at numerous political events; (2) police bicycles bought with funds from the West Riverside Operation Weed & Seed Project; and (3) graduated more than 100 adults and nearly 40 teenagers from the Citizens Police Academy and Junior Police Academy in 2008. Service calls for 2008 for 911 calls is 33,096; wireless calls is 2,107; for a total number of service calls of 113,570 (includes officer initiated).

In the sustainability focus area (1) River District Brownfields Program - financial assistance application for Phases I and II began on December 1 (applications due March 13); (2) One Stop Shop (a) staff site visit to Columbia, S.C.; and (b) next steps include identifying key functions to relocate to Public Works; (3) Transit Master Plan (a) completion of first phase and (b) next steps; (4) Water Bond Project - Water Bond projects are approximately 70% complete; (5) City Manager's Development Forum (a) discussion on economic issues facing area; and (b) Planning & Zoning Commission; (6) Neighborhood Stabilization Grant (a) reduce vacant properties; and (b) available affordable housing; and (7) Expand Partnership with UNC-Asheville (a) UNC-Asheville and City of Asheville staff collaboration; and (b) five areas of focus.

Fire Chief Greg Grayson responded to various questions from Council, initiated by Councilwoman Cape, regarding the AFR's 15,377 calls in 2008 and how the AFR's workload is comparative to cities with populations 150,000 people. Councilman Mumpower felt that if we are processing double the calls based on national statistics, then Council should have some policy deliberation about what we can do to address that workload.

Mr. Richardson responded to Councilman Kelly explaining that improved customer experience and better efficiencies over time will result in cost efficiencies with the one-stop shop.

Mr. Richardson said that Council has been provided with an economy report for FY 2008-09 (2nd Quarter). He reviewed charts on (1) employment change by major industry; (2) unemployment rates; (3) monthly home sales - units; (4) monthly home sales - average price; (5) residential building permits - units; (6) residential building permits - value; (7) City business licenses; and (8) special focus of total employment - Asheville MSA.

He said that Council has been provided with the Asheville Police Department's outreaches/actions for January 2009. He said that January was a very successful month for the APD, particularly in terms of key arrests and drug interdictions. Detectives in the Criminal Investigations Division (CID) cleared several first-degree residential burglaries ("home invasions") and made an arrest for second-degree murder in a homicide cold case that was nearly 20 years old. CID also in January arrested two women for a string of eight armed robberies that had plagued local hotels and convenience stores, as well as two men who were posing as law enforcement officers and robbing people. In addition, our K-9 Unit and Drug Suppression Unit

(DSU) made key interdictions of large supplies of marijuana and cocaine that would otherwise be on the streets. He reviewed the following most notable arrests/actions from January: (1) APD charges man in 1990 homicide; (2) arrests made in home invasions; (3) DSU seizes nearly 2 kilos; (4) man pleads guilty to sexual battery; (5) two charged with impersonating law enforcement officers, robberies; (6) APD top 10 arrestees of 2008; (7) CID/crime stats; (8) Support Services Division calls; (9) Patrol Division charges/seizures; (10) K-9 Unit makes key seizure; (11) outreach; and (12) staff and other recognitions.

In response to Councilman Mumpower, Police Chief Bill Hogan explained what their efforts have been to eliminate the open air drug market, noting that they have not let up in their efforts to reduce drugs. He agreed with Councilman Mumpower in that there are not sufficient resources for the judicial system.

Councilman Mumpower urged the citizens to take ownership of their neighborhoods and work with the Police Department to eliminate the open air drug market.

In response to Councilwoman Cape regarding the homeless population, Mayor Bellamy noted that the service providers are tracking where people are coming from and City Council will be hearing a report on the homeless initiative in the very near future.

B. TRANSIT MASTER PLAN UPDATE

Director of Transportation and Engineering Cathy Ball said that the following report is to provide an update of the development of the Transit Master Plan.

The City of Asheville is analyzing existing transit services, assessing current and future needs, determining future equipment and operational requirements, and determining how existing bus transit services can be streamlined to provide improved service levels through the development of a Transit Master Plan.

The City hired HDR Engineering, Inc. of the Carolinas as the firm to provide services for the development of the City of Asheville Transit Master Plan (TMP).

The scope of work identified seven specific tasks as follows: Task 1: Data Collection; Task 2: Public Involvement; Task 3: Impacts to Existing Ridership; Task 4: Impacts to ATS Operations; Task 5: Transit Facility Locations; Task 6: Recommendations and Implementation Plan; and Task 7: Funding.

To date the consultants have finished with the data collection and the first phase of the public involvement tasks.

The data collection consisted of data gathering and application of several surveys. During the data gathering the consultants reviewed relevant studies and data collected from other sources. Such sources included the Comprehensive Transportation Plan, Long-Range Transportation Plan, any relevant issues from the latest Federal Transit Administration (FTA) Triennial Review or North Carolina Department of Transportation (NCDOT) reviews, or other studies conducted by the City and the Metropolitan Planning Organization.

Three different surveys were applied to get input from riders and non-riders, and included:

- On-board survey to gather travel information, rider profile information and rider attitudinal information.
- Ride check survey to determine origins and destinations, identifying busiest areas and more used bus stops.

- Survey Monkey, an on-line tool which aims to identify potential new riders and barriers that prevent them from riding the bus, as well as current riders and the potential for improvements.

This task was completed with a public meeting held on January 22nd at the Civic Center. 176 persons signed in and gave their input to the consultants and staff.

The analyses showed that most of the rider's trips originate and end at home (35%), 20% are work related trips and 11% are for shopping.

Regarding frequency, most of the riders ride six days per week (54%), and 40% have been riding for five years or more.

The analysis showed that two thirds of the riders are transit dependant and one third are choice riders.

The ethnicity analysis showed that 48% of riders are white/non-Hispanic and 40% are black/African-American.

The surveys allowed identifying the most needed improvements, shown below:

- Sunday service (25%)
- More frequent service (16%)
- More evening service (14%)

When riders were asked to choose only one of these improvements 53% identified Sunday service as the most needed improvement.

During the public meeting a dot voting system was implemented. The analysis showed that 22% of the riders want more frequent service, followed by a tied between Sunday service and more sidewalks (18%).

Non-riders who participated in the SurveyMonkey identified more frequent service (32%) as the main reason to consider riding the bus. Riders considered the same as a needed improvement (30%) in the on-line survey.

The next steps involve the development of tasks 3 to 7 and completion of the public involvement process. The consultants will be developing recommendations, implementation plan, cost analysis and funding.

Staff expects to have the draft plan ready by mid-May and bring the final plan for Council approval by the end of June.

The Transit Commission supports the development of the Transit Master Plan.

Regarding the Strategic Operating Plan, the TMP will support the areas of environmental sustainability, promoting emission reductions through transit and identifying a sustainable funding structure for transit.

The project complies with the City Development Plan – 2025, Transportation Goals and Strategies, as follows: (1) Goal VI: Develop a transit system that is capable of meeting the needs of all residents of and visitors to the region; and (2) Goal X: Develop a comprehensive set of implementation strategies intended to reduce local vehicle miles traveled in accordance with the State of North Carolina transportation policies.

Pros:

- The development of the transit master plan provides the tools to reshape the transit system accordingly to current ridership and development.
- The TMP will identify future opportunities for growing in a planned and organized way.
- The TMP will make recommendations related to technology, transit facilities and funding opportunities.

Con:

- None.

The project cost is $89,245 and 10% contingency for unforeseen expenses during the development of the master plan.

Ms. Ball summarized by saying that the study objectives for the Transit Master Plan include (1) assess current conditions; (2) project future system needs - equipment and operational requirements; (3) streamline and improve service levels; and (4) identify funding opportunities.

The scope of work entails (1) data collection; (2) public involvement; (3) impacts to existing ridership; (4) impacts to Asheville Transit System (ATS) operations; (5) Transit facility locations; (6) recommendations and implementation plan; and (7) funding.

Work completed includes (1) data collection (a) ride check and analysis; (b) on-board survey; and (c) survey monkey (on-line); and (2) public involvement (a) public forum.

Key findings consist of (1) 35% of the trips are to/from home, followed by work related trips (20%) and shopping (11%); (2) most of the riders ride six days per week (54%); (3) 40% have been riding for 5+ years; (4) one-third of the riders choose to ride the bus instead of taking a car; and (5) 48% of riders are White/Non-Hispanic, 40% are Black/African American.

Riders are satisfied or very satisfied with all service aspects except hours of operation. The best attributes are safety and fire. The worst attributes are hours of operation, frequency, and on-time.

She reviewed the requested service improvements of (1) Sunday service; (2) increased service frequency; (3) more evening service; (4) new routes; (5) more sidewalks; (6) better on-time performance; (7) more shelters; and (8) express buses.

Next steps include (1) development of recommendations to be presented to the Steering Committee and operators; (2) second public meeting is April 2; (3) implementation plan; (4) cost analysis and funding; (5) draft plan; and (6) presentation to City Council for adoption in June 2009.

This report is to provide an update to City Council; no action is recommended at this time.

Councilwoman Cape stressed the need for on-time performance.

After a brief discussion about concerns (or perceptions) of buses speeding through neighborhoods, Ms. Ball said that one of their goals is to design the route so that the buses can go slower (so they are not perceived as going faster) and still make the route. She felt they can also do some random checks, if Council desires.

C. EMERGENCY PREPAREDNESS SYSTEM

Fire Chief Grayson introduced Mr. Doug Hoell, Director of North Carolina Emergency Management (NCEM); Mr. Mike Cook, Western Branch Manager for NCEM; Mr. Jimmy Ramsey,

NCEM Area 14 Coordinator; Mr. Jerry VeHaun, Buncombe County Emergency Services and Homeland Security Director; and Dr. Martha Salyers, Director of Region 6 Public Health Team.

Chief Grayson said that the system component representatives include (1) City government efforts; (2) County government efforts; (3) NC Emergency Management efforts; (4) non-profit agencies as partners, such as American Red Cross, United Way 211 and a host of others.

The NC's system is an all-hazards approach to emergency assistance (1) severe weather (hurricane, snow, tornado, flood, drought); (2) technological (hazardous materials/radiological, fixed nuclear facilities); (3) man-made (weapons of mass destruction, cyber-terrorism); and (4) lost person search/rescue.

Emergency management traditional phases include (1) preparedness (a) training; and (b) equipment); (2) response; (3) recovery; and (4) mitigation.

Chief Grayson then reviewed the flow chart of the NC Emergency Management System when disaster strikes in Asheville.

The City's primary emergency services include (1) Fire and Rescue; (2) Police; (3) Public Works - fleet and streets); (4) Water; and (5) support departments such as Finance, Information Technology, Engineering, Public Information and Building Safety.

Key emergency roles for Asheville include (1) City Manager keeps all elected officials apprised of emergency situations and obtains policy direction from elected officials when necessary; (2) Fire and Rescue has the key coordinating role to ensure that unified command and control is in place and operates in concert with Buncombe County and NC Emergency Management efforts; and (3) all other operating departments perform specific services as needed for the emergency.

Buncombe County's primary emergency services include (1) emergency medical services; (2) emergency management; (3) Sheriff's Department; (4) Human Services departments; (5) health; and (6) support departments.

Transition from County to State Emergency Management includes (1) all 100 counties have an Emergency Management Director whose position is partially funded by state government; (2) the state has three geographical districts that the County directors connect with. The Western North Carolina branch headquarters is located in Conover; and (3) North Carolina operates an Emergency Operations Center in Raleigh 7/24/365 and upgrades when needed for all significant emergencies.

In response to Councilman Miller, Chief Grayson and Dr. Hoell updated Council on plans for future fuel shortage problems.

In response to Councilwoman Cape, Chief Grayson and Mr. VeHaun stressed the importance of individuals to be prepared (for at least 72 hours) and outlined the various ways they can make a plan, e.g., visiting the various links on the City website, Buncombe County website, watching programs on the City Government Channel, contacting the Red Cross or Hearts with Hands, etc. Even some digital billboards help advise people on what they need to have in case of an emergency.

When Councilwoman Cape asked if any changes are made to prepare for climate adaption, Mr. VeHaun said that they are keeping abreast of changes and adapting where necessary. Dr. Hoell also explained how the NCEM is preparing for multi-hazards.

In response to Vice-Mayor Davis about nuclear transportation, Fire Chief Grayson and Assistant Fire Chief Gary Cornett and member of the Hazardous Materials Team, explained how Asheville is more prepared than many other cities our size. Our greatest resource is Asheville being a regional hub and because of that we have Dr. Salyers and her team. He also noted that Asheville is one out of 7 teams in North Carolina that houses a Hazardous Materials Team.

In response to Mayor Bellamy regarding the excellent collaboration of public involvement at the grassroots level, Dr. Salyers said that Mr. Chris Emory with Buncombe County Health Center Preparedness Coordinator, is working on a vulnerable populations initiative. This is a means to get all of the organizations agencies in the City and Buncombe County to figure out a consistent way to identify the populations that we're worried about and help them produce a more prepared population so that when things do happen, we can look to ourselves and our neighborhoods. Mayor Bellamy said that this plan will be coming before Council once it's completed.

Mayor Bellamy, on behalf of Council, thanked the individuals for coming in and helping Council and the public understand the emergency preparedness system we have in place and what is forthcoming.

Budget/Personnel Issues

Due to the number of speaker requests regarding the budget and a personnel issue, Mayor Bellamy noted that at the Informal Discussion and Public Comment portion of the meeting Council does allow public comment on any item not on the agenda. However, Council does not consider personnel matters in open session. City Attorney Oast said that to the extent public comments deal with specific personnel recommendations, Council may limit the comments.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE CONDITIONAL ZONING ORDINANCE FOR WEIRBRIDGE VILLAGE (PHASE II) AT 1741 HENDERSONVILLE ROAD TO REDUCE THE NUMBER OF BUILDINGS AND DWELLING UNITS; REDUCE THE HEIGHT AND WIDTH OF THE BUILDINGS; AND CHANGE THE LOCATION OF BUILDINGS

ORDINANCE NO. 3703 - ORDINANCE AMENDING THE CONDITIONAL ZONING ORDINANCE FOR WEIRBRIDGE VILLAGE (PHASE II) AT 1741 HENDERSONVILLE ROAD TO REDUCE THE NUMBER OF BUILDINGS AND DWELLING UNITS; REDUCE THE HEIGHT AND WIDTH OF THE BUILDINGS; AND CHANGE THE LOCATION OF BUILDINGS

Mayor Bellamy opened the public hearing at 7:20 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to amend the conditional zoning ordinance for Weirbridge Village Phase (II) at 1741 Hendersonville Road to reduce the number of buildings and dwelling units; reduce the height and width of the buildings; and change the location of the buildings. This public hearing was advertised on February 13 and 20, 2009.

Ms. Cogburn said that the subject property, 15.86 acres of a 20.66 development, is located within the city limits, at the corner of Hendersonville Road and Racquet Club Road. The property previously contained a few homes and accessory buildings, which have now been demolished. Surrounding properties are both residential and commercial. To the north is the Racquet Club (a recreational facility) and the Racquet Club Village condominiums. Applebee's restaurant is on the northwestern corner at the intersection of Racquet Club and Hendersonville Roads. Across Hendersonville Road are apartments and commercial properties. To the south, a

low density multi-family development (Crowfields Condominiums) abuts the development and to the east another condominium development, South Oaks, is located. Two banks have been constructed on the commercial portion of the project. There is one remaining outparcel that has yet to be developed. The zoning in the area reflects the development; to the north and east, RM16 and HB, and to the south and west, RM6.

The applicant received conditional zoning approval in November of 2006 for the property to be zoned Highway Business Conditional Zoning. The site plan that was approved with the rezoning presented a mixed use development with commercial outparcels to the east (along Hendersonville Road) and 336 residential dwellings located on the middle and western portions of the property (the subject of the requested amendment). The applicants received approval for an amendment to the conditional zoning ordinance in May of 2008. This amendment approved a coordinated sign package for all phases of the development.

As approved in 2006, the residential portion of the development was proposed to contain 336 residential dwellings (112 one-bedroom units, 176 two-bedroom units, and 48 three-bedroom units) in 16 buildings. The developer is now proposing 280 units (86 one-bedroom units, 163 two-bedroom units, and 31 three-bedroom units) in 10 buildings. Both plans show a clubhouse with pool and open space in the center northeast of the property. Buildings have been shifted; they are now further away from the property lines, except to the east. Additional changes from the previously approved plans for Phase II of Weirbridge Village are the following:

- Parking is no longer proposed to be provided within the residential structures. Surface, carport, garage, and on-street parking is shown. The parking complies with the City's parking standards.
- The impervious surface is reduced in the new development proposal. The original impervious surface calculation was for 8.67 acres of impervious surface. Impervious surface under the new development proposal will be 8.49 acres.
- Two entrances to the residential portion of the project from Racquet Club Road have shifted. The originally proposed entrance to the west of the project has been moved closer to the center and the originally proposed entrance in the center has been shifted eastward to align with the drive into Racquet Club Village.
- The developer is proposing to meet Healthy Built Home Standards in the development of the project as opposed to seeking LEED certification.
- The height of the buildings is reduced under the new proposal. The buildings in the original proposal were 51'6 ¾ "in height. The new proposal contains buildings that are 40'6 ¾ "in height.
- Whereas the previous plan showed three stories of dwelling units with structured parking below, the new submittal shows residential buildings with 3-4 split to fit the topography found on the site.

The developer is still planning on providing 5% of the units (14 units) at affordable rates per the City of Asheville's guidelines. The developer, as previously approved, is designing the project to provide stormwater controls suitable to handle a 25-year storm and using Best Management Practices in the design of their stormwater measures. Landscaping is provided to meet the City's ordinance as before with the "Type C" buffers to the south and west still shown.

A number of conditions were placed on the property at the time of the initial conditional zoning approval. The signage conditions were amended with the submittal of the sign package.

Amendments to Conditional Zoning approvals come directly to the Asheville City Council so this matter has not been previously heard by the Planning and Zoning Commission. The Technical Review Committee (TRC) reviewed this project informally at their meeting on 2 February 2009. At that meeting, the Committee found no reason to review the project in detail prior to it returning to Council for consideration of the changes. The project will return to TRC for

detailed technical review of all aspects of the project, should Council approved the proposed amendment.

Pros:

- The proposed development supports the 2025 goals of: promoting transit supportive density, pursuing infill development, utilizing greenbuilding techniques, providing affordable housing, and developing and using BMPs to address the effect of development on stormwater runoff and water quality.
- The developer has and continues to work on the improvement of Racquet Club Road and its intersection with Hendersonville Road.
- The reduction in and movement of the residential structures should allow for the saving of additional mature trees on the site.
- Changes result in a small reduction in impervious surface (2%).

Cons:

- Reduces the total number of units and overall density, including the number of affordable units offered (reducing density could be viewed as a "pro."
- Removes the structured parking; however, no additional impervious area is proposed.

Based on the analysis provided in the report, staff finds this request to be reasonable.

Staff recommends approval of the amendment to the conditional zoning approval for Weirbridge Village with the conditions previously adopted with the following changes: (1) Condition 7 will be changed to read, "The project shall be designed to meet Healthy Built Homes standards."' and (2) Condition 13 statement that concerns signage shall be changed to read, "Signage shall conform to the sign package approved by Asheville City Council on June 24, 2008."

She said that the development team has met with representatives of South Oaks Subdivision and Crowfields Subdivision.

Mr. Clay Moody, Landscape Architect with Design Associates, explained that this amendment is only for the residential part of the project and not the commercial part. He explained some of the completed components of the project to date. Due to the economy, he explained in detail the requested revisions. He felt they have improved the project in many ways and urged Council for their support.

Mayor Bellamy closed the public hearing at 7:37 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3703, to approve the proposed changes to the development of Weirbridge Village and to approve amending the conditional zoning ordinance in accordance with the site plan presented for the residential phase of the project and the conditions in the original approval with the following changes (1) Condition 7 will be changed to read "The project shall be designed to meet Healthy Built Home standards" and (2) Condition13 statement that concerns signage shall be changed to read "Signage shall conform to the sign package approved by City Council on June 24, 2008." This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 25 – PAGE 185

V. UNFINISHED BUSINESS:

A. RESOLUTION NO. 09-41 - RESOLUTION ADOPTING THE PARKS, RECREATION, CULTURAL ARTS AND GREENWAYS MASTER PLAN

Parks & Recreation Director Roderick said that this is the consideration of a resolution adopting the Parks, Recreation, Cultural Arts and Greenways Master Plan.

Based on the direction from City Council, the City of Asheville contracted with GreenPlay, LLC, at a cost of $120,000, to lead the process to develop a master plan for parks, greenways, recreation and cultural arts. GreenPlay, based out of Broomfield, Colorado, operates as a consortium of experts to provide services for parks, recreation, open space and related agencies.

GreenPlay worked with staff and a volunteer steering committee to guide development of the plan and gather public input. Over 1,000 people participated in the public input process January through July 2008 via seven focus groups, eight stakeholder meetings, nine public meetings, three board and commission meetings, and a direct mail survey.

The consultant 1) analyzed the existing level of services in parks, recreation, cultural arts, public art, festivals and greenways, 2) inventoried and assessed existing assets and services, 3) inventoried and analyzed recreation programs, 4) developed recommendations for goals, strategies and action steps.

The preliminary recommendations were presented to the Master Plan Steering Committee on June 10, 2008. Based on feedback, GreenPlay refined the recommendations and presented it to the public at a public meeting on July 17, 2008. GreenPlay presented the master plan and recommendations to City Council at a work session on November 18, 2008, with the intent for the plan to come back to Council at a later date for action. The master plan is a long-range planning document presented in goals, strategies and action steps that creates a vision and a guideline for a coordinated effort to deliver parks, greenways, recreation and cultural arts services over the next 10 to 15 years. The master plan does not obligate nor commit City Council to a funding timeline for implementation. The recommendations in the plan will be implemented as funding opportunities become available.

This action complies with the City Council Strategic Operating Plan and the Asheville City Development Plan 2025.

This item was reviewed on November 7, 2008, by the Council appointed boards. The Recreation Advisory Board and the Public Art Board voted unanimously to recommend the adoption of the master plan to City Council. The Greenway Commission voted unanimously to abstain from voting to support the master plan as drafted. While the Greenway Commission supports the intention to simplify and streamline communications among Council appointed boards and commissions as well as other committees associated with the Parks, Recreation & Cultural Arts Department, the Commission thinks the structure laid out in the plan is unnecessarily complex and hierarchical.

Staff agrees with the master plan and the recommendations as presented, but recommends:

1) Goal # 2: Improve administrative effectiveness and transparency as it pertains to the role of citizen boards, commissions and committees and relationship with staff, each other and to City Council. Staff recommends that staff and the Recreation Advisory Board further assess citizen board, commission and committee development to determine a model that is a best match for operations, which will be brought back to Council at a later date for consideration.
2) Timetable for Capital Improvement Projects: Rather than assign Capital Improvement Plan (CIP) projects to a five-year incremental timeline, staff recommends prioritizing the projects based on expressed community interest and a plan to preserve the existing

infrastructure of parks and recreation facilities which may be adjusted and implemented as funding becomes available.

Pros:

- Establish a clear direction and a coordinated effort to guide staff, advisory boards and commissions and elected officials in efforts to enhance Asheville's parks, recreation and cultural arts programs, services and facilities.
- Prioritize capital projects in a manner to allow for adjustment as funding becomes available
- Help meet the recreational needs of Asheville citizens by positioning Asheville to build on the community's park and recreation assets and identify new opportunities.

Con:

- None

The financial impact of implementing the plan will be determined by future capital improvement planning processes.

Staff recommends City Council adopt a resolution adopting the Parks, Recreation, Cultural Arts and Greenways Master Plan with direction to 1) assess board, commission and committee development at the Council's Boards & Commissions Committee, and 2) prioritize capital improvement projects for future consideration and implementation as CIP funding becomes available.

In response to Councilman Mumpower regarding cost, Mr. Simmons said that there was not a detailed analysis for cost and that a projection over a period of time at today's dollars would be approximately $40 Million.

Councilman Mumpower questioned the realism of the plan coupled with no budget. He felt we don't have enough dollars to take care of our existing facilities.

Mr. Marc Hunt, Chairman of the Tree Commission, noted that the Greenway Commission did not vote to approve the plans noting 3 concerns, two of which Mr. Roderick addressed. The third concern is that projects in the Wilma Dykeman RiverWay Plan would not be supported by the department. Those plans are mentioned and highlighted as priorities, but it clearly states that the department will not actively engage in the development of greenways in that district. That is a mistake. Their suggestion would be for Council to direct staff to reconfigure the plan so as to address the entire City, not just the City except for the River District. Regarding funding, we do need to be proactive and definite about funding plans and some day when the economy recovers they feel a General Obligation Bond is the strategic way to get projects implemented on a manageable program timeline. Finally, they encourage Council to direct staff to expand the planning for greenways to include pedestrian and bicycle amenities around the City. He feels there needs to be one plan that brings these segments together.

In response to Councilman Newman, Mr. Hunt was not suggesting the Greenway Commission have broader authority for the pedestrian and bicycle plans, but it should be looked at in the context of a multi-department approach.

Mr. John Pomeroy, representing some local businesses in the River District, urged Council to adopt the Plan with the inclusion of the development of greenways in the River District.

Mr. Michael Soule, founder of Asheville on Bikes, encouraged Council to adopt a plan for multi-modal infrastructure.

Mr. David Madera, represent developers on River District, spoke in support of adopting the Plan with the inclusion of the development of greenways in the River District.

Ms. Karen Cragnolin, Director of RiverLink, urged Council to adopt a plan that includes the development of greenways in the River District with the Wilma Dykeman RiverWay Plan.

Mr. Darryl Searcy did not support adopting this plan in that we are trying to balance the budget and this plan has no budget associated with it.

Mr. Mike Fryar could not support the plan in that it has no budget associated with it.

Ms. Jean Webb noted Council is not voting on spending $40 Million but voting on a vision. She urged the plan be approved and that the Wilma Dykeman RiverWay Plan, which is a vital part of this plan, be prioritized in this plan.

Ms. Leesa Kulba was concerned about adopting the plan with the proposed revenue sources.

Mayor Bellamy closed the public comment period at 8:03 p.m.

In response to Councilwoman Cape, Mr. Simmons stressed this is a guiding tool and that everything in the plan having to do with fees or taxes has to come back before Council for approval. Anything implemented that is a policy decision has to come back for Council approval, through the Recreation Board.

Mr. Simmons said that in response to the Wilma Dykeman RiverWay Plan, he said that plan is not left out, but this plan isn't to enhance the Wilma Dykeman RiverWay Plan. The Wilma Dykeman RiverWay Plan is a part of the City because it was adopted. There are other things in place to move the Wilma Dykeman RiverWay Plan along. In order to advance our park system, we have to build on the rivers. He said the Wilma Dykeman RiverWay Plan is a valuable tool. In addition, this Plan will be updated as we move along and if there are elements left out or needed to be added, this Plan can be amended.

Councilwoman Cape confirmed that we are not leaving out the Wilma Dykeman RiverWay Plan out of the overall master plan for the City of Asheville.

In response to Councilman Newman, Mr. Simmons explained that the Wilma Dykeman RiverWay Plan was not developed by the City, but by community partners coming together. We don't have ownership of it, but we can include that in our planning so we don't overlap in the development of the build-out of the riverways.

Councilman Newman said there is a lot of support for the inclusion of the Wilma Dykeman RiverWay Plan in this Plan. He asked that if this Plan is approved, that we ask the Parks & Recreation Department, RiverLink and others interested in the Wilma Dykeman RiverWay Plan to have a follow-up meeting with the goal of making some adjustments to this Plan. We would like to make it clear that we view this as an integral part of the City and that the Parks and Recreation Department is fully supportive of the Plan and wants to provide resources to help make that happen as part of our overall park development plan moving forward.

Councilman Miller agreed with Councilman Newman regarding the Wilma Dykeman RiverWay Plan. He noted that the 2025 Plan, which Council references frequently, does not have prices attached to the different elements.

Councilman Mumpower was concerned that this is a $52 Million vision with no direct plan for implementation. He explained how he felt this is a waste of resources.

Vice-Mayor Davis explained why he could not support this Plan in the form presented.

Mayor Bellamy noted there are several strategies in this Plan. Usually when we get a large Master Plan staff breaks it down into different phases. She suggested the Plan be broken down into phases and be brought back to Council. Each phase can have short-term goals. This is a multi-year vision for our City. She did note that the bulk of this Plan is to maintain our existing facilities and acknowledges that many of them are in disrepair or have no connectivity.

Councilman Russell felt to walk away and have no vision is not the right answer, even though it may be years before we can move forward with some of these projects. He agreed with comments regarding the Wilma Dykeman RiverWay Plan and only one sentence in this Plan is misleading.

Councilman Miller offered to work with GreenPlay to amend the Executive Summary in order to have a little more continuity.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-41, with the two recommendations outlined by staff and that staff be directed to report back to Council on how the Plan can be implemented in phases. This motion was seconded by Councilman Miller and carried on a 5-2 vote, with Vice-Mayor Davis and Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 31 – PAGE 450

B. RESOLUTION NO. 09-42 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A MUNICIPAL AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR A SAFE ROUTES TO SCHOOL DEMONSTRATION PROJECT

Summary: The consideration of an resolution authorizing the City Manager to execute a municipal agreement with the N.C. Dept. Department of Transportation (NCDOT) to receive $250,000 for a safe routes to school demonstration project.

In November 2007, City Council authorized the City act as lead agency on a Safe Routes to School Demonstration Grant application for sidewalk improvements in the Emma Community. In February 2008, City Council adopted a resolution of support for the grant application. The $250,000 Safe Routes to School Demonstration grant was awarded to the City. This requested council action will allow the City Manager to execute the grant agreement with the NCDOT. These actions are required to follow-through on implementation of the grant.

Safe Routes to School (SRTS) is a federally-funded grant reimbursement program providing an opportunity for communities to improve conditions for bicycling and walking to school. The grant requires no local matching funds.

This grant complies with the City Council 2009-10 Strategic Operating Plan within the Affordable and Sustainable Focus Areas by supporting a strong commitment to infrastructure maintenance and capital improvements, and the safety focus area by implementing a Safe Routes to School projects.

Pro:

- The project will provide more and safer transportation options to Emma Elementary students and to other people in the Emma Community.

Con:

- The use of City staff to administer the program and oversee the contracts will add additional work load. This aspect can be compensated through the use of a 15% administration fee from the Safe Routes to School grant.

The City will receive $250,000 through the Safe Routes to School Program.

Staff recommends that City Council adopt a resolution authorizing the City Manager to execute a municipal agreement with the N.C. Dept. Department of Transportation (NCDOT) to receive $250,000 for a safe routes to school demonstration project.

Ms. Ball said that the goal of the Emma Community Safe Routes to School Demonstration Project is to improve conditions for children to walk or bicycle to Emma Elementary School. Prior Council actions include (1) in November 2007, Council authorized the City to act as project lead agency; and (2) in February 2008, Council adopted a resolution of support for the project.

The description of the project is a 0.4 mile of sidewalk and crosswalks along North Louisiana Avenue from Emma Road north to Mosswood Mobile Home Park. Grants include (1) in-school encouragement programs to promote walking and biking to school; and (2) materials allowance to upgrade existing roadside trails on private property.

She then reviewed the scope of the project, which is all located in Buncombe County.

Regarding funding (1) this grant requires no local match; and (2) this is part of a planned larger sidewalk project extending south to Patton Avenue (a) Community Development Block Grant and federal Job Access grant funds, which require no local match, have been secured for the larger project; and (2) further grant funding is being sought to complete the larger project.

Councilman Mumpower could not support this action is it is nice, but not necessary.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-42. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 450

ORDINANCE NO. 3704 - BUDGET AMENDMENT TO SET UP PROJECT BUDGETS FOR THE RIDE, AUTOMATED VOICE ANNUNCIATION SYSTEM AND EMMA COMMUNITY (N. LOUISIANA AVENUE) PEDESTRIAN INFRASTRUCTURE PROJECTS

Summary: The consideration of a budget amendment, in the amount of $893,412, to set up the project budgets for the RIDE, Automated Voice Annunciation System, and Emma Community (North Louisiana Ave.) Pedestrian Infrastructure projects. Funding for these projects will come from Job Access and Reverse Commute and New Freedom grants, the Safe Routes to School (SRTS) grant, Community Development Block Grant funds, and Buncombe County.

In 2006, the Federal Transit Administration (FTA) initiated two new formula grant programs, the Job Access and Reverse Commute (JARC) and the New Freedom programs, to improve and enhance accessibility to public transportation to low-income individuals and individuals with disabilities.

JARC, previously a discretionary program, is a formula grant program oriented to provide job access in the urbanized and suburbanized area. The formula is based on the number of eligible low-income and welfare recipients in these areas. New Freedom is also a FTA formula grant program for new public transportation services and public transportation alternatives beyond those required by the Americans with Disabilities Act of 1990. These funds are intended to assist individuals with disabilities with transportation, including transportation to and from jobs and employment support services.

To be eligible, both programs required an intensive planning process and the development of a Coordinated Public Transportation and Human Services Transportation Plan or CTP-HSTP based on community participation. The CTP-HSTP was developed in conjunction with the French Broad Metropolitan Planning Organization, Buncombe, Henderson and Haywood Counties (MPO), human services agencies, public and private transportation providers, the N.C. Dept. of Transportation (NCDOT) and general public to assess current transportation needs, identifies gaps and sets goals. The plan was adopted on April 17, 2008, by the French Broad River MPO's governing body, the Transportation Advisory Committee, which is made up of elected representatives from each of the eighteen local governments which make up the MPO. They include Buncombe, Haywood, and Henderson County, and each of the incorporated municipalities in the three counties.

The City will be responsible for the Program Management and, as designated recipient, to oversee the utilization of the grant funds according to FTA regulations. The program management will require the use of city resources, mainly staff. As a designated recipient the city will use 10% of the grant funds for administration purposes, which will cover the program management expenses. Therefore, the City will receive $47,643 for grant administration over the period of three years. The CTP-HSTP set the rules to apply for projects; all the projects that applied for funds responded to these assessment. Three projects were selected for funding, as follows:

New Freedom project:

RIDE: Program ridership independence for the disabled and elderly – Mountain Mobility, Buncombe County. This project will cost $417,024, half of which will be paid by Buncombe County. The City will receive and pass through to Buncombe County the New Freedom grant amount of $208,512.

Job Access and Reverse Commute projects:

Automated Voice Annunciation System – Transportation Management Division, Transportation and Engineering Department, City of Asheville. This project will cost $147,400. The City will receive JARC grant funding of $117,920 for this project, and the remaining cost of $29,480 will be covered by Buncombe County.

Emma Community (North Louisiana Ave.) Pedestrian Infrastructure Project – Engineering Services Division, Transportation and Engineering Department, City of Asheville. This project will cost $537,500. The JARC grant funding is for $187,500. In the addition to the JARC funding, the City has also received two other grants for this project. In February of 2008 City Council adopted a resolution supporting a grant application to the Safe Routes to School Program for $250,000 for pedestrian infrastructure improvements in the Emma community. The City was awarded the grant. In April of 2008, City Council was also awarded $100,000 in Community Development Block Grant Funds for this project.

These actions comply with the City Council 2009-10 Strategic Operating Plan within the Affordable and Sustainable Focus Areas by offering a standard of living that is affordable and

attainable for citizens of Asheville; and supporting a strong commitment to infrastructure maintenance and capital improvements.

Pro:

- The subject projects will provide more and safer transportation options to low-income individuals and individuals with disabilities, improving Asheville citizen's quality of life.

Con:

- The use of City staff to administer the program and oversee the contracts will add additional work load. This aspect can be compensated through the use of the 10% administration fee from the JARC and New Freedom projects, and a 15% administration fee from the Safe Routes to School grant.

The total budget for these three projects is $893,412. Funding in the amount of $863,932 will come from grant sources. Buncombe County will provide $29,480 in funding. The impact to the City's general fund is the in-kind services contributed for administration of the projects.

Staff recommends that City Council adopt a budget amendment to set up the project budgets for the RIDE, Automated Voice Annunciation System, and Emma Community (North Louisiana Ave.) Pedestrian Infrastructure projects.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3704. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 188

C. WATER AND ANNEXATION FOLLOW-UPS

City Manager Jackson said that the purpose of this information is to respond to a City Council request for more information and staff recommendations regarding annexation policy.

On January 27, 2009, the Asheville City Council held a work session to discuss the status and background of annexation policy for the City of Asheville. That discussion led to a request for further information from staff on the following items:

- **Water Utility Financial Information:** Information including a benchmark comparison of water system rates for city residents and non-residents, fund balances, costs, and condition of water infrastructure as well as a summary report of independent, third-party analysis of the water utility is below;

- **Sullivan Acts and Voluntary Annexation**: Information outlining the fiscal and growth impacts to the City resulting from the inability to use waterline extension as an incentive for voluntary annexation is below;

- **Annexation Agreements/"Spheres of Influence":** A proposal for long-term managed growth through agreements with other county municipalities and the County using the "Spheres of Influence" model pioneered in Mecklenburg County is outlined below, and

- **Municipal Financial Structure:** A benchmark comparison of the financial structure of the City and the revenue diversification of the North Carolina metropolitan areas.

The annexation limitations included in the legislation collectively known as the "Sullivan Acts" have led to the anomaly of Asheville having a substantially lower population growth rate than the residual and less urbanized portions of Buncombe County. In addition, the City's inability to control the extension of water and sewer leaves Asheville in the position of not being able to offer these benefits to potential developments as an incentive to secure growth at long term, fiscally supportable densities.

As a result, Asheville's residents have been forced to support lower density, suburban growth patterns in the County by paying higher taxes to compensate for: (1) the lost water revenue that would normally come from differential water rates and (2) the increased stress on city services and infrastructure caused by non-city residents coming into the Asheville for employment, services, recreation and tourism, as evidenced by Asheville's daytime to nighttime population ratio. This growing burden on city taxpayers has been compounded by the lack of other revenue options (i.e., hotel tax, food and beverage tax, improvement district tax, etc.) available to Asheville.

The unique set of circumstances described above has culminated in a continually growing and unsustainable demand on the city's property tax revenue, and one that is gradually weakening the city's ability to deliver high quality core services at a cost that is reasonable and affordable for Asheville citizens. To meet this challenge, the city has shifted resources and streamlined operations; however, Asheville has experienced below average citizen satisfaction with core services because it remains limited in its capacity to address increasing needs with consistent service delivery models supported by adequate funding.

This situation is comparable to circumstances in other states where cities have been unable to use annexation as a tool to achieve prudent and planned growth, thus increasing the tax burden on a core population in the urban center. As a result of an increasing tax burden and a decreasing quality of municipal services, citizens have left those urban centers, causing the cities to deteriorate and creating a less sustainable pattern of suburban growth.

Despite the challenges created by the Sullivan Acts, Asheville has continued to operate according to the legislation. Asheville has worked to systematically address the financial stability of the water utility as well as the long-term viability of the system's infrastructure. Asheville has instituted a capital improvement plan and dedicated funding source to ensure the system's capacity to serve the region in future generations. The City has also improved the utility's financial standing and associated bond rating, partially through building a fund balance for unplanned needs that can arise from an aging water system in challenging topography. Many of these efforts have been recommended and/or validated by independent, third-party experts.

Given the information and analysis presented in this report, staff would make the following recommendations:

- Seek a negotiated legislative remedy for the financial limitations Asheville has experienced as a result of the Sullivan Acts, including alternatives to diversify the City's revenue opportunities, to provide a more equitable position for city tax payers;

- Seek a regional approach to plan for future growth and annexation beginning with an annexation agreement process similar to Charlotte-Mecklenburg County "spheres of influence" model, and;

- Continue to operate the water system according to best management practices and professional engineering analysis conducted to ensure the long term viability of the water system.

Water Utility Financial Information

30

Mr. Robert Griffin, Interim Director of Water Resources Director summarized the following (1) the water utility is in good financial condition; (2) the City of Asheville is systematically addressing critical infrastructure needs though a comprehensive capital improvement program; and (3) water rates and the utility's fund balance are comparable to State benchmarks and verified by independent engineering analysis.

He provided Council with the following benchmarking data and financial performance indicators for the City of Asheville Water Resources Department and our water system. Using charts, he reviewed the five year trend from Fiscal Years 2003/04 through 2007/08 for each of the following: (1) Revenue versus Expenditures; (2) Maintenance Costs; (3) Water Demand (or Consumption); (4) Water Rates and Fees Comparison; (5) Total Water Meters and Customers, and (6) Reserve Fund (Fund Balance).

He then reviewed with Council the independent information on key financial management of the water system compiled from various sources.

The observations and recommendations from independent third-party assessments of the water system, separated into key areas of interest:

- **Engineering/Physical Condition**
  - "These credit strengths are offset by water loss the system will continue to experience, mainly attributed to the geography of the mountainous region..."(Standard & Poor's Rating Report, October, 2007)
  - "A consideration to be made is that [the system] has such dramatic system pressure ranges." (Brown and Caldwell Water Audit, August, 2005)

- **Capital Improvement Plan (CIP)**
  - "Development fees have not been updated since 1988 and need to be adjusted to fit current conditions. "(Brown and Caldwell Water Rate Recommendations Report, September, 2005)
  - "System requires $57 million in improvements within the next five years. The existing rate structure is unable to support this schedule. "(QualServe Peer Review Report, March, 2006)

- **Rates**
  - "Although the city's water system rates are above average at $38.03 per 1,000 cubic feet, they are still competitive with other cities within the state. The city is planning 4% annual rate increases for five years, beginning in 2008. The rate increases will affect the administrative and volume charges." (Standard & Poor's Rating Report, October, 2007)
  - "In order to meet future revenue requirements documented in this report, a moderate annual rate increase of 3 percent per year of the next seven years will be required. " (Brown and Caldwell Water Rate Recommendations Report, September, 2005)

- **Financial/Credit-worthiness**
  - "The upgrade to Aa3 [Water Revenue Bonds Rating] reflects a strong track record in the two years since the system has been solely a city enterprise, particularly the implementation of a capital charge which will be used to address deferred maintenance, including paying debt service on the current issue. The upgrade also reflects the continued economic vibrancy and sustainable growth in the customer base, modest levels of debt, healthy financial position and legal framework which satisfactorily protects bondholders." (Moody's Investor Service Rating.Report, October, 2007)

31

- "Sound financial performance, evidenced by a strong liquidity position and debt service coverage levels" (Standard & Poor's Rating Report, October, 2007)

- **ISO 14001 certification**
  - "Environmental Management Program(s): Obj[ectives]/targets excellent" (ISO 14001 Readiness Review Report, October 2004)
  - "City of Asheville Water Resources Department continues to maintain an excellent environmental management system (EMS) that has resulted insignificant improvements to the department environmental performance." (ISO 14001 Surveillance Report, January 2009)

Sullivan Acts and Voluntary Annexation

Planning & Development Director Judy Daniel summarized the following report by outlining the growth impacts of the Sullivan Acts (1) Asheville annexation policy has been very conservative but has led to lengthy and expensive legal battles; (2) cities like Asheville provide the benefits of urban living to residents of the surrounding County, but do not receive revenues from those areas (a) City residents pay both city and county taxes; (3) Asheville has been accused of "aggressive" annexation but the City of Asheville – 11th in population – is 19th in total acres annexed and 20th in acres annexed as a percentage of total city area; (4) Asheville is one of only two cities where less than half of the population lives in a municipality (a) Buncombe County's population is the 7th largest; (5) rational growth management allows a city to (a) annex where density is sufficient to warrant urban levels of services; and (b) determine where water and sewer service should be extended and at what density; (6) rational fiscal management allows a city to set rates for services that reflect the cost to serve those areas; and (7) other choices that are available and need to be considered as the City evaluates how to attain long term fiscal and environment stability.

In summary of the annexation agreements (1) legislative authority for cities to enter into agreements delineating areas where they would and would not annex; (2) provides certainty over growth boundaries; and (3) if Council is interested in pursuing such agreements, staff recommends regional meeting facilitated by the Land of Sky Regional Council of Governments (a) staff of the various governments would map the proposed "spheres of influence; and (b) proposed areas would be presented to the governments for approval and public process.

The following outlines a history of the City's annexation policy, the evolution of annexation in America and its' impact on taxes, and the impact of these factors on Asheville's growth and fiscal challenges. It offers recommendations for a preferred annexation policy, and suggestions for considering alternate development patterns for areas already in the City, that would be more environmentally and fiscally sustainable. Finally, it outlines what the fiscal impacts of alternate annexation policy would be, and the detrimental impact of the existing situation to the City.

Because the City of Asheville has had to use a statutory (involuntary) annexation approach since 1999 annexation has been very conservative, taking in only areas clearly urban in nature that are not difficult or complicated to serve from a service provision standpoint, that enhance the city's ability to provide efficient and effective municipal service, and areas that can clearly benefit from enhanced urban services. Even these very rational annexations have too often led to protracted and expensive legal battles.

This careful, measured, approach to annexation has led to moderate growth, but the surrounding County has grown much faster, expanding into the surrounding mountains as well as more easily developed areas, subsidized by Asheville taxpayers, and stunting the ability of the City to require more density on less land and build a more fair and stable tax base. Compounding the detrimental impact to City taxpayers is the seemingly legal, but fiscally unsound and inherently prejudicial and unfair, requirement to provide water service to any area

32

where it is requested without setting rates reflecting the true cost of service. The City is legally bound to provide water service regardless of topographic challenges or proposed density. How should a City be able to annex? Why has that normal urban function come to such a distorted place in North Carolina?

Annexation as a Normal Aspect of Urban Growth - Cities have traditionally annexed as a means of extending urban services to unincorporated areas. Throughout most American history this was the means of differentiating between urban and non-urban places. During the growth of suburban America during the post WWII era, those distinctions began to blur as vast stretches of rural lands were converted to low density residential suburbs. Over time, those suburbs often began to be served with public water or even public sewer service, formerly critical parts of the municipal services template.

In some cases, people living in unincorporated areas near cities enjoyed these urban services and the many benefits of nearby urban areas (entertainment, cultural attractions, special events, etc.) without having to pay for the city taxes used to support those benefits. This is the situation in which Asheville finds itself. Alternately, in areas which allowed easier annexation, cities annexed both fairly dense suburbs and stretches of open land to accommodate future growth. They later (especially since the 1970's) allowed substantially low density development on public water and sometimes even public sewer. In recent years the fiscal flaws in both these models have been revealed and have led to difficult fiscal issues for many (if not most) cities.

Cities like Asheville are providing the benefits of urban living to residents of the surrounding county, but not receiving the taxes sufficient to fully support the urban institutions necessary for a clean and safe urban environment. Cities that included extensive areas of low density development found themselves paying more in services to these suburban areas than they received in taxes. That led to an endless cycle of annexation of new suburbs to get more tax revenue, but poor service to existing residents. Both situations led to increasing resentment of taxes which seemed to take more and more, but provide less and less.

What is a balanced model? What would be a rational concept for this City to reach in terms of balancing growth and fiscal stability? Due to the topographical constraints of Asheville's location, it has never been susceptible to the type of fiscally insupportable annexation practices of taking in large areas of low density development. And that practice is what has led to some of the annexation strangulation legislative initiatives that North Carolina now debates. The fiscal woes of Asheville's past (from the 30's) did, however, lead to the strangulating tentacles of the Sullivan Acts which prevent both rational annexation of urbanized areas, or higher water rates for areas expensive to serve, or use of water and sewer as the tools and services of urban places.

The models for what to annex that the City has been following in recent years are philosophically strong: taking in properties clearly urban in nature, avoiding vacant land or sparsely developed properties, and annexation of areas not difficult or complicated to serve from a service provision standpoint. Areas clearly urban in nature due to moderate to high density development should be in a city for both fiscal and public safety reasons. Similarly, property owners who wish to develop with moderate to high density should be looking for annexation to secure the urban level of services they need – water, sewer, trash removal, fire, and police.

Because of the complicated past history of this area, the City of Asheville has been blocked from normal and rational methods of growth. The inability to charge more for water service to areas that clearly require far more dollars per tap to support puts a fiscal burden on the City residents living at higher densities, forcing them to support County residents living in remote, low density, topographically challenged, suburban developments. The inability of the City to control the extension of water and sewer leaves the City in the unfortunate position of not being able to offer these benefits to potential development as an incentive to secure growth at densities fiscally supportable over the long term.

33

Asheville's residents support the low density suburban lifestyles in the County by paying higher taxes to compensate for the lost water revenue that would normally come from differential water rates. County residents, enjoying urban services without urban taxes, cannot be blamed for wanting to keep this system in place. They have much to gain and little to lose, until these fiscal stresses impact the City that provides the cultural and other amenities they value in this area.

But certain accusations leveled at the City are manifestly false and should be addressed. For example, the City has been accused of "aggressive" annexation. This is patently untrue. The staff studied the 25 largest North Carolina cities (by population), sorted by their recent "annexation aggressiveness", measuring annexation area as a percentage of total city area. The study found that Asheville -- 11th in population -- is 19th in total acres annexed and 20th in acres annexed as a percentage of total city area. This clearly highlights that far from being an aggressive leader in annexation, Asheville is near the bottom of the list.

Further, the inability to annex substantially developed areas has also led to the anomaly of Asheville having a substantially lower population than the residual portions of Buncombe County. The staff looked at all cities in North Carolina with a population of 50,000 to 100,000, comparing their county to city population, and found Asheville's ratio of City population to County population is the lowest. Asheville is one of only two cities where less than half of the population lives in a municipality, and Buncombe County's population is much higher than most of the others — the seventh largest county in NC by population. Clearly this is an abnormal situation.

Rationally, the City should be allowed to more easily annex in areas where density is sufficient to warrant urban levels of services and protection. Rationally, the City should be allowed to determine where water and sewer service should be extended as these are traditional urban services. Rationally, the City would extend services only where density and topography make it sensible and fiscally and environmentally sustainable to extend such services. Rationally, the City should have rates for services that reflect the cost to serve those areas. But rationality has been denied, and fiscal constraints hamper the provision of services desired by City residents.

Beyond these rational choices denied to the City of Asheville there are, however, other choices that are available and need to be considered as the City evaluates how to attain long term fiscal and environmental stability. For example, another path for the City (and a worthwhile path for most American cities) is to consider incentives for the redevelopment of some of the incorporated areas at substantially higher densities. Multiple commercial properties, especially retail properties, are currently "underbuilt" and substantially "underutilized" in terms of their actual "highest and best use". These sites offer great potential for future redevelopment as mixed use neighborhood centers. Adding mixed uses at moderate urban densities in these areas will also begin to build the level of density required to support a mass transit system that can provide more frequent service and with more frequent use by a wider range of our residents. This in turn will increase the fiscal and environmental sustainability of the City.

Annexation Agreements – "Spheres of Influence"

In 1984, the North Carolina General Assembly first approved the ability of municipalities to enter into agreements delineating areas in which one or more of the cities could not annex. The legislation was a local bill, applying only to cities and towns in Mecklenburg County. The purpose of such legislation was to get cities in that County to agree upon their respective annexation "spheres of influence" in order to enhance orderly planning by such cities as well as the residents and property owners in areas adjacent to such cities. In 1989, the General Assembly extended this authority statewide.

Statutory Authority and Requirements

34

The statutory authority, founding NCGS §160A-58.21-58.28 allows two or more cities to enter into binding agreements concerning future annexations. The agreeing parties delineate one or more areas in which one or more cities *may not* annex. An agreement applies to both voluntary and involuntary annexations. Such agreements can be designated to last for any term up to twenty (20) years. Unless all cities involved in an agreement concur, a city may prematurely terminate the agreement only after five (5) years notice to the other parties. If all are in agreement, the agreement may be terminated at any time. While in effect, an annexation agreement prohibits annexations in violation of the agreement.

An annexation agreement must describe "clearly the area or areas subject to the agreement." (There are no specifics on this; one just must be able to locate boundaries on the ground). Even though the agreement describes areas in which one or more cities may not annex, in the usual case, the annexation agreement provides each participating city with an area, or "sphere of influence" in which it alone can annex property. The statute requires each city to give the other municipalities that are party to the agreement notice of any annexation undertaken at least sixty (60) days prior to the adoption of an annexation ordinance. Parties to an agreement can stipulate otherwise concerning notification. An agreement can state anything else that the parties think is necessary or proper. Some agreements have included provisions about whether cities may extend utility lines in each other's spheres of influence and about the operation of these lines. "Spheres of influence" often follow extraterritorial jurisdiction boundaries.

In order to adopt an agreement, the city (or town) council of each municipality must hold a public hearing on the agreement. A joint hearing may also be held. Notification is the same as for voluntary annexation – publication in a newspaper having general circulation in the municipality at least ten (10) days prior to the date of the public hearing. If any sphere of influence is greater than three (3) miles out of the corporate limits, the county commissioners must also approve the agreement.

Suggested Next Steps

Before staff members of any jurisdiction begin work on recommended "spheres of influence"/annexation agreements, the applicable governing boards of the pertinent jurisdictions must sanction the effort. Therefore, the first step in pursuing annexation agreements with other municipalities surrounding Asheville should have the Mayor (or other Council representative) meet with representatives of the other local governments and Buncombe County. The purpose of this meeting (or meetings), which perhaps could be facilitated through the Land of Sky Regional Council of Governments, would be to evaluate interest in and commitment to examining the development of annexation "spheres of influence". This meeting should include representatives of Woodfin, Weaverville, Black Mountain, Biltmore Forest, Montreat, Asheville, and Buncombe County. While all these areas may not want to consider annexation agreements, the staff recommends that the initial invitation should be extended to all noted. Although it might seem prudent to include representatives of Leicester and Swannanoa in such meetings, as there are no official governments or representatives at this point, the staff does not recommend including them at this time. The proposed boundaries for these areas should, however, be part of the discussion. The staff also recommends that consideration be given to including the towns of Fletcher and Mills River in Henderson County.

Should agreement be reached on pursuing one or more annexation agreements, staff from the respective jurisdictions can begin mapping suggested "spheres of influence." In determining boundaries, consideration should be given primarily to efficiency of service provision. It should also be recommended that each party to an annexation agreement establish internal annexation policies. Such policies would detail the principles for annexation established by that municipality and the service delivery that can be expected to those annexed. The staff further recommends that extraterritorial jurisdiction be discussed as part of each annexation agreement. Since Buncombe County now has zoning, they would need to agree to any changes to jurisdiction as part of this proposal.

35

Once "spheres of influence" have been preliminarily determined, the staff of agreeing municipalities can present such areas for approval by their governing boards. Following any approval received, a formal public hearing for consideration of an agreement should be held, following all statutory requirements.

Questions for Discussion

- Should Fletcher and Mills River (and perhaps Henderson County) be invited to the initial meeting? The staff recommends their inclusion.
- Is there any way to tie service provision into the discussion? This would involve the legislature. Staff research has revealed that a major benefit found in annexation agreements that are in place across the State of North Carolina is in planning for service provision.
- Will such discussions precipitate additional calls for incorporation? Should this be a concern?
- Do those involved in previous discussions with Fletcher or Woodfin have information to contribute prior to moving forward?

Municipal Financial Structure

Chief Financial Officer Ben Durant summarized the following report by saying that the service demand and revenue diversification (1) Asheville has the highest ratio of daytime to residential population in the state; (2) the demand for services and pressure on infrastructure grows as a result of daytime influx; and (3) yet Asheville's revenue "tool-box" for meeting increased service and infrastructure demands is limited compared to cities with lower day-time populations; (4) "Tools" used by other cities (but unavailable to Asheville) include maximized occupancy tax rates, food and beverage taxes, and differential water rates; (5) despite revenue limitation, Asheville still has the fifth lowest property tax rate out of the 15 largest cities in the state; and (6) impact high day-time population and low revenue diversification (a) growing and unsustainable burden on property taxpayers; (b) gradual weakening the City's ability to deliver high quality core services at a reasonable rate and affordable cost; and (c) community survey results that show below average citizen satisfaction with core services.

Staff recommendations are (1) seek a negotiated legislative remedy for the financial limitations Asheville has experienced as a result of the Sullivan Acts, including alternatives to diversify the City's revenue opportunities, to provide a more equitable position for city taxpayers; (2) seek a regional approach to plan for future growth and annexation beginning with an annexation agreement process similar to Charlotte-Mecklenburg County "spheres of influence" model; and (3) continue to operate the water system according to the best management practices and professional engineering analysis conducted to ensure the long term viability of the water system.

The purpose of this staff report is to present a benchmark comparison of city & CDB service demands and the revenue diversification of North Carolina metro areas. It is also structured to serve as a response to a recent report by The John Locke Foundation that claims that the City of Asheville has the second highest combined city and county costs per capita.

The residential population of a city is a key indicator of demand for city services. A better measure of service demand, however, is a municipality's daytime population. The daytime population of a city center can be much higher than resident populations due to the influx of a large daytime workforce.

Daytime Population

36

Based on the latest official census data, Asheville has the highest ratio of daytime-to-residential population in the state for large cities (i.e. cities with populations over 50,000):

City	Resident Population	Daytime Population	Ratio
Asheville	68,889	102,472	1.49
Wilmington	75,838	105,774	1.39
Winston-Salem	185,776	233,617	1.26
Jacksonville	66,715	87,346	1.31
Greensboro	223,891	282,808	1.26
High Point	85,839	105,462	1.23
Raleigh	276,093	345,286	1.25
Charlotte	540,828	655,483	1.21
Rocky Mount	55,893	64,787	1.16
Gastonia	66,277	76,887	1.16
Greenville	60,476	70,501	1.17
Fayetteville	121,015	138,334	1.14
Durham	187,035	214,137	1.14
Concord	55,977	61,189	1.09
Cary	94,536	92,231	0.98

Asheville is expected to continue being at the top of the day-time population list in future years.

Service Demand

Demand for both the quantity and quality of Asheville's services grows significantly as a result of its large daytime influx of population. Examples of increased demand are as follows:

- Increases and different mixes of criminal activity
- Increased traffic congestion, requiring alternative mobility options
- More demands on parks, community and recreational/entertainment facilities
- Accelerated maintenance requirements for streets, sidewalks and water & storm water systems that deteriorate at a faster pace.

Local revenues used to fund operations are being stretched as a result of this increased demand. Asheville's two largest sources of revenue for general government services are property taxes and sales taxes. The John Locke Foundation states that Asheville has the second highest sales tax burden and the fifth highest property tax burden in the state. Both assertions are misleading.

Consider the claim that Asheville has the second highest "sales tax burden" in the state. One obvious problem with this argument is that sales tax rates are set by the state, not by local government, and the rates are identical for cities across the state. The Locke Foundation points out that the sales tax in Asheville produces more revenue, on a per capita basis, than other cities. That is not because our rate is higher. It is because Asheville has more tourists and visitors than most other cities, reflective of a vibrant economy rather than a "burden".

Using these same methods of analysis, if the Locke Foundation were studying two grocery stores that charged the same prices for their groceries, but one of the stores had more customers and therefore produced more revenue, the Locke Foundation would report that the more successful store has placed a "greater burden" on their customers.

The assertion that Asheville has the fifth highest property tax rate in the state is also inaccurate. In fact, of the fifteen largest cities in the state, the City of Asheville's rate is 11th, with

only four cities having a lower rate. This ranking can be seen in the Property Tax Comparison section of this document. Families in Asheville must also pay County property taxes. People in some Asheville neighborhoods also pay the supplemental school tax, which is also set by the County Commissioners. Currently, the combined rate of these three property tax rates is $1.095 per $100 of assessed value.

There are other fees for government charges, but the rates set by Asheville tend to be in-line with other communities. One fee that is higher in Asheville than the state average is our water/ sewer rate. Our mountain topography makes this infrastructure more expensive to build and maintain than in the flatlands. City Council and MSD have increased rates to make up for years of previous neglect. More information on water fees is presented later in this report.

As an alternative to excessive reliance on property taxes, it is generally accepted that cities need a well balanced and diversified set of taxes and revenue options to fulfill the increased service demands created by high day-time populations. A review of the revenue diversification of North Carolina metro cities is provided below.

Revenue Diversification

The major types of revenues available to North Carolina municipalities are local taxes, state-shared revenues, user charges, other local fees and charges, and federal and state grants. With few exceptions, large North Carolina municipalities utilize all revenues that are statutorily available to them to support their various services. Thus, revenue diversification is not necessarily achieved by cities identifying new and unique revenue sources; rather, it is accomplished through a city's ability to establish revenue structures that maximize the use of what is already available to us and earmark those proceeds through a local act to support specific municipal needs.

To compare Asheville's revenue diversification with that of other metro cities, the finance department gathered benchmark data on the rates and the use of the tax proceeds for the 1) Room Occupancy Tax and 2) the Food & Beverage Tax. These revenues were chosen in particular because their rates and usage vary considerably among jurisdictions; consequently they offer significant revenue enhancement and diversification possibilities for Asheville through the adoption of local acts. Our review focused on the 15 cities (and encompassing counties) surveyed in the preceding day-time population analysis. Key findings are listed below:

Occupancy Tax:

- Buncombe County's county-wide room occupancy rate of (4%) is the second lowest of the 15 cities survey in the benchmark study.
- In several instances in the survey, the general assembly has authorized both a county and a city within that county to levy an occupancy tax. Approximately 50% of the cities in the survey have a city levied room tax.
- Currently, Asheville does not have legislative authority levy a city occupancy tax.
- Usage of occupancy tax proceeds varies considerably among jurisdictions. Examples of current usages include providing funds for product development, operating and debt service support for civic centers and coliseums, design of a performing arts center, financing of a NASCAR Hall of Fame museum and economic development grants.
- Over the past several years, there has been a greater effort to make occupancy taxes uniform. Generally, the county occupancy tax rate cannot exceed 6% and the city occupancy rate, when combined with the county rate, cannot exceed 6%.

He provided Council with detailed results of the occupancy tax benchmarking data.

Food & Beverage Tax. Currently only four counties in North Carolina have a prepared food & beverage tax. They are Cumberland, Dare, Mecklenburg and Wake counties. None of the 15 cities in the survey levy a food & beverage tax. Currently, the only municipality with a food & beverage tax is the town of Hillsborough. A uniform rate of 1% is charged by the aforementioned jurisdictions. In general, usage of these proceeds is for Convention & Visitor Bureau activities, convention center financial support and various special capital projects.

Water Revenue. Water Resources staff compared water rates for the 15 large cities in the benchmark analysis. The chart below provides an inside/outside water rates comparison. Because some cities use different tiers for their rate structures, in order to provide for a consistent comparisons rates are presented using typical residential water usage of 5 CCF or 3,740 Gal per month. Data is shown in CCF and Gallons:

	Water Rate Per CCF (Based on 5 CCF Usage)		**Water Rate Per 1,000 Gallons (Based on 3,740 Gal Usage)**	
	Inside Rate	Outside Rate	Inside Rate	Outside Rate
Asheville	3.45	3.45	4.61	4.61
Wilmington	1.95	1.95	2.61	2.61
Winston-Salem	1.09	1.64	1.46	2.19
Jacksonville	1.80	3.60	2.40	4.81
Greensboro	2.30	4.60	3.07	6.15
High Point	2.19	4.39	2.93	5.87
Raleigh	1.96	3.91	2.62	5.23
Charlotte	1.56	1.56	2.09	2.09
Rocky Mount	1.69	3.39	2.26	4.53
Gastonia	2.03	4.07	2.72	5.44
Greenville	2.21	3.43	2.95	4.58
Fayetteville	1.65	2.06	2.20	2.75
Durham	1.98	3.96	2.65	5.29
Concord	3.67	4.41	4.90	5.89
Cary	2.45	7.36	3.28	9.84

Key findings are as follows:

- Twelve of the 15 cities in the survey (or 80%) charge differential (higher rates) for customers outside of the city limits.
- Of the preceding 12 cities, 8 of them charge double or higher rates to customers outside of the city limits.
- Asheville is prohibited through local legislation from charging differential rates.

Property Tax Comparison

The North Carolina Department of Revenue (NCDOR) collects data on property tax rates for all North Carolina municipalities. In order to accurately compare property tax rates among multiple cities, the effective tax rate must be used. The effective property tax rate is calculated by multiplying the sales assessment ration by the current tax rate. The sales assessment ratio is defined as the percentage of market value represented by the current property tax rate and is

calculated by the NCDOR for each city. This allows from comparative tax rates even though revaluation of property occurs at different times among cities. It makes for a "fair" comparison:

Property Tax Rate Comparison

City	Effective Rate
Greensboro	59.11
High Point	58.44
Durham	53.29
Jacksonville	53.16
Greenville	51.86
Gastonia	50.14
Fayetteville	47.51
Winston-Salem	46.99
Charlotte	43.00
Concord	42.97
Asheville	**41.92**
Raleigh	36.74
Cary	35.48
Wilmington	30.97
Rocky Mount	24.23

Based on the data above, 10 of the fifteen cities with populations over 50,000 have property tax rates that are higher than Asheville's.

Conclusions - Asheville has the highest day-time population for cities with populations of 50,000 or above, yet it has less revenue diversification to support the resulting increased demand for services. The county-wide room occupancy tax in Buncombe is the second lowest in the survey; Asheville currently does not have legislative authority to levy its own occupancy tax rate. Furthermore, Asheville is prohibited by the Sullivan Acts from charging differential water rates to customers outside of the city boundaries, and is thereby limited in its ability to address critical infrastructure needs. Despite these limitations, Asheville continues to have a relatively low property tax rate.

Proposal to Settle the Sullivan Act Dispute

Councilman Newman, working with Mayor Bellamy and Vice-Mayor Davis (per Council's direction at the City Council retreat), briefed Council on the following proposal to settle the Sullivan Act dispute:

"Proposal. (1) City of Asheville agrees there will be no differential rates charged for water customers inside and outside the city limits; (2) the Sullivan Acts will be modified to allow Asheville to operate under the Voluntary Annexation policies that apply to all other cities in North Carolina. Asheville is open to policies to assure voluntary annexation will not be abused. Potential policies could include (a) no more than 5% of the city properties could be non-contiguous with the primary city limits unless specifically authorized by state legislation (such as the airport property). Existing state law allows cities to have up to 10% non-contiguous; (b) no properties could be voluntarily annexed into the city unless they are within one-half mile of the city limits. However, Asheville could still require other developments that are more than a half mile from the city limits to sign a Voluntary Annexation agreement with the city if they wish to connect to city water lines, so that the city can bring them into the city once the city has grown outwards to the point that the development is within one-half mile of the city; (c) developments of less than eight residential units or 10,000 square feet of commercial space would not be required to enter

into a Voluntary Annexation agreement with Asheville in order to access municipal water services; (d) no existing customers of the water system could be required to sign an Annexation Agreement as a condition of continuing to receive water service. The policy would apply only to new developments; and (e) new developments that are located closer to another incorporated town or city than Asheville could not be required to sign a Voluntary Annexation agreement with Asheville unless there is a "sphere of influence" agreement between Asheville and the other town or city; (3) Asheville will not be allowed to divert Water Funds to the General Fund. However, up to 5% of Water Funds may be used for infrastructure improvement projects directly related to water line replacement (such as improving streets or sidewalks torn up during the line replacement process); and (4) City and County continue discussions about opportunities to work together to be partners on infrastructure and facilities that serve the larger region. The previous water agreement included the following City/County partnerships (a) County reimbursed Asheville about $1.7 Million annually for law enforcement services provided outside the city limits that are not provided in the City; and (b) the County was financially responsible for the Nature Center, McCormick Field and the golf course.

"The Sullivan Acts II and III. In 2004, the City Council decided to dissolve the Water Agreement that had governed management of the system since the early 1980's. In response, members of the legislative delegation passed Sullivan Acts II and III. Sullivan Act II prohibits the city from charging differential water rates. Sullivan Act III prohibits the city from using Water Funds for any purposes unrelated to management of the water system and prohibits Asheville from using Voluntary Annexation of new developments that wish to access City water services.

"Benefits of the proposed settlement. The proposed settlement represents a compromise. Neither party gets everything they wish. However, it does address the core concerns identified by the City, County and legislators over the past several years. Benefits of the settlement to Asheville include (1) the water system will be managed by the City, which has demonstrated good stewardship of the system over the past several years, investing tens of millions in long overdue water infrastructure repairs; (2) voluntary annexation will allow the city's tax base to grow as the area urbanizes; and (3) the city will have additional funds to upgrade streets and sidewalks as part of the process for replacing old water lines. Benefits of the settlement to non-city residents include (1) assurance that water rates will be no higher for non-city customers than for those who live in Asheville; (2) assurance that for all existing customers, water cannot be used as a condition for annexation into the city; and (3) assurance that payments made for water services cannot be diverted to the City's General Fund. Benefit to the water system is the assurance that the infrastructure will be fixed as funds cannot be diverted to non-water system programs."

Councilman Newman said that unfortunately the Sullivan Act litigation was not resolved in a way the City hoped they would be. But in spite of that we have a sense that there is some openness amongst our legislators to changing the Sullivan Acts in ways that might make them more fair to Asheville and address some of the issues that staff has about the unique limitations that Asheville has on the management of the water system. Mayor Bellamy, Vice-Mayor Davis and he would like Council's support of putting this proposal forward for discussions with our legislators. In summary, we want to put forward a proposal that the Sullivan Acts should be modified to allow Asheville the ability to grow as other cities do. Across the State, the normal and non-controversial way that cities grow in terms of growth outside the existing city limits is through voluntary annexation. He reiterated the voluntary annexation agreement proposal as outlined above in the proposal. As part of this, we will have discussions with our neighboring municipalities around questions of "spheres of influence." There also seems to be some genuine openness to is the ability to use some of our water resource funds to fix infrastructure in our community that is directly associated with water line repairs.

Mayor Bellamy would like to present this proposal to our legislators and begin dialogue with Buncombe County about how we move forward, prior to the deadline for writing a bill.

Councilman Mumpower said that the N.C. Supreme Court validated the power of our local legislators to steal Asheville's water system. They have taken away from Asheville a $1 Billion asset. He felt this negotiated proposal does nothing more than sell out the people of Asheville and that's wrong.

Councilwoman Cape said that even if we had won the Sullivan Act litigation, we would still be up against this negotiation process about annexation. She commended Mayor Bellamy, Vice-Mayor Davis and Councilman Newman for helping us try to get to a better place. She supported the proposal, except in order to be fair, she suggested deleting the clause "Developments of less than eight residential units or 10,000 square feet of commercial space would not be required to enter into a voluntary annexation agreement with Asheville in order to access municipal water services."

Vice-Mayor Davis said that no one on Council is pleased with the outcome of the lawsuit. Regarding Councilwoman Cape's concern, he said that after discussions with our legislators, they wanted a density portion, but that can still be negotiated. The legislators do recognize we are good stewards of our water system. We have up until March 3 for any kind of an amendment to the Sullivan Act to take place. The proposal is at least a position and an opportunity to amend the Sullivan Act to where at least we have some benefits beyond what we have. The legislators do recognize that for Asheville to be healthy, they must have some reasonable way to grow. He felt this proposal is a gain.

Vice-Mayor Davis moved to adopt the proposal outlined by Councilman Newman. This motion was seconded by Councilman Miller.

Councilman Russell was concerned that this is the first time Council has seen the proposed settlement. We do need to work with our legislators, but didn't want to rush into a proposal.

Councilman Newman apologized for not circulating the proposal sooner, but realized there are some deadlines in the legislature quickly approaching. He was asking for Council's support in moving in this direction, noting that he is not asking Council to approve the specific language.

Mayor Bellamy said the proposal is the beginning of conversation. She believes that the legislators realize Asheville is going a good job with management of their water system. It is incumbent upon Council to spend time educating the community letting them know how Asheville is moving the water system forward. She feels the community wants elected officials who will work together and leadership on issues that affect our community. She urged Council to support this proposal to move our community forward, acknowledging that this is an opportunity to make some changes.

The motion made by Vice-Mayor Davis and seconded by Councilman Miller carried on a 5-2 vote, with Councilman Mumpower and Councilman Russell voting "no."

VI. NEW BUSINESS:

A. RESOLUTION NO. 09-43 - RESOLUTION AUTHORIZING THE USE OF DOWNTOWN ASHEVILLE STREETS FOR THE LAYOUT OF THE BELE CHERE FESTIVAL ON JULY 24-26, 2009.

Ms. Diane Ruggiero, Superintendent of Cultural Arts, said that this is the consideration of a resolution authorizing the use of downtown Asheville streets for the layout of the Bele Chere Festival on July 24 – 26, 2009.

The City of Asheville via the Parks, Recreation, and Cultural Arts Department produces the annual Bele Chere Festival in downtown Asheville. The festival requires many downtown streets to be closed prior to and during the three-day event. As downtown Asheville continues to develop, adjustments to the festival layout are necessary.

She showed a map which showed the streets that will have festival activities as well as street closings.

The most significant changes to the festival include (1) the elimination of using College Street (between Biltmore Avenue and South Charlotte Street) and other surrounding streets due to the ongoing construction of Pack Square Park, and (2) the addition of the Asheville Civic Center; and (3) reduced number of contracted stages from six to four.

Festival staff developed the festival layout and has been approved by representatives from the Asheville Fire Department and the Asheville Police Department. Staff has also spoken with newly impacted members of the downtown community and the initial feedback was very positive.

This action does not comply with the City Council Strategic Operating Plan or other City master plans.

This item was reviewed the by the Bele Chere Advisory Board at its regular meeting on January 28, 2009, and by the Recreation Advisory Board and at its regular meeting on February 9, 2009. Both boards support the action and recommend City Council approve the proposed festival layout.

Pro:

- Establishes the Bele Chere festival layout with advance time to communicate information to the community.

Con:

- None

There is no fiscal impact.

Staff recommends City Council adopt a resolution authorizing the 2009 Bele Chere festival layout and indicated by the festival map.

In response to Vice-Mayor Davis, Ms. Ruggiero said that staff has met with members of the Mt. Zion Church to share this footprint and they were excited. City staff will continue to work with representatives of the Eagle/Market Street.

Councilman Miller said that since July and October are our busiest months, he suggested that long-term staff look at holding Bele Chere in September to extend sale tax business over a very difficult month.

Councilman Russell thanked the Bele Chere Committee for their commitment and the number of hours they devote to this festival.

In response to Councilwoman Cape, Ms. Ruggiero explained why Lexington Avenue was deleted from the footprint.

Mayor Bellamy said that the Bele Chere Festival was born at a time when we needed to get people downtown. She urged the Committee to focus on local artists and local merchants.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 09-43. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 31 – PAGE 451

B. RESOLUTION NO. 09-44 - RESOLUTION APPROVING HOUSING TRUST FUND LOANS FOR THREE AFFORDABLE HOUSING DEVELOPMENTS

Mr. Randy Stallings, Community Development Analyst, said that this is the consideration of a resolution allocating $700,000 in Housing Trust Fund (HTF) loans for three (3) affordable housing developments.

The following three (3) Housing Trust Fund applications have been evaluated by the HTF review panel and recommended for approval by the Housing and Community Development Committee at its January 28th meeting. As of February 18th, $718,600.39 is available in the Housing Trust Fund. The HCD Committee has recommended partial funding of three loan applications, due to insufficient funds to meet all requests in full.

1. Mountain Housing Opportunities Inc. (MHO) - Westmore

MHO requested a $470,000 loan, but the HCD Committee has recommended a loan of $300,000 at this time. The loan is for the development of 72 apartment rental units in West Asheville. The property is located near Deaverview and Pisgah View Roads. If approved, the developer does anticipate requesting the additional $170,000 at a future date. The second subsidy would be contingent upon the receipt of an early repayment on the Crowell Park development estimated to be $480,000. The Housing and Community Development Committee (HCD) reviewed the project and recommended that $300,000 be approved at the present time, and that additional funding be considered at a future date upon receipt of the Crowell Park repayment by the City.

In addition, the HCD committee supports the additional amount of $170,000 to Mountain Housing Opportunities Inc. when the Crowell Park funds are returned to the Housing Trust Fund.

Terms Requested: 2% Interest, permanent financing, 30 year term.

Pros:

- Receipt of State Tax Credits will ensure 30 years of guaranteed affordability for families below 60% AMI.
- Per-Unit subsidy is extremely low at $4,166.
- Large number of affordable units.
- Project will be Energy Star certified.
- Public transit and employment centers are within close proximity.
- Track record of the developer is exceptional
- Complies with the Mayor's Task Force recommendation that rental housing be prioritized.

Cons:

- The property does require a partial rezoning from CI-RM16
- The large appropriation will more quickly deplete available funds.

2. Mike Figura, Eco Concepts Development, LLC – Sulphur Springs.

Mr. Figura requested $250,000; and is recommended for a $200,000 loan for the development of a 27 unit mixed-use development in West Asheville. The property is located at 22 Sulphur Springs Road on the Haywood Road Corridor. The project will contain a total of 10 affordable condominium units and 17 market rate units. The project also includes 3,577 feet of lower level commercial space. The developer has agreed to a Memorandum of Understanding with Mountain Housing Opportunities to find qualified buyers for the affordable units. The project will have an elevator and will be either LEED or NC Healthy Built Homes certified. Thirteen of the project units are already under reservation. The per-unit subsidy is $20,000. HCD has reviewed the proposal and is supportive of the project.

Terms Requested: 2% interest, construction financing, 24 months

Pros:

- The project meets many of the goals and objectives identified in the City strategic plans, including mixed use development, mixed income, infill development, accessibility to jobs and transit, pedestrian friendly design, and green building practices.
- Provides redevelopment of a blighted area.
- Project will be LEED or NC Healthy Built certified.
- Partnership with MHO will provide additional expertise for the affordability component of the project.
- Project has all appropriate planning and zoning approvals.

Cons:

- The developer has no prior history with the Housing Trust Fund.
- Extensive site-cleanup is needed; however, the developer has received a favorable bid and has factored this into the construction budget.

3. Kirk Booth, Beaucatcher Properties LLC - 57 Nancy Street

Mr. Booth requested $250,000, and is recommended for $200,000 for the development of 12 single family rentals in a cottage development located in West Asheville. The property is located near employment centers on Patton Avenue. The project has received Level I approval and all financing has been committed. The per-unit subsidy is $16,667. The developer has agreed to the filing of a Deed Restriction to ensure that rents remain affordable for a minimum of 10 years. HCD has reviewed the proposal and is supportive of the request.

Terms Requested: 2% interest, permanent financing, 30 year term.

Pros:

- The project meets many goals and objectives identified in the City strategic plans, including infill development, accessibility to jobs and transit, pedestrian friendly design, and green building practices.
- The cottage development style provides housing appropriate for families and children.
- Project will be Energy Star certified.
- Construction ready to proceed immediately.
- Complies with the Mayor's Task Force recommendation that rental housing be prioritized.

Cons:

- Proposed rents are near the program maximum for 3-bedroom units.
- No prior history with the Housing Trust Fund; however, the developer has successfully completed similar projects locally.

All three applications were presented to the Housing and Community Development Committee on January 28, 2009, and were unanimously approved.

45

This action complies with the Strategic Operating Plan in that the project is supportive of the City's goal of providing safe and decent affordable housing units to the citizens of Asheville.

It also addresses the priorities of the Consolidated Strategic Housing & Community Development Plan by increasing the housing stock, providing affordable rental units, building high quality energy-efficient housing, and coordinating development with transportation and jobs.

Funding for the Housing Trust Fund has been previously appropriated. The current balance in the Trust Fund is $718,600.39. The remaining available balance if all three (3) projects are funded at the terms requested will be $18,600.39. All projects are new construction and are anticipated to add $22.4 million dollars in new development to the City tax base.

As recommended by the HCD Committee, the staff recommends adoption of a resolution authorizing the City Manager to approve the additional Housing Trust Fund loans for the projects identified below:

- Mountain Housing Opportunities Inc. - Westmore $300,000.
  $170,000 to Mountain Housing Opportunities Inc. for the Westmore project when an anticipated $480,000 is returned to the Housing Trust Fund through an early repayment of a loan to Mountain Housing Opportunities Inc. for the Crowell Park development
- Mike Figura, Eco Concepts Development – Sulphur Springs $200,000.
- Kirk Booth, Beaucatcher Properties LLC – 57 Nancy Street $200,000.

Mr. Mike Figura, from Eco Concepts Development, thanked Council for partnering with them on this project, noting that they will be able to use this money to leverage against the seller's finance loan.

Upon inquiry of Vice-Mayor Davis, Councilman Newman, Chair of HCD, felt the financial difficulties of the Villas of Cedar Hill should not have a negative impact on this project.

In response to Councilman Mumpower, Planning & Development Director Judy Daniel said that the Villas of Cedar Hill did receive a Housing Trust Fund loan.

Councilman Mumpower spoke against the action in that this is not a time to use taxpayer dollars to subsidize affordable housing.

Councilman Newman said that overall the Housing Trust Fund has a very low rate of default and foreclosure amongst the developers and residents who have invested in making home ownership a reality through this loan program. These are well thought out loans to help people afford homeownership in a sustainable way. We are leveraging a lot of good out of these projects.

In response to Councilman Mumpower, Mr. Stallings said the sales price on the condominium units will be $145,000 for 2 bedrooms; the 3-bedroom rental will be $875/month and the 2-bedroom rental will be approximately $600. Councilman Mumpower then felt the prices are not affordable for normal people.

Councilwoman Cape stressed that people need jobs. Here we have a Housing Trust Fund and we can either sit on the $700,000 or get people back to work to buy food and pay sales taxes. Our City has very limited opportunity to put jobs on the street and the Housing Trust Fund can do that.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-44. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 31 – PAGE 454

C. RESOLUTION NO. 09-45 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH BUNCOMBE COUNTY FOR THE PURPOSE OF PERFORMING CERTAIN CONSTRUCTION AND REPAIR WORK ON COUNTY PROPERTY

ORDINANCE NO. 3705 – BUDGET AMENDMENT FOR STREET WORK NEAR BUNCOMBE COUNTY JAIL COMPLEX

Public Works Director Mark Combs said that this is the consideration of a resolution authorizing the City of Asheville to perform certain construction and repair work on city-maintained streets adjacent to the new jail complex and on Buncombe County property.

Last autumn, Public Works staff prepared an estimate for Buncombe County to do streets milling, resurfacing, re-striping and miscellaneous paving or patching in the vicinity of the new jail complex behind City Hall.

The estimate for the project is $157,508.62 which includes all 'out-of-pocket' expenses such as supplies, sub-contract work and materials to complete the project. The estimate does not include overhead expenses (labor and equipment wear & tear), which is an additional $56,702 'soft cost' to the City. Buncombe County has agreed to contract with the City to perform this work per the estimate, to be completed in Spring 2009.

This action complies with the City Council Strategic Operating Plan to "Develop better relationships with State and County elected officials...."

Pros:

- Highest quality infrastructure adjacent to City Hall;
- No direct financial impact to the City for materials and supplies;
- Reduced financial impact to Buncombe County (estimated private sector cost to do this project: $220,000);
- Promotes 'win-win' partnership with Buncombe County.

Cons:

- Three weeks of work for Public Works staff, 'opportunity cost' for other projects
- 'Soft cost' of $56,702 (labor and equipment wear & tear)

There is only indirect financial impact to the City as outlined in the pros and cons above.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into an agreement with Buncombe County to perform the described work.

City Attorney Oast said there is a dollar limitation on a project we can do with our own labor force. The authorization to get around that has not been obtained yet, therefore, any actions Council takes will be subject to compliance with the applicable statutory provision.

In response to Councilman Mumpower regarding subcontractors hiring illegal workers, Mr. Combs said that the City will go through their normal process to verify residency.

Councilman Mumpower could not support this action because we cannot find ways to make sure subcontractors are hiring legal workers.

In response to Mayor Bellamy, Mr. Combs said we are doing the work in-house, except for milling of the street which must be sub-contracted out.

City Manager Jackson noted that one of Council's strategic goals is relationships with partners. The City has stepped up and (1) put in waterlines to the CTS contaminated areas at significant savings to Buncombe County; and (2) used our contract to extend broadband to the 911 Call Center saving hundreds of thousands of dollars. This is a way to build good relationships with our partners.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolution and ordinance and they would not be read.

Councilman Newman moved for the adoption of Resolution No. 09-45, subject to compliance with the applicable statutory provision. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no".

RESOLUTION BOOK NO. 31 – PAGE 455

Councilwoman Cape moved for the adoption of Ordinance No. 3705, subject to compliance with the applicable statutory provision. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 25 – PAGE 190

VII. OTHER BUSINESS:

Economic Stimulus Package

Mayor Bellamy updated Council on her recent trip to Washington, D.C. to meet with President Obama, Vice-President Biden and 5 Cabinet members, where 37 cities were represented. She outlined each key priority and the amount of funding (some which are competitive). She asked for Council's support on (1) use the Finance Committee as the Economic Recovery Committee and adding three community members to be a part of that dialogue; (2) develop a page on our website to show projects and how money is spent; (3) develop an Energy and Environment Plan; and (4) coordinate with the Housing Authority, schools and other entities.

Mayor Bellamy said that City Manager Jackson has asked Assistant to the City Manager Lauren Bradley to be the staff liaison to keep track of these issues. Due to time sensitive deadlines and since we don't want to miss any opportunities, she asked Ms. Bradley to give Council a brief report.

Ms. Bradley said the following are funding opportunities already announced through the N.C. Dept. of Environment and Natural Resources (DENR) through the Drinking Water and Clean Water State Revolving Funds. She provided Council with copies of letters of intent for projects that we intend to apply for funding for. There is an application deadline tomorrow for one of those revolving funds. She asked for Council's consensus to move those applications forward. The second item for consideration is small enhancement projects through the N.C. Dept. of Transportation (NCDOT). They have asked for a call for project proposals for that pot of money they will be receiving. She provided Council with a working list of projects staff has accumulated and they expect to have that list finalized by the end of this week. She asked for Council's consideration of staff forwarding that to the NCDOT for all projects can be considered in a timely manner. It was the consensus of Council to authorize the City Manager to proceed with (1) accepting and endorsing the letters of intent to DENR for funding consideration under the associated State Revolving Funds; and (2) accept and endorse the working list of projects

48

identified by staff for funding consideration under the NCDOT's Small Enhancement Projects program, and authorize staff to forward the final list to NCDOT upon its completion.

Mayor Bellamy said that she personally presented staff's list in draft form to each of the applicable secretaries. She also let the US Attorney General know about the need for prosecutors and judges, and spoke about the success of the Weed & Seed and Project Safe Neighborhood programs. She said staff will bring Council regular updates.

Councilwoman Cape said that Congressman Shuler was in Asheville and was pleased to see how quickly things are moving.

In response to Councilwoman Cape about 20% being set aside for green initiatives, Ms. Bradley said that our Sustainability Coordinator is putting together project proposals, which are posted on our website.

Lawsuit

The City received a Complaint in Federal Court on February 10, 2009, from Holly Oxner, Jr. and Forrest Eugene Weaver. The nature of the proceeding is a class action lawsuit brought in federal court challenging the City's personnel policy regarding the conversion of accumulated sick leave for purposes of the N.C. Local Government Employees Retirement System. This matter will be handled by an attorney outside of the City Attorney's Office.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Gene Hampton spoke to Council about the need of quality education.

Mr. Chuck Chiavaras suggested Council raise money by having bicyclists pay to use the track at Carrier Park, similar to golfers who have to pay to use the golf course. This would be one way to raise money and not cut staff. He felt current staff have worked to improved the golf course and urged Council to continue moving forward in that regard.

Mr. Brian Festa spoke to Council about the need for a conscious evolution in the way we teach in the public school system.

Mr. Mike Fryar agreed with Mr. Chiavaras in that bicyclists should pay to use our facilities.

Closed Session

At 10:12 p.m., Councilman Miller moved to go into closed session for the following reason: (1) To discuss matters related to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered by the Council in negotiations; provided, that any final action authorizing economic development incentives will be taken in open session. The statutory authority is contained in G.S. 143-318.11 (a) (4); and (2) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is G.S. 143-318.10 (e). The statutory authorization is contained in G.S. 143-381.11 (a) (1). This motion was seconded by Councilman Russell and carried unanimously.

At 10:23 p.m., Councilman Russell moved to come out of closed session. This motion was seconded by Councilwoman Cape and carried unanimously.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:23 p.m.

Magdalen Bouleson
CITY CLERK

MAYOR

Tuesday – March 10, 2009 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Mumpower gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION

Mayor Bellamy was pleased to recognize and welcome Ms. Alma "Gibbie" Harris as the new Buncombe County Health Director.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Item "E" was removed from the Consent Agenda for discussion and/or an individual vote. Mayor Bellamy moved this to the end of New Business.

At the request of Mayor Bellamy, Consent Agenda Item "F" was removed from the Consent Agenda for discussion and/or an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON FEBRUARY 24, 2009

B. RESOLUTION NO. 09-46 - RESOLUTION AUTHORIZING A LICENSE AGREEMENT WITH BELL ATLANTIC MOBILE OF ASHEVILLE INC. D/B/A VERIZON WIRELESS, FOR ANTENNAS AND RELATED EQUIPMENT ON CITY-OWNED REAL PROPERTY AT 57 CRESTWOOD DRIVE, ASHEVILLE NC

ORDINANCE NO. 3706 - BUDGET AMENDMENT FOR A LICENSE AGREEMENT WITH BELL ATLANTIC MOBILE OF ASHEVILLE INC. D/B/A VERIZON WIRELESS, FOR ANTENNAS AND RELATED EQUIPMENT ON CITY-OWNED REAL PROPERTY AT 57 CRESTWOOD DRIVE, ASHEVILLE NC

Summary: The consideration of a resolution authorizing the City Manager to execute a License Agreement with Bell Atlantic Mobile of Asheville, Inc. for antennas at 57 Crestwood Drive, Arden, North Carolina; and the associated budget amendment, in the amount of $56,200 from tower lease revenue.

The City of Asheville owns and operates a telecommunications tower located on property at 57 Crestwood Drive in Arden. The City leases antenna space on the tower and ground space for related equipment.

Bell Atlantic Mobile of Asheville, Inc. with its principal place of business located at One Verizon Way, Mail Stop 4AW100, Basking Ridge, New Jersey 07920, has offered to enter into a license agreement for antenna space and related equipment on the tower. A tower analysis is required by the license agreement to assure that the new installation does not interfere with existing installations and that the tower is structurally able to support the additional installation, to be paid for by Bell Atlantic Mobile of Asheville, Inc. The proposed License Agreement will enable Bell Atlantic to operate nine (9) panel antennas at that site; however, there is a provision, which allows either the Licensor or the Licensee to terminate the agreement upon 180 days notice. The term of the License Agreement will be five (5) years with one renewal period of five (5) years. Bell Atlantic will pay an annual License Fee based on the initial rate of $30,000 with a 4% increase annually thereafter. Two years of license fees will be collected in advance; the first two months exempted to allow for installation of equipment.

The initial rate was determined by gathering and comparing rate structures used by other municipalities across the state, including the Cary, Hickory, Charlotte and others. Formal findings were reviewed and endorsed by the Council's Planning and Economic Development Committee on August 20, 2008. Results indicate that base fee of $30,000 per annum represents fair market value for this type of installation.

Please note that due to the close proximity of proposed installation to the adjacent property, City staff has requested Bell Atlantic to perform outreach to the neighboring property owner. The site plan includes a privacy fence installation and additional landscaping, to be installed by Bell Atlantic, to provide an appropriate buffer and address feedback from the neighbor.

The Notice of Intent to enter into a License Agreement with Bell Atlantic Mobile was published on February 27, 2009, in the Asheville Citizen-Times. Ten days have passed since the publication and authorization to execute the License Agreement is being requested.

This action complies with the City Council Strategic Operating Plan in that strategic tower asset management, through the creation of new license agreements, presents the City with revenue enhancements. These revenue enhancements can help the City's telecommunications operations become more sustainable and fiscally responsible.

Several new tenant leases are anticipated in FY09. A portion of this additional revenue has been planned to underwrite a cost savings plan for the City's own telecommunication operations. Specifically, the City is planning on utilizing an estimated $80,000 of these new revenue enhancements to re-locate equipment from the Spivey Mountain site (where the City pays $29,000 per year with a 7% escalation each year) to the White Fawn site (owned by the City). This re-engineering was proposed in the FY09 budget, and once implemented, will promote significant cost savings to the City over time. The budget amendment will appropriate $56,200 into the re-engineering account.

Pros:

- Enhanced revenue through the license fee income
- Maximized vacant space on existing tower infrastructure
- Underwrites long term cost savings plan for telecommunications

Con:

- None

Fiscal Impact:

- FY09: $56,200 revenue
- FY09: $56,200 investment programmed to support re-location of City equipment
- Beyond FY09: Additional revenue stream based on initial rate of $30,000 per year with 4% escalation per year.
- Beyond FY09: Resulting savings of initial rate of $29,000 per year with 7% rent escalations.

City staff recommends City Council adopt a (1) resolution authorizing the City Manager to execute the license agreement with Bell Atlantic Mobile of Asheville, Inc. on behalf of the City of Asheville; and (2) budget amendment to be used for cost savings plan for telecommunications.

RESOLUTION BOOK NO. 31 – PAGE 456

ORDINANCE BOOK NO. 25 – PAGE 192

C. MOTION ADOPTING THE 2009-10 BUDGET SCHEDULE

Summary: Staff is seeking City Council's approval of adoption of the Fiscal Year 2009-10 Budget Schedule.

At the February 24, 2009, City Council meeting, staff provided Council with a proposed Fiscal Year 2009-10 Budget Schedule for the time period between February 2009 and June 2009, when the budget is scheduled for adoption. The proposed schedule outlines key dates in the budget process.

Staff recommends that City Council review the proposed Fiscal Year 2009-10 Budget Schedule, make changes as needed, and make a motion adopting the Fiscal Year 2009-10 Budget Schedule.

D. RESOLUTION NO. 09-47 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE EASEMENT FOR ELECTRIC UTILITY LINE AT AIRPORT

Summary: The consideration of a resolution authorizing the City Manager to execute two easements for the installation and upgrade of power utility lines across property at the Airport

The land on which the Asheville Regional Airport is located is owned by the City of Asheville. It is leased by the Airport Authority, which has the ability to sublease to individual tenants at the airport. A new facility is being constructed on subleased property at the Airport, and this new facility requires electrical service. In order to draw power from the nearest transmission line, this service line will have to cross Airport property that is not subject to the sublease. This is the subject of the first easement. In connection with this work, the Airport is upgrading existing service to the fuel farm. This is the subject of the second easement.

This installation has been reviewed and approved by the Airport's Development Manager and Director, and the form of the easements has been approved by the Authority's attorney. The Airport Authority will consider the easements at its next meeting, scheduled for March 13. The facility is scheduled to be operational on April 1, and both the Authority and Progress Energy have requested this action.

This action complies with the City's Strategic Operating Plan in that it contributes to the development of a multimodal transportation program, supports sustainable economic development, and contributes to Asheville's role as a regional economic and service center.

The requested action is consistent with the Airport's Master Plan.

Pros:
- Facilitates development of Airport
- Lines will be mostly underground

Con:
- None noted

The fiscal impact would be indirect; increases potential for revenue at Airport.

Adoption of the resolution is recommended

RESOLUTION BOOK NO. 31 – PAGE 457

E. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH SITE DEVELOPMENT CORPORATION TO CONSTRUCT THE FRENCH BROAD RIVER CORRIDOR CONNECTOR

This item was removed from the Consent Agenda for discussion and/or individual votes. This item was moved to the last item of New Business.

F. MOTION APPROVING THE CONCEPT OF A TOWN HALL MEETING REGARDING ASHEVILLE'S ECONOMIC CLIMATE

This item was removed from the Consent Agenda for discussion and/or individual votes.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Russell.

Item removed from the Consent Agenda for discussion and/or an individual vote

F. MOTION APPROVING THE CONCEPT OF A TOWN HALL MEETING REGARDING ASHEVILLE'S ECONOMIC CLIMATE

Mayor Bellamy said this is an effort to give our community a sense of Asheville's economic climate. She asked that the Town Hall meeting be held on March 31, 2009; however, one of the speakers (Senator Nesbitt) was unable to attend on that date. At this meeting, she is asking if Council would approve the concept and come back with an alternative date.

Vice-Mayor Davis moved to approve the concept of a Town Hall meeting regarding Asheville's economic climate. This motion was seconded by Councilwoman Cape and carried unanimously.

Continuation of Consent Agenda

Mayor Bellamy said that the City Manager is currently authorized to sign informal construction contracts under $100,000, service contracts under $50,000 and professional service contracts under $50,000 without formal City Council approval. She felt all resolutions should reflect the policy currently in place where the City Manager is authorized to sign the contracts outlined above. All other resolutions should be authorizing the Mayor to sign the contracts. She asked that policy authority be aligned on the resolutions.

At the suggestion of Councilman Mumpower, it was the consensus of Council to ask Mayor Bellamy, Vice-Mayor Davis, Councilman Mumpower, City Manager Jackson and City Attorney Oast to meet in a timely manner to discuss this issue.

The motion made by Councilman Mumpower and seconded by Councilman Russell carried on a 6-1 vote, with Mayor Bellamy voting "no".

III. PRESENTATIONS & REPORTS:

A. MAYOR'S COMMITTEE FOR CITIZENS WITH DISABILITIES REPORT

Ms. Karen Harrington, representing the Asheville Mayor's Committee for Citizens with Disabilities, said that the Asheville Mayor's Committee for Citizens with Disabilities is a committee of persons with disabilities, agencies, business and government representatives. She then explained their mission is to promote and advocate for equal and inclusive opportunities for people with disabilities in all aspects of society and to recognize and cooperate with all people and organizations that contribute to this cause. Their goal is to be an advocacy organization to educate the community for the inclusion of all people: (1) They provide educational services to employers and businesses about local needs surrounding people with disabilities, and have consultation services about accessibility issues according to the Americans with Disabilities Act; (2) They advocate for the inclusion of people with disabilities in all aspects of the community; (3) They promote the employment of people with disabilities; (4) They recognize outstanding efforts of employers who hire people with disabilities; and (5) They participate in community activities to enhance awareness.

Ms. Harrington then updated Council on (1) the Council of Committee and its role in the community; (2) their Awards Banquet and who the recipients were and why they received an award; (3) need to connect the community as a whole with those living with disability; and (4) the need to get past negative connotation with talking about disability. She provided Council with the Committee's brochure and a sheet outlining the reasons to volunteer.

Ms. Harrington thanked the Council for their support and invited them to attend their meetings.

In response to Mayor Bellamy, Ms. Harrington explained a program where private citizens, after training, can issue parking citations to people who park illegally in handicapped spaces. In over two years, they have written over 250 tickets.

Councilman Mumpower noted that near the Grove Arcade some handicapped parkers are taking advantage of the handicapped spaces by parking in them all day long. Mayor Bellamy felt the Parking Enforcement should manage that concern.

On behalf of City Council, Mayor Bellamy thanked Ms. Harrington and the Committee members for their hard work and dedication on this committee.

B. ECONOMIC STIMULUS PACKAGE UPDATE

Assistant to the City Manager Lauren Bradley briefly provided Council with an update that went to the Finance Committee regarding staff work related to the American Reinvestment and Recovery Act (ARRA).

Administrative Update- She reviewed a policy and administrative structure has been developed as a framework for managing ARRA efforts. Staff intends to fill the project manager and grants administrator positions identified in the flow chart with existing personnel through temporary reassignments. Many ARRA funding opportunities allow for a portion of the funds to

be used for grants administration; therefore, expenses associated with these positions may be charged to ARRA projects where appropriate and permitted. Staff will maintain detailed records in compliance with federal standards to ensure the highest level of financial accountability when managing these project funds.

Program Updates - This section provides updates on specific funding allocations that have been announced for Asheville as well as any associated grant applications, awards and project implementation.

Community Development

CDBG
HUD has announced that Asheville is designated to receive $332,942 in ARRA funds through the CDBG program. HUD is requiring grantees to prepare an action plan amendment for the use of these funds and will process the plans in an expedited manner, execute grant agreements, and make the funds available in each grantee's line of credit. Staff is waiting for additional announcements regarding requirements for the action plan amendments, including any changes in beneficiary and other eligibility requirements.

Homeless Prevention Fund
HUD has also announced that Asheville is designated to receive $509,000 from the Homeless Prevention Fund, which is dedicated to providing financial assistance and services to prevent individuals and families from becoming homeless and help those who are experiencing homelessness to be quickly re-housed and stabilized. Staff is waiting for additional information about the receipt and distribution of these funds.

Environment

As approved by City Council, staff submitted four applications to the NCDENR's Drinking Water State Revolving Fund. These projects included an Automated Meter Reading System, Pump Station Meters, Pumping System Installations, and the William DeBruhl Water Treatment Plan Backwash Lagoon. Applications for the Water Quality State Revolving Fund are due by March 24. Staff will provide ongoing updates on the funding status of these projects.

Transportation

Transportation Enhancement Projects
Staff responded to NCDOT's request for "small enhancement" projects (shovel-ready projects under $100,000) and submitted the letter made available at the last City Council meeting. Staff anticipates an additional call for larger enhancement projects ($100,000- $300,000 range) and is developing a list of recommended projects for future City Council consideration.

MPO Urbanized Area Funding
A portion of the state's highway funding is allocated to urbanized areas of over 200,000 in population. As previously reported, the Asheville urbanized area is expected to be allocated approximately $6 million. It is anticipated that these projects will be selected by the Transportation Advisory Committee of the French Broad River Metropolitan Planning Organization (MPO). It is anticipated that the MPO will call for suggested projects for this funding in the coming weeks. Staff will bring forward a recommended list for City Council consideration prior to submittal.

In order to ensure project expediency for funds that may be awarded for either enhancement projects or larger capital projects, staff plans to issue a Request for Qualifications for design/build teams for sidewalk projects. This step will allow the City of Asheville to pre-qualify firms that may be interested in bidding on specific projects once funding is confirmed,

thus accelerating the bid and project implementation process. As in all such requests, the City is not obligated to hire one or any of the firms submitting qualifications, so this step can be done now, before funding decisions are known.

Transit Capital Projects
The FBRMPO is expected to guide project choices for the $2.5 million in transit funding allocated for urban fixed-route transit systems in the Asheville urbanized area, which includes Asheville Transit and Apple County Transit in Henderson County. If these funds are allocated to the two systems using the existing state funding formula, Asheville Transit could expect to receive $2,004,598, and Apple County Transit would receive $585,841. The FBRMPO has requested the City of Asheville submit a prioritized list of transit capital projects by the end of the week, which staff has compiled and submitted for the Finance Committee's review. The list was prioritized based on system need, citizen benefit, and ability to implement according to ARRA required timeframes.

Public Safety

Edward Byrne Memorial Justice Assistance Grant - $265,466 is the minimum base allocation. Applications are due in May.

On Friday, March 6, staff presented this information to the Finance Committee and requested their approval of the Transit Capital Improvements Project Proposals, which she outlined, and approval to authorize staff to forward the list to the FBRMPO. ARRA transportation funding is in the form of reimbursable grants requiring no local match. There will not be adverse fiscal impacts to the city if these funds are obtained.

In summary, as of March 10, 2009, the total specific funding allocations that have been announced for Asheville as well as any associated grant applications, awards and project implementation is $3,607,408.

She also noted the following community announcements, which will be posted on our website with appropriate links. One is the Dept. of Education has just posted some specific information about how funds will be administered through their programs. We will be reaching out to our school systems to make sure that they are receiving information and that they get the support they need in order to move forward with their applications. The other announcement is the National Endowment for the Arts has put up their process for awarding funds. We have several community organizations that can benefit from that process. Those funds are eligible for pass grant recipients and also sub-granting authorities, which we have a couple in the Asheville area.

Ms. Bradley responded to questions from Council to the best of her knowledge regarding the funding allocations.

Councilman Mumpower felt that for Council to participate in these initiatives in any way represents a betrayal of the people we are trying to represent at a time of dire economic difficulty.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS CROWNE PLAZA RESORT AT 1 RESORT DRIVE FOR A MASTER PLAN COMPOSED OF THREE PHASES TOTALING 364,700 SQUARE FEET OF NEW FACILITIES, CONSISTING OF (1) DETAILED APPROVAL OF PHASE I THAT INCLUDES A 61,500 SQUARE FOOT EXPANSION OF THE EXISTING SPORTS CENTER FACILITY WITH A REQUEST FOR MODIFICATION TO REQUIRED SETBACKS; AND (2) CONCEPTUAL APPROVAL OF PHASES II AND III THAT INCLUDE A 123,200

SQUARE FOOT MIXED USE BUILDING AND A 180,000 SQUARE FOOT CONDO/HOTEL BUILDING RESPECTIVELY

ORDINANCE NO. 3707 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS CROWNE PLAZA RESORT AT 1 RESORT DRIVE FOR A MASTER PLAN COMPOSED OF THREE PHASES TOTALING 364,700 SQUARE FEET OF NEW FACILITIES, CONSISTING OF (1) DETAILED APPROVAL OF PHASE I THAT INCLUDES A 61,500 SQUARE FOOT EXPANSION OF THE EXISTING SPORTS CENTER FACILITY WITH A REQUEST FOR MODIFICATION TO REQUIRED SETBACKS; AND (2) CONCEPTUAL APPROVAL OF PHASES II AND III THAT INCLUDE A 123,200 SQUARE FOOT MIXED USE BUILDING AND A 180,000 SQUARE FOOT CONDO/HOTEL BUILDING RESPECTIVELY

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 5:34 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

City Attorney Oast said that the Authorized Practice Committee of the North Carolina State Bar has issued an advisory opinion that appearing in a representative capacity for a party before a local governmental body in a quasi-judicial proceeding is the practice of law, especially with respect to such aspects of the hearing as examining or cross-examining witnesses, or advocating for legal conclusions or results. This does not prevent persons, including land use professionals, from presenting information or expressing opinions within their knowledge or area of expertise.

Urban Planner Jessica Bernstein submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Bernstein said that this is the consideration of the issuance of a conditional use permit for the project identified as Crowne Plaza Resort at 1 Resort Drive for a Master Plan composed of three phases totaling 364,700 square feet of new facilities, consisting of (1) detailed approval of Phase I that includes a 61,500 square foot expansion of the existing Sports Center facility with a request for modification to required setbacks; and (2) conceptual approval of Phases II and III that include a 123,200 square foot mixed use building and a 180,000 square foot condo/hotel building respectively (Location and Aerial Maps – Attachments to City Exhibit 3).

She said the applicant is requesting review of site plans for site improvements and new construction at the Crowne Plaza Resort. This project is considered a Level III review pursuant to Section 7-5-9(a) of the Unified Development Ordinance (UDO) which designates review for commercial developments with a gross floor area of more than 100,000 square feet. The existing

resort contains approximately 393,000 square feet and the total new construction is proposed at 364,700 square feet over three phases.

The project site consists of a 108.45 acre parcel and a small leased portion of an adjacent parcel located off of Resort Drive (accessed from Patton Avenue/I-240) and is zoned Resort District. Surrounding properties are zoned Resort, Regional Business, RM-8, RS-2, RS-8, CBI, and CBII. This site is currently the location of the Crowne Plaza Resort.

The applicant is requesting review of a three-phase improvement project, with detailed approval of Phase 1 and conceptual approval of Phases 2 & 3 (Master Plan – Attachment to City Exhibit 3):

- Phase 1 (2009) – Sports center expansion, including two surface parking lots, an addition to existing indoor tennis building for a fitness center and staff offices (2-story addition, 33'9", 36,000 square feet), a building for a pool and bathrooms (6,500 square feet), and a separate indoor soccer facility (1-story, 24'2", 19,000 square feet – total 61,500 SF).

- Phase 2 (2011-2013) – Mixed-use office and residential building, four-stories with under-structure parking (123,200 square feet).

- Phase 3 (2011-2014) – Hotel/condo expansion, four-stories with under-structure parking (180,000 square feet).

Phases 2 and 3 will return to the Technical Review Committee (TRC) separately for detailed review.

The entire resort is accessed via Resort Drive, which is private. A driveway will link Resort Drive to the proposed improvements. Access to the southernmost tennis courts and indoor soccer facility are pedestrian-only and cross the Smith Mill Creek. Surface parking lots are proposed as a part of Phase 1 and include 75 parking spaces. Future phases will have parking included under the structure.

Landscaping and open space will be provided according to the City's ordinances.

The project proposes structures that will straddle existing property lines. In the Resort district, there is a 35' front setback and a 15' side setback from the property line. Because of the unique structure placement of the tennis court and soccer facility and the Phase 1 building over the property line (which must be approved by both the Fire Department and Building Safety and may require consultation with the Building Code Council), modifications to setbacks are needed for Phase 1 structures and will need to be approved by City Council (Modification Map - Attachment to City Exhibit 3).

Several of the improvements proposed in this expansion project are on land owned by others. A lease agreement has been submitted with the project application which states in Section 6.2 that the "Lessee shall be permitted to make structural or other modification(s) or improvement(s) to the Premises without prior approval by Lessor." This language has been reviewed by the City attorney who finds no reason to withhold consideration.

This project was approved with conditions by the TRC on February 2, 2009. No members of the community expressed opposition to the project.

The Planning & Zoning Commission reviewed this request on February 19, 2009, and recommended approval of the master development plan and setback modifications by a unanimous vote (5-0). Commissioners recognized that the plans for the I-26 connector were not truly a "con" to this proposal and that until an alternative is definitively identified and funded,

proposals such as this one cannot be held hostage. No member of the community expressed opposition to the project.

City Council must take formal action as set forth in Section 7-5-5(e)(3) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case pursuant to Section 7-16-2(c). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The project will meet State building code requirements and will be reviewed in detail by the TRC to ensure compliance with safety requirements.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The improvements in Phase 1 are proposed in areas with significant natural features, including the need to reconstruct a bridge over a jurisdictional stream that appears to be within the 100-year floodway and associated grading activities. The applicant will need to coordinate with the City's Engineering Department (as well as the Army Corps of Engineers) to demonstrate compliance with applicable state, local and federal rules and regulations.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The parcel(s) containing the Crowne Plaza Resort is quite large (over 108 acres) and the proposed activities are all focused in the southeast corner of the lot, along the access way into the Resort (far from any adjacent residential neighborhoods). This portion of the lot is in between Sam's Club and the Westgate Shopping Center, both zoned RB. Any increase in development intensity associated with these improvements is complementary to the adjacent uses and zoning and should not injure the value of the abutting property.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   The parcel(s) containing the Crowne Plaza Resort is quite large (over 108 acres) and the proposed activities are all focused in the southeast corner of the lot. As mentioned in #3, this is an appropriate location for higher density residential, recreational and resort development. The proposed buildings are located far from any single-family or low density development and the uses and development are compatible with the hotel and resort amenities and buildings existing on the site.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   This proposal aligns with Smart Growth Land Use Policies in the 2025 Plan by including mixed-use development with hotel, recreational and residential components on a site with existing infrastructure, close to transportation and the downtown (pg. 31). Also, the tourism industry is highlighted in the Plan as needing to concentrate on "creating and marketing 'destination' travel opportunities to attract travelers" (pg. 195). Expanding and enhancing the amenities of this centrally located resort will no doubt have a positive draw to visitors, but many of the improvements are also available as a benefit to the public and the tennis courts will be used by UNC-Asheville.

The Plan states "the route that the Connector takes and the extent to which I-26 is widened are topics of great controversy in the City of Asheville" with concerns including "impacts on community character, promotion of economic development, loss of businesses and housing, public safety, construction noise and congestion, business access during construction and further inducement of a sprawl development pattern" (pg. 140). Three of the four proposals for the Connector have a serious impact on the viability of this proposal, with Alternative 2 being the only proposal that appears to not have a detrimental effect on the Resort property. Under the City's current preferred alternative (4B), almost all of the land for Phase 1 and a portion of Phase 2 would be taken.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   This site is located just off I-240/Patton Avenue, which places the project in an easily accessible location by car and Asheville transit (rt. 15). The project has been reviewed by the Technical Review Committee and has been found to have adequate access to infrastructure.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   The subject project has been reviewed by the City Traffic Engineer and the following comments are provided. The proposed project will likely trigger the need for a traffic impact analysis (TIA) at full build-out conditions, including Phase 3 if not sooner; however, the analysis should be delayed until Phase 2 for the following reasons:

   1. *The proposed recreational uses are intended for use by guests of the resort the majority of the time.*
   2. *The indoor soccer complex will be for non-spectator event(s) due to the actual size of the complex (no room provided for spectators should mean no additional vehicle trips).*
   3. *The uncertainty of the final location of the I-26 connector, which will affect the nearby street network and thereby any improvements recommended by a TIA.*

   Since the construction of Phase 1 will not increase the number of available rooms (beds), the overall traffic impact should be minimal and the existing street network is sufficient. Phase 1 should not cause undue traffic congestion or create a traffic hazard.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- The proposal is aligned with City goals relating to economic development (tourism) and sustainability (mix of uses on a parcel with access to transportation options and existing infrastructure).
- Allows for a partnership with UNC-Asheville for use of the recreation facilities.

Cons:

- Three of the four proposed I-26 Connector alternatives seriously impact the viability of this project.
- Impacts to a jurisdictional stream are unavoidable; however, they are within the parameters of normal development practices and will require review, approval and oversight by outside agencies.

Staff recommends approval of the Level 3 phased master development plan and the modifications to setback as requested by the applicant.

Mr. Marvin Mercer, with Mercer Design Group, said that he was present to respond to Council questions.

Mr. Dennis Hulsing, owner, spoke in support of the conditional use permit which will bring additional tourists to Asheville.

Mayor Bellamy closed the public hearing at 5:40 p.m.

There was considerable discussion, initiated by Councilwoman Cape, regarding how Council's support of the N.C. Dept. of Transportation's I-26 Connector Alternate 4-B that Council endorsed would affect this project, since that alternative would seriously impact the viability of this project. It was City Attorney Oast's opinion that Council's vote on a preferred path for the I-26 Connector would not be diminished by their vote on this project. Because the Crowne Resort is in the way of several N.C. Dept. of Transportation's alternatives, and there is no decision on the final plan or acquisition of properties, he was unsure whether that is proper consideration in this decision. In addition, the Council's support of the I-26 Connector Alternate is just an endorsement of a N.C. Dept. of Transportation Plan, not the City's plan.

In response to Councilman Mumpower, Mr. Hulsing explained how they have been working on this project for several years while waiting to hear about the final I-26 Connector Plan. Even though he disagrees with the Alternate 4-B that Council endorsed, he preferred to move forward with this project in order to keep people employed and bring business to Asheville.

Vice-Mayor Davis said that from the Metropolitan Planning Organization's standpoint, the N.C. Dept. of Transportation decision on a final alternate plan could be made in early September.

Councilman Miller felt there is a definite need for these types of structures in the City and its uncertain when the N.C. Dept. of Transportation will be ready to start purchasing land, especially with the prospect of lawsuits being filed.

Councilman Miller moved for the adoption of Ordinance No. 3707, granting a conditional use permit for the project identified as Crowne Plaza Resort at 1 Resort Drive for the proposed 3-phase Master Plan with approval of the proposed setback modifications, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by the TRC prior to issuance of any required permits; (6) Bridge reconstruction may require review by the Army Corps of Engineers; and (7) No building permits shall be issued until a solution is devised concerning resolution of the property line/building code matter. This motion was seconded by Councilman Newman and carried on a 4-3 vote, with Mayor Bellamy, Councilwoman Cape and Councilman Mumpower voting "no."

City Attorney Oast said that due to the vote, this matter will have to come back for a second reading. Mayor Bellamy said it will be placed on the March 24, 2009, agenda.

Mayor Bellamy asked staff to see if they can find out a date when the N.C. Dept. of Transportation expects to have a final decision, prior to Council's consideration on March 24.

In response to Councilman Mumpower, Mayor Bellamy said that if there is going to be reconsideration of a motion, that reconsideration must be made by someone who voted in favor of the motion.

Councilman Newman felt we should not freeze development and hold hostage all property owners in the different alternate areas until a decision is made.

ORDINANCE BOOK NO. 25 – PAGE 194

B. PUBLIC HEARING TO CONSIDER AMENDMENTS TO THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE

ORDINANCE NO. 3708 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE (GUARANTEEING PERFORMANCE)

ORDINANCE NO. 3709 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE (PERMIT VALIDITY)

ORDINANCE NO. 3710 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE (ALTERNATIVE LANDSCAPING COMPLIANCE IN DISPLAY AREAS)

ORDINANCE NO. 3711- ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE (APPROPRIATE ACCESS TO HIGHWAY BUSINESS ZONED PARCELS)

ORDINANCE NO. 3712 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE (PARKING REDUCTION FOR SELF-STORAGE FACILITIES)

ORDINANCE NO. 3713 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE (ELIMINATE ACCESSORY STRUCTURE BUFFER)

ORDINANCE NO. 3714 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE (GREATER SIGNAGE FOR LARGE NEW DEVELOPMENTS)

ORDINANCE NO. 3715 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO RESPOND TO THE CURRENT ECONOMIC CLIMATE (GREATER FLEXIBILITY FOR TEMPORARY SIGNS)

Mayor Bellamy opened the public hearing at 5:57 p.m.

Urban Planner Jessica Bernstein said that this is the consideration of eight amendments to the Unified Development Ordinance (UDO) for the purposes of responding to the current economic climate to assist businesses and development proposals to open and operate more easily, while still meeting the technical UDO standards along with City adopted goals. This public hearing was advertised on February 27 and March 6, 2009.

Planning & Development staff began to see impacts on local development emerging throughout the fall, and started to consider how regulations could be adjusted to provide relief. Several proposals were under already consideration when participants at the City Manager's Development Forum held on December 5, 2008, were asked for their ideas on what other changes would be helpful. At the Forum, similar concern was expressed over the national economic climate and additional suggestions were made to staff. Staff discussed how minor changes to the UDO would be able to provide some relief to development proposals facing difficulty with willingness of banks and financial institutions to provide bonds or loans, the increased cost of construction operations, materials and general delays, all resulting in a decrease in revenue overall. The staff suggestions led to other ideas from the group which has led to a consolidated package of amendments designed to assist those facing difficulty completing projects and/or keeping existing projects viable.

Staff is proposing eight (8) separate code changes as a response to the Forum discussion, meetings with stakeholders and brainstorming among City staff. Although the eight (8) changes are loosely grouped together for purposes of this report as serving as a response to the current economic climate, they are distinct in their directives and will therefore be described separately below. Each item will require a separate vote.

The first two (2) changes relate to timelines and the process for projects from approval to occupancy. The last six (6) are intended to offer some economic relief to both business owners and homeowners. All eight (8) proposals in this report have been carefully considered to balance providing some relief to the currently affected development community with maintaining the intent of the UDO and development review process. While providing relief was the main objective, it should be noted that the proposed changes do result in some consequences.

The changes included in this report should be seen as a starting point. Staff continues to meet with property owners and members of the business community to develop additional potential UDO changes.

1. **Issue: Provide an alternate method of guaranteeing performance if bonds are not available.**

   Current: For major subdivisions and development projects wherein the installation of public infrastructure (streets, waterlines, etc.) is part of the development, the City can issue plat approval or a certificate of occupancy for structures in the development prior to completion of the infrastructure, provided that a bond or other financial instrument is in place to guarantee payment of the cost of the infrastructure if the developer is unable to complete the project. In other cases, the City can issue temporary certificates of occupancy as for a building, and allow such peripheral requirements as landscaping, to be installed later. This also requires a financial guarantee. These temporary arrangements are authorized in State law, which provides that in no case may a certificate of occupancy or other approval issue for structures that do not otherwise satisfy building, fire, and safety code requirements.

   Proposal: Because banks and other financial institutions have been unable or reluctant to issue bonds in recent months, the City should consider allowing alternative means of providing this flexibility, while ensuring that required improvements are made. One method of doing this is a "Delayed Compliance Agreement," whereby a developer agrees to complete required installations within a certain time. However, instead of a financial guarantee, the developer waives defenses to legal actions to enforce the agreement, and agrees to pay attorneys fees. The City should be careful to use such agreements only in extraordinary circumstances, only for certain types of improvements, and only where it can be demonstrated

that a bond is not available even though that developer was willing to pay for it, and was otherwise qualified for it.

Relevant Code Sections: 7-5-8(a)(4) and 7-15-1(g)(4): Major Subdivisions; 7-11-3(f)(1): Landscaping; 7-5-19: Certificate of Occupancy

Pros:

- Allows for an alternative method to ensure completion of site improvements in the event that a bond or traditional guarantees are not available.
- Allows for an alternative that may be better suited to address unique circumstances or needs.
- Allows resources to be focused on more pressing needs.
- Provides a negotiated time frame within which to work.

Cons:

- Removes the third-party financial element and places a greater burden on the City to recover costs in the event a developer cannot complete project.

In response to Councilman Newman, Ms. Bernstein and City Attorney Oast explained the City's risk, how this would be used for only non-safety improvements, how the developer would have to submit verification from a financial institution of why there is a problem, how criteria is being developed to evaluate which projects could be considered for this alternate method, and what options the City has if required improvements are not made.

2. **Issue: Extend zoning permit approvals and terms of permit validity**

Current: In August 2007, Council approved an increase in the validity of Conditional Use Permits from one year to two years. Currently, the UDO states that all Conditional Use Permits, Conditional Zonings and Level 3 project zoning approvals shall be valid for *two years* from the date of approval by City Council. *Failure to initiate construction* or otherwise begin the permitted use within this time shall render the approval void. The Planning & Development Director may grant a single extension of up to six months upon submittal by the applicant of sufficient justification for the extension. Level 1 and 2 projects have zoning approval valid for one year from the date of approval with the same parameters of validity and extension.

Proposal: Due to the cumulative effect of the economic climate from availability of funding sources and the overall market downturn, the City should consider allowing the approving body to grant an additional extension up to one year beyond the two years approval validity and six-month extensions already allowed for Conditional Use Permits and Level 3 projects. The six-month extension granted by the Planning & Development Director should be included for Conditional Zoning approvals. Additionally, the circumstance which begins this term of permit validity for all projects (those mentioned above as well as Level 1 and 2s) should be changed from "failure to initiate construction" to "failure to obtain zoning permit" since no project activity may occur prior to issuance of the zoning permit.

In order to safeguard against the possibility of degradation on the site during the time of permit extension, conditions can be added to the initial approval or extension approval to address site maintenance issues such as graffiti removal, trash pick-up, mowing and security.

Relevant Code Sections: 7-5-5(j): CUP/Level 3; 7-7-8(c.)(9): CZ; 7-5-9(c.)(9): Level 1; 7-5-9(b)(9): Level 2

Pros:

- Allows the development community additional time to complete financial and property transactions without having to return through the review process because of permit expiration.
- Can be applied to existing as well as future projects.
- Changing "failure to initiate construction" to "failure to obtain zoning permit" provides a more definable method to track permit validity.
- Places authorization on the approving body and not staff (could be viewed as a con).

Cons:

- Has limited application - although zoning rights would be vested, this would not protect against changes to Engineering standards or Building Safety codes that may be amended during that time of extension.
- Community priorities may change/evolve over a 3 ½ year period and this amendment could facilitate a project that no longer reflects technical standards or adopted goals.

In response to Councilman Newman, Ms. Bernstein said that this applies to new projects but could also be retroactively placed on some projects if they contact the City and request an extension with sufficient justification for the extension.

3. **Issue: Businesses that rely on large outdoor display areas feel adversely impacted by landscaping requirements in parking fields/display areas. The cost and location of the plantings cause financial hardship in a time of declining sales and revenues**

Current: All businesses that include large outdoor display areas (including car dealerships or rental businesses) are required to comply with all landscape code standards, including property line buffer, street buffer, street trees, parking lot landscaping, building impact landscaping and screening. An alternative is currently offered which allows reduction in size of the required landscape islands, reduction in number of interior plantings and alternatives for tree spacing if the development includes specific design features aimed at reducing the impervious parking field and improving water runoff amount and quality. Several of the alternatives are offered to any type of development; however the waiver for tree spacing is available only to those who use their parking field as a display area.

Proposal: Because of the significant amount of impervious surface associated with automobile dealerships and the subsequent issues with stormwater runoff and water quality, staff does not feel that a complete elimination of parking lot landscaping is advisable. However, the alternative option for tree spacing and interior plantings can be altered to allow for a 50% reduction of parking lot landscaping materials provided that the planting areas are either concentrated towards the perimeter of the lot or grouped in one large central area and that they are designed so that stormwater runoff is captured through bio-swales and/or constructed wetlands.

Relevant Code Sections: 7-11-3(e)(3)

Pros:

- Reduces some financial burden on these businesses.
- More appropriately accommodates the unique nature of these outdoor display areas.
- Allows for a reduction in some of the interior parking lot landscaping, but does so in an alternative that incorporates stormwater runoff best management practices while maintaining parking field interior plantings.

- By consolidating islands, arguably, improves the growing conditions of the plantings.

Cons:

- Eliminating interior planting creates a larger impervious surface which can increase stormwater control and quality issues, especially on a site where gasoline, oil, soap and other potential groundwater contaminants are regularly utilized.
- Reduces other benefits from interior plantings such as moderating surface temperatures and improvements to air quality.
- Bioswales, rain gardens, constructed wetlands and other BMPs require regular maintenance to be effective.
- Increasing concessions to only one group of business owners may result in feelings of disparate regulation from other developers who would also appreciate less restrictive landscaping.

Items regarding landscaping were discussed with the Tree Commission at their meeting on January 26, 2009. The Commission was not supportive of the proposal in #3 to further reduce the number of interior plantings required for businesses using their parking fields as display areas. While they acknowledge the reasoning behind the request they do not feel the reduction aligns with that body's goals and objectives regarding improving the visual and environmental quality of Asheville.

Mayor Bellamy said that proposal states that "Because of the significant amount of impervious surface associated with automobile dealerships ..." and wondered this is amendment is open to all businesses or just automobile dealerships. Ms. Bernstein said that this relates specifically to businesses whose parking area doubles as a display area. Primarily we think of automobile dealerships first, but it would also be large scale rental, boat rental, etc. – those businesses who use the parking field as display. It would not apply to a business with a large parking lot – it would have to double as a display area.

In response to Mayor Bellamy, Ms. Bernstein that this amendment does not change anything to the property line buffer that is required between different zoning districts.

At Mayor Bellamy's suggestion, Ms. Bernstein said that she would be happy to clarify the language that this does not change anything to the property line buffer that is required between different zoning districts.

In response to Councilman Newman, Vice-Mayor Davis further explained the Tree Commission's lack of support for this amendment.

Councilman Newman supported the Tree Commission's guidance on this matter.

Mayor Bellamy asked for a friendly amendment clarifying the language that this amendment relates specifically to all businesses whose parking area doubles as a display area. Councilman Mumpower and Councilman Russell accepted the friendly amendment.

4. **Issue: Development in the Highway Business District (HB) may be restricted due to the minimum lot frontage requirement**

   Current: In the HB zoning district, it is stated that there shall be no minimum lot *size* or *width* standards, however, the minimum lot *frontage* shall be 100 lineal feet. For through and corner lots, the minimum street frontage shall be required along the property line abutting the larger thoroughfare.

   Proposal: There are a number of areas zoned HB where additional development would be possible however the creation of new lots is currently prohibited without

sufficient lot frontage. Section 7-11-2(k) of the UDO provides standards for safe access and states that lots or parcels used for non-residential purposes are not required to abut a public street if an easement or right-of-way is established with a minimum width of 30' connects the lot to a public street. The City should consider exempting HB-zoned lots for non-residential development from the minimum lot frontage requirement, provided they can comply with the access standards.

Relevant Code Sections: 7-8-16(f)(4)

Pros:

- Removes a barrier to creating new lots for non-residential development while maintaining safe and adequate access to those sites.

Cons:

- None noted.

5. **Issue: Number of parking spaces required for self-storage facilities is excessive for the use**

Current: Self-storage facilities are required to have a *minimum* of one parking space for each 10 storage units plus one space per two employees on the shift of greatest employment and a *maximum* of 1 space for each 5 storage units plus one space per two employees on the shift of greatest employment.

Proposal: Owners of these types of facilities have indicated that the current code requirements far exceed the number of spaces that are generally needed by customers, even during busy hours. Staff has researched methods used by other communities and has found some validity in this issue. The City should consider amending the requirements to be based on the office square footage (a minimum of four parking spaces per 1,000 square feet of office space and a maximum of eight parking spaces per 1,000 square feet of office space). The fire department has requested a minimum aisle width of 24 feet.

Relevant Code Sections: 7-11-2(c.)

Pros:

- Requiring fewer parking spaces results in less impervious parking surface on the site.
- Specifying a 24 foot drive aisle satisfies Fire Department access needs.
- Allows for more efficient use of property and could result in more storage units per acre.

Cons:

- None noted.

6. **Issue: Buffer required around accessory structures in residential zones is excessive considering there are no buffering requirements for the principal structure**

Current: Accessory structures are considered as a use by right, subject to special requirements in all residential districts. Provided that the homeowner can meet setback and lot size requirements (as well as design and placement standards), an accessory structure can be constructed. The code requires that all accessory structures with a footprint of more than 600 square feet shall be buffered from the adjacent residential development. This buffer requirement was enacted at a time when there was no size limit to accessory structures.

Proposal: Homeowners have indicated that if their proposal for an accessory structure complies with all standards in the UDO, including location, size and height, the additional requirement to install a landscaped buffer is an undue financial burden – especially when the much larger principal structure on the lot is not required to be buffered. Also, the code reference describing the buffer is obsolete and refers to a section that no longer exists. In considering the homeowner's request, the City has determined that the requirement can be eliminated.

Relevant Code Sections: 7-16-1(c.)(2)e.

Pros:

- Removes an obsolete code reference.
- Allows homeowners to maximize personal usage of their lots while complying with setback and other standards.
- Provides a small financial relief to homeowners and homebuilders.

Cons:

- Results in the loss of some tree cover currently required in these residential districts.
- Accessory structures are permitted to be placed closer to property lines than primary structures – this could result in an unbuffered structure in close proximity to a home on an adjacent lot.

At Mayor Bellamy's suggestion, Ms. Bernstein said that she would be happy to clarify the language that this does not change anything to the property line buffer that is required between different zoning districts.

7. **Issue: Allow for greater signage advertising new multi-family, commercial or mixed-use developments**

Current Procedure: Real estate signs advertising the sale, lease or rental of property is currently exempt from permitting. However, while these types of signs are not required to obtain permits from the City, they are held to certain restrictions relating to size, number of signs, illumination and duration of use.

Proposal: Allow larger banner-style signs to be displayed for a limited time period when a new building is preparing to come on-line. Banner will be used for real estate purposes and will advertise the availability of the new units.

Relevant Code Sections: 7-13-4(a)

Pros:

- Provides a cost effective advertising and announcement opportunity for projects seeking to bring multiple units on-line at one time.
- Utilizes the features of the building itself to communicate availability – does not clutter roadways.

Cons:

- Providing this opportunity to only one form of real estate may result in feelings of disparate regulation from other property owners or developers of smaller or older projects desiring larger signage as well.
- Most tall projects will be downtown where signage is typically more restrictive.

In response to Mayor Bellamy, Ms. Bernstein explained what qualifies as a banner and what the standards are that regulate this type of banner.

In response to Mayor Bellamy, Ms. Bernstein that that they will be researching additional economic condition ordinances and would be happy to research the issue of people who have signage related to their business on a vehicle giving them more flexibility as to where and how long they can park the vehicle.

In response to Councilman Miller, Assistant Planning & Development Director Shannon Tuch said that since these signs shall only be displayed for no more than 120 days, they felt that would not be enough time for an all-weather material to become tattered.

In response to Mayor Bellamy, Ms. Bernstein said that these ordinances will also apply to property in the extraterritorial jurisdiction areas.

8. **Issue: Allow businesses to display temporary signs for shorter periods more frequently in a year**

   Current Procedure: Temporary signs are currently allowed in all nonresidential zoning districts and may be displayed twice a year for a period of 30 days for each sign. Permits are required and the size and location of the sign is restricted.

   Proposal: Allow business owners to display temporary signs more often but for shorter time periods, such as for a series of holiday sales throughout one year. Proposal is to limit all businesses to 60 days of temporary signage that may be divided into a maximum of six separate ten day occurrences, not to exceed 60 days in total.

   Relevant Code Sections: 7-13-4(a)(8)(b)

   Pros:
   - **Allows for more flexibility with temporary signage to meet smaller needs throughout the year.**

   Cons:
   - The City's current permitting & tracking software does not allow for the automatic tracking of short term permits. Information will have to be entered into two separate systems in order to track of permit durations and frequency.
   - Enforcement will be more difficult given current resources and will likely result in proliferation of unpermitted signs.

The Planning & Zoning Commission reviewed the entire proposal as included in this report and attachment and recommended approval of all eight amendments by a unanimous vote (5-0). One member expressed concerns that extending the time period for permit validity (item #2) would result in more time for a site to remain vacant and possibly be subject to degradation which could have safety implications and could cause adverse impact to the surrounding neighborhood or other potential redevelopment in that area. Conditions can be added to an initial approval or any permit extension that would guarantee site maintenance during an extended period of dormancy. Wording clarification was also provided by Commissioners for item #3.

City staff recommends approval of the code amendments as proposed.

Mayor Bellamy closed the public hearing at 6:05 p.m.

In response to Mayor Bellamy, Ms. Bernstein said that all these changes are permanent changes to the UDO.

Mayor Bellamy said that members of Council have been previously furnished with copies of the ordinances and they would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3708 (guaranteeing performance). This motion was seconded by Vice-Mayor Davis and carried unanimously.

ORDINANCE BOOK NO. 25 - PAGE 201

Councilman Mumpower moved for the adoption of Ordinance No. 3709 (permit validity). This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 25 - PAGE 202

Councilman Mumpower moved for the adoption of Ordinance No. 3710 (alternative landscaping compliance in display areas), as amended. This motion was seconded by Councilman Russell and carried on a 5-2 vote, with Councilwoman Cape and Councilman Newman voting "no."

ORDINANCE BOOK NO. 25 - PAGE 204

Councilman Mumpower moved for the adoption of Ordinance No. 3711 (appropriate access to Highway Business zoned parcels). This motion was seconded by Councilman Newman and carried unanimously.

ORDINANCE BOOK NO. 25 - PAGE 206

Councilman Mumpower moved for the adoption of Ordinance No. 3712 (parking reduction for self-storage facilities). This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 25 - PAGE 207

Councilman Newman moved for the adoption of Ordinance No. 3713 (eliminate accessory structure buffer). This motion was seconded by Councilman Miller and carried unanimously.

ORDINANCE BOOK NO. 25 - PAGE 208

Councilman Newman moved for the adoption of Ordinance No. 3714 (greater signage for large new developments). This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 25 - PAGE 209

Councilman Russell moved for the adoption of Ordinance No. 3715 (greater flexibility for temporary signs). This motion was seconded by Councilman Miller and carried unanimously.

ORDINANCE BOOK NO. 25 - PAGE 211

V. UNFINISHED BUSINESS:

A. DISCUSSION REGARDING CONSTRUCTION EASEMENT TO ALLOW FOR A PERMANENT ROAD IMPROVEMENT ON PUBLIC LAND (PACK SQUARE PARK)

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of a request for a construction easement to allow for a permanent road improvement on public land (Pack Square Park).

On July 7, 2008, the Asheville Technical Review Committee (TRC) reviewed and approved the Level II Parkside Condominium project, finding no technical insufficiencies. The proposed development plan included a variety of site features including a new road to be constructed on the north side of the building located between the building and the southern edge of the Pack Square Park. Because this proposed road (identified as "Court Plaza") crossed into property owned Buncombe County and the City of Asheville as tenants in common, the project approval was conditioned to require a construction easement from both the City and County in order to construct this permanent road improvement; no permits may be issued until these easements are obtained.

On July 9, 2008, the City Manager's office received a request from SWAG Holdings, Black Dog Realty LLC, and Parkside Condominiums LLC for the necessary construction easement.

In the fall of 2007, a lawsuit was filed in Buncombe County Superior Court by the heirs of George Pack claiming, in essence, that part of the property on which the Parkside project was to be built (acquired by the applicant from Buncombe County) had been given to the County by George Pack subject to a restriction limiting its use to public purposes, and that the proposed condominium use was in violation of that restriction. During the time between the City's receipt of the request for the construction easement and the City Council meeting at which the request was to be considered, the Court ruled in favor of the Pack heirs, a ruling that clearly affected whether the Parkside project, as it had been approved, could be built. This development caused the construction easement request to be withdrawn until a later date when the potential impact of this decision could be more fully evaluated. The Superior Court's decision has been appealed. Argument and decision dates are difficult to estimate but are not expected before this fall.

In an effort to have all unresolved issues addressed in the event of a favorable outcome, the original construction easement request has been revived and resubmitted by Stewart Coleman, on behalf of Parkside LLC, under a new letter dated January 28, 2009.

The general layout and design of the road is reflected in one of three Pack Square Park Master Plans that were reviewed and approved concurrently by the Asheville City Council in 2004. Staff reports and meeting minutes reflect the need for three separate Master Plans due to the uncertainty over the potential development of two publicly owned sites that bordered the Park (commonly referred to as Site A and Site B) as well as the privately owned property commonly known as the Hayes & Hopson building. Should the Hayes & Hopson building remain in its current state, construction of Court Plaza as proposed would not be possible and alternatives would need to be considered. Since the road had been included in a previously adopted Master Plan for the park, staff determined that the Parkside Condominium project was in compliance with previous approvals for the Park and would not require any additional approvals other than a design review by the Pack Square Conservancy (PSC). Under the Pack Square Guidelines, all improvements in the park required a mandatory review with mandatory compliance; however, this would be limited to design considerations only and would not include an option to disapprove the road entirely. Should the Council and, at a later date, the Buncombe County Commissioners approve the easement for the road, it would then go before the PSC for design review as the next step.

It is important to note that Court Plaza is technically necessary for the current design of the Parkside Condominium project as it provides the necessary fire apparatus staging area which, per state fire code, requires a minimum width of 26 feet. Both Marjorie Street and Spruce Street could be widened to accommodate this width but would necessitate design changes that could result in further encroachment into the Park. As stated by the developer during the July 15th City Council meeting – should the construction easement be denied, their stated preference would be to leave the design of the building as proposed and widen Marjorie St. to accommodate the fire apparatus staging. If the form/size of the building is not changed; this would result in the condo building moving approximately 15 feet closer to the park, further eclipsing the view of City

Hall; this amount would be increased by 7 feet if on-street parking was retained. A change of this magnitude would require re-review by both the Downtown Commission and the TRC. Of course, other design options could be explored including; reducing the footprint of the building, widening Marjorie in the direction of City owned property (employee parking lot) or providing other staging surfaces in the park.

This easement for the road is separate and distinct from the "no-build" easement that will be required from Buncombe County (which owns the property adjacent to the east of the site) in order to allow for the Parkside building to have window and door penetrations on the east elevation, as the current plans reflect.

This report is informational only and compliance with the Strategic Operating Plan is not relevant.

Pros:

- Improves vehicular traffic flow in front of the Courthouse and City Hall.
- New road provides access and staging for the park (although PSC has expressed some concern over the development that the road would serve).
- Helps to prevent further encroachment towards the park (eclipsing view of City Hall) as a result of a potential building redesign or new layout.
- Complies with one of three approved park Master Plans.

Cons:

- Directs vehicular traffic along edge of park (one way).
- Potential for deliveries to occur on the side of the building facing the park.
- Does not comply with two of the three park Master Plans.

Approving this request will result in a private investment into public infrastructure that will require public maintenance over time. Other impacts may be more difficult to identify.

She said that should this approval be granted, staff would recommend that Council condition it specific to this plan. In the event that the courts rule in favor of the Pack heirs on this appeal, then we would want to reconsider the construction easement for the road or any other options.

Since the proposed road minimally complies with (one of) the approved Master Plans and other technical standards required for the extension of public infrastructure, it potentially conflicts with park use. Staff recommends that the Council take the time necessary to carefully consider the pros and cons along with other citizen and stakeholder concerns in deciding whether such easement should be granted and/or conditioned to mitigate any potential concerns. Should it be determined that additional information or analysis is necessary, staff would recommend the Council continue this item to allow for new information to be presented and considered.

Vice-Mayor Davis didn't think there was going to be a lot more information forthcoming and favored making a decision. He personally would have a difficult time approving the project without the road because the building would further encroach into the view corridor of the City Hall, and it would be expensive to widen Marjorie Street and reduce the size of the City employee's parking lot.

In response to Vice-Mayor Davis, Ms. Tuch said that both of those options are to maintain a certain product. There is always the option to scale down a product or re-design it with lesser units, or to provide for some other kind of staging area other than a road on the Park. She said that she hasn't discussed a different staging area in any detail with the developer. She understood that the developer's preference would be to have the road over a staging area than bringing everything to the side or rear of the building. She would also be concerned that an

alternative staging area might have a different design aesthetic and that would have to be approved by the Park and may be difficult to achieve a uniform appearance. Whereas, the road was clearly contemplated in at least one of the three plans that were approved.

Councilwoman Cape felt we heard clearly from the community that the sale of public land for infrastructure is not what our community supports. She could not support this construction easement and felt that anything can be re-designed.

In response to Councilman Russell, Ms. Tuch said that the traffic and traffic flow was considered by the Technical Review Committee. The City's Traffic Engineer said that having a road would improve the traffic flow in the area.

Councilman Russell noted that the Park is currently surrounded by roads on three sides. He felt if a road was allowed, it would keep the building out of the view corridor and create more open space.

In response to Councilman Mumpower, using an illustration, Ms. Tuch showed where the existing magnolia tree is located.

In response to Councilman Mumpower, Ms. Tuch said that the City was not a party to any decisions related to this development plan.

Councilman Mumpower expressed concern that the City was not a part of this development plan, even though it is in our front door, is now being asked to provide a rescue opportunity for the project to move forward. He would be willing to keep the lines of dialogue open, but could not support any intrusion on the public properties.

In response to Councilman Newman, Ms. Tuch said that if the plan is modified with another configuration, that plan would represent significant changes to the proposal and would have to be submitted as a new project.

Councilman Newman felt the City is being told to take approve this road or they will do something worse. As a separate issue, he would support directing the City Manager to craft an ordinance that future proposed developments that are directly contiguous to Pack Square Park be reviewed and approved by the Asheville City Council. He felt that if the courts do say that this project is not allowed or if there are new plans submitted by this developer or others, Council will have some oversight of those projects.

Councilman Miller gave some important context to this matter. He said that the three plans that were submitted were predicated on Site A and Site B maybe happening and then a plan was submitted with those sites being a part of the deal. When those two projects fell by the wayside, the Pack Square Conservancy designer was directed to go forward with the plan that is now being constructed. That was the plan that was submitted to the N.C. Dept. of Transportation and that was the plan that received approval. That plan did not have a road. When the Conservancy talked about Site B the intent was to have that building farther south.

In response to Councilman Miller about the road potentially conflicting with Park use, Ms. Tuch said that while a road could serve the Park, it would effectively route vehicular traffic around the edge of the Park thus creating the potential of vehicular/pedestrian conflict.

Councilman Miller supported asking the developer come back to Council after we hear from the court. Another crucial point is the protection of the view corridor and exactly where would the building be located. He questioned if something can be done to the Hayes & Hopson Building on a buy-out and get this other piece of land back so we can have something there that is a little bit more in line with what the intent of the 6.5 acres of Park space.

In response to Councilman Mumpower, Mr. Stewart Coleman, developer, said that they have made a presentation to Council that fully addressed most of these issues. It is not his intent to intimidate anyone into choosing one design over another design. He will be gifting land back to the City as private land and he is not taking land from the City. He intends on giving the access for this road. He explained the many benefits of the road, some being, that it would improve vehicular flow in front of the Courthouse and City Hall and eliminate the "bottle-neck" that the present cul-de-sac generates; and the new road would provide access and staging for the Park and provide access for early morning deliveries to occur on the side of the building facing the Park. He felt moving the building north is an atrocity as it will affect the view corridor to the point of where it's against everything they have tried to work towards in this design. They followed the Pack Square Conservancy guidelines. There is very little they have not given up to build the best product for the City, the County and the Park. He said they have spent an enormous amount of money in the design levels to meet the fiber of what is presently in the area.

Mayor Bellamy suggested that in all fairness to this Council, since we had no part in the decisions made previously, that Mr. Coleman present this request to the Buncombe County Commissioners first for their consideration of approval of the easement for the road.

Councilman Mumpower moved to (1) table (postpone) this item pending a decision from the Court of Appeals and pending Buncombe County's decision on the construction easement request; and (2) request further deliberation between the developer and City staff to see if there are additional points of resolution. This motion was seconded by Councilman Miller.

The following individuals spoke in favor of Councilman Mumpower's motion to table action on this easement request:

Ms. Dixie Deerman
Mr. Steve Rasmussen
Mr. Coleman Smith
Ms. Clare Hanrahan

Mr. Coleman reviewed with Council the proposed Parkside Condominium project at 80 Court Plaza. He showed the proposed landscaping design, proposed Court Plaza streetscape, the existing view from the Vance Memorial per guidelines (showing the Hayes & Hopson building), a view of the revised building (view from Vance Memorial per guidelines), and several renderings of the Pack Square Park with a copy of the front page of the AT&T Yellow Pages of July 2008, noting many of the documents show a road. He said that they are trying to construct a building that is compatible with the fabric of the neighborhood. He questioned what the Park will do with the property south of the sidewalk if the road is not put in. He noted that the Conservancy Chairman had initially agreed to not only put it in, but to pay for it. Now that there are budget issues, they have asked him to pay for that.

Mr. Guy Clerici, Chair of the Pack Square Conservancy, emphasized that three proposals were approved by Council, one of which did include the road. Construction drawings, from which the Park is being built, do not include that roadway. It is the Conservancy's position that once they have all the facts in front of them and the litigation resolved, that we should come together and determine what the best use for this property is for Asheville. He supported Council's motion to table.

The motion made by Councilman Mumpower and seconded by Councilman Miller carried unanimously.

City Attorney Oast said that if the Court's decision is overturned and Buncombe County approves the construction easement, he felt that Council will be expected to act on the request in a fairly quick timeframe. Mayor Bellamy agreed that Council will consider on that matter expeditiously.

Councilman Newman moved to direct the City Manager to craft an ordinance that future proposed developments that are directly contiguous to Pack Square Park be reviewed and approved by the Asheville City Council. This motion was seconded by Councilwoman Cape.

Mr. Mike Fryar spoke against the motion.

Mr. Steve Rasmussen supported the motion and suggested it be incorporated into the Downtown Master Plan.

Councilman Miller suggested staff try to find a way to include the Pack Square Conservancy in the review process.

Councilman Mumpower could not support the motion in that he felt we are close to creating a policy to address a specific project.

Vice-Mayor Davis hoped that this can be incorporated into the Downtown Master Plan but liked the motion in principle.

Councilman Newman was supportive of the Downtown Master Plan; however, his motion is not about one person, but one place – the town square of Asheville. At present the Council has no oversight to determine the future of our town square and this motion would give us the oversight authority.

Councilwoman Cape felt that anyone who buys land in the City's "living room" should realize there will be an engagement of the public process. We do have an obligation to protect our community.

Upon inquiry of Councilman Miller about placing restrictions on property that the City and County owns, City Attorney Oast said that if staff is directed to look into drafting an ordinance, that is something they will research, but just as a general notion he believed that Council could adopt zoning regulations that would apply to properties that are not necessarily owned by the City.

Mayor Bellamy noted that the motion as proposed would impact the Pavilion, the Art Museum Expansion and all the development that is occurring. She suggested the motion be clarified for staff to look at some options that dovetail with the Downtown Master Plan and the Pack Square Conservancy. She does think the view corridor is important. Part of the issue that Council pushed with County Detention Center was we didn't want it to impact the view corridor of City Hall. As the motion stands, it just doesn't impact the Parkside development. She suggested staff bring back some recommendations for Council to consider.

Councilman Newman agreed that he is not asking for a particular policy outcome, but that there be some options given to Council for some meaningful oversight of the future plans that are proposed for this area.

In response to Councilwoman Cape, Mr. Clerici said that attached to the City/ County/Conservancy agreement is a map of where the Conservancy has design review. Unfortunately outside the map is mostly the buildings.

Councilman Newman clarified his motion that the City Manager be instructed to provide some options (with input from the Conservancy Board) to allow future proposed developments that are directly contiguous to Pack Square Park be reviewed and approved by the Asheville City Council.

In response to Councilwoman Cape's comments regarding a timeline, Planning & Development Director Judy Daniel said that if the motion passes, staff will be happy to come back with some options. This would be about the same timeline as the Downtown Master Plan and so this might be something they make in their recommendations on the Plan – perhaps an addendum to the Plan. That will be coming to Council in the next 1-½ months.

The clarified motion made by Councilman Newman and seconded by Councilman Miller carried on a 6-1 vote, with Councilman Russell voting "no."

At 7:33 p.m., Mayor Bellamy announced a 20-minute recess.

B. BUDGET PLANNING

Staff Reports

Chief Financial Officer Ben Durant said that the following is information City Council requested from staff on several items that were discussed at the February 24, 2009, Quarterly Report/Budget Worksession. Provided below are answers to questions that were raised by Council.

1. **Provide information on transfer from General Fund Balance to the Health Care Fund.**

Beginning in Fiscal year 2008, the City began accounting for its self-funded Health Care and Worker's Compensation programs in a new insurance fund, separate from the City's General Fund. Accounting for these programs was formerly done in the General Fund. Segregating these funds from the General Fund was done to enhance the City's financial management and reporting capacity for its self-funded insurance programs.

The impact of the preceding change is reflected in the financial summary statements from the City's previous two audits. The Audit and Financial Statement Summary produced by Dixon Hughes for FY 2007 shows that in that year, total fund balance for the General Fund was $41.61 million, which included reserves for Health Care and Worker's Compensation. The Audit and Financial Statement Summary for FY 2008 shows the 2007 total fund balance amount restated to $34.64 million to reflect the transfer of approximately $3.47 million in Health Care reserves and $3.51 million in Worker's Compensation (Risk Management) reserves to the new internal service fund.

It is important to note that even when Health Care and Worker's Compensation reserves were included in the total General Fund balance, they were unavailable for appropriation as they were reserved for their intended use. Thus, their removal from the General Fund had no impact on our "available" fund balance.

2. **What has fund balance been spent on in recent fiscal years?**

Available fund balance peaked in FY 2005-06 at $23.79 million or 31.0% of General Fund expenses. At that time, Council made the policy decision to begin appropriating a portion of fund balance to address high priority capital and operating needs that were one-time in nature. Highlights include:

- October 2006, Council appropriated $1.0 million in fund balance, along with $1.5 million in revenue from property and sales taxes that were coming in over budget, to fund $2.5 million in capital projects, including the Civic Center arena roof and the Haw Creek and Patton Avenue sidewalk projects.

- With adoption of the FY 2007-08 budget, Council authorized the appropriation of $3.7 million in fund balance for capital improvement projects and $500,000 to fund one-time operating costs, such as the Downtown Master Plan update, the Parks & Greenways Master Plan Update, and the Comprehensive Affordable Housing Plan. Funded capital improvement projects included the Hominy Creek greenway, repairs at Fire Station 6, and replacement of the City Hall chiller, as well as additional vehicle and equipment replacement.

- Other major mid-year fund balance appropriations since FY 2005-06 include: 1) $575,000 for the City's initial payment for the Overlook Park/Beaucatcher Mountain property; 2) $353,000 for the demolition of Tunnel Road property; and 3) $259,000 to fund the City's share of the cost of replacing a wrecked fire truck.

3. Show how various levels of fund balance appropriation would impact the City's financial position in FY 2009-10.

At the February 24th budget worksession, staff estimated that fund balance would end the current fiscal year at $17.68 million or 19.7% of General Fund expenditures. Staff also indicated that under current budget assumptions, $1.0 million would be appropriated from fund balance in next fiscal year's budget. Appropriating $1.0 million in fund balance for next year's budget would lower available fund balance to $16.68 million of 18.2% of estimated FY 2009-10 expenditures. The table below shows three additional scenarios for fund balance usage ranging from $2.0 million up to $4.0 million. However, staff would caution against the use of additional fund balance to pay for ongoing budget expenses since such a practice creates an automatic budget gap that has to be filled in the subsequent budget year.

2009-10 Fund Balance Usage	2009-10 Est. Year End Avail. Fund Balance	Fund Balance %
1,000,000*	**16,684,273**	**18.2%**
2,000,000	15,684,273	17.1%
3,000,000	14,684,273	16.0%
4,000,000	13,684,273	15.0%

* Current proposed fund balance usage

4. Provide a list of current year encumbrances in the General Fund.

An encumbrance is created whenever the City enters into a contract with an outside vendor for supplies, professional services, etc. Typically, the City will encumber the full amount of a contract at the outset of a project, then the vendor is paid from that encumbrance as services are provided. Often, contracts are not completed and fully paid out by the end of the fiscal year; therefore the remaining balances on those contracts (encumbrances) are carried over to the next fiscal year. The "savings" generated from not having completed those contracts in the year that the funds were actually budgeted temporarily inflates general fund balance. This additional fund balance, however is not available for general use; instead, it is required to be held in reserve and re-appropriated in the subsequent fiscal year specifically to cover the eventual completion of the encumbered contracts that we carried over from the previous year.

As noted during the presentation of the Quarterly Financial Report, there was a total of $1,443,395 in General Fund encumbrances carried over from FY 2007-08 into FY 2008-09. Thus, approximately $1.4 of the $19.67 million beginning fund balance that was reported in the Quarterly Financial Report was actually fund balance that was held in reserve and restricted for use in covering the carry-over encumbrances from the prior-year. This amount was re-appropriated in FY 2008-09 to cover the prior year carry-overs and thus included in the fund balance usage that staff presented at the February 24th Council worksession.

An example of a carry-over encumbrance transaction is the $170,000 contract that the City entered into with Goody Clancy & Associates for the update to the Downtown Master Plan. The full amount of the contract ($170,000) was encumbered in FY 2007-08, however only $20,000 was actually paid out in FY 2007-08. As a result, the remaining encumbrance of $150,000was carried over to FY 2008-09. Financial reporting standards require that the City reserve a portion of its fund balance to cover outstanding encumbrances since they are pending obligations of the City. We report the amount of fund balance reserved for encumbrances in the City's Comprehensive Financial Report (CAFR) and in each of our Quarterly Financial Reports to Council. He presented Council with all the General Fund encumbrances that rolled over from FY 2007-08 to FY 2008-09.

5. **Provide different revenue scenarios to show the impact on the General Fund budget.**

Property taxes and sales taxes together make up approximately 70% of the General Fund revenue budget. Staff is currently projecting that the property tax base (exclusive of annexation) will grow by 2.0% in FY 2009-10. Because of the recession, staff has projected a growth rate for the property tax base that is less than the 10-year average growth rate of 3.3% and less than 4.2% growth that occurred in the current fiscal year. The chart below shows how property tax revenue would increase or decrease compared to the current 2.0% estimate for growth values ranging from 1.5% to 4.0%. As the chart indicates, every 0.5% change in the estimate results in an impact of approximately $217,000. Finance staff will be meeting with the Buncombe County Tax Assessor in the next few weeks to review property tax estimates for FY 2009-10:

Tax Base Growth	Property Tax Revenue	Change Vs. Current Estimate
1.5%	44,190,233	(217,686)
2.0%*	**44,407,919**	**0**
2.5%	44,625,604	217,685
3.0%	44,843,290	435,371
3.5%	45,060,976	653,057
4.0%	45,278,662	870,743

* Current estimate

Sales tax revenue through the first six months of the current fiscal year is down 3.1% compared to the prior fiscal year. Staff is currently projecting that this same trend will continue through the remaining six months of the fiscal year and as a result, the city will end the year with a **$1.5 million** shortfall in sales tax revenue.

In projecting sales tax revenue for next year, staff started with an adjusted sales tax base that is reduced by $1.5 million, reflecting the current year shortfall. Staff is then estimating that the adjusted sales tax base will remain flat (or experience no growth) in the upcoming fiscal year. This assumption was a major contributing factor to the initial $5.6 million budget gap that was projected for FY 09-10, prior to the identification of specific budget balancing strategies.

Sales tax revenue is highly sensitive to economic conditions, especially unemployment. As a result, there is the possibility that sales tax revenue could decline even further. Staff has prepared sales tax scenarios that show the impact on current revenue estimates for sales tax declines if the annual decline ranges from 4% to 7%. As the chart indicates, every 1.0% decline in the estimate results in a reduction to the base of approximately $165,000.

Projected Annual Decline	Additional Reduction to Base
4.0%	(164,735)
5.0%	(329,471)
6.0%	(494,206)
7.0%	(658,941)

* Current estimate

6. Review cost recovery estimates and staff recommendations for fees & charges.

Fees & charges will be reviewed initially by the Finance Committee and recommendations made to the full Council in late March.

7. Review revenue estimates and level of subsidy for the Transit Fund.

Asheville Transit has requested additional expenditures in the amount of $415,000 mostly due to increases in cost for intercity routes (Black Mountain and Weaverville) which are offset by increased revenues to support these routes. The transit fund will have some operational savings recommended by the Management Company that include several initiatives listed below for a total savings of approximately **$150,000**.

- Workers comp – First Transit found a different policy: $25,680
- Overtime: reduced from 13.81% to 7.67%, representing around $80,000
- Drug and alcohol policy, Printing and Telephone: $5,000
- Reengineering: $ 40,000

Asheville Transit will be receiving an additional $484,000 from the Federal government to be used for operations.

The FY 09 subsidy from the general fund was approximately $1.5 million. The anticipated subsidy from the general fund for FY 10 is $900,000, reflecting the combined impact of operational savings and increased federal assistance.

8. Review fund status and level of allocation for the Housing Trust Fund (HTF).

There has been no new HTF fund activity since the Council meeting on February 24, 2009, during which time Council was last updated. The current available balance is $18,600.39.

MHO has refinanced its loan from the Housing Trust Fund for the Crowell Park project through another lender. As such, an early pay-off of $480,000 will be paid to the City in one lump sum sometime in April. MHO is currently making $3,500 monthly principal payments, so the principal balance will decrease proportionately upon receipt of the regularly scheduled payments for March and April. $170,000 of this projected payoff was allocated by Council to the Westmore project; therefore the net revenue to the fund will be roughly $310,000.

9. Review the details of re-engineering/streamlining efforts and compensation options, including four-day work weeks and reducing 401K allocations.

He provided council with a chart showing the details of the City's re-engineering/streamlining efforts, as well as a list of various compensation options.

At Mayor Bellamy's request, it was the consensus of Council to prepare a formal response to reports that Asheville has the 2nd highest tax burden in the State.

In response to Mayor Bellamy, Mr. Durant reviewed what the Fund Balance has been spent on in recent fiscal years.

There was a short discussion, initiated by Councilman Mumpower, about the use of Fund Balance.

Finance Committee Recommendations

Councilman Russell, Chair of the Finance Committee, updated Council on their meeting held on March 6, 2009, on the following topics (1) introduction of Management/Financial Model for Energy Efficiency; (2) economic stimulus update; (3) discussion of follow-up items from 2-24-09 Committee meeting (a) Overlook Park contribution; (b) alternative revenue projection scenarios; and (c) review of Re-engineering efforts and compensation options; and 4) establishment of Schedule for Reviewing Fees & Charges. He encouraged Council to communicate any specific items to him or a member of the Finance Committee.

In response to Mayor Bellamy, Mr. Durant said that he would be happy to make available the information regarding the proposed fees and charges to the entire Council, in addition to the other information presented solely to the Finance Committee.

Councilman Newman (1) did not support raising the recycling fee; and (2) since a salary freeze affects all City employees, he supported encouraging the Finance Committee to look at something we can do for employees who are on the lower end of the income scale since they will be hit the hardest.

Councilman Mumpower supported salary reductions as an alternative to helping limit staff reductions beginning with City Council considering a 10% reduction of their own salary.

Councilwoman Cape felt that a Council salary reduction would prohibit the average person from participating in the process.

VI. NEW BUSINESS:

A. REVIEW THE SERVICE PLAN, FINANCIAL AND LEGAL REQUIREMENTS FOR AIRPORT ROAD AND RIDGEFIELD ANNEXATIONS

Mayor Bellamy said that since Councilman Miller and Councilman Russell have not participated in an annexation process, she felt it would be appropriate to have a report on how we bring in new citizens.

Urban Planner Julia Cogburn said that the purpose of this staff report is to review the service plan, as well as the financial and legal requirements for the Airport Road and Ridgefield Annexations, two annexations that recently became effective. She briefly reviewed the following report.

In April of 2005 the City of Asheville initiated an annexation services plan for four areas contiguous to the current city limits. Those areas were the Ridgefield Business Park Area, Ascot Point Village Area, Long Shoals Road Area and the Airport Road Area.

The process for annexation was initiated on April 12, 2005, with the adoption of a resolution stating the intent of the city to annex the preceding four areas. On April 26, 2005, the Council approved the Plan for Services for the annexation areas that had been prepared by staff. This plan demonstrated how each area proposed for annexation met the statutory qualifications

for annexation and further demonstrated the capability of the city to provide urban services to these areas.

In accordance with statutory requirements, information meetings and public hearings on the annexation areas were held in May and June of 2005. On June 28, 2005, Council completed the final step of the annexation process with the adoption of various annexation ordinances. The ordinances established the following effective dates for the annexations:

- September 30, 2005 – Ridgefield Business Park area
- December 31, 2005 – Ascot Point Village, Long Shoals Road & Airport Road

The annexations for Ascot Point Village and Long Shoals Road went into effect as scheduled on the original established effective dates. All required city police, fire, sanitation and other services are currently being provided in those areas.

Owners of property in the Ridgefield Business Park and Airport Road areas, however, initiated a lawsuit challenging the legality of the City's annexation process. The lawsuit delayed the original effective dates of those annexations. Recently the legal challenge against the Ridgefield and Airport Road annexations was resolved in favor of the City, with the Supreme Court denying the property owners petition against annexation. The effective date of these annexations is now March 31, 2009.

Ridgefield and Airport Road - Legal Requirements

With the recent ruling by the Supreme Court, the annexations for the Ridgefield and Airport Road Areas will become effective on March 31, 2009. According to North Carolina General Statutes, cities must commit to providing city services to annexed property on substantially the same basis as those services are provided to the remainder of the city (NCGS §160A-49(f)). The statutes, at NCGS §160A 47(a) further provide that police protection, fire protection, solid waste collection, street maintenance, water and sewer services to an annexed area must be provided at the time of annexation if such services are provided in the annexing municipality. The exception to this requirement is with respect to needed water and sewer improvements. A two year window of time is allotted to make water and sewer construction improvements.

The state statutes provide for varied means of providing the required services. For the Ridgefield and Airport Road area annexations, the approved Plan for Services calls for police and fire protection, solid waste collection and street maintenance to be provided with City of Asheville staff resources.

If the state is maintaining residential streets in the annexation area, the statutes contemplate that these streets will be transferred to city control by agreement with the state Department of Transportation. The Plan for Services for the Ridgefield and Airport Road areas identified five streets to be taken over by the City. Streets meeting City standards will be accepted and maintenance provided in accordance with City policies.

Another section of the statutes addresses the issue of the transition of areas from rural fire service to municipal service and the impact on the rural fire departments. The statutes require the annexing municipality to make a good faith offer to contract with the rural fire department to continue to provide fire protection within the annexation area for up to five years. It also requires that the city offer employment to any full-time employee of a rural fire department who has lost employment because of the annexation. Lastly, in both voluntary and involuntary annexations, the city must assume responsibility for payment of a proportionate share of the rural department's indebtedness.

As with fire protection, the statutes recognize the need for providing some transitional protection for private solid waste collection firms seriously disadvantaged by annexation. If a solid waste collection firm qualifies, the statute states that the annexing city must either enter into a contract with the firm, allowing it to continue operating within the annexation area for at least two years after the effective date of the annexation, or reimburse the firm for its "economic loss". To qualify, one of the requirements is that any firm wishing to receive benefits must make a written request for such benefits before the public hearing on the annexation. GDS has made a request for these benefits in the amount of $30,880, which is included in the Plan for Services.

Ridgefield and Airport Road - Service Plan/Financing Plan

The original service plan for the Ridgefield and Airport Road Service areas was developed over fours years ago, prior to the legal challenge against those annexations. As noted earlier, on the effective date of annexation, all residents, businesses and property owners in the annexed areas must receive service on a basis substantially equal to all current parts of the City. The costs to provide these services are determined by each department based on their individual service delivery models. For example, the Police Department determines the number of new officers needed to service an annexed area based on the calls for police service in that area.

Upon the successful resolution of the lawsuit in favor of the City, staff updated the service plan to reflect today's costs and service demands for those areas. The updated plan includes provisions for extending police protection, fire protection, solid waste collection, street maintenance, water distribution and sewer collection. A summary of the updated service and financial plan for Ridgefield and Airport Road is provided below:

REVENUE SUMMARY

AREA	*AD VALOREM*	*STATE UTILITY TAXES*	*SALES TAX*	*POWELL BILL*	*FEES, CHARGES, & PERMITS*	*TOTAL*
Ridgefield Bus. Park	$327,869	$44,920	$128,164	$3,217	$103	**$504,273**
Airport Road	$202,760	$55,760	$79,259	$17,972	$20,096	**$375,847**
	$530,629	**$100,680**	**$207,423**	**$21,189**	**$20,199**	**$880,120**

ANNUALLY RECURRING EXPENDITURES

AREA	(1) Police	(2) Fire	Solid Waste	Recycling	Street Maintenance	Street Lighting	TOTAL
Ridgefield Business Park	$ 0	$60,803	$521	$ 0	$0	$9,992	$71,316
Airport Road	$101,435	$37,656	$2,084	$1,070	$0	$780	$143,025
General	$0	$117,353	$0	$0	$0	$0	$117,353
TOTAL	**$101,435**	**$215,812**	**$2,605**	**$1,070**	**$0**	**$10,772**	**$331,694**

Notes:

(1) The annual costs for police services reflect two additional officers to maintain current police officer to population ratios.

(2) The annual costs for fire protection are based on the costs for 3 additional personnel and financial impact payments to the rural fire districts (5 year duration).

CAPITAL EXPENDITURES

AREA	Water Lines	Sewer Lines	Solid Waste	Rollout Containers	St Signs	Street Repair	Side-walks	Police	Fire	TOTAL
Ridgefield	$0	$0	$ 0	$510	$ 0	$ 0	$ 0	$0	$0	$510
Airport Road	$176,640	$250,000	$0	$2,295	$ 0	$ 0	$ 0	$0	$0	$428,935
TOTAL	**$176,640**	**$250,000**	**$0**	**$2,805**	**$0**	**$0**	**$0**	**$0**	**$0**	**$429,445**

After the ruling by the Supreme Court, staff sent out a mailing to all property owners and the residents in the new areas. The mailing welcoming the new citizens and gave them information about who they can contact in the City if they had questions. We will be holding an outreach meeting in each annexation area where department representatives will talk about the services to be provided and respond to questions. In addition, Sanitation has had a separate outreach effort.

In response to Mayor Bellamy, City Manager Jackson said that we are determining where we can use the stimulus dollars and apply those to projects. Our primary emphasis is that we are looking at small shovel ready projects that we can guarantee can be completed so we stay in line to get future funds. Our primary emphasis is not in regional areas, but in projects that can meet the criteria and are on the top of our priority list in terms of infrastructure needs. Any place that we can use those dollars to supplement our budget and get the projects done, we will do that.

B. RESOLUTION NO. 09-49 - RESOLUTION ENCOURAGING THE STATE LEGISLATORS TO PROVIDE ENABLING LEGISLATION TO NORTH CAROLINA MUNICIPALITIES TO PROVIDE AN ENERGY EFFICIENCY FINANCING MODEL TO PROPERTY OWNERS

MOTION TO DIRECT STAFF TO CREATE A PROPOSAL FOR THE SOUTHEAST ENERGY ALLIANCE GRANT

Councilwoman Cape (working with Councilman Newman) presented the following for Asheville's participation in Southeast Energy Efficiency Alliance grant proposal.

The Southeast Energy Efficiency Alliance (SEAA) is a non-profit organization that promotes energy efficiency for a cleaner environment, a more prosperous economy and a higher quality of life in the Southeastern United States. SEAA is currently promoting a friendly competition among cities in the Southeast centered around which can design the most effective energy efficiency plan for their community. The City that wins the competition, to be selected in June, will receive a grant of $500,000, which is being donated by a private foundation.

They believe that Asheville is well positioned to participate in this competition and recommend that City Council endorse our participation. Asheville's key strengths that should enable us to compete include:

- A demonstrated commitment to clean energy
  - o Created a Sustainable Advisory Committee for Energy and the Environment.
  - o Commitment to LEED Gold Certification of municipal buildings.
  - o Committed to reduce municipal global warming emissions by 80%, at a rate of 2% per year.
  - o City Council established "Green" as a top city priority, specifically including clean energy, in our 2008-2009 Strategic Plan for the Asheville.
  - o Dedicated staff.

- Strong partnerships
  - o Participation with Progress Energy in the Community Energy Advisory Committee (CEAC) process.
  - o Relationship with Warren Wilson College and others for sustainability initiatives.

Participating in the partnership involves the creation of a plan for promoting energy efficiency improvements at the community level, including specific goals, potential financing mechanisms, partnership commitments from businesses and community groups, and an implementation strategy.

They believe that the development of this plan will have benefits regardless of whether Asheville is selected as the winner of the competition. Developing the plan will help Asheville advance our green goals as a City. It will also position Asheville to access the significant resources that will be available through the American Recovery and Investment Act for energy efficiency.

At this time, they requested Council endorsement in principle to move the process forward. A final review of the proposed energy plan will also be reviewed by City Council prior to its submission to SEAA or other agencies. The proposal needs to be submitted to SEAA by May 15. We have requested review of this proposal by SACEE and the Finance Committee at their next meetings. For additional information about SEAA, visit http://www.seealliance.org/.

Ms. Maggie Ullman, Energy Coordinator, this is the consideration of providing City staff with direction to apply for the $500,000 Southeast Energy Alliance (SEEA) grant in concert with a resolution encouraging State Legislators to pass enabling legislation for an energy efficiency financing model.

The intention of this grant is to build regional partnerships to promote energy efficiency, energy conservation, and renewable energy in the community's existing building stock. In order to be successful, this effort will require participation from neighboring local governments, utilities, financial institutions, and public services commissions. A second variable, to support a successful grant application, involves encouraging the state to provide enabling legislation to pursue an energy efficiency financing mechanism. This financing mechanism partners the City of Asheville with property owners who volunteer to have the City of Asheville place a special tax assessment on their property in order finance energy efficiency and renewable energy improvements. This

This action complies with the following areas of the City Council Strategic Operating Plan: (1) Support diversified job growth and small business development; (2) Work with regional partners to create incentives for green building, energy conservation and energy intendance; and (3) Expand community education programs to attract volunteers to initiatives, including climate awareness, water conservation, recycling, storm water and sustainability.

Pros:

- Demonstrates City leadership state wide by pursuing legislation that enables all municipalities to pursue energy efficiency financing.
- Funds if awarded to the City may be leveraged to gain access to competitive federal stimulus dollars.

Cons:

- Requires significant staff time to prepare proposal
- Requires significant stakeholder buy in with associated letters of support before the grant is awarded

There is no fiscal impact associated with preparing the proposal and requesting enabling legislation.

City staff recommends City Council encourage the State Legislators to provide enabling legislation. Furthermore, staff recommends City Council direct staff to create a proposal for the Southeast Energy Alliance grant opportunity. In order for City Council to provide policy direction regarding a formal application, the grant proposal will be completed and available for City Council to review. On April 28, 2009, a formal resolution will come before City Council requesting authorization to submit an application to the Southeast Energy Alliance.

Councilwoman Cape said that Progress Energy instituted the Community Energy Advisory Council about 18 months ago and brainstormed about how we can work together. They have asked that each organization look at what they can do to participate. When this grant came along, she spoke with Mr. Robert Sipes at Progress Energy and said that they are supportive of this grant.

Councilman Newman said that on the financing legislation there are a lot of creative ideas being developed on a community level. If this legislation passes, it will be for all cities in North Carolina and noted that the actual participation is 100% voluntary. From our research, the model can be structured in a manner that is revenue neutral to the property owners who participates by agreeing to a special assessment on the property. Based on programs in other utilities, the property owner's utility bills will be reduced. This is also revenue neutral to the cities that sponsor these bills, including the cost of administration and staffing of a program. This should not be a financial burden on the City, the participating property owner or even property owners who do not participate in the program. This proposal was presented to the Finance Committee and they supported adopting the resolution requesting our state legislators to provide enabling legislation to North Carolina municipalities to provide an energy efficiency financing model to property owners.

When Councilman Newman asked if there would be a conflict of interest for him since he is employed by FLS Energy, it was City Attorney Oast's opinion that participation in this vote did not disqualify him from voting. If, however, the proposal is implemented, that would require a different consideration and it would also depend on the particular case.

There was considerable discussion regarding the financing model, throughout which City Attorney Oast and Ms. Ullman responded to various questions/comments.

The following individuals spoke against the proposal and asking our state legislators to provide for this energy efficiency financing model for property owners:

Mr. Sidney Bach
Mr. Gene Hampton
Mr. Mike Fryar

Councilwoman Cape explained how this model does several good things and they are asking to legislators to approve this so we can research into how this can help our community.

Councilman Russell moved adopt Resolution No. 09-49 and to direct staff to create a proposal for the Southeast Energy Alliance grant opportunity. This motion was seconded by Councilman Miller and carried on a 5-2 vote, with Vice-Mayor Davis and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 461

C. RESOLUTION NO. 09-50- RESOLUTION APPOINTING MEMBERS TO THE HOMELESS INITIATIVE ADVISORY COMMITTEE

Vice-Mayor Davis said that on November 11, 2008, City Council adopted Resolution No. 08-227 establishing the Homeless Initiative Advisory Committee (HIAC).

At the HIAC meeting on February 10, 2009, the HIAC recommended City Council appoint Gerald Hixson, Gordon Smith and Stephen Bolden.

At the February 10, 2009, City Council meeting, it was the consensus of Council to interview Gerald Hixson, Gordon Smith, Stephen Bolden, Crystal Williams and Wanda Lanier. Ms. Williams was unable to attend the interview.

After Council spoke highly of the candidates, Gerald Hixson received 4 votes, Gordon Smith received 3 votes, Stephen Bolden received 7 votes and Wanda Lanier received 7 votes. Therefore, Wanda Lanier was appointed to the HIAC to serve a three-year term, term to expire November 1, 2011; Stephen Bolden was appointed to the HIAC to serve a three-year term, term to expire November 1, 2011; and Gerald Hixson was appointed to the HIAC to serve a two-year term, term to expire November 1, 2010. All terms are until their successors have been appointed.

RESOLUTION BOOK NO. 31 – PAGE 462

D. RESOLUTION NO. 09-51 - RESOLUTION APPOINTING A MEMBER TO THE HUB COMMUNITY ECONOMIC DEVELOPMENT ALLIANCE

Vice-Mayor Davis, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing a member to the HUB Community Economic Development Alliance.

Ms. Joyce Dorr has resigned from the HUB Community Economic Development Alliance, thus leaving an unexpired term until August 22, 2009.

At the February 10, 2009, City Council meeting, it was the consensus of Council to interview Tabatha Hamlin, Vanessa Penix, Daniel Collins and Richard Stiles. Ms. Penix was unable to attend the re-scheduled interview time.

After Council spoke highly of the candidates, Tabatha Hamlin received no votes, Daniel Collins received 2 votes, and Richard Stiles received 5 votes. Therefore, Richard Stiles was appointed to the HUB Community Economic Development Alliance to serve the unexpired term of Ms. Dorr, term to expire August 22, 2009, and then to serve a full three-year term, term to expire August 22, 2012, or until his successor has been appointed.

RESOLUTION BOOK NO. 31 – PAGE 463

E. RESOLUTION NO. 09-52 - RESOLUTION APPOINTING A CHAIR TO THE CIVIL SERVICE BOARD

Vice-Mayor Davis said that this is the consideration of a resolution reappointing John Miall as Chair to the Civil Service Board.

John Miall currently serves as Chairman of the Civil Service Board. The Civil Service Law for the City of Asheville, Section 2, Chapter 303 of the 1999 Session Laws of the North Carolina General Assembly provides that the Chair of the Civil Service Board shall be appointed annually by the City Council.

Current members of the Civil Service Board include: Chairman John Miall; Sidney Bach, Virginia Robinson, Marvin Rosen and Sharon West (who has resigned effective April 1, 2009).

At the February 24, 2009, meeting, it was the consensus of Council to interview Mr. Miall.

Councilman Mumpower moved to reappoint Mr. Miall as Chair to the Civil Service Board effective March 10, 2009, or until his successor is duly and annually appointed by the City Council, as provided by law. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Mayor Bellamy voting "no."

Mr. Sidney Bach thanked City Council for reappointing Mr. Miall, which reappointment he concurred with. He also addressed the Blue Ribbon Commission's scope of determining, through its analysis, the effectiveness of the Civil Service Law and to offer advice on future policy direction. He asked Council to reconsider the scope and ask for the Commission to do an overall objective study.

In response to Mayor Bellamy, City Manager Jackson said that Assistant City Manager Jeff Richardson brought to Council the suggestion for a Blue Ribbon Commission and on Council's direction, the Commission was formulated. He said that City Clerk Burleson would provide those minutes to Council.

Vice-Mayor Davis felt that the Commission has been meeting and the Council will be less than honorable not to hear about their study results.

RESOLUTION BOOK NO. 31 – PAGE 464

F. BOARDS & COMMISSIONS

It was the consensus of Council to interview Wilfred Lack and Albert Anderson for a vacancy on the Alcoholic Beverage Control Board.

It was the consensus of Council to interview Bridgette Odom, Davidson Jones and Beatrice Brown for a vacancy on the Civil Service Board.

Due to the lack of interest in the City's Census Complete Count Committee, it was the consensus of Council to instruct City Clerk Burleson to contact the Census' representative and ask her what her expectations are for the City committee if there is good representation on the overall County Committee by City leaders. He noted that the City does have a representative on the overall County Committee.

It was the consensus of Council to ask the Downtown Commission what their needs are and their recommendations for the vacancy on the Downtown Commission.

It was the consensus of Council to interview Sarah Sparboe Thornburg, Peggy Dalman and Honor Moor for a vacancy on the School Board.

It was the consensus of Council to re-advertise vacancy on the URTV Inc. Board of Directors.

ITEM REMOVED FROM THE CONSENT AGENDA FOR DISCUSSION AND/OR AN INDIVIDUAL VOTE

E. RESOLUTION NO. 09-48 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH SITE DEVELOPMENT CORPORATION TO CONSTRUCT THE FRENCH BROAD RIVER CORRIDOR CONNECTOR

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Site Development Corporation to construct the French Broad River Corridor Connector for an amount not to exceed $90,000.

As part of the French Broad River Greenway, the City of Asheville is preparing to construct the French Broad River Corridor Connector, an approximately 700-linear foot sidewalk connection between Carrier Park and Amboy Road Park in front of the former site of the Edaco salvage yard on Amboy Road.

The City issued a formal bid request for construction of this section of greenway and received a bid from Site Development Corporation from Cliffside, NC who was selected as the lowest, responsible bidder at a base bid of $81,015. Staff is including a contingency budget of $8,985 or approximately 11% due to unforeseen costs that may arise from construction.

Eighty percent or $72,000 of the total contract will be funded by a North Carolina Department of Transportation Federal Transportation Enhancement Reimbursement Grant. The remaining $18,000 has been allocated by City Council via the Fiscal Year 2001/02 capital budget.

This action complies with City Council's Strategic Plan (1) in the Green Focus Area in that it advances the promotion of emission-reducing transportation options including greenways, bike paths, and sidewalks; and (2) in the Safe Focus Area in that it advances public safety and infrastructure investments that support children's health and safety. It also complies with the Asheville City Development Plan 2025 in that it implements the adopted Greenway Master Plan. In addition, it complies with the Greenway Master Plan and the 2009 Parks, Recreation, Cultural Arts, and Greenways Master Plan in that it provides a linkage for an existing greenway identified in the Master Plan.

The Greenway Commission voted to support the project during its regular meeting on February 12, 2009. The Greenway Commission has received regular updates on the status of the project since it began in 2001.

Pros:

- Provides a vital link between two sections of the French Broad River Greenway and will increase pedestrian safety
- 80% of construction costs is funded through a grant from the State of North Carolina
- The contract amount is within the project budget

Con:

- The additional greenway mileage will require maintenance resources

Funds are currently funded in the City's capital budget.

Staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with Site Development Corporation to construct the French Broad River Corridor Connector for an amount not to exceed $90,000.

Councilman Mumpower said that he could not support any actions by Council until the City of Asheville can confirm the people we hire use legal employees.

After Mayor Bellamy asked for public comment and received none, Councilwoman Cape moved for the adoption of Resolution No. 09-48. This motion was seconded by Vice-Mayor Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 460

VII. OTHER BUSINESS:

Lawsuits

The City served a Complaint on February 27, 2009, which is generally described as follows: City vs. Edwin F. Pinner and Mona L. Pinner. This lawsuit involves a violation of the City's solid waste ordinance and failure to pay civil penalties imposed for violation of the ordinance. This matter will be handled in-house.

The City served a Complaint on February 27, 2009, which is generally described as follows: City vs. Fakhoury Real Estate Investments. This lawsuit involves a violation of the City's solid waste ordinance and failure to pay civil penalties imposed for violation of the ordinance. This matter will be handled in-house.

The City received a Complaint in Federal Court on March 3, 2009, which is generally described as follows: Troy Steven Wyatt v. City of Asheville, Gary Jackson, William Hogan, Officer Bridges, and Officer Martinez. This is a lawsuit brought in federal court pursuant to 42 USC 1983 for violation of civil rights due to alleged use of excessive force during drug arrests. As this case involves multiple defendants, this matter will be handled by separate counsel.

The City served a Complaint on March 4, 2009, which is generally described as follows: City vs. Suzayne Reeves. This lawsuit involves a violation of the City's solid waste ordinance and failure to pay civil penalties imposed for violation of the ordinance. This matter will be handled in-house.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Mike Fryar commented about fareboxes on City buses and whether City Council was advised about a County resident who served on the Transit Commission (but is now a City employee). Mayor Bellamy asked City Manager Jackson to update Council on the fareboxes and noted that Council did not discuss personnel issues.

Mr. Brian Festa spoke to Council about quality education.

Mr. Gene Hampton requested Council (1) adopted a resolution to end the war in Iraq; (2) adopt a resolution defining "real marriage" as a union of two souls with a single thought; and (3) consider the following when appointing a new School Board member (a) requirements for a quality public education system; (b) characteristics of a quality school; and (c) crucial criteria for the key characteristics.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:38 p.m.

Magdalen Bunleson
CITY CLERK

MAYOR

Tuesday – March 24, 2009 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding (excused from meeting at 7:20 p.m.); Vice-Mayor Jan B. Davis; Councilwoman Robin L. Cape; Councilman Kelly M. Miller; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Councilman William A. Russell Jr.; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Newman gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING MARCH 28, 2009, FROM 8:30 P.M. – 9:30 P.M. AS "EARTH HOUR"

Mayor Bellamy read the proclamation proclaiming March 28, 2009, from 8:30 p.m. – 9:30 p.m. as "Earth Hour" in the City of Asheville. She presented the proclamation to Ms. Maggie Ullman, the City's Energy Coordinator, who urged all citizens to join in the millions of people around the globe in turning off the lights for one hour in order to make a statement about climate change. The City has initiated (1) a computer shut-down program at 8:00 p.m. every evening; (2) Better Energy Savings Today Program; and (3) a 4-day work week in Public Works. Regarding Earth Hour, we will have the spot lights on City Hall turned off and she will send out an e-mail encouraging non-essential city buildings to participate. The e-mail will double to let employees know they can chose to participate at home.

Councilwoman Cape, member on the Community Energy Advisory Council, thanked City Manager Jackson and City staff for their work to address energy efficiency and finding creative ways to look at our own footprint as an organization.

B. PROCLAMATION PROCLAIMING APRIL, 2009, AS 'CHILD ABUSE AWARENESS MONTH"

Mayor Bellamy read the proclamation proclaiming April, 2009, as "Child Abuse Awareness Month" in the City of Asheville. She presented the proclamation to Mr. Bill McGuire, with Child Abuse Prevention Services, and Ms. Tammy Shook, Chair of the Community Child Protection Team, who thanked City Council for their support in this effort and briefed Council on some activities taking place during the month.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 10, 2009

After Mayor Bellamy asked for public comments on the Consent Agenda, but received none, Councilman Mumpower moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Russell and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. GREAT SMOKY MOUNTAIN PARK 75TH ANNIVERSARY

Mr. Bill Wright, Chief Ranger at the Great Smoky Mountain Park, extended his apologies that Mr. Dale Ditmanson, Great Smoky Mountain Park Superintendent, was unable to attend; however, Mr. Ditmanson is looking forward to attending several events in Asheville. Mr. Wright then was pleased to highlight the 75th Anniversary of the Great Smoky Mountain Park and outlined some activities that will be taking place.

The 75th Anniversary focuses on nature, culture, stewardship and partnerships through special events and programs.

Great Smoky Mountains National Park, its neighbors and partners have announced plans to celebrate the diamond anniversary of the congressional action that gave birth to the national park on June 15, 1934. Straddling the border between North Carolina and Tennessee and covering 800 square miles, Great Smoky Mountains National Park is one of the largest federally protected reserves east of the Mississippi River and the most visited national park in the National Park System.

The anniversary will serve to commemorate and showcase the Park's biologically diverse natural resources, cultural history and the host of recreational and education opportunities it offers the more than 9 million visitors who come annually. The celebration, a year of special in-Park events and over 100 community-partner events, will also highlight opportunities and the need for long-term stewardship of the Park.

The first of the Park's special activities is a media event on April 24 at Clingmans Dome to recognize and celebrate the efforts of the North Carolina-Tennessee states and local governments and early Park support groups that led to the creation of the Park. Local and state officials and other dignitaries, including both state governors, are being invited.

A three-day series of special events will occur during the "Anniversary Weekend", June 13-15. The first event will be on Saturday, June 13, when the Knoxville Symphony Orchestra (KSO) will perform in Cades Cove, reminiscent of its performance during the Park's 50th anniversary. The outdoor concert will be a ticketed event, based on a first-come, first serve basis, and the process for obtaining a "vehicle pass" and other logistical details will be announced early 2009 and posted on the 75th anniversary website.

The other two events during the Anniversary Weekend are June 14 when the Park will hold an Open House at Park Headquarters, near Gatlinburg, Tenn., to showcase Park operations and provide visitors with a "behind the scenes" view of administration and management activities such as search and rescue, exotic species control, wildlife management, archival displays, and exhibits on managing the Park's complex infrastructure of roads, trails, and bridges. On June 15, the Park's actual anniversary date, programs will take place at the Oconaluftee Visitor Center, near Cherokee, N.C., and highlight the cultural heritage of Southern Appalachians and Cherokee Indians through music, storytelling and exhibtry. The day will culminate with a groundbreaking ceremony of a new visitor center to be privately funded by Great Smoky Mountains Association and Friends of the Smokies.

The last of the in-Park special events will be held on September 2 at Newfound Gap to recognize a significant event in the Park's history—the dedication of the Park in 1940 by President Franklin D. Roosevelt. The event--at the Rockefeller Memorial which straddles the Tennessee/North Carolina boundary at Newfound Gap--will have limited attendance. An invitation will be extended to President Barack Obama. If the President is able to attend, he will be the first sitting President since FDR to visit the most popular national park in the National Park

System. The event will be supplemented by live broadcasts to be screened for a broader audience in venues located in or near the Park in gateway communities.

In addition to the events mentioned above, visitors will have a chance to celebrate the Park through many of its annual programs and educational services which will also incorporate aspects of the anniversary theme, "Celebration of our Past – Stewardship for our Future". Throughout 2009, a wide variety of community events officially sanctioned as 75th anniversary activities, will be everything from hikes and scavenger hunts to musical performances and cultural demonstrations held in and around neighboring communities to mark the occasion and showcase the nation's most visited national park.

As a major thrust throughout the celebration, the Park and its partners will be focusing on opportunities to create support for the continued health of the Park over the next 75 years.

All of the activities, sponsorship opportunities, and a variety of 75th Anniversary logo sale merchandise are listed on: www.greatsmokies75th.org.

On behalf of City Council, Mayor Bellamy appreciated the hard work that has gone into preparing the 75th Anniversary activities.

B. HOPE VI PRELIMINARY STUDY

Mr. David Nash, Chief Operations Officer of the Housing Authority, briefed Council on the HOPE VI preliminary study. He said that they have updated the City's Housing & Community Development Committee. They have also met with residents at each of the three developments and although there are some clear concerns among the residents, those meetings have been reasonably positive. He reviewed the following PowerPoint presentation:

Primary purpose of the feasibility study

- Preliminary analysis of Public Housing developments based on HOPE VI threshold of "severe physical distress":
  "Requires major redesign, reconstruction or redevelopment, or partial or total demolition, to correct serious deficiencies in the original (including inappropriately high population density) deferred maintenance, physical deterioration or obsolescence of major systems, and other deficiencies in the physical plant of the project."

Physical inspections:

- Inspected 5% of 914 Units in 5 developments selected based on:
  - Age
  - Overall appearance
  - Vacancy rate
  - Police calls for service
  - Ongoing maintenance issues

For the Aston Park Tower and Garden Apartments:

- Property
  - Built in 1970
  - 162 efficiency & 1 bedroom units
  - 35.8 units/acre
  - 2007: 6.4 police calls/unit (Note: 2008 police calls declined to 3.7/Unit)
  - 2008 vacancy rate: 6.7%
- Conditions:
  - Poor accessibility

- All electric with no AC or insulation
- Obsolete systems; solid concrete chases
- Exterior brick issues
- Conclusion: severely physically distressed HOPE VI candidate

For Lee-Walker Heights

- Property
  - Built in 1950
  - 96 units, 1-4 bedrooms
  - 8.2 units/acre
  - 2007: 15.4 police calls/unit (14.3 in 2008)
  - 2008 vacancy rate: 6.2%
- Conditions
  - Oldest in Asheville
  - Narrow streets, high population density
  - Functionally obsolete electrical, plumbing, and heating systems
  - Conclusion: severely physically distressed HOPE VI candidate

For Pisgah View Apartments

- Property
  - Built in 1951
  - 262 units, 1-4 bedrooms
  - 10 units/acre
  - 8.6 police calls/unit in 2007 (6.3 in 2008)
  - 2008 vacancy rate: 7.3%
- Conditions
  - Largest and 2nd oldest in Asheville
  - Obsolete electrical system
  - Conclusion: functionally obsolete – possible HOPE VI candidate

Two other developments analyzed:

- Deaverview Apartments
  - Built in 1971, 160 units
  - 7.7 police calls/unit in 2007; 7.3 in 2008
  - Standard condition - not a HOPE VI candidate

- Hillcrest Apartments
  - Built in 1959, 234 Units
  - 7.4 police calls/unit in 2007; 7.7 in 2008
  - Standard condition - not a HOPE VI candidate

Fundamental considerations:

- One-for-one physical unit replacement
- Generous relocation benefits
- Strong support from City leadership, staff and other community partners
- Decision must be mission driven – healthy, low-income housing communities
- HOPE VI - funding to prepare strong application

Aston Park:

- Opportunities

- Potential collaboration with City and other community partners in Aston Park/Clingman Greenway area
- Expand number of truly accessible one bedroom units.
- Eliminate central office and/or maintenance warehouse

- Challenges
  - Limited development footprint of 4.52 acres – is one-for-one replacement possible on site?
  - Temporary loss of 162 0-1BR units (35% of our entire stock)
  - Office and shop relocation costs
  - Cost of HOPE VI application; current lending and tax credit environment

Lee-Walker:

- Opportunities
  - Replace our oldest, most concentrated development with highest crime rate
  - Only 96 units, so good possibilities for mixed income development with up-to-date standards and amenities
  - Convenient to many jobs; potential public/private partnerships
  - Potential to add to 1 BR stock
- Challenges
  - Topography limits development footprint (11.66 acres but not all buildable)
  - Long term residents have significant concerns
  - Cost of HOPE VI application; current lending and tax credit environment

Pisgah View:

- Opportunities
  - Replace second oldest facility with highest vacancy rate
  - Large site: 26.14 acres
  - Convenient to Carrier Park and transportation
  - Potential to add to 1BR unit stock
- Challenges
  - Very large project - 262 units hard to replace with on-site mixed income development
  - Disruption of current community building efforts
  - Cost of HOPE VI application; current lending and tax credit environment

Recommendations:

- Focus on options at Aston Park and Lee Walker
- Aston Park
  - Can tower be preserved and renovated?
  - If so, consider smaller scale replacement of garden units and maintenance facility
- Lee Walker
  - Will NOFA require "family" development?
  - Explore potential public/private partnerships
- Pisgah View
  - Potential for future redevelopment, but address immediate needs through capital/stimulus funding

Councilman Newman, Chair of the Housing & Community Development Committee, said that the Committee heard this presentation and felt it was a useful process in terms of the information. The concept of the HOPE VI has a lot of inherent appeal. He felt that if we are going to go forward with a HOPE VI effort, this would be investing in developing very specific plans for redevelopment of properties. He also encouraged Council to think about a partnership with the

Housing Authority to use some of our properties that border Housing Authority properties for creating some new 1 bedroom units as part of the HOPE VI process before we lose any existing units, so that there is not much of a displacement challenge.

Mr. Nash responded to various questions/comments from Council, some being, but are not limited to: is there a deadline for applying for the HOPE VI funds; how many projects do you think will come forward seeking HOPE VI funds; how many opportunities are there nationwide for HOPE VI funds and does the Housing Authority feel like our applications will be successful; and how much did the City participate in the HOPE VI study.

In response to Councilwoman Cape regarding the funding proposal to design a HOPE VI project, Mr. Nash said that the Housing Authority would like split the approximately $200,000 cost with the City. The Housing Authority would also use whatever development funds they have available to put in their share, along with staff resources. Mayor Bellamy also hoped the Housing Authority would contact Buncombe County as well.

Councilman Mumpower explained why he felt public housing is a very dangerous place to live in Asheville, and even though progress is being made, it continues to be a playground for drug dealers, users and their supporters. In addition, he was concerned that the mixed use model, as it can be realistically implemented, has not been demonstrated to him to succeed.

In response to Mayor Bellamy, Mr. Nash said that the leader of the feasibility study was Mr. Larry Holt. He explained Mr. Holt's experience and success levels with the HOPE VI initiatives.

Mayor Bellamy felt that we are fortunate to have a citizen (Mr. Holt) in our community that has had a proven success rate with HOPE VI initiatives. She said that she has visited Charlotte, Greensboro, Raleigh and Atlanta to see first hand the success of the HOPE VI developments. She noted the last Council voted to support police officers to work with the Housing Authority, noting that we are moving forward. Regarding the long-range planning for Aston Park, she felt having our senior citizens in a high rise is not the best model, especially when emergencies arise. If HOPE VI is not the tool to address this problem, then we need to address it another way. She felt there is an opportunity for the Housing Authority to partner with Mission Hospitals for a good Master Plan for the area, which addresses both needs, e.g., another entrance for Lee Walker, improvement of that corridor, etc. She suggested the Housing Authority continue to work with Mountain Housing Opportunities on Aston Park in that their plan calls for some redevelopment with the garden apartments. She did hope that the Housing Authority will continue to look at Pisgah View. She was pleased with this first step as it is a great vision for our community. She was also pleased that the Housing Authority is involving the community in this process. She suggested they look at the successful models of mixed income affordable housing in our community.

When Mayor Bellamy asked when they could update Council next, Mr. Nash said that they will report back on their progress to Council in the next 30-60 days.

C. HOMELESS INITIATIVE UPDATE

Ms. Amy Sawyer, Homeless Coordinator, provided Council with the following report on implementation of the 10-Year Plan to End Homelessness.

In November 2007, the City of Asheville, in partnership with Buncombe County, became the lead agency for the implementation of the 10-Year Plan to End Homelessness. The Plan entering its 4th year of implementation through the efforts of the Homeless Initiative project, which supports the City's goal of providing sufficient, safe, and affordable housing opportunities for all citizens.

There are 4 areas of focus for the Homeless Initiative:

1. Coordination of homeless and mainstream resources:

Workgroups of the Homeless Coalition, a partner of the Homeless Initiative, are currently focusing on the following actions:

- Ongoing meetings between homeless support staff and staff from the Buncombe County Jail and Mission Hospitals.
- Development of a community protocol to limit discharge to homelessness.
- Negotiations with landlords to work with potential tenants whose credit is challenged due to homelessness.
- Legal and credit support from local agencies to help potential tenants repair bad credit and build housing stability.
- Coordination of available housing resources so that people in a housing crisis can understand all of their options as soon as possible.

In summary, the Homeless Coalition Action Group focus is (1) coordination between homeless outreach staff, hospital, jail; (2) community protocol to limit discharge to homelessness; (3) landlord recruitment, negotiation with landlords; (4) legal and credit support from agencies to help re-build credit; and (5) coordination of available housing resources to help people in housing crisis.

2. Data Collection

Agency Surveys:

Through an award from the North Carolina Coalition to End Homelessness (NC ICCHP), the Homeless Initiative is currently working with two researchers to collect Agency Surveys to evaluate housing outcomes and complete a "map" of the Homeless Service system. To date, three agencies out of thirteen have provided agency surveys.

Point in Time Count:

The Homeless Initiative, along with the Homeless Coalition, facilitates a Point in Time Count at least once a year. Facilitation includes staff training, volunteer recruitment, data collection, and data analysis. This year's count occurred on January 28, 2009.

The Point in Time Count offers a "snapshot" of the homeless population. This national annual count supported by the US Department of Housing and Urban Development aims to count all homeless people in the community on one specific night. Facilities and agencies providing treatment, emergency, transitional, or permanent housing and/outreach services count and interview every person they work with. While agencies are making strides to input data into HIMIS, at this time a paper Point in Time tally sheet still is used to report how many people were counted on January 28.

Point In Time Count: January 28, 2009

Since 2008:

- Total population increased by 5%
- Total people experiencing chronic homelessness decreased 25%
- Total covered in HMIS increased 38%.

Unsheltered or in emergency or transitional housing:
555 total

52 children and 34 caretakers, 34 households

77 Single Women
355 Single Men
37 adults in hospitals or treatment facilities

21% are experiencing chronic homelessness
31% are experiencing mental illness
44% have a diagnosable substance use disorder
29% are veterans
<1% with HIV/AIDS
18% victims of domestic violence

Permanent, Supportive Housing:
231 total

31 children and 28 caretakers, 20 households

100 single men
72 single women

100 people who were *formerly* experiencing chronic homeless

In summary:

- **Total number of people counted was 555 -** This represents an increase of 5% from January, 2008.
- **The total number of people experiencing chronic homelessness was 115 -** This represents a 25% decrease from January 2008.
- **The average percent of people counted using HMIS was 48% of the total number of people counted.** This represents an increase of 36% from last year.

HMIS Data Collection:

With increased data now in the system, training has been offered to Homeless Initiative staff which will give staff the ability to easily and efficiently access system-wide reports. These reports will help the community better understand what services are accessed by people experiencing homelessness, what the outcomes are, and what gaps still exist. Additionally, the Homeless Initiative will be able to assist local agencies in better understanding how to use HMIS for their own reporting needs.

In summary, (1) agency surveys (a) voluntary; (b) any agency working with people experiencing homelessness urged to respond; and (c) will provide information to local, state, and federal decision makers; and (2) HMIS (a) monthly reports provide regular data quality evaluation; (b) Homeless Initiative staff has ability to collect system-wide reports; and (c) 2-1-1 and HMIS to share data.

HMIS Data Sharing:

In order to provide high-quality, integrated information and referral services, United Way's 2-1-1 of WNC (2-1-1) and Carolina Homeless Information Network (CHIN) plan to work together to share a single health and human services community resource database. This data sharing partnership will enhance the capability of HMIS by giving homeless service providers a streamlined way to access the 2-1-1 database of community services. This partnership is on track to be implemented this spring. A community announcement will be made when the partnership is formalized.

In summary, the agencies that are currently signed up to use HMIS include the Asheville-Buncombe Community Christian Ministries, Buncombe County Department of Social Services, City of Asheville, Homeward Bound of Asheville, On-Track, Pisgah Legal Services, Salvation Army – Asheville, and Western North Carolina Community Health Services! The Housing Authority of the City of Asheville is an agency that is signing the HMIS contract.

3. Funds Management & Development

McKinney-Vento Funds:

The Asheville-Buncombe County Homeless Coalition is happy to announce that our community has received a total of $878,592 through the Housing and Urban Development Continuum of Care/McKinney-Vento Grants.

Funds from the Community Development Block Grant (CDBG) allowed Pisgah Legal Services to complete the grant application with support from Homeless Initiative staff. Below is a breakdown of the award:

A-Hope Center & Safe Haven: outreach and emergency housing:	$ 182, 886
Interlace: Transitional Housing for victims of domestic violence	$ 265,602
Bridge to Recovery: Permanent Housing	$ 166,404
Shelter Plus Care: Permanent, Supportive Housing	$ 263, 700

Our community has accessed all Continuum of Care grant funds that Asheville-Buncombe is eligible to receive. No new programs were funded, and existing programs are full to capacity. While the Continuum of Care award makes a great impact, funding from other sources is necessary to meet our existing community need.

Homeless Prevention Funds:

The City of Asheville has been designated as an entitlement community for Homeless Prevention Funds from the president's Reinvestment and Recovery Act. The community is slotted to receive $509,460. The U.S. Dept. of Housing & Urban Development (HUD) is expected to provide communities with guidelines for the funding within the next few weeks. A public meeting is scheduled to provide details about funding guidelines on April 1, 2009, at 11 a.m. at the Public Works Building.

4. Effective Use of Housing and Services Resources to Move People out of Homelessness

Permanent, Supportive Housing is working in this community: a preliminary report from the Jordan Institute for Families at UNC-Chapel Hill followed participants of the Housing Support Team program (HST) for twelve months. The HST pilot program serves homeless individuals with severe and persistent mental illness. Until their enrollment in the program, participants heavily utilized public systems such as hospitals, mental health hospitals, jails, prisons and homeless shelters.

Under the guidance of the program, participants have reduced their use of these public systems. In Asheville and Buncombe County, a 32% reduction in service costs (e.g., jail, prison, emergency room, and mental health inpatient services) was documented after participants entered the program.

In the two years that the pilot program has existed in Buncombe County, 74 individuals have been housed. The retention rate is 91%, meaning that just 9% of the people who accessed the program were unable to stabilize their housing. People in the program have seen improvements in mental health, a reduction in behaviors related to substance abuse, and an increase in income. Unfortunately, for some participants, disability applications are still pending or underemployment limits access to affordable housing. Subsequently, 29 adults and 7 children continue to receive funding through the program in order to afford rent. Additionally, the program was funding supportive services that help everyone in the program maintain their housing.

The Housing Support Teams program is a $2.1 million, 26-month pilot project of the NC Department of Health and Human Services, funded through the state mental health trust fund since 2007. This program is the first state funding directed towards homelessness. Of the 2.1 million, Asheville-Buncombe was granted $350,000 to implement HST.

This program has flourished in three North Carolina counties: Buncombe, Durham, and Guilford. Without continued funding the Housing Support Teams program will end on June 30, 2009.

The program's end will mean a loss of stability for participants currently enrolled in the program and inhibit the implementation of successful best practices interventions embraced by the Housing Support Teams program. In Buncombe County, the Western Highlands Network is the lead entity, and Homeward Bound has served as the project manager. Partners of the project include the Asheville Housing Authority, Pisgah Legal Services, and numerous mental heath providers.

In summary, (1) research indicates 32% reduction in costs to community; (2) program has shown a 91% retention rate; (3) 74 individuals accessed the program since 2007, including children; (4) first dedicated homeless funding from North Carolina ever; and (5) program at risk of ending, funding for the program ends in June.

The Homeless Initiative implements the City's 2008-09 Strategic Plan goal of affordability by supporting initiatives that will end homelessness, the Continuum of Care Plan and the 10-year Plan.

City staff recommends that City Council accept this annual update report on progress to date on the implementation of the 10-year Plan to End Homelessness.

Mayor Bellamy was pleased with the relationship between the Western Carolina Rescue Ministries and Housing Authority where the Rescue Mission's recipients of services are fixing up Housing Authority units in order for more people to be housed quicker.

Councilman Mumpower explained how he felt the model for the 10-Year Plan is basically opportunity without responsibility. He recalled Police Chief Hogan stating that his officers had not reported a significant difference in the impact of homelessness and related misbehaviors issues downtown. He felt we are duplicating the model that failed in public housing many years ago in that when you give people something for nothing, you create a hostile dependence and it robs people of their dignity and their future.

In response to Councilwoman Cape, Ms. Sawyer said that the HMIS system will supply information on the root cause of homelessness. She said with the HMIS system, we can see what the population needs are and the make-up of the population.

Councilman Miller was pleased with the success seen in the point in time count.

Vice-Mayor Davis felt these statistics are important and we are addressing homelessness; however, he expressed some concern with the accuracy of the point in time count in that the count was taken only once on a rainy night.

Councilman Newman said that there has been an objective academic look at how well the Housing First strategy does work. A lot of discussion took place about how implementation of the Plan would lower the costs for police, health care, and other burdens that taxpayers have to carry that are related to chronic homelessness. We do have a 32% reduction in cost to taxpayers as a result of implementing this program. He felt that was a key finding. It does take money to fund the programs, but it also saves money.

Councilman Russell noted some success stories as well from the Western Carolina Rescue Ministries.

In response to Councilman Mumpower, and with the consensus of Council, City Manager Jackson said that he would provide Council with a report on March 27 regarding the number of calls for fire or police service in the downtown area since implementation of this program.

Councilman Newman noted that the Report entitled "The Cost Effectiveness of Housing Support Teams: The Experiences of Persons Enrolled in the First Three Months" e-mailed to all of Council by Ms. Sawyer is a good place to start for those who are interested in looking at the cost of these programs and the documented cost savings they produce, not only for the City of Asheville, but for various public institutions that are involved in providing services to homeless people.

Councilman Miller said that if we are going to look at the cost of police or fire service, we also need to look at the productivity that people are now giving back to the economic vitality.

Mayor Bellamy agreed with Councilman Miller in that we are not getting data from the Western Carolina Rescue Ministries, A-B Community Christian Ministries, A-HOPE, Mountain Housing Opportunities, etc. about their successful programs. The total population increase of 5% can relate to our current economy. If we want a comprehensive look at this, we will need to have a comprehensive report scheduled.

D. ECONOMIC STIMULUS PACKAGE UPDATE

Assistant to the City Manager Lauren Bradley introduced Ms. Brenda Mills, who has been reassigned as the project manager for the American Recovery & Reinvestment program. Mr. James Lee will be reassigned to assist Ms. Mills in the management of the Minority Business Program. Ms. Bradley then updated Council on the following application for the economic stimulus package.

RESOLUTION NO. 09-53- RESOLUTION APPROVING FOUR WATER PROJECTS KNOWN AS AUTOMATED METER READING SYSTEM, PUMP STATION METERS, PUMPING SYSTEM INSTALLATIONS TO REDUCE ENERGY AND WILLIAM DEBRUHL WATER TREATMENT PLANT BACKWASH LAGOON TO BE SUBMITTED AS PART OF THE ECONOMIC STIMULUS FUNDING FROM THE DRINKING WATER STATE REVOLVING FUND

Ms. Bradley said that as part of City staff's recurring American Recovery & Reinvestment (ARRA) update to Asheville City Council, staff is seeking Council consideration of a Governing Board Resolution and Certification Statement to the Public Water Supply Section in support of the

four water projects submitted for economic recovery funding from the Drinking Water State Revolving Fund.

At the City Council meeting on February 24, 2009, Council approved through consensus staff submission of four Drinking Water State Revolving Fund applications to NC DENR's Public Water Supply Section. These four projects include an Automated Meter Reading (AMR) System, Pump Station Meters, Pumping System Installations to Reduce Energy, and the William DeBruhl Water Treatment Plant (WTP) Backwash Lagoon. In order to move forward with the processing of these applications, the Public Water Supply Section is requiring from applicants a Governing Board Resolution and Certification Statement by March 31, 2009. These projects are part of City Council's strategic plans to create jobs to aid in economic recovery, improve city infrastructure, and promote the city's green and sustainability initiatives.

Pros:

- Approval of these projects will ensure continuation of the application process. If awarded, Water Resources could realize significant savings in project costs.

Cons:

- If the Resolution and Certification Statement are not approved, the application process and funding potential for these projects will not move forward, pushing these projects out into later fiscal years until the necessary funds could be allocated.
- Approval does not guarantee the state will approve any or all of these projects.

There is no fiscal impact at this time for City Council to approve this list of projects. If these projects are approved by the state, the Water Resources Department may be required to provide at least 50% of the funds. At that time, staff would reallocate funds from completed and/or existing capital projects in order to meet any potential grant obligations. A decision has not been made on how North Carolina will allocate the recovery funds, so the amount is unknown at this time. Staff will keep City Council informed as more information about the funding process becomes available.

Water Resources staff recommends that the Mayor and City Council approve Governing Board Resolution and Certification Statement for the four approved water projects known as Automated Meter Reading (AMR) System, Pump Station Meters, Pumping System Installations to Reduce Energy, and the William DeBruhl Water Treatment Plant Backwash Lagoon.

Councilman Mumpower personally did not believe we should be using other people's money to pay for our water system, especially money that is borrowed from China and Japan and money our grandchildren will be required to pay back.

After a brief discussion, initiated by Councilman Mumpower, about whether the City has anything at the local level requiring the use of the e-verify system for any economic stimulus projects, City Manager Jackson said that this is an area of uncertain legal status, providing Council with the School of Government's Local Government Law Bulletin entitled "Do State and Local Immigration Laws Violate Federal Law."

Councilman Newman noted that Council voted in support of using the e-verify system for economic stimulus projects. He understands that our City Attorney is researching that particular issue regarding our ability to require that. And, if that is not permissible, that our staff is looking at permissible ways to achieve Council's goal. He suggested City Attorney Oast provide Council with updates on his research.

Mayor Bellamy felt it was important for staff to focus on giving Asheville the authority to be able to designate our contracts to local contractors.

City Manager Jackson said that they have spent an extensive amount of time on this issue. One path is to get into the business of regulating immigration, which is clearly not advisable. The second path of regulating business licenses (requiring certain verification of their employment) is an area that has potential for us and based upon the advice we have received to date, is worth pursuing. He said he would report back to Council].

After Mayor Bellamy read the resolution and received no public comment, Councilwoman Cape moved for the adoption of Resolution No. 09-53. This motion was seconded by Councilman Miller and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 31 – PAGE 465

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER ZONING A PORTION OF PROPERTY LOCATED AT 380 LONG SHOALS ROAD TO CENTRAL BUSINESS DISTRICT

ORDINANCE NO. 3716 - ORDINANCE TO ZONE A PORTION OF PROPERTY LOCATED AT 380 LONG SHOALS ROAD TO CENTRAL BUSINESS DISTRICT

Mayor Bellamy opened the public hearing at 6:44 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of zoning a portion of property located at 380 Long Shoals Road to Central Business District. This public hearing was advertised on March 13 and 20, 2009.

Ms. Tuch said that there are a number of interrelated actions that have resulted in the zoning and jurisdictional patterns that currently exist. The actions are summarized and listed in chronological order below:

- Schenck Parkway and a portion of the area now commonly referred to as Biltmore Park Town Center came into the City's corporate limits in 1999 through a voluntary annexation – this included the Volvo plant and adjacent WLOS property and was zoned CI.
- The City's extraterritorial jurisdiction (ETJ) was expanded in 2001 and captured the balance of the Town Center area including the subject property (380 Longs Shoals). CBD zoning was applied as this most closely resembled the existing Town Center buildings already developed under the County's jurisdiction. *Note: the CBD zoning did not get applied to the 1.86 acre portion of the subject property due to the then existing Limestone Township zoning.*
- The Master Plan and related zoning change for the Biltmore Park Town Center was approved in February 2006.
- City initiated an involuntary annexation in January 2007 for the subject property (380 Long Shoals) – annexation boundary was based on the property lines that existed at the time.
- A voluntary annexation was requested for the Town Center subsequent to the above action. This annexation became effective in April 2007 and proposed to recombine a small portion of property south of Ducker Creek with the subject property (380 Long Shoals). The voluntary annexation did not include this recombined portion of property. *Note: because the preceding involuntary action had already been filed, it was not possible to change the annexation boundary to include this portion of unincorporated property – this resulted in the current existing jurisdictional anomaly.*

The large majority of the subject property was zoned as part of the 2001 ETJ expansion. The 1.86 acre portion of the subject property had been zoned under the then Limestone Township zoning and could not be zoned until it came into the City's jurisdiction, which did not occur until recently. As a result, the City is now pursuing the initial zoning for this unzoned remnant.

In considering the most appropriate zoning classification for this property, city staff initially felt a compelling argument could be made to apply UV zoning to match the majority of the adjacent development. The property owner, however, expressed an interest in maintaining the existing CBD zoning to avoid the need to develop a UV Master Plan and, while the property is owned by Biltmore Farms, it is somewhat geographically separated by a small creek. Additionally, the tenant of the property is interested in re-establishing the retail gas sales that were removed as a result of the Long Shoals Road widening project. He would not be able to reestablish gas sales under UV zoning but, could potentially do so under CBD zoning, although the use would be subject to obtaining several variances from the Board of Adjustment. Staff feels comfortable that the variances would be supported by the Board of Adjustment due to the hardship of the road widening.

Highway Business was also considered and would be more flexible for re-establishing the gasoline pumps; however, this was generally not well regarded given the propensity for HB zoning to result in suburban style, automobile oriented development which would be in proximity to the pedestrian oriented development of the Town Center property where long-term goals would seek to have more compatible uses. In addition, this initial zoning will include an area that had been inadvertently left unzoned. A separate rezoning application could be considered on a portion of the property at a later date should a mutually agreeable solution be worked out between tenant and owner.

After considering the unique context and the desires of both the property owner and tenant, staff felt the most appropriate zoning designation would be CBD.

The Planning and Zoning Commission reviewed this application at their March 4, 2009, meeting. The tenant and his legal counsel informed staff shortly before the meeting that they would be in attendance. There was, therefore, insufficient time to notify the property owner of their intended attendance. The tenant's legal counsel initially requested that the Commission delay the zoning action allowing them further time to hold conversations with the property owner regarding a possible HB zoning designation.

While the Commission was sympathetic to the desire of the tenant to re-establish their gasoline sales, the discussion revealed that delaying action would adversely impact the tenant in his efforts to establish a grandfathered use. All non-conforming uses that cease for any reason have a maximum of 365 days to re-establish the use. In this case, the property supporting the use is unzoned and the use cannot be grandfathered until it is zoned. Delaying zoning action reduces the window to (1) establish the grandfathered use, and (2) make application to re-establish this use which must be accomplished by May of this year.

Ultimately, the Commission supported the staff recommendation of CBD Zoning, but stated on record that they supported the re-establishment of the retail gasoline sales use but did not want to delay zoning action (for the "grandfathering" reasons stated above). The tenant and legal counsel acknowledged that the Commission's decision may be the best course of action under these unique circumstances. The Commission vote supported the staff recommendation, 7:0.

Pros:

- Zones property recently taken into the City of Asheville in consideration of the surrounding zoning and land use and the City's Comprehensive Plan.

- Provides the greater flexibility for both the tenant and the property owner (compared to UV zoning).

Cons:

- Expands CBD zoning outside of the City's central business area.
- Requires a Board of Adjustment variance to re-establish the gasoline pumps.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Mr. Paul Zurich, property owner, spoke in support of the zoning. He said they would support the tenant being able to get the appropriate variances to re-install the gas pumps on their current site.

Mayor Bellamy closed the public hearing at 6:50 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Davis moved for the adoption of Ordinance No. 3716. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 25 - PAGE 212

B. PUBLIC HEARING TO CONSIDER THE REZONING OF PROPERTY LOCATED ON 1498 SAND HILL ROAD FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO INSTITUTIONAL DISTRICT

ORDINANCE NO. 3717 - ORDINANCE TO REZONE PROPERTY LOCATED ON 1498 SAND HILL ROAD FROM RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT TO INSTITUTIONAL DISTRICT

Mayor Bellamy said that the Asheville City Council held a public hearing on this matter and January 27, 2009, and tabled consideration due to concerns expressed by a neighboring property owner. The neighboring property owner and the applicant have reached an agreement on the applicant's future plans for the property. The applicant requested to return to Council for reconsideration in light of this agreement. The request remains for a standard rezoning from RM-16 to Institutional.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to rezone property located at 1498 Sand Hill Road from RM-16 Residential Multi-Family High Density District to Institutional District. She said that the public hearing was advertised on March 13 and 20, 2009.

Mayor Bellamy opened the public hearing at 6:53 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to rezone property located at 1498 Sand Hill Road from RM-16 Residential Multi-Family High Density District to Institutional District. This public hearing was advertised on January 2 and 9, 2009.

Ms. Cogburn said that the subject property is located off of Sand Hill Road (NC 112) just past the intersection with US 19/23. Access to the property is via a private road, Chapel of Faith Drive. The property is 38.8 acres in size and is used as a cemetery with related operations/ buildings. The property is currently zoned RM-16 (Residential Multi-Family High Density District)

and is in the City of Asheville's extraterritorial jurisdiction. The petitioner seeks a rezoning to Institutional.

The property is bordered by various uses and zoning district designations. To the west is the Vulcan Quarry operation (zoned Industrial); to the north are a variety of commercial, residential and institutional operations (zoned CBII and RM-8); to the east is vacant property zoned Urban Village for the proposed Main Street at Enka Village; and, to the south are multi-family dwellings (zoned RM-16).

The property is bordered by creeks and streams, although only one stream is located on the property at the northern property line. A rail line is located immediately north of the property between the northern property line and US19/23. The property is mostly flat.

Although the rezoning results in the loss of multi-family zoning, as there is presently a cemetery on the property, it is highly unlikely that any such development would be proposed. More intense uses than are present would be allowed under either zoning district. The rezoning does allow for additional development of the cemetery operations on site.

Pros:

- Allows for more intense development in an area off a major corridor.
- Conforms to the City's goal of allowing appropriate non-residential uses in suitable locations.

Con:

- None noted.

Based on the analysis provided in this report, staff and the Planning & Zoning Commission find this request to be reasonable. This rezoning was recommended for approval by a 5-0 vote by the Planning & Zoning Commission. One person (the property manager) spoke in favor of the rezoning. Since the Planning & Zoning meeting some concerns have been expressed by owners of the Urban Village District property adjoining this property.

Ms. Cogburn said that she received a call from the previously opposing neighboring property owner, FIRC Group, and even though they are unable to attend the meeting, they authorized her to report that they are no longer going to oppose the rezoning based upon a private contract concerning the location of the pet crematory.

Mr. Patrick Bradley, Family Counselor from Forest Lawn Cemetery, explained how they are now going to relocate the crematory on the far side of the Vulcan quarry. He then spoke about pet crematories in general.

Mayor Bellamy closed the public hearing at 6:57 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3717. This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 25 - PAGE 215

V. UNFINISHED BUSINESS:

A. SECOND READING OF ORDINANCE NO. 3707 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS CROWNE PLAZA RESORT AT 1 RESORT DRIVE FOR A MASTER PLAN COMPOSED

OF THREE PHASES TOTALING 364,700 SQUARE FEET OF NEW FACILITIES, CONSISTING OF (1) DETAILED APPROVAL OF PHASE I THAT INCLUDES A 61,500 SQUARE FOOT EXPANSION OF THE EXISTING SPORTS CENTER FACILITY WITH A REQUEST FOR MODIFICATION TO REQUIRED SETBACKS; AND (2) CONCEPTUAL APPROVAL OF PHASES II AND III THAT INCLUDE A 123,200 SQUARE FOOT MIXED USE BUILDING AND A 180,000 SQUARE FOOT CONDO/HOTEL BUILDING RESPECTIVELY

Mayor Bellamy said that due to the 4-3 vote on this matter at the public hearing and adoption on first reading on March 10, 2009, the matter needed a second reading.

In response to Mayor Bellamy's request to City staff to if they could find a date when the N.C. Dept. of Transportation (NCDOT) expects to have a final decision regarding the plan for the I-26 Connector, Assistant Director of Transportation & Engineering Ken Putnam said that provided Council with the following update on the anticipated schedule for the I-26 Connector project (City Exhibit 4). The information should be considered tentative and accurate as of this date but it is subject to change.

The subject project is following the "merger process" which is a shared decision-making process designed to streamline project development and permitting by establishing a project team to ensure that all laws and rules are followed. The process establishes a series of concurrence points (total of seven) that require agreement of the team for a project to move forward. This process has been used successfully on about 240 projects throughout the state and it has consistently reduced project time and improved project quality. The anticipated schedule is listed as follows:

Jun 2009	Concurrence point meeting to solidify Alternate 4B as a viable alternate and to bring it up to the same level of review as the other alternates.
Aug 2009	The supplemental draft environmental impact statement including Alternate 4B should be completed and released for public review and comment.
Sep 2009	The corridor public hearing meeting should be held to discuss the supplemental draft environmental impact statement.
Oct 2009	The post public hearing meeting should be held.
Dec 2009	Concurrence point meetings to select the preferred alternate and to optimize the design and benefits of the project while reducing the environmental impacts should be held.
Oct 2010	The record of decision (ROD) and the design public hearing should occur.
FY 2011	Right-of-way acquisition should begin.
FY 2013	Construction should begin.

Councilman Mumpower asked for guidance from the City Attorney regarding Council support of the property owner proceeding with his project even though NCDOT has yet to pick a final connector project being in conflict with Council's endorsement of Alternate 4-B which plan would seriously impact the viability of this project.

City Attorney Oast said that if the location for the connector has been decided on finally, that would be a concern for Council. And, if the NCDOT had begun the property acquisition

process, that would also be a concern. But at this point in time, the project is in the path of several of the alternatives. Regarding condemnation, he felt if it was determined that someone upgraded their property in anticipation of getting more money, that would be an element the courts would consider in awarding damages in a condemnation case. If that is a concern, it would be up to the NCDOT to raise it.
